EXPENDITURE DETAIL BY PROJECT—Continued

UPLAND GAME INVESTIGATION

Under this project statewide surveys are conducted to determine the distribution, numbers and habitat needs of the various upland game bird species pertinent to setting proper seasons and bag limits and for other management purposes. Project activities include:

Investigations—trapping and banding of doves to determine migration patterns; nesting studies to gain production figures; food habit studies; development of census methods;

evaluate results of planting exotic species and make experimental plantings of new exotic species..... 70%

Management—train regional personnel in gathering data on upland game; formulate recommendations on seasons and bag limits; advise regions on habitat improvement needs of upland game; trap and plant partridges and evaluate results; and prepare special reports on request..... 30%

SALARIES AND WAGES	5.8	6.6	6.6	\$32,735	\$37,684	\$37,853
(See page 234, Salary Supplement)						
OPERATING EXPENSES				14,879	17,237	17,790
EQUIPMENT				-	100	350
Contributions to State Employees' Retirement Fund				2,963	3,279	3,407
Totals, Upland Game Investigation				\$50,577	\$58,300	\$59,400

BIG GAME INVESTIGATION

The objectives of this project are to study populations of deer, antelope, elk and mountain sheep and compile data needed to determine proper seasons and bag limits; develop practical methods of managing brushlands; and develop practical range revegetation methods. Projects included are:

Investigations—Develop methods of brushlands management for production of more game, study by the University of California; develop practical range planting methods for the

benefit of game animals study by the California Forest and Range Experiment Station; and study of antelope herds to determine management practices favorable to production of this species..... 55%

Management—train regional personnel on data gathering; make field observations on deer numbers and range conditions for recommendations on seasons and bag limits; prepare special reports as requested and conduct special deer hunts.... 45%

SALARIES AND WAGES	9.7	9.8	10	\$54,702	\$55,665	\$55,646

Totals, Big Game Investigation				\$155,380	\$165,800	\$165,500

WILDLIFE INVESTIGATION LABORATORY

The primary functions under this project are the determination and control of wildlife diseases; investigation of food habits and nutrition problems; and study of the effects of pesticide chemicals used in agriculture on wildlife. Included in this project are:

Investigation—To work up control methods and evaluate losses from fowl cholera, foot rot, worms, botulism, trichomoniasis and other diseases; studies to determine food habits and nutrition of game animals as related to species and range;

and evaluation and preparation of reports on investigations..... 60%

Management—Make checks on wildlife disease losses, determine cause and recommend and carry out control measures; train regional personnel in animal diseases; keep abreast of pesticide use practices and recommend safe use practices to minimize loss of game; and train regional personnel in pesticide control practices..... 40%

20	SACRAMENTO-SAN JOAQUIN RIVER SALMON AND STEELHEAD STUDY						
21	Purpose of this project is to collect necessary facts and to						
22	manage salmon and steelhead populations of the Sacramento-						
23	San Joaquin River system. During the 1959-60 Fiscal Year						
24	it is anticipated that most of the effort will go toward the						
25	analysis of data and preparation of final reports on the follow-						
26	ing phases of project activities: (1) The results of stocking of						
27	yearling steelhead in the Sacramento River system. (2) The						
28	evaluation of losses of salmon and steelhead through unscreened						
29	irrigation diversions. (3) Evaluation of the success through the						
30	introduction of silver salmon to the Sacramento River system.						
31	As in the past, some time will be spent assisting with the						
32	annual king salmon spawning inventory.

9					
10	GENERAL ANALYSIS				
11	Objectives				
12	Objectives of the Marine Research Committee are the devel-				
13	opment of commercial fisheries of the Pacific Ocean and of ma-				
14	rine products susceptible to being made available to the people				
15	of this State.				
16					
17	Program and Performance				
18	Research projects are selected by the 9-member committee				
19	which includes 5 members actively engaged in the sardine indus-				
20	try, at least 1 representative of organized sportsmen's groups,				
21	and at least 1 representative of organized labor.				
22	Research is financed from a privilege tax of 5 cents per 100				
23	pounds of sardines, Pacific and jack mackerel, squid, herring				
24	and anchovies. Chapter 1459, Statutes of 1957, extended the				
25	privilege tax for an additional 2-year period which will expire				
26	on December 31, 1959.				
27	Carrying out of research projects selected by the committee				
28	is accomplished by contracting with other public and private				
29	agencies. The principal agencies whose services are utilized are				
30	the United States Fish and Wildlife Service, Scripps Institute				
31	of Oceanography and the Department of Fish and Game.				
32	Principal research and investigations sponsored by the com-				
33	mittee have concerned the Pacific Sardine Fishery which de-

^c Section 8046 of the Fish and Game Code which imposes privilege taxes dedicated to the Marine Research Committee expires December 31, 1959, thus an extension of these taxes will be necessary to carry on the program. Revenue for 1959-60 is based on the estimated amount to be received prior to December 31, 1959.

WILDLIFE CONSERVATION BOARD

11	GENERAL ANALYSIS				
12	Objectives				
13	Under provisions of the Wildlife Conservation Law of 1947				
14	the board is authorized to acquire, restore, and maintain in a				
15	high state of productivity areas which can successfully sustain				
16	wildlife and provide adequate and suitable recreation for the				
17	people of the State. To accomplish this end the board may				
18	study and investigate suggested programs.				
19					
20	Program and Performance				
21					
22	The board is composed of the Director of Finance, the				
23	Director of Fish and Game and the President of the Fish				
24	and Game Commission. The board is advised by a joint interim				
25	investigating committee consisting of 3 Members of the Senate				
26	and 3 Members of the Assembly. Annually \$750,000 is trans-				
27	ferred to the Wildlife Restoration Fund from license fees				
28	collected for conducting horse races. The board is charged				
29	with the administration of this fund. (Abolishment of Fair and				
30	Exposition Fund, as recommended in the accompanying Budget				
31	Message, includes a recommendation for discontinuance of this

annual allocation of \$750,000. All horse racing revenues would go to the General Fund. Funds appropriated for operation of the Wildlife Conservation Board would come from the Fish and Game Preservation Fund.)

Through its staff the board conducts necessary investigation and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies the board determines which lands or rights in lands or water should be acquired by the State to effectuate the wildlife conservation and recreation program. After acquisition and completion of such development and facilities as are necessary for the purpose for which the lands were acquired, the areas are managed and maintained by the Department of Fish and Game. The department is authorized to contract with other public agencies for such construction, management or maintenance.

The currently authorized staff and level of services provided for the board are continued for the 1959-60 Fiscal Year.

GENERAL ANALYSIS

Objectives

The principal functions of this division are to provide office facilities and staff services for the director; provide accounting, personnel, budgetary, and property services to the divisions of the department and other related agencies under contract; and co-ordinate the department's conservation education program.

Program and Performance

Conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, soil, and recreational resources comprises the program of the department.

This division, in addition to providing administrative and office services, assists the director through exercise of the review function with regard to departmental budgetary, fiscal, and personnel operations, and provides consultative and advisory services on operating and financial matters for the several divisions of the department, the Committee for the Development of the California Public Outdoor Recreation Plan, and the State Water Pollution Control Boards. The 1957 Session of the

Legislature added the Division of Small Craft Harbors. Cost of these services is distributed and charged to the Special and General Fund Divisions and other agencies on a pro rata basis for services provided to each.

The budget proposed for the 1959-60 Fiscal Year continues the existing level of service and provides for workload increases in the bookkeeping, claims, and personnel sections by the addition of 18 man-months of temporary help. Growth of the department in activities, personnel, and expenditures has resulted in measurable workload increases for which sufficient staff is not now provided.

As a further step in utilization of the recently installed tabulating machine equipment the budget includes \$8,415 to convert the department's property accounting records to a tabulating machine operation. By this procedural change the division will eventually be able to eliminate 2 positions—1 the second year and another the third year after conversion. These personnel reductions will offset the initial cost of the conversion and continue the property accounting function at a lesser cost.

a Grants received under the federal Clarke-McNary program are deposited and reported in the General Fund.

b A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition of the Small Craft Harbors Revolving Fund see Local Assistance for Public Works. For a statement of fund condition of the Soil Conservation Development Fund see the Appendix.

GENERAL ANALYSIS

Objectives

The State Park System has 3 essential objectives. They are to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

Under policies established by the State Park Commission the State Park System is administered by the Division of Beaches and Parks with guidance and direction from the Department of Natural Resources.

Major efforts of the division are concentrated on the extensive acquisition and development program authorized by recent legislative acts and appropriations. The majority of these appropriations are available until June 30, 1961.

Besides the large number of new beach and inland park areas and the expansion of existing parks and historical monuments, the program includes operation of Hearst Castle, the roadside rests, Redwood Highway relocation, historic ships program, and 4 proposed museum facilities.

The expanded acquisition and development program established in 1956 and 1957 is being financed from the large State Beach and Park Fund surplus derived from the release of impounded tidelands oil revenues. The Legislature subsequently increased the division's allocation from the State Lands Act Fund to \$12,000,000 annually (Chapter 2367, Statutes of 1957)

to finance this program and provide for continuing operation and maintenance of the growing State Park System. However, except for the current year, the division has not received the authorized maximum amount because of a shortage in resources of the State Lands Act Fund and it is estimated that the maximum amount will not be received for the 1959-60 Fiscal Year. Since previously authorized appropriations were based on the \$12,000,000 maximum revenue being received, the State Beach and Park Fund will have insufficient revenues to finance all appropriations therefrom.

The support budget proposed for the 1959-60 Fiscal Year provides personnel, equipment, and operating funds for increased workload of the division. The acquisition of new areas requiring protection and operation and increased public use and attendance at existing parks, beaches, and historical monuments account for the principal budget increases. Examples of areas being developed and placed in operation include Folsom and Natoma Lakes, Hearst Castle, Salton Sea, Millerton Lake, Bolsa Chica Beach, San Diego and San Mateo County Beaches. In addition, provision is made for the division's operation of Squaw Valley after the Eighth Winter Olympics end.

The budget also includes provisions for operation of completed roadside rests; the second and final years' cost for preparation of topographic maps in co-operation with the United States Geological Survey; and funds for repair and reconstruction of park facilities damaged or destroyed in the severe storms of 1958.

^a For statement of fund condition see Capital Outlay Budget, Division of Beaches and Parks.

ADMINISTRATION

area not presently staffed which involves the collection of data; compilation and preparation of statistical reports; and preparation of informational replies to the many requests received by the division. Various members of the staff now spend considerable time outside of their primary workload in order to answer requests for this type of information.

3 additional clerical positions are also proposed for workload increases resulting from the growth and increased activities of the division. 1 clerk will be assigned to the clerical pool for transcription and other typing duties. 2 clerks will be assigned to the accounting and budget section for document preparation and accounting duties.

SALARY RANGE

376-415	-	4,626
281-341	-	6,912
281-341	-	3,456

units located at the Sacramento headquarters offices. The previously semi-independent units are now combined under direction and supervision of the deputy chief.

2 Additional architect positions are proposed for 1959-60 to handle increased workload in the development unit to keep abreast of the development requirements of the expanding State Park System.

The balance of this function's program is continued at the current level which includes provisions for the observance of significant anniversaries initiated by Chapter 2277, Statutes of 1957 and the historical marker projects.

MAINTENANCE AND OPERATION—FIELD SERVICES

Program and Performance

Field services includes the park unit supervisors; park ranger and park attendant staffs; and the various specialized technicians needed for continuing operation and maintenance of the State Park System. Types of facilities provided include ocean beaches, lakes and reservoirs, inland and mountain parks, historical monuments, riding and hiking trails, and roadside rests.

The following additional positions with related operating expenses and equipment are proposed for the 1959-60 Fiscal Year to provide operating personnel necessary to staff new and existing state park units and facilities:

1. Positions proposed for opening and operation of new and enlarged park units:

a. Squaw Valley—3 state park rangers, 3 state park attendants, tractor operator-laborer, 3 stationary engineers, 1 electrician, and 6 man-months seasonal help are proposed for the division to assume control of Squaw Valley effective April 1, 1960. This staff will permit the division to maintain the buildings and facilities but does not provide for opening the area to general public.

tion of new park units and shifting of workload to district offices.

b. 1 tractor operator-laborer and 1 equipment mechanic for District I, to operate and maintain heavy equipment. The allocation of additional park units to this district has made it necessary to provide an equipment operator for the northern part of the district to eliminate extensive traveling and transportation of tractors and other heavy equipment.

c. A one-half time janitor position is proposed for the new and larger District III headquarters office.

d. 6 drafting aid positions—1 for each district, are required to provide a position for detailed drafting work at the district offices. The positions will also provide assistance to the headquarters staff in connection with projects initiated and handled at the district level.

Necessary operating expenses and equipment have been provided for the above positions. An additional amount of \$11,100 is also provided for the District IV office which is being moved from San Francisco to Santa Barbara.

MAINTENANCE AND OPERATION—FIELD SERVICES—Continued

Program and Performance—Continued

- use. Operation of the area as a going unit of the park system is the subject of a study and plan being prepared by the division.
- b. San Diego County Beaches—3 state park rangers, 1 state park attendant, 30 man-months park aid, and 44 man-months beach lifeguard are proposed to assume operation of state-owned beaches formerly operated by the county under agreement with the State. The county has elected to return the beaches to state operation.
- c. Bolsa Chica Beach—4 state park rangers, 4 park attendants, 60 man-months park aid and 16 man-months beach lifeguard are provided for operation of this beach area now being acquired.
- d. Benbow Lake—1 state park ranger and 12 man-months park aids are proposed for protection and state supervision of this new park unit.
- e. Hendy Woods—1 state park ranger is required for state supervision and protection of this valuable redwood grove now owned by the State.
- f. Los Angeles Joshua Trees—1 state park ranger and 6 man-months park aids are proposed for operation of this newly acquired area.
- g. San Francisco Maritime Museum—1 state park ranger to provide for public display of the C. A. Thayer and other historic ships being acquired and refurbished.
- h. Prairie Creek Redwoods—1 state park attendant and 3 man-months park aid are provided for protection of an addition of several thousand acres of land to the park.
- i. San Mateo County Beaches—1 state park attendant is proposed for maintenance of additional state-owned beach area which has been returned to state operation.
- j. Atascadero Beach—1 state park ranger and 7 man-months park aid are proposed for operation of this beach which is being transferred to the State by San Luis Obispo County.
- k. Huntington Beach—2 state park attendants, 1 clerk, 1 highway equipment operator-laborer, and 6 man-

months park aid are proposed in order for the division to assume operation of the parking facilities when the concession agreement terminates December 31, 1959. By division operation revenue for the State will increase and initial public contacts will be by state park personnel.

- l. Sunset Beach—1 state park ranger and 5 man-months park aid are proposed for patrol and protection of new beach frontage and upland area being added to this beach park.
2. Staffing for existing areas on the basis of workload and completed facilities:
- a. 1 state park ranger, 1 carpenter foreman and 1 watchman for Hearst Castle to facilitate year-round operation as indicated by continuing high attendance. In addition to these proposed new positions, during the current year the authorized historical guide and park aid staffs were expanded and put on a yearlong basis; bus service to the castle was increased, and additional funds for utilities, housing needs, and repairs and maintenance of the castle and entry road were provided.
- b. State Park Attendants—1 each for Paul M. Dimmick, Donner Memorial, New Brighton Beach, Stinson Beach, San Buenaventura Beach, and Salton Sea.
- c. Beach lifeguard man-months for Curry-Bidwell Bar (4), Portola (7), Pismo Beach (8), Pfeiffer Big Sur (8), Millerton Lake (13), Carpinteria Beach (9), El Capitan Beach (2), San Buenaventura Beach (9), and Torrey Pines (4), for necessary protection of the public.
- d. Seasonal park aid man-months are provided as follows on the basis of workload requirements: Grizzly Creek Redwoods (8), MacKerricker Beach (3), McArthur-Burney Falls (5), Millerton Lake (38), New Brighton Beach (4), Angel Island (4), Tomales Bay (4), Sea Cliff Beach (11), Samuel P. Taylor (7), Twin Lakes (3), El Capitan (12), San Buenaventura (15), Pismo Beach (3), Torrey Pines (10), Salton Sea (8), and Fremont Peak (4).

ROADSIDE RESTS

The roadside rest program was established in the Budget Act of 1956 by appropriation of \$450,000 for construction purposes. The intent to operate and maintain the completed rests from funds available for park purposes was also expressed. In conformance with this legislation the division will have 10 rests completed and in operation by the close of the current fiscal year. \$12,500 is proposed to operate and maintain these 10 roadside rests during the 1959-60 Fiscal Year.

Operation and maintenance of roadside rests \$11,065 \$12,500 \$12,500 —

* In subsequent year budgets, bus service income is considered as revenue. See State Beach and Park Fund statement.

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Forestry is the protection of over 28,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands, recreational uses, and watershed values. The various land management programs include the prevention and suppression of fires; the administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public planting, windbreaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal agencies and private owners; and co-operation with the Federal Government on forest surveys.

The division directly provides fire protection for approximately 20,000,000 acres of state-owned and private lands. 5,000,000 acres are protected under a contract arrangement with the United States Forest Service and 3,000,000 acres are protected through contracts with 6 counties. In addition to the fire protection provided for lands of statewide interest, the division protects about 10,000,000 acres of rural agricultural land under contracts providing for reimbursement of costs from 25 counties.

Program and Performance

New and more critical problems in the management and protection of California's wild land areas have been brought about by the pressures of a continually growing population. The use of wild land areas for permanent and summer home sites and for recreational purposes has increased greatly during the past few years. Along with the increased use of these lands, the values for timber and rangelands and for watershed purposes have also increased with the demands of a growing population. Because of these expanding uses and pressures, the division revised its basic fire plan in 1956 to provide personnel, equipment and facilities planned to meet statewide needs. The first step toward implementing the "1956 Fire Plan" was taken in

the 1957-58 Budget when approximately \$2,000,000 was added to the division's budget to provide one-fourth of the additional personnel and equipment needed as established by the plan. Since the division was in the middle of the fire season when the additional funds became available on July 1, 1957, the full program increase could not be put into effect at that time as the movement of personnel to new assignments would have seriously affected the striking ability of fire control forces. Major moves to implement the program were, therefore, made at the close of the fire season. For these reasons the full effects of the 1957-58 increment are being realized during the current fiscal year. Further additions to the staff and facilities were also provided in the 1958-59 Budget. These additions while compatible with the 1956 Fire Plan were made primarily to meet pressing increased workloads in specific areas requiring immediate attention. *Increases proposed for the 1959-60 Fiscal Year*, with 1 exception, are provided on the same basis; to meet increased workload needs. The specific increases are discussed in detail under the appropriate budgetary functions. *The exception is the provision of a nucleus initial attack aerial tanker program.* This new fire fighting technique is a recent development which was initiated on a trial basis during the current year and financed within the division's available funds as a substitute for other budgeted fire suppression items. *The 1959-60 proposal provides for a partial offset with \$30,456 of the total program cost of \$133,116 being financed by reducing seasonal firefighter man-months. (See page 447, line 74.)*

Several of the division programs which affect the national interest are reimbursed under grants from the Federal Government. Under terms of the Clarke-McNary Act the State will receive approximately \$1,228,000 during 1958-59 and \$1,185,000 during 1959-60 for fire protection on timberlands and primary watershed areas. \$17,000 will be received each year for co-operating in forest planting and about \$29,000 is provided each year to assist in forestation of denuded or understocked timberlands.

ADMINISTRATION

The function of administration includes the Office of the State Forester, business management, fire control, engineering section, and the operation of the Davis warehouse and equipment repair shop. The prime objectives are to develop operating policies, rules and regulations in accordance with the fire laws and administrative procedures of the State.

Program and Performance

The fire control section co-ordinates the statewide fire fighting forces both within the division and with other fire control organ-

izations. In addition it is responsible for forest fire research, equipment development and maintenance, fire plans, communications, and fire statistics. Recent increases in personnel have permitted the division to expand its fire research program, to analyze and adapt new developments to field activities, and to strengthen co-ordination of division forces with those of other agencies.

The business management section is responsible for the budget development, fiscal control, procurement agreements, and personnel matters. The section also supervises the activities of the Davis warehouse and shops. *2 additional positions are proposed*

^a Grants received under the federal Clarke-McNary program are deposited and expended in the General Fund. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in forestation of timberlands.

FIRE PREVENTION EDUCATION

Program and Performance

This function co-ordinates the fire prevention program with other co-operating governmental agencies, industrial firms and citizen groups. It is also responsible for the law enforcement program of the division involving both civil and criminal cases.

In the field of education the division utilizes all major types of public contacts, including television, radio, and motion pictures. Motion picture films for television and other educational media have been developed including television spot announcements providing different fire prevention messages and others for motion picture theater use. These films are distributed to theaters and television stations throughout the State.

Efforts are continuing toward development of a fire research program to devise methods for reaching the group of people whom statistics reveal are causing the majority of man-caused fires. A recently initiated program of hazard reduction surveys is also continuing as a forerunner to the development of new plans and procedures. In addition, planning and co-ordination for the enforcement of forest and fire laws under direction of the law enforcement coordinator is progressing as planned.

For the 1959-60 Fiscal Year it is proposed to continue the fire prevention education function at the existing level with emphasis on the program as outlined above.

- c. 3 automotive maintenance foremen—1 each for Districts I, V, and VI, are proposed for maintenance of an increased number of fire fighting vehicles and equipment. Positions will be available for emergency fire line repairs during the fire season as well as for normal maintenance duties the year around. Salaries for these positions have been offset by reducing funds budgeted for automotive maintenance by an equal amount.
- d. 2 automotive mechanics—1 each for Districts III and IV are proposed for assignment to forestry conservation camp repair shops. Much of the division's automotive repairing is now performed at these shops by inmates under the supervision of trained mechanics.
- e. 1 forest fire fighter foreman is proposed for District VI to function as assistant dispatcher for the district and provide necessary relief for the existing dispatcher.
- f. A one-half-time position of groundsman is proposed for maintaining lawns and grounds at the new District IV headquarters offices in Fresno.
- g. 2 one-half-time intermediate stenographer-clerks are proposed for the 2 training centers authorized in the 1957-58 Budget. The positions will be utilized during the busy winter training sessions to permit the rangers in charge to devote full time to training activities.
- h. Additional temporary help funds in the amount of \$9,000 (\$1,500 for each district) are provided to meet the increased cost of artisan help required for maintenance of existing plant and facilities.

FOREST PROTECTION—FIELD SERVICES

Program and Performance

This function provides for the operation of fire suppression camps, forest fire lookouts, and county headquarters offices. The prime objective is to provide trained suppression crews to make efficient initial attack on forest and brush fires and to provide a flexible organization to develop into the required manpower needs to deal with large campaign fires. In addition, field administrative personnel are active in all programs of the division in forest and range management.

The 30 ranger units in the division operate 230 fire suppression stations, 79 lookouts, and utilize 35 patrolmen for the protection of over 23,000,000 acres of state lands, private lands, and intermingled federal lands under the division's direct protection.

The 1959-60 Budget proposes the addition of an initial attack aerial tanker program to the division's fire suppression efforts. The total cost of \$133,116 provides for rental of air tankers and observation airplanes and for purchasing fire retardant materials and other necessary supplies. As an offset to the cost of this

program, seasonal forest fire fighters have been reduced by 108 man-months and \$30,456. It is believed that benefits from this new method of fast initial attack by air will eliminate the need for these positions. The aerial tanker program is a new technique for fighting forest and brush fires which was initiated during the current fiscal year on a trial basis and financed within the division's support appropriation by substitution for other budgeted positions and items. Results from its limited use to date have been encouraging and the Division of Forestry believes it is a worthwhile tool which should be included to augment fire suppression forces.

In addition 22 man-months of forest fire lookout are proposed to assume operation of 3 lookout towers formerly staffed by the United States Forest Service under contract with the division. These lookouts cover areas now under direct protection by the State. Personnel and operating expense costs are offset against the amount budgeted for payment to the United States Forest Service.

44	FOREST PROTECTION—FORESTRY CONSERVATION CAMPS						
45	Program and Performance						
46	The forestry camps are operated in co-operation with the						
47	Department of Corrections and the Department of the Youth						
48	Authority. The Division of Forestry is responsible for determin-						
49	ing the need for a camp in a given area and for the construction						
50	of such camps. Under existing agreements the division is responsi-						
51	ble for the work program and the supervision of the inmates						
52	during the working day. In addition to the work program the						
53	camps provide added manpower for forest protection and fire-						
54	suppression work. During the 1959-60 Fiscal Year it is anticipa-						
55	ted that the forestry camps will house 265 wards of the						
56	Department of the Youth Authority and 1,115 inmates from the						
57	Department of Corrections.						
58	As of July 1, 1959, 3 permanent camps and 3 "spike" or						
59	temporary camps will be operated for Department of the Youth						
60	Authority wards and 11 permanent and 1 "spike" camp will be						
61	available for Department of Corrections inmates. In addition to						
62	these it is estimated that construction of 5 additional camps						
63	will be completed during the budget year and the camps will						
64	be opened for Department of Correction inmates. These are						
65	Chamberlain Creek, Crystal Creek, Folsom, Pilot Rock, and						
66	Puerta La Cruz camps. 1 previously authorized camp and						
67	additional camps for which sites have now been selected are						
68	expected to be ready for occupancy during the 1959-60 Fiscal						
69	Year.						
70	In order to staff and operate the new camps opening in 19						
71	60 the budget proposes 112 man-months forestry work pro-						
72	supervisor and 11 man-months forestry equipment opera-						
73	This staffing in addition to that previously authorized dur-						
74	ing the construction period and subsequently transferred to						
75	support budget will provide the complement of Division						
76	Forestry positions required for these new camps.						
77	SALARIES AND WAGES						
78	(See page 241, Salary Supplement)						
79	Forester	16.5	20	20	\$113,927	\$137,453	\$138,939
80	Work project leader	120.6	154.9	154.9	695,610	949,108	974,924
81	Tradesman	3.3	3.3	3.3	12,858	12,714	12,714
82	Totals, Positions Now Authorized	140.4	178.2	178.2	\$822,395	\$1,099,275	\$1,126,577

these it is estimated that construction of 5 additional camps will be completed during the budget year and the camps will be opened for Department of Correction inmates. These are Chamberlain Creek, Crystal Creek, Folsom, Pilot Rock, and Puerta La Cruz camps. 1 previously authorized camp and additional camps for which sites have now been selected are expected to be ready for occupancy during the 1959-60 Fiscal Year.

In order to staff and operate the new camps opening in 1960 the budget proposes 112 man-months forestry work project supervisor and 11 man-months forestry equipment operator. This staffing in addition to that previously authorized during the construction period and subsequently transferred to the support budget will provide the complement of Division Forestry positions required for these new camps.

47	FOREST MANAGEMENT						
48	Program and Performance						
49	This unit is divided into 3 functions consisting of Manage-						
50	ment of State Forests, Forest Practice, and Service Forestry,						
51	and deals primarily with the programs concerning the manage-						
52	ment of the timber resources on private land within the State						
53	of California. The prime objective is to assist private land-						
54	owners in attaining sustained yield forest management pro-						
55	grams and to return to full production those timber producing						
56	lands that are presently understocked or devoid of timber.						
57	The division is responsible for the administration of 8 state						
58	forests. 3 of these forests are of sufficient size to be managed as						
59	demonstration units to illustrate proper sustained yield, forest						
60	management techniques, and to be utilized in forest management						
61	research. In the orderly conversion of these managed forests						
62	from old growth to sustained yield second growth stands, the						
63	State presently realizes annual revenue in excess of \$500,000						
64	from timber sales. During the current year the division experi-						
65	enced marked success at the Jackson State Forest by holding						
66	2 smaller timber sales annually rather than 1 large lot sale.						
67	The total returns to the State were considerably greater under						
68	this system. In order to continue this method of timber sales						
69	an assistant forest technician is proposed for the increased						
70	workload of scaling and supervision at Jackson State Forest.

27	RANGE IMPROVEMENT						
28	Program and Performance						
29	Range improvement personnel are responsible for providing						
30	technical assistance to private landowners in the conversion of						
31	brushlands to more productive range types in order to increase						
32	the carrying capacity of the California rangelands.						
33	Range improvement technicians advise private landowners						
34	regarding the most effective and economical methods to apply						
35	in converting brushlands. They also supply information con-						
36	cerning the adaptability of the various soil types for rangeland						
37	conversion and the recommended species of forage plants to be						
38	sown to achieve the most effective sustained results.						
39	Demonstration ranges are maintained in co-operation with						
40	private landowners to study and demonstrate the effects of						
41	conversion by mechanical means, chemical sprays, controlled						
42	use of fire, and various combinations of these methods.						
43	Several standby crews are provided to assist the landowner						
44	in the event a planned control burn escapes the established						
45	control lines and threatens other state or private lands.						
46	SALARIES AND WAGES

68	Totals, Range Improvement-----						
69					\$142,065	\$138,688	\$141,033

In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.

Emergency revegetation projects to prevent serious erosion and flood damage on critical watersheds that have been denuded by fire are also carried out under this function. These reseeded projects are financed on a matching fund basis by the State and private landowners or local political subdivisions concerned.

For 1959-60 the budget reflects the elimination by the department because the present program does not warrant retention of the range improvement fire suppression crew in District VI. The balance of the program is continued at the current level for the 1959-60 Fiscal Year.

WATERSHED PROTECTION BY CO-OPERATING COUNTIES

The counties listed below receive payments from the State for the prevention and suppression of fires in areas of state responsibility. Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected. The increased payments are computed on the level of service proposed for state-protected areas for the 1959-60 Fiscal Year.

76	Kern County -----	\$293,149	\$314,096	\$317,432

GENERAL ANALYSIS

Objectives

Supervision of the method of drilling and maintenance of oil wells in order to prevent waste and damage to oil and gas deposits and to prevent contamination of fresh-water resources is the primary responsibility of this division.

The division is also responsible for a program to arrest or ameliorate the subsidence and compaction of land resulting from oil and gas production.

Program and Performance

Under direction of the state oil and gas supervisor, the division is organized into 6 districts each supervised by an oil and gas engineer. Oil and gas engineers inspect all oil and gas wells and collect necessary information in order to determine the presence and source of water in the oil sands and the location and extent of strata bearing water. This information is used to advise operators of the best means of protecting the oil and gas sands, the water-bearing strata, and surface waters. It is also the basis on which the agency orders necessary tests or repair work at wells. *The division's workload* in this area is illustrated by the following:

	1954-55	1955-56	1956-57	1957-58	1958-59	1959-60
New producing wells-----	1,716	1,765	1,780	1,440	1,500	1,500

GENERAL ANALYSIS—Continued

This part of the division's program is supported by an annual assessment against oil and gas producers based on the amount of petroleum produced and gas produced and sold. These funds are deposited in and disbursed from the Petroleum and Gas Fund.

With minor adjustments for price level and operations changes and the necessity to budget for the replacement of several automobiles during the 1959-60 Fiscal Year, the proposed budget continues the existing level of service for supervision of oil and gas well drilling.

A second area of service and responsibility was added to the division's program by the 1958 Legislature in enacting Chapter 73, Statutes of 1958. This act provides for the initiation and enforcement of a program for co-operative development and unit operation of oil and gas pools in certain subsidence areas and for their repressuring in order to arrest or ameliorate the subsidence and compaction of lands overlying or immediately adjacent to producing pools.

To finance initial operations under the act, \$250,000 was appropriated from the Investment Fund with provisions for repayment. The Subsidence Abatement Fund was created as the depository for this money and for funds received under the authorization granted to the State Oil and Gas Supervisor to levy charges on well operators included in the subsidence area. Charges are to be based on the production of oil and gas in order to finance the necessary hearings, unit operations and repressuring authorized by the act. The division plans to levy an assessment on production during the 1959-60 Fiscal Year.

During the current year a staff of 4 engineers, 2 technical and 2 clerical positions with necessary operating expenses and equipment were established based on program and workload estimates of requirements needed to begin operations in this area. Pending the development of workload data based on actual operating experience on which the adequacy of the present staff can be assessed, it is proposed to continue the staff initially authorized for the 1959-60 Fiscal Year.

GENERAL ANALYSIS

Objectives

The division was created by Chapter 2362, Statutes of 1957 (Sections 5801 to 5882 of the Public Resources Code), to implement the State's small craft harbors program. The division may prepare plans for, and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division is on a loan basis.

Program and Performance

The general policies guiding the division are set by the 7-member Small Craft Harbors Commission. Funds for the operation of the agency are available in the Small Craft Harbors Revolving Fund. In addition to the foregoing the program of the commission and the division is funded from a \$5,000,000 advance from the Investment Fund which is available for construction

^a A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition see Local Assistance for Public Works.

^c Under the provisions of Section 2, Chapter 73, Statutes of 1958 (First Extraordinary Session) the amount due to the Investment Fund is not required to be repaid until the surplus in the Subsidence Abatement Fund is equal to \$400,000.

Program and Performance—Continued

loans. These funds were provided by Item 421.5, Budget Act of 1958. In addition the commission has an authorization to grant loans from \$10,000,000 to be derived from the sale of bonds under the provisions of the Harbor Development Bond Law of 1958.

During the current year 7 positions were added to the staff of the division to handle the workload which was created by the availability of construction funds which were not known when the 1958-59 Fiscal Year program was prepared. Subsequently the program contemplated in the Harbor Development Bond Law of 1958 was approved by the adoption of Section 8½ to Article XVI of the Constitution. These 7 positions together with 3 positions proposed in the 1959-60 Fiscal Year will provide 2

planning teams for the field and in addition provide a central office staff for planning and loan analysis consisting of an economist and a statistician, related clerical help, and a delineator for master plan review and development.

As a general program the commission will continue to grant planning loans from the fund in the Small Craft Harbors Revolving Fund. In the area of construction loans the 1959-60 Fiscal Year budget contemplates the use of the \$5,000,000 available from the Investment Fund. Funds from the \$10,000,000 authorized by the Harbor Development Bond Law of 1958 will be available after the commission establishes adequate provisions for meeting the bond service charges and for retiring the principal as the obligations mature. The details of these programs are included in the Local Assistance Section of this budget.

14					
15	GENERAL ANALYSIS				
16	Objectives				
17					
18	The division assists in the organization and operation of soil				
19	conservation districts and, under policy direction of the State				
20	Soil Conservation Commission, co-ordinates the planning of the				
21	"small watershed" program under Public Law 566. In addition				
22	the division authorizes purchases of equipment from the Soil				
23	Conservation Development Fund for soil conservation work for				
24	rent or sale to districts.				
25					
26	Program and Performance				
27					
28	Workload of the division is divided between the nontechnical				
29	and the technical types of assistance to the various soil con-				
30	servation districts organized in the State. Nontechnical assist-				
31	ance generally covers advice and guidance on district adminis-				
32	tration, with suggestions and encouragement for suitable soil				
33	conservation activities. Staffing for this phase is based on 1				
34	soil conservationist position for each 12 existing districts as of				
35	the beginning of the fiscal year. No additional position or other				
36	changes in the existing level of service is proposed for the				
37	1959-60 Fiscal Year. The increase in support expenditures over				
38	current year costs is due primarily to the anticipated full year				
39	employment of all authorized positions during the budget year.				
40	The technical phase of assistance is performed in conjunction				
41	with the provisions of Public Law 566, as amended by Public				
42	Law 1018. The division is authorized 2 small watershed plan-				
43	ning teams which with a United States Soil Conservation

10	GENERAL ANALYSIS				
11	Objectives				
12					
13	The objectives of the California Public Outdoor Recreation				
14	Plan Committee are to conduct an intensive review of all				
15	the factors affecting public outdoor recreation and develop a				
16	master plan with recommendations to the Governor and Leg-				
17	islature which will include recommendations for the general				
18	location and size of recreation areas and facilities to be				
19	acquired, developed and operated by all levels of government				
20	now and in the foreseeable future.				
21	Program and Performance				
22					
23					
24	The committee, created by Chapter 2318, Statutes of 1957,				
25	is composed of the Directors of Natural Resources (chairman),				
26	Fish and Game, Water Resources, Recreation, Finance, and				
27	Education; the Chief of the Division of Beaches and Parks,				
28	and the Executive Officer of the State Lands Commission. The				
29	committee has appointed a technical consultant group consist-				
30	ing of approximately 80 agencies at all levels of government				
31	to assist in the research work and providing information essen-				
32	tial to the study. The committee has also appointed an advisory				
33	council consisting of over 150 organized groups representing				
34	the public attitude toward necessities for outdoor recreation				
35	to be provided by government.				
36	Under direction of the executive officer, a staff has been				
37	recruited to perform the duties required for the development				
38	of the plan which will be submitted to the Governor and				
39	Legislature on March 1, 1960. The statutes require that pre-				
40	liminary reports be submitted to the Governor and Legislature

on March 1, 1958, and March 1, 1959. The work program as planned will result in the report and plan consisting of an inventory of park recreational areas and facilities, a determination of the needs of the public for outdoor recreation, and recommendations for financing and administration at each level of government to insure an integrated program. The committee, whose duties will terminate at the close of the 1959-60 Fiscal Year, has a staff of 17 positions, 5 of which have been loaned by 4 agencies to assist with the study. Extensive use of manpower from agencies comprising the technical consultant group is also materially adding to the research for the plan. Extensive field research work is being done in analyzing the distances and reasons why people will travel to obtain types of outdoor recreation. One of the main responsibilities of the plan is to assess the obligation of each level of government to meet the overall needs of the public.

To accomplish the extensive studies and compilation of data necessary and to assist with the voluminous clerical workload involved in preparation of the final report additional temporary help equivalent to 1 position is proposed for 1959-60.

Operating expense funds have also been increased in order that the final report may be printed in sufficient copies for presentation to the Legislature, the Governor, and participating and interested agencies.

The remainder of the budget continues the existing program level designed to permit completion of the study and report by March 1, 1960.

GENERAL ANALYSIS

Objectives

The Recreation Commission helps the State and its communities to develop and utilize recreation areas, facilities and programs, formulates policies and aids in the co-ordination of local, state and federal recreation activities.

Program and Performance

Upon request, the commission's staff provides technical services to recreation agencies of unincorporated communities, cities, counties, recreation and park districts, school districts, voluntary organizations, universities and colleges, and state agencies. Surveys of recreation needs and studies of the feasibility of

special recreation districts are conducted upon the request of governing bodies.

The agency makes periodic inventories of public facilities and programs that exist or may be needed and publishes findings in compilations, annual report to the Governor, operating guides and directories.

In addition to the regular activities of the commission, the commission is actively participating in the California Public Outdoor Recreation Plan Study.

The existing level of service is continued for the 1959-60 Fiscal Year.

11					
12	GENERAL ANALYSIS				
13					
14	Objectives				
15					
16	The Department of Public Health, in co-operation with local				
17	health departments, is responsible for the prevention of disease				
18	and the provision of a healthful environment for the people of				
19	California.				
20					
21	Program and Performance				
22					
23	During the past fiscal year the State experienced a rather				
24	severe epidemic of Asian Flu. Vaccine was rationed during the				
25	fall months but was released by December when adequate sup-				
26	plies became available. The value of the continuing health				
27	survey was demonstrated during this epidemic since it gave a				
28	week-to-week surveillance of the course of the disease. The em-				
29	phasis on vaccination against polio certainly contributed to the				
30	lowest attack rate ever recorded in California.				
31	The department has continued to make progress in the air-				
32	pollution field with a minimal smog monitoring network set up				
33	in the central valley and the appointment of a qualified advisory				
34	committee. This problem has grown much more rapidly than				
35	previously anticipated and it appears that much of California				
36	will be faced with an air-pollution problem in the next few				
37	years. An expansion of this program is outlined under new				
38	programs.				
39	A minimal program on radiation hazard was authorized on				
40	an emergency basis pending a general session of the Legislature.				
41	The proposed expansion of this program is discussed under new				
42	programs.				
43	A program of special local public health project grants was				
44	initiated and has stimulated local health departments to con-				
45	duct several worthwhile investigations and demonstrations.				
46	The required regulations for the administration of the Nalline				
47	Test were adopted after extensive hearings. This test is used to				
48	uncover the use of narcotics by probationers or parolees.				
49	The rabies legislation enacted at the last general session has				
50	been implemented with the formation of regional rabies advisory				
51	committees, declaration of endemic areas and establishment of				
52	effective rabies control programs in local areas.				
53	After hearings the department adopted regulations governing				
54	sanitation, healthfulness, and safety in ocean water contact				
55	sport areas.				
56	Extensive work has been done in connection with establish-				
57	ment of regulations governing eye tissue and bone banks.				
58	The department did fieldwork in connection with the large				
59	population of mice in the northern counties which was infected				
60	with tularemia. No human cases developed.				
61	The department has worked closely with the California Hos-				
62	pital Association, practicing physicians, and other official health				
63	agencies in connection with control of staphylococcal infections.				
64	The development of strains which are resistant to the anti-				
65	biotics has presented a particularly difficult control problem.				
66	The Division of Alcoholic Rehabilitation has worked closely				
67	with its advisory committee, physicians, and all interested				
68	groups. This work was assisted by public hearings and the meet-				
69	ing of the National Association of Alcoholism Programs which				
70	was held in California.				
71	The department is continuing its program of providing con-				
72	sultative services to local health departments particularly in				
73	the fields of maternal and child health, tuberculosis, public				
74	health nursing, medical social service, nutrition, vector control				
75					
76					
77					
78					
79					
80					
81					
82					
83					
84					
85					
86					

^a Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

and dental health. Field studies and consultation are provided in industrial disease, chronic disease, and water and sewage sanitation.

The department has completed its program of preparation of a duplicate microfilm copy of births, deaths, and marriages and this copy is stored where it will be safe from a major catastrophe.

The Crippled Children Program, operated in co-operation with local health and welfare departments is continued. This program is partially supported by a State subvention and provides medical care for crippled children whose parents are unable to provide needed services.

Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, canneries and a number of related food producing establishments.

The Food and Drug Inspection Program continues to provide protection from adulterated foods, drugs and beverages.

The Health Education Program stimulates education in the health field by the development of media and consultation to departmental staff and local agencies.

This budget proposes additional positions, based on workload, in the following divisions: Administration 5, Preventive Medical Services 5, Laboratories 12, and Environmental Sanitation 2.

New Programs

Radiation: In order to recognize the potential hazards associated with the increased use of radiation sources for peacetime uses the department proposes the following program in the amount of \$239,216. The objectives are to maintain environmental surveillance, collect data, interpret significant fluctuations, keep abreast of new users, observe users facilities and practices, advise local health officers, and to assist in site location and other safety aspects of reactor developments.

Personnel requirements for the implementation of this program at the lowest level consistent with safety and efficiency are: Division of Preventive Medical Services, 1 health physicist, 2 industrial hygiene engineers, and 1 clerk; Division of Laboratories, 8 chemists, 2 instrument technicians, 3 lab assistants, and 2 clerks; Division of Environmental Sanitation, 4 engineers. Operating expenses and equipment required will cost \$107,120.

Air Pollution: The expanded Air Pollution Program consists of a proposed increase of \$50,000 for contract research and \$56,556 for salaries and wages composed of the following personnel for monitoring: Division of Laboratories, 3 chemists and 2 laboratory assistants; Division of Environmental Sanitation, 3 engineers, 1 instrument technician, and 2 clerks. Operating expenses and equipment will cost \$55,751, which represents an increase of \$162,307 in total for this function. As in the past, close liaison will be maintained with all other such research, and every effort will be made to attract additional federal and outside support for this work.

This proposal expands the present air monitoring network from 4 to 10 sets of automatic monitoring equipment. All work in this area will continue to be completely co-ordinated with that of local agencies, with local personnel actually doing much of the daily instrument reading.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration, including the Director's Office, the Bureau of Business Management, the Bureau of Personnel and Training, the Bureau of Health Education, and the Bureau of Records and Statistics, provides administrative direction and staff services for the department with consultation to local health departments in these fields.

Program and Performance

Business services for the department are centralized in the Bureau of Business Management and include general administrative and operative services, stockroom, mail and messenger service, operation of building and telephone switchboard, accounting, budget preparation and control, purchasing, and a car pool of specialized vehicles.

The Bureau of Personnel and Training has a dual responsibility: first, to develop and administer a comprehensive personnel management program, including employee relations, a classification and salary plan, a recruitment and placement program, and other related personnel services; second, to initiate and carry out a training program, including accredited university training, employee orientation, technical refresher courses, and administrative and supervisory training. Institutes and seminars are organized and conducted to increase the competence of professional public health staff members. Stipends are granted for advanced training in the field of public health. Special project grant funds are transmitted to the University of California for special training projects. Local health officers

are assisted on personnel and training problems. Also included is an information program for domestic and foreign visitors.

The Bureau of Records and Statistics provides directional assistance as well as related processing services in the development of public health records and statistics. This unit provides service to local health agencies as well as to the various units of the department and includes the preparation of special interpretive reports, analysis of statistical data relating to birth deaths, marriages, population, and statistical consultation services to specific programs.

The Bureau of Health Education provides health education services and consultation to local health departments, to other administrative units of the department, and to other state agencies and organized groups.

In the Bureau of Business Management, 1 clerical position is proposed for the Los Angeles clerical pool to meet the needs of the proposed professional personnel to be assigned there; 1 electrician and 1 painter are proposed for continuous building maintenance in lieu of contracts for the work; 1 building engineer is proposed for routine maintenance of the refrigeration and air-conditioning equipment recently installed. 5 auditor positions and 1 clerical position are also proposed to be transferred from the State Controller in order to reflect the proper functional assignment and to take advantage of federal funds.

In the Bureau of Personnel and Training 1 clerical position is proposed to meet the increased number of transactions being handled.

Totals, Positions Now Authorized	271	286.9	286.9	\$1,285,597	\$1,391,454	\$1,423,613

DIVISION OF PREVENTIVE MEDICAL SERVICES

Objectives

The Division of Preventive Medical Services is responsible for the medical, hospital, public health nursing and other services necessary for the prevention of disease.

Program and Performance

The Division of Preventive Medical Services consists of 11 bureaus and services: Maternal and Child Health, Crippled Children, Tuberculosis Control, Acute Communicable Diseases, Chronic Disease Control, Adult Health, Public Health Nursing, Medical Social Service, Nutrition Services, Mental Health Service, and Hospitals. It also contains a special project on the public health aspects of the prevention of blindness which is financed by the Kellogg Foundation through the current year.

A program of maternal and child health services includes studies and investigations of child health problems, and provides technical consultation to local health departments, hospitals,

maternity homes, schools, physicians and other professional groups.

The crippled children program provides consultation and assistance to the counties in their operation of a crippled children program including:

1. Establishment of standards for care and consultation in the maintenance of such standards.
2. Provision of funds for expert diagnostic services and care.
3. Planning for necessary treatment and consultation in the provision of treatment and rehabilitation services.
4. Maintenance of statistical records of children receiving services.

Tuberculosis control is accomplished by a subsidy program to local tuberculosis sanatoria, operation of a hospitalization program for recalcitrant tuberculosis patients, inspection of tuber-

A subsidy program is administered by the Bureau of Hospitals for the construction of general hospitals, nursing home diagnostic and treatment centers, chronic disease hospitals and rehabilitation centers. The Bureau of Hospitals also has the responsibility for establishing standards for hospital and related facilities, inspecting and licensing these institutions and providing limited technical consultation to them.

Technical and administrative assistance in public health nursing, nutrition and public health social work are provided local health agencies, as well as assistance in recruitment and training of staff.

A departmental consultant on radiation was authorized on an emergency basis in 1958 to provide a minimal program pending action by a general session of the Legislature on the problem. This position of Public Health Medical Officer III is proposed for continuance. 2 additional clerks are proposed for the Bureau of Adult Health; only recently has it been possible to fill all authorized professional positions, resulting in a shortage of clerical assistance. An additional architect and a construction supervisor are proposed for the Bureau of Hospitals to provide consultation on plans and construction of the expanded hospital construction program.

Proposed New Programs

An increase of \$50,000 in funds available for state supervisory research for more intensive investigation of the possible serious influence of air pollution on health is proposed.

It is proposed to expand the Radiological Health Program to the minimum level considered adequate for the problem. The program would determine the nature and extent of the radiological problem; minimize exposure by supervision of sources and use of ionizing radiation; perform necessary research to develop better methods of evaluation and control; and provide advice and consultation to agencies, communities, and individuals. health physicist, 2 industrial hygiene engineers, and 1 clerical position are proposed in the Bureau of Adult Health to implement this program plus supportive services in the Divisions of Administration, Laboratories, and Environmental Sanitation.

		57-58 (Filled)	58-59 (Auth.)	59-60 (Auth.)			
1	DIVISION OF ALCOHOLIC REHABILITATION						
2	Objectives						
3	This division was established within the Department of Public Health by Chapter 1004, Statutes of 1957, to replace the Alcoholic Rehabilitation Commission. It engages in the treatment and rehabilitation of alcoholics and investigates and studies all phases of the rehabilitation of alcoholics, and all factors necessary to the reduction and prevention of chronic alcoholism and other excessive uses of alcohol.						
4	2. Experimental methods of treating alcoholics.						
5	3. Followup studies to evaluate the effectiveness of treatment methods and studies related to the causation of alcoholism						
6	Treatment of alcoholics is conducted through the support of 7 pilot community clinics. Educational and public information programs include the publication of a monthly bulletin, dissemination of appropriate information, distribution of pertinent literature and sponsorship of certain training institutes.						
7	This budget continues the program at the level of service approved by the 1957 Legislature. Allowance is made for salary and price increases in the community clinic program.						
8	Program and Performance						
9	The present program consists of research, education and treatment. Research is conducted both by state staff and other agencies under contract in the following areas:						
10	1. The nature of alcoholism and the metabolism of alcohol in the human body.						
11	SALARIES AND WAGES

32	Totals, Division of Alcoholic Rehabilitation	-	-	-	\$535,714	\$655,379	\$681,332
33	DIVISION OF LABORATORIES						
34	Objectives						
35	The Division of Laboratories provides laboratory services to the department and to local areas without laboratories; consultation, investigation and reference service for local laboratories; and regulation of laboratories and laboratory technicians.						
36	Program and Performance						
37	Individual laboratories are maintained in the fields of water and sewage, industrial hygiene and air pollution, food and drug, virus and rickettsial diseases and bacteriology.						
38	The laboratory field services section provides consultation, inspection and licensing of clinical and hospital laboratories, local health departments, laboratories using animals and firms producing biologics.						
39	The addition of 4 microbiologists and 4 chemists is proposed to meet the increased workload placed on the laboratories caused by increasing numbers of samples to be tested (rabies, etc.), a shift to more complex tests as county health departments assume the simpler testing, full employment of engineers who generate workload, and licensing of bone and artery bank added by the 1958 Legislature. Also, 1 laboratory assistant and 2 laboratory helpers are proposed to perform the routine laboratory functions increased for these reasons, and 1 clerk is proposed for general assistance to the professional personnel.						
40	Proposed New Programs						
41	For support of the expanded Air Pollution Monitoring Network it is proposed to add 3 public health chemists and laboratory assistants.						
42	To support the expanded Radiological Health Program it is proposed to add 8 public health chemists, 3 laboratory assistants, 2 instrument technicians, and 2 clerical positions.

DIVISION OF ENVIRONMENTAL SANITATION

Objectives

The Division of Environmental Sanitation has the primary responsibility for the services necessary to provide a healthful environment for the people of California.

Program and Performance

The division consists of: Bureau of Air Sanitation, Bureau of Sanitary Engineering, Bureau of Vector Control, Bureau of Food and Drug Inspection, and Cannery Inspection.

The Bureau of Sanitary Engineering administers a program of consultation, inspection, and regulation in the fields of sewage disposal, industrial waste disposal, water supply, sanitation of bathing places and recreational areas, and water contamination.

The program of the Bureau of Air Sanitation includes investigation of the effects of air pollution and assistance to local agencies in the measurement and control of air pollution and its effects. A minimal air monitoring network is maintained in co-operation with local air pollution authorities.

The Bureau of Food and Drug Inspection insures the purity of foods and drugs in California by an inspection program of the manufacturing, wholesale and retail outlets throughout the State. This program not only removes particular lots of foods and drugs from consumer channels, but operates to provide a long-range program of correction and prevention of unsatisfactory environmental conditions.

Canneries are licensed and inspected to provide sanitary operation and prevent the occurrence of botulism.

A field program is maintained by the Bureau of Vector Control to stimulate adequate local vector control programs;

endemic surveys are conducted to determine the existence of vector-borne disease hazards and control techniques; and methods and equipment are evaluated and demonstrated.

In the Bureau of Air Sanitation, a meteorologist is proposed to continue the services previously supplied by a full-time meteorologist on loan from the United States Weather Bureau; an instrument technician is proposed for servicing the automatic air monitoring machines to release engineering time for services in air pollution.

Proposed New Programs

It is proposed to expand the existing Air Pollution Monitoring Network by addition of 17 additional recorders, which will provide a more adequate picture of the air pollution situation throughout the State. Operation of the additional network would require addition of 3 industrial hygiene engineers, 1 instrument technician, and 2 clerical positions in the Bureau of Air Sanitation and supportive services in the Divisions of Administration and Laboratories.

The basic Radiological Health Program will require supportive services. In the Bureau of Sanitary Engineering 2 industrial hygiene engineers are proposed to make periodic inspections of radioactive waste sources, evaluate the public health hazards of waste disposal and use of isotope tracers, and perform necessary field work generated by the basic program. In the Bureau of Air Sanitation it is proposed to add 2 industrial hygiene engineers to manage the monitoring program relating to radiological contamination of air.

DIVISION OF DENTAL HEALTH

Objectives

This division has responsibility for the administration of a program to protect and improve the dental health of the public.

Program and Performance

The program is implemented by advisory and consultative services to local health departments, community groups, agencies and educational institutions; epidemiological studies of dental diseases; and promotion of training, clinical facilities, and public health preventive measures such as water fluoridation.

DIVISION OF LOCAL HEALTH SERVICES

Objectives

This division has the responsibility of integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, and for providing local health services under contract to areas without organized health departments.

Program and Performance

Liaison is maintained with each of the individual local health departments, with the Conference of Local Health Officers and all other divisions and bureaus of this department. A minimal public health program is operated under contract with small counties who do not maintain their own health departments. The program for residency training in public health is co-ordinated in this division.

15	GENERAL ANALYSIS				
16	Objectives				
17	Under the Director of Public Works, the department designs				
18	and supervises construction of state buildings, highways, and				
19	bridges; administers the State Contract Act, and supervises				
20	construction of public school buildings. The department is				
21	organized into 4 divisions: Architecture; Highways; San Fran-				
22	cisco Bay Toll Crossings; and Contracts and Rights-of-Way.				
23	Departmental administration consists of the immediate staff of				
24	the director, which assists him in carrying out his responsi-				
25	bilities for overall direction and co-ordination of the department.				
26					
27	Program and Performance				
28					
29	The executive group consists of 2 deputy directors and an				
30	assistant director. There are staff specialists for general admin-				
31	istration, fiscal affairs, personnel management, public informa-				
32	tion, and management analysis, plus clerical services. The				
33	executive positions serve as direct representatives of the director

GENERAL ANALYSIS

Under the direction of the State Architect, the Division of Architecture provides a pool of technical and professional civil service employees to prepare the designs, plans, specifications and cost estimates, together with all other studies relating thereto, for all buildings, structures, and utility systems to be used by all state agencies and institutions except the University of California and the San Francisco Port Authority.

The division is called upon for the survey and examination of any potential site for a construction project, the planning and design of major repair, alteration and maintenance projects, and the supervision, inspection and control of actual construction which is being carried out by private builders under contract with the State. Under certain conditions, the division may also undertake construction by the use of day labor hired by the division.

By authority of the Field Act, Sections 18191 to 18205, inclusive, of the Education Code, the division is responsible for the checking and approval of all public school building plans, including alterations, and the inspection of such projects during construction to make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire and storm.

By authority of the Field Act, Sections 18191 to 18205, inclusive, of the Education Code, the division is responsible for the checking and approval of all public school building plans, including alterations, and the inspection of such projects during construction to make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire and storm.

^a Savings in operating expenses.

45	SUPERVISION OF PUBLIC SCHOOL BUILDING CONSTRUCTION							
46								
47	Objectives							
48	This unit checks and approves plans and specifications for							
49	all new public school building construction and for all altera-							
50	tions and additions exceeding \$4,000 in estimated cost. The unit							
51	inspects such buildings periodically during the course of con-							
52	struction to insure compliance by the contractor with approved							
53	plans and specifications, as required by the Education Code. The							
54	unit is entirely self-supporting in that all funds appropriated for							
55	the support of the unit are from the Public Building Fund							
56	which, in turn, is supported by fees charged for services rendered							
57	by the division in connection with the checking of plans and							
58	specifications and supervision of construction.							
59	During the current year \$50,000 was budgeted for research on							
60	fenestrated walls, solid blocking, design of a shaking machine,

reinforced grouted brick masonry piers and on strong motor recorder locations. The budget year proposes a continuation of this research program and will require \$50,000 for this purpose.

The 1959-60 Budget reflects nominal increases due in part to increased services of the State Fire Marshal based upon additional Deputies State Fire Marshal being assigned by the State Fire Marshal's Office for the purpose of checking public school building plans for compliance with the fire and panic regulations.

3 clerical positions have been abolished and are being replaced by services furnished by the Division of Architecture Revolving Fund. In addition \$1,000 is provided to reimburse the Division of Highways for services of their legal section. These factors are the primary contributors to the increase in pro rata charges.

GENERAL ANALYSIS

Objectives

The principal functions of the Division of Highways are to plan, construct and maintain the 14,710 miles of the State Highway System. Other functions include various special studies in the transportation field and certain responsibilities in connection with county roads on the Federal-aid Secondary System, with the expenditure of state gasoline tax funds on city streets, and with supervision of the Outdoor Advertising Act.

Program and Performance

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including fed-

eral aid, as provided by the Legislature and to statutory control governing geographical distribution of construction expenditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4 year terms. The Director of Public Works serves as ex officio 7th member and chairman of the commission. The commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

ADMINISTRATION

Program and Performance

The chief of the division of highways is the state highway engineer, who is assisted in the administration of the division by 2 deputy state highway engineers.

Responsibility for the various activities necessary to carry on the division's functions is assigned to 5 assistant state highway engineers, a chief right-of-way agent and a comptroller, all located in the headquarters office in Sacramento.

The assistant state highway engineers are in charge of groups of departments and sections. The operations group includes construction, maintenance, materials and research, and equipment. The administration group includes office engineering, county and co-operative projects, city and co-operative projects, service and supply, industry contact, and management section. The planning group includes advance planning, planning survey,

traffic, design, programs and budgets, and photogrammetry. Another assistant state highway engineer is in charge of bridges and another is in charge of public relations and personnel. The chief right-of-way agent is the head of the right-of-way department and the comptroller of the accounting department.

Because the state highway program reaches into every corner of California, the division operates in the field through 11 districts. 9 of these districts are headed by district engineers; the 2 metropolitan districts (San Francisco and Los Angeles) are headed by assistant state highway engineers. Each district is organized along the lines of the headquarters office. Construction of bridges and other highway structures on a statewide basis is administered by the Bridge Department, having offices in Sacramento and Los Angeles.

34	CONTRACTS AND RIGHTS-OF-WAY						
35	Program and Performance						
36	The Division of Contracts and Rights-of-way is a division of						
37	the Department of Public Works, administratively established						
38	by the director under Government Code Section 14005, which						
39	provides legal services for the department, including the Division						
40	of Highways. It handles legal problems and litigation arising						
41	out of such activities as eminent domain and other legal phases						
42	of highway right-of-way acquisition, including matters involving						
43	public utilities, contracts, claims, financial affairs and collec-						
44	tions, operations of toll bridges and activities involving other						
45	governmental agencies.

65	TOTALS, ADMINISTRATION-----				\$8,688,228	\$9,300,000	\$9,800,000
66	MAINTENANCE OF STATE HIGHWAYS						
67	Program and Performance						
68	The function of state highway maintenance is to preserve						
69	roadways and structures in the safe and usable condition to						
70	which they have been built or improved. This description covers						
71	hundreds of different tasks, ranging from routine patching to						
72	emergency slide removal. About one-fourth of the employees of						
73	the Division of Highways are engaged in maintenance work.						
74	Replacement and restoration work on highway facilities is						
75	performed by the division forces, with major work of this						
76	nature, including resurfacing, being done by contract.						
77	SALARIES AND WAGES-----	2,840	3,008	3,206	\$15,734,570	\$16,881,184	\$18,803,041
78	OPERATING EXPENSES-----				\$13,163,090	\$14,223,186	\$15,674,600
79	Contributions to State Employees' Retirement Fund-----				1,441,288	1,546,316	1,722,359
80	Totals, Maintenance of State Highways-----				\$30,338,948	\$32,650,686	\$36,200,000

tember, 1957, toll bridge maintenance costs are paid from the State Highway Fund as provided by Chapter 2249, Statutes of 1957. Formerly these costs were paid from toll bridge revenues.

Operation of these bridges is a function of the Bridge Department, with specific responsibility assigned to a principal bridge engineer, whose office is located at the east end of the San Francisco-Oakland Bay Bridge.

the economic and other effects of freeways. Current major emphasis has been on an overall statewide freeway system study called for by Senate Concurrent Resolution No. 26 of the 1957 Legislature.

from revenues received from license and permit fees paid by outdoor advertisers who place displays within view of public highways, outside incorporated areas.

DIVISION OF SAN FRANCISCO BAY TOLL CROSSINGS

Office at Berkeley

SUMMARY AND GENERAL ANALYSIS				ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
SUMMARY							
TOTAL EXPENDITURES							
San Francisco to Tiburon Peninsula Crossing Investigation and Study (<i>General Fund</i>)				\$141	—	—	—
San Mateo to Hayward Bridge Studies Preliminary to Improvement (<i>State Highway Fund</i>)				61,228	\$38,772	\$100,000	\$61,228
Totals				\$61,369	\$38,772	\$100,000	\$61,228 (157.9%)
GENERAL ANALYSIS							
The division was established by the Director of Public Works under Section 14005 of the Government Code and is assigned by the Director of Public Works various studies and surveys, and the preparation of plans, specifications, and estimates for additional highway crossings of the San Francisco Bay. It also supervises construction of such bridge projects. The operation				of bay crossings after completion, however, is assigned to the Division of Highways.			
Investigation and study of the feasibility of financing and constructing a toll highway crossing from San Francisco to the Tiburon Peninsula in Marin County				\$141	—	—	—
Preparation of surveys, plans, estimates and related studies preliminary to the issuance of bonds for improvements to the existing San Mateo-Hayward Bridge				61,228	\$38,772	\$100,000	\$61,228

25	GENERAL ANALYSIS							
26	Objectives							
27	The Aeronautics Commission provides advisory planning and							
28	engineering services to public agencies on aviation problems;							
29	fosters the development of a statewide system of airports to							
30	expand air service and commerce through intrastate, local and							
31	feeder services, and the use of private aircraft; fosters and co-							
32	ordinates improvements in the use of agricultural aircraft;							
33	renders assistance to political subdivisions formulating ap-							
34	proach zoning ordinances; co-ordinates civil aviation plans for							
35	disaster relief and civil defense; and investigates and reports							
36	to the State Department of Education on proposed school sites							
37	near airports under Chapter 1451, Statutes of 1955.							
38	Chapter 872, Statutes of 1957, delegated to the commission							
39	the additional function of approving or disapproving specific							
40	flight schools and their facilities when offering aviation educa-							
41	tion courses which include flight orientation. In addition, Chap-							
42	ter 1592, Statutes of 1957, provided for a basic insurance pro-							
43	gram for aviation education. This legislation is permissive and							
44	provides that the commission is authorized to make available							
45	to public schools offering actual flight experience a basic in-							
46	surance program the costs of which will be borne by the local							
47	school district.							
48								
49	Program and Performance							
50	The more important activities performed by the commission							
51	are shown in the following table:							
52		Actual	Actual	Estimated	Estimated

Aviation education and safety programs-----	20	23	65	43

Federal aid is available to local airports through Public Law 377. During the past year the commission, upon request, assisted in the preparation of federal aid applications for public airports, the airports receiving \$5,200,000 in federal aid.

Other activities included aviation safety, promotion of public acceptance and use of air transportation through publications, maintenance of a film library, and radio and television presentations. Direct assistance is rendered to various state departments in advising on industry needs. Assistance was rendered to agriculture in the use of aircraft through co-operative sponsorship of agricultural aviation courses at the University of California at Davis.

* Not possible to estimate as this function is largely dependent on the availability of federal funds for airport financing.

GENERAL ANALYSIS

40	Objectives							
41	The commission was created by Chapter 1693, Statutes of							
42	1953, to confer with a similar commission established by the							
43	State of Arizona to define a common boundary between the							
44	states along the Colorado River.							
45	Program and Performance							
46								
47	During the first years of existence research was undertaken							
48	into the history, hydrography, and the matter of land owner-							
49	ships along the Colorado River. A preliminary report was ren-							
50	dered to the 1955 Legislature, and they in turn extended the							
51	life of the commission for 2 more years by Chapter 1679, Stat-							
52	utes of 1955. In 1955-56 problems such as channelization and							
53	transfers of land ownership were studied.							
54	During 1956-57 further investigation of the necessity and the							
55	advisability for a compact between California and Arizona de-							
56	fining and relocating the common boundary was made; provision							
57	relating to relocation of the river channel by dredging and other							
58	means were made, and assistance and advice from members of							
59	Congress in securing United States consent to any boundary							
60	line agreed upon were undertaken.							
61	In the same fiscal year, the commission secured passage of							
62	Proposition 19, a constitutional amendment permitting reloca-							
63	tion of the existing boundary between the two states and the

10	GENERAL ANALYSIS				
11	Objectives				
12					
13	This department is responsible for preventing the illegal or				
14	unauthorized sale of alcoholic beverages, and preventing the sale				
15	of alcoholic beverages where any activity contrary to the public				
16	welfare is associated with a licensee or licensed premise.				
17					
18	Program and Performance				
19					
20	The department functions through a headquarters office and				
21	26 area, district and branch offices. The field offices provide				
22	direct law compliance, and encourage, train, and assist local law				
23	enforcement agencies to enforce the Alcoholic Beverage Control				
24	Act. Compliance is determined by inspection and investigation.				
25	Most frequent violations include sales to minors, sales during				
26	restricted hours, sales to obviously intoxicated persons, oper-				
27	ating disorderly premises, and business practices contrary to				
28	rules and regulations on fair trade, price posting, and secret				
29	rebates. There are 45,023 active licenses subject to this act.				
30	These licenses include on-sale beer, beer and wine, and general				
31	licenses for trains, boats, airplanes, and bona fide business estab-				
32	lishments, retail package off-sale establishments, dealers, whole-				
33	salers, importers, warehousemen, brokers, and manufacturers of				
34	beer, wine, alcohol, brandy, and distilled spirits. The total				
35	number of licenses is expected to remain constant. Although a				
36	few new licenses are being issued, a corresponding number of

GENERAL ANALYSIS

Objectives

The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Department of Alcoholic Beverage Control.

mento to discuss cases and approve decisions prepared by the legal counsel in accordance with instructions from the board.

Since the creation of this body in 1954 more than 850 cases have been decided. During 1957-58, 306 cases were appealed. *One counsel and one clerk are proposed* in order to eliminate a backlog in excess of 150 appeals. This attorney will also assist in revising the rules and processes of the board as well as compile and maintain an index of decisions. *Other expenses are continued at the 1958-59 level.*

Program and Performance

The appeals board consists of 3 members. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review appealed cases. The board meets bimonthly in Sacra-

GENERAL ANALYSIS

Objectives

The Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical affairs of irrigation districts and other entities of the State of California.

Program and Performance

In 1957-58 the commission reviewed and inspected the financial and physical condition of 159 districts, as compared to 152 in 1956-57, and assisted district officials with respect to their financial problems. Investigations are made by the staff to determine the engineering and economic soundness of proposals by districts to incur additional indebtedness through issuance of bonds or warrants or by contract with the Federal Government for water service, construction of facilities, or loans. The commission passes upon the incurrence of major indebtedness by irrigation districts, water districts, and other districts and local agencies that request certification of bonds as legal investments pursuant to the Districts Securities Commission Act. The commission passes upon the expenditure of bond funds during the period of acquisition or construction of district facilities. Co-operative assistance to banks, investment companies, and other lending agencies is provided by

making available to them factual information regarding the economic condition of the districts. This is of substantial importance to both the investment companies and the districts, for, when the financial soundness of a district can be supported, the credit of the district is strengthened, and financing can be more readily secured at a reasonable rate of interest.

As a result of action by the 84th Congress, irrigation and water districts are eligible to obtain loans for construction of irrigation systems and other water projects on an interest-free basis. At least 19 irrigation and water districts have initiated action to obtain such loans.

Chapter 2052, Statutes of 1957, sets forth a new policy providing for state financial assistance for local projects in connection with water development by local public agencies within the State. It permits loans in furtherance of projects for that portion of the cost which the commission certifies to be beyond the reasonable financial ability of the public agency. Formal applications from agencies requesting commission investigation have been deferred pending proposed clarification of the act at the next session of the Legislature. If the act is amended as proposed, a number of applications for loans are expected which would increase the workload of the commission.

GENERAL ANALYSIS

Objectives		Actual		Estimated		
		1956-57	1957-58	1958-59	1959-60	
70	The Horse Racing Board regulates and supervises the operation	Number of racing days--	525	499	540	546
71	of horse racing meetings where there is parimutuel betting.	Number of licenses-----	9,233	9,390	10,390	11,172

Program and Performance

The board licenses trainers, jockeys, track officials and other persons employed by the racing associations. Investigators check to determine compliance with rules and regulations. Before each race, horses are inspected and after each race drug tests are made on horses under supervision of the board veterinarian. The workload of the board is indicated by the number of racing days and the number of licenses as follows:

In the current year, \$7,230 is provided by deficiency appropriation for research by the University of California to determine effects of new drugs on race horses and means of detecting such drugs.

Provision is made in 1959-60 to continue the same level of service as presently authorized, except for the drug research program. The budget is based on a program of 546 days of racing of which 352 are to be at major tracks, 89 days at fair tracks, 50 days for quarter horses, and 55 days for a combination meeting.

^a Composed of savings in salaries and wages, \$156; operating expenses, \$883; equipment, \$23; and loss in reimbursements, \$30.
^b For statement of fund condition see Capital Outlay Budget for Department of Finance, Fairs and Expositions Division.

GENERAL ANALYSIS				
Objectives				
The purpose of the Banking Department is to safeguard depositors' funds in state banks.				
Program and Performance				
The main programs of the department are to grant licenses for new state banks or branches, examine all state banks annually and liquidate the affairs of banks when this becomes necessary.				
Applications for new state banks or branches require surveys to determine: the competition offered by existing banks; the opportunity for profitable employment of the bank's funds; the number of potential depositors; and the volume of banking business which the community may provide. Licenses are then				
granted or denied after a public hearing of all interested parties. 1 examiner has been extended to June 30, 1960, to reduce the backlog in applications to a 30 to 60 day waiting period. Many applications have been pending over 6 months.				
The staff examines each state bank and branch annually. The examination covers the condition and resources of the bank, the mode of management of its affairs, the actions of its board of directors, the investment and disposition of its funds, the safety and prudence of its management and the security afforded its depositors and creditors. The increased annual examination work is reflected in the increase in banking offices and the total resources of state banks as shown by the following figures:				
	Actual		Estimated	
	1955-56	1956-57	1957-58	1958-59 1959-60

GENERAL ANALYSIS—Continued							
Program and Performance—Continued					The State Banking Department is supported primarily by a tax on all state banks. On July 1, 1958, a tax assessment was made on banks which was 15 percent below the maximum rate allowable by law. The Banking Department is maintaining a reserve fund which will total \$371,957 on June 30, 1960. This is a sufficient reserve to pay the cost of operating the department without assessing any tax for a period of approximately 6 months. By careful administration, tax reductions have been accomplished even though salaries were increased, new equipment purchased, and the services of the department improved.		
5 additional examiners and 1 additional clerk are justified for the examination work based on the trend of recent years. An accounting machine estimated to cost \$5,862 will save 1 man-year of examiner time, reducing the proposed increase in examiner positions to 4.							
The banking law provides that the superintendent may make special examinations whenever necessary. The increase in regular examination work has been accompanied by the need for more followup examinations.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Corporations is protection of the California public from fraud in the sale of corporate securities. The division is also responsible for preventing fraud and usury, as well as unsound business practices in industrial loan companies, personal property brokers, small loan companies, credit unions, check sellers, and escrow agents.

Program and Performance

Before many types of corporate securities can be offered for sale, application must first be made to this division. As of June 30, 1958, there had been 39,529 corporate security applications filed for permits or licenses under provisions of the corporate securities laws. The division investigates properties, books, and prospects of the corporation and a permit to issue is granted or denied. It is estimated that applications will increase to 41,848 in 1958-59 and 43,819 in 1959-60. Industrial loan companies, personal property brokers, small loan companies, credit unions, check sellers, and escrow agents are regulated by first issuing a permit or license and second by conducting an annual examination in accord with the law. In 1957-58 there were 2,192 licensees subject to regulation. It is estimated that in 1958-59 there will be 2,417 and in 1959-60, 2,628 licensees.

	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60
Applicants and licenses-----	37,291	40,902	41,721	44,265	46,447
Cost (gross) per applicant and licensee-----	\$26.66	\$28.01	\$31.50	\$32.88	\$34.94

Major increases in the costs during 1956-57 were attributable to salary increases granted to all employees on July 1, 1956, and to enabling legislation which was passed in 1955 to allow the Commissioner of Corporations to examine substantially all escrow agents annually. Funds were provided in the 1956-57 Fiscal Year for this purpose, however, the program was not fully implemented until January of 1957.

Major cost increases in the 1957-58 Fiscal Year resulted from further salary increases granted to all employees on July 1, 1957, and to full implementation of the examination program for escrow agents above mentioned. During the last half of this year the division completed microfilming of all permanent records relating to permits, orders and licenses issued. This will result in a saving of storage space and will expedite locating the records as needed.

The estimated increase in costs for the current and budget years are due principally to increased rental and moving costs to accrue by reason of moving the division's two offices and substantial increases in the cost of postal rates and other operating costs.

This budget contains 8 additional positions for 1959-60, 4 professional and 4 clerical, to meet the increase in license workload at the existing level of service. 2 of the professional positions were authorized in 1957-58, but not established when estimated application workload was not realized. Increases in licenses, which require 32 hours to process compared to 2.7 hours per application, more than offset the decrease in anticipated applications by 2 man-years. A comparable increase in overall clerical workload requires the 4 additional clerks.

GENERAL ANALYSIS

Objectives

The purpose of the Department of Insurance is to protect insurance policyholders in California.

Program and Performance

The main programs of the department are to: license companies and individuals who engage in the insurance business; admit insurers to operate in California; grant permits to issue securities and make changes in capital structure; approve certain types of policy forms; approve minimum workmen's compensation insurance rates; examine financial condition and procedures of insurers through field audits and analysis of financial statements; take over the California affairs of insurers in financial difficulty for purpose of liquidation or rehabilitation; investigate complaints against licensees; and check activities of licensees for compliance with all insurance laws. *The increases in license and examination workload require the addition of 7 clerks in order to maintain the current level of service.* These activities are carried out through the Divisions of: Administration, Rate Regulation, Compliance and Legal, License, and Examination and Financial Analysis.

A new function of regulating employee health and welfare programs was added by Chapter 2167, Statutes of 1957, which placed the responsibility for supervising certain of these pro-

grams with the Insurance Commissioner in order to protect the rights and interests of the beneficiaries of such programs.

The first major step requires each program to file a registration statement by December 23, 1958, with this agency. It is estimated that there are 2,500 such programs.

The agency is now developing rules and regulations which will cause the filing of annual reports, periodic examinations and the investigation of complaints. *13 positions are being added temporarily in the current year as the work requires. These 13 positions and 5 examiner positions, shown as proposed new positions, are to meet the estimated needs as the program gets into full operation in the 1959-60 Fiscal Year. The law is in effect until June 30, 1960, and unless extended this program will be terminated at that time.*

The insurance industry of the State has shown steady growth over the years. The staff has been able to meet the workload increases in all areas except the policy complaint work. *The increased work in policy complaints requires 1 additional insurance service officer to maintain the current level of service.*

The department is supported from license fees, examination fees, assessments, taxes, and other revenues levied on the insurance business. The unencumbered balance in the fund at June 30th of each year in excess of \$2,000,000 is transferred to the General Fund.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Real Estate is to protect the general public in all matters relating to real estate, subdivisions, business opportunities, mineral, oil, and gas, and mortgage loan transactions handled through licensees and to provide funds for education and research.

Program and Performance

The division issues an original license to real estate business opportunity, and mineral, oil, and gas applicants after the applicant has passed a written examination. Licensees must

take a written or oral examination before a license is renewed. Fiscal year figures show license examination totals at a higher level than had been anticipated. In the 1957-58 Fiscal Year, there were 92 more examination sessions given throughout the State than in 1956-57, an increase of 11.6 percent. The bulk of the increase was accounted for by original license examinations, mostly salesmen, which were up 2,797, a 19.9 percent increase. This increase in original examinations in the past year is reflected in the number of second examinations to be given in the current year.

	Actual				Estimated			
	1956-57		1957-58		1958-59		1959-60	
	Applicants	Passed	Applicants	Passed	Applicants	Passed	Applicants	Passed
1st Examination	16,656	13,513	20,942	17,289	21,288	17,322	22,352	18,187
2nd Examination	7,981	4,731	7,502	3,636	8,660	4,928	9,432	5,358
Oral	2,109	1,827	2,834	2,352	3,031	2,121	3,301	2,311
Total	26,746	20,071	31,278	23,277	32,979	24,371	35,085	25,856

During 1957-58, 4,286 complaints against licensees, subdividers and advance fee operators were received as compared with 3,753 in 1956-57. During the current year, 50 out of 199 complaint cases are being referred to the Attorney General's office for prosecution from the Los Angeles office.

Each subdivision to be sold in California must be filed with this division. If after investigation it is determined that it would perpetrate a fraud on the public to permit the sale, a stop order is issued. During 1957-58, 2,289 subdivisions were filed. The amended subdivision law requires impounding buyers' deposits, or employing alternative methods of protecting them. A subdivider may post a surety bond to guarantee return of deposits in event the subdivider cannot deliver clear title, or post a bond and impound all sums above the principal amount of the bond; or impound the deposits and later furnish a bond to release them. Subdividers in the State had on file with the commissioner 322 bonds in the total amount of \$7,463,150 as of June 1, 1958.

Regulations have been adopted to implement mortgage loan legislation.

It is anticipated that approximately 4,000 to 5,000 man-hours will be required for auditing mortgage loan brokers accounts, 1,200 to 1,500 hours on subdivision accounts, and 2,100 to 2,400 hours on trust accounts in 1958-59. In 1957-58, the audit staff devoted 3,433 hours on mortgage loan broker accounts, 1,068 hours on subdivision accounts and 429 hours on trust accounts. In addition under auditing service contract with the Audits

Division, Department of Finance, 2,148 hours at a cost of \$11,806 were spent on these three types of accounts. An accountant-auditor position has been established in the current year by reducing auditing services of the Audits Division and is proposed for extension into the budget year as a new position.

Administration of the education and research program in state colleges and junior colleges, co-ordinated with the same program in the University of California, under the direction of the Real Estate Commission is continued in the budget year. A subcommittee has been appointed to meet and draft a clear-cut program which would define the purposes, aims, and objectives for the Advisory Committee.

The expenditure program of the Real Estate Education and Research Fund for 1958-59 will require a deficiency appropriation of \$36,855 to meet the costs of the program. The increased cost is due to an underestimate made at the time the program was adopted by the Legislature and subsequent financial adjustments.

Renewals of licensees are now being processed monthly and temporary employees for renewals are no longer employed. Allotment for temporary help has been reduced from 10 man-years in the past year to 0.2 man-years in the budget year.

This budget contains provision for 2 additional clerical positions, 1 of which was provided out of temporary help in the current year, to process the increased number of complaints, examinations and related workload.

GENERAL ANALYSIS				
Objectives				

The Division of Savings and Loan is responsible for safeguarding investors' funds in savings and loan associations.

Program and Performance

This division licenses and examines savings and loan associations to prevent unsound business practices. Application for a license must first be made to the division. A license is issued or denied after examination and public hearings. Each association

is licensed annually. The division is responsible for an annual examination of the affairs of every domestic association and every foreign association doing business in this State. *Because of the increasing number of associations and applications for new facilities, it has not been possible for the examiner staff to make the required examinations without reducing the quality and a resulting loss of control over the regulation of the associations.*

a Estimated distribution for study of the educational and research needs of the real estate industry in California. To be allocated by the Department of Finance to the Division of Real Estate and the University of California to carry out the provision of Section 10451.5 of the Business and Professions Code.

BOARD OF OSTEOPATHIC EXAMINERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
SUMMARY				
TOTAL EXPENDITURES				
Support (<i>Contingent Fund of the Board of Osteopathic Examiners</i>)-----	\$58,258	\$59,674	\$61,342	\$1,668 (2.8%)
Personnel man-years-----	6.3	6.4	6.4	—

GENERAL ANALYSIS

Objectives

To maintain high standards for the osteopathic profession and to assist and protect licentiates and the public; and effect economies within the board consistent with effective administration and consistent with adequate policing.

Program and Performance

The Board of Osteopathic Examiners was created by initiative enactment in 1922. It is a licensing and policing agency which has the responsibility of licensing as physicians and surgeons graduates of approved osteopathic schools meeting the educational requirements of Division 2, Chapter 5, Business and Professions Code.

The board receives applications for examination for licensure as a physician and surgeon, investigates and approves approximately 110 applications per year, conducts a 3-day written examination, generally once a year, processes the examination grades and licenses those applicants who have passed the written examination and have completed a year of internship in an approved hospital. Applicants may take the examination upon completion of their medical course, but a license may

not be issued until they have completed a year of intern training. 16 licenses were issued to applicants who had passed the examination in 1957 and who had completed their intern training. 82 licenses were issued in 1957 to applicants who had passed the written examination the previous year and who had completed their intern training in 1957. The board also receives and investigates approximately 30 applications for physicians' and surgeons' certificates by reciprocity each year. Credentials of approximately 14 licentiates are endorsed to other states during each year. 80 clinic licenses have been issued in 1958. A register is kept of all licenses issued. The board holds 3 meetings a year, keeps records of all proceedings, publishes an annual directory and makes an annual report to the Governor. *Fees* for the written examination, annual renewal and for the various licenses are receipted and deposited. The board has approximately 2,500 licentiates. In 1957 investigative staff made 136 investigations; there were 13 citations before the board resulting in disciplinary action against 13.

This budget continues the level of service authorized for the current year.

^a Composed of savings in salaries and wages, \$25,105; operating expenses, \$2,829; equipment, \$54; and excess reimbursements, \$1,580.

GENERAL ANALYSIS

Objectives

To protect the public, health, welfare and safety by permitting only persons and firms of demonstrated knowledges and abilities to perform public services for compensation; to prevent unauthorized practices upon the public and to discipline those licensed who fail in their public trust.

Program and Performance

The department is headed by a director, appointed by the Governor. Approximately 420 people are employed by the department and its member agencies.

The member agencies of the Department of Professional and Vocational Standards are headed by boards of 3 to 13 members appointed by the Governor from among members of the particular profession or vocation regulated. The members usually serve overlapping 4-year terms.

In general, the agencies have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licensees by means of inspections, investigations, and formal disciplinary action. Each agency employs a staff to assist with these functions. With minor exceptions, the cost of operation of the member agencies

^a These funds are derived from assessments against other funds which expenditures are included in the overall budget totals.

^b Expenditures and revenues of the Professional and Vocational Standards Fund are not carried into the budget totals, since the assessments against the various boards and the rent receipts for the building have been included as expenditures in the budgets of the respective boards and agencies.

BUSINESS AND PROFESSIONS BUILDING ANNEX

In accordance with the provisions of Sections 400 to 404 of the Business and Professions Code, the Business and Professions Building was constructed and is being operated by the Department of Professional and Vocational Standards as a self-sustaining enterprise. Out of the rentals received from state agencies occupying space in the building and fees paid by users of its parking facilities, are defrayed the cost of operating and main-

taining the building. Generally, the remaining receipts are apportioned back to the agencies contributing to the cost of the building in proportion to their respective investments.

Repayments to investing agencies are estimated on an accrual basis. Actual repayments are made semiannually, after the close of the period in which net rentals accrued.

GENERAL ANALYSIS

This division is responsible for co-ordinating and improving the quasi-judicial functions of the various licensing boards, including agencies not within the department itself. It furnishes trained hearing officers to any state agency conducting quasi-judicial disciplinary proceedings, and it compiles and publishes the California Administrative Code, consisting of agency rules and regulations. This budget provides for an anticipated legislative change to the Business and Professions Code in order to recover 100 percent of the costs of providing hearing services to

other agencies, and otherwise provides for a continuation of the existing level of service. The agency workload is reflected in the following figures:

	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959

20	GENERAL ANALYSIS							
21	This board licenses and regulates certified public accountants and public accountants. The proposed budget provides for a continuation of the existing level of service, with 1 additional investigator to handle an increased complaint workload and 1 additional clerk for an increased number of certified public accountant licenses. Certified public accountant licenses are increasing at a faster rate than the public accountant licenses				and require considerably more clerical time per license. The agency workload is indicated by the following figures:

ATHLETIC COMMISSION

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
SUMMARY				
TOTAL EXPENDITURES				
Support (<i>Athletic Commission Fund</i>)-----	\$130,947	\$151,238	\$151,762	\$524 (0.3%)
Personnel man-years-----	14.9	16.1	16.3	0.2

GENERAL ANALYSIS

The Athletic Commission controls all professional and amateur boxing and wrestling matches held in California. It also licenses all clubs which sponsor such matches and all persons who participate in them. *This budget provides a continuation of the existing level of service. The augmentation in the current year is due primarily to the increased number of disciplinary cases pending. It is expected that California will continue to have some of the larger boxing matches, and the revenue from them*

will be sufficient to operate this commission's activities on a solvent basis.

The *agency workload* is indicated by the following figures:

	Actual		Estimated	
	1955-56	1956-57	1957-58	1958-59

GENERAL ANALYSIS

The Board of Barber Examiners examines, licenses, and regulates barbers and apprentice barbers. It also examines the sanitary conditions of barber shops.

This budget provides for a continuation of the existing level of service with an augmentation in the current year in order to provide for increased workload over that originally anticipated.

The agency workload is reflected by the following table:

	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60
Licenseses-----	32,337	33,253	34,358	34,558	34,558

Personnel man-years -----		5.7	6.1	6.2	0.1			
GENERAL ANALYSIS								
This agency examines, licenses, and regulates chiropractors in California. <i>The proposed budget provides</i> for a continuation of the existing level of service with an augmentation in the current year to provide for the increased number of disciplinary cases pending and general price increase. The agency workload is indicated by the following figures:		<i>The annual expenditures of this board have been exceeding the revenues for several years. The surplus will be reduced to a dangerously low balance of approximately \$16,000 on June 30, 1961. Special legislative consideration will be necessary to continue the activities at their present level.</i>

GENERAL ANALYSIS

This board licenses and regulates contractors in the various branches of the construction industry. The proposed budget provides for a continuation of the existing level of service with an augmentation in the current year in order to provide increased workload and general price increase. The agency fund condition indicates that annual expenditures will exceed revenues in the current fiscal year. This budget reflects an increase in license fee by board action to maintain this program on a solvent basis.

BUREAU OF FURNITURE AND BEDDING INSPECTION

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
------------------------------	-------------------	----------------------	---------------------	------------------------

SUMMARY

TOTAL EXPENDITURES				
Support (Furniture and Bedding Inspection Fund)	\$291,747	\$332,033	\$345,802	\$13,769 (4.1%)
Personnel man-years	39	43.7	43.7	-

GENERAL ANALYSIS

The bureau licenses and regulates sellers and processors of overstuffed furniture and articles of bedding. An inspection service is maintained to insure truthful labeling of these goods. The bureau is under direct supervision of the Director of Professional and Vocational Standards. *This budget provides* for a continuation of the existing level of service with an augmentation in the current year to provide for an increased number of disciplinary cases pending, and for facilities necessary to test synthetic materials used in the construction of overstuffed furniture.

The agency workload is indicated by the following figures:

SUMMARY

TOTAL EXPENDITURES				
Support (General Fund) -----	\$160	\$670	\$2,228	\$1,558
				(232.5%)

GENERAL ANALYSIS

The Board of Guide Dogs for the Blind was established for the purpose of licensing and regulating guide dog schools and guide dog trainers. 9 licenses are in effect. Staff for this agency's work is currently provided jointly by the Department of Professional and Vocational Standards and the Department of Edu-

cation. Due to the increased workload within each of these agencies this service can no longer be continued. This budget provides \$1,500 for contractual services from other agencies in order to provide the staff to carry out the necessary licensing and regulation function.

^a Composed of savings in salaries and wages, \$23,635; operating expenses, \$4,005; and equipment, \$385.

^b Composed of savings in salaries and wages.

GENERAL ANALYSIS

The Board of Medical Examiners examines, licenses, and regulates physicians and surgeons, chiropractors, drugless practitioners, and midwives. Within the board the Physical Therapy Examining Committee reviews applications and examines applicants for licensing as physical therapists, subject to approval by

the board; the Psychology Examining Committee examines and passes upon the qualifications of applicants for certification and registration as psychologists; and a Chiropractic Examining Committee reviews applications and examines applicants for licensing as chiropractors.

^a Composed of savings in salaries and wages, \$1,902; operating expenses, \$658; and equipment, \$2.

BOARD OF NURSE EXAMINERS

Headquarters Office at Sacramento

	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
SUMMARY AND GENERAL ANALYSIS				
SUMMARY				
TOTAL EXPENDITURES				
Support (Nurse Examiners' Fund)-----	\$196,084	\$213,140	\$238,830	\$25,690 (12.1%)
Personnel man-years-----	22.1	23.1	26	2
GENERAL ANALYSIS				
The Board of Nurse Examiners examines, licenses, and regulates nurses in California. This budget provides for 1 additional investigator, 2 clerical positions and the services of 0.5 of another clerk provided by other agencies. The need for these additional positions is based on increases in workload as follows:				
		Actual	Estimated	
		1955-56	1956-57	1957-58
School of nursing-----	48	46	56	57
Total licentiates-----	84,447	89,291	92,363	95,500
Applications received *-----	7,737	8,652	9,946	9,800
Complaints received-----	181	370	533	586
				10,850

^c Composed of savings in salaries and wages, \$1,879; operating expenses, \$3,112; and equipment, \$50.^d Composed of savings in operating expenses.

* Includes temporary permits and licenses: 2,353 in 1955-56; 3,728 in 1957-58; and an estimated 4,550 in 1959-60.

BOARD OF EXAMINERS IN VETERINARY MEDICINE

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS		ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
SUMMARY					
71	TOTAL EXPENDITURES				
72	Support (Veterinary Examiners' Contingent Fund)	\$19,243	\$21,914	\$23,256	\$1,342
73					(6.1%)
74	Personnel man-years	1.2	1.2	1.3	0.1

GENERAL ANALYSIS

This board examines, licenses, and regulates the practice of veterinarians. The augmentation in the current year reflects the cost of more frequent meetings of the board. Workload of the agency is reflected by the following:

	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60
Total licentiates	1,450	1,550	1,704	1,799	1,894
Applications received	135	150	200	215	225

^a Composed of savings in salaries and wages, \$478; operating expenses, \$919; and equipment, \$169.

GENERAL ANALYSIS

Objectives

It is the duty of the commission to secure adequate and safe services at rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

Program and Performance

The commission hears matters relating to rates, charges, services, safety and affairs of the utilities and carriers under its jurisdiction. The commission then determines intrastate rates and service of privately owned utilities and transportation companies. These include gas, electric, telephone and telegraph utilities; streetcars, trucks, buses, airlines and vessels transporting freight or passengers in intrastate commerce; warehousemen, wharfingers, carloaders and pipeline operators. The commissioners control the issuance of securities and other transactions relating to the capital structure of public utilities, and protects

the public interest by appearing before federal agencies and courts as an advocate in interstate proceedings.

The activities of the commission are reflected in the following statistics:

	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60
Formal proceedings filed	1,427	1,394	1,493	1,500	1,500
Overall formal documents registered	6,557	6,896	7,591	8,000	8,500
Decisions and orders issued	1,838	2,066	1,916	2,300	2,350
Parties notified of hearings	16,984	17,838	16,026	18,000	18,500
Parties of record served with decisions	14,751	19,725	22,175	23,000	24,000

^a Composed of savings in salaries and wages, \$2,361; operating expenses, \$1,913; equipment, \$18; and excess reimbursements, \$334.

^b Composed of savings in salaries and wages, \$953; operating expenses, \$1,319; and loss in reimbursements, \$449.

PUBLIC UTILITIES COMMISSION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
		57-58 (Filled)	58-59 (Auth.)	59-60 (Auth.)			
1							
2	During 1957-58 rate increases were authorized which it was						
3	estimated would add \$131,851,725 per year to gross revenues of						
4	54 gas, electric, telephone and water utilities. However, Cali-						
5	fornia customers continue to receive gas, electric and telephone						
6	service at comparatively low rates. For 50 therms of gas, 100						
7	kilowatt hours of electricity and two-party flat rate telephone						
8	service San Franciscans pay \$11.02 per month, the lowest in						
9	any of the Nation's 25 largest cities. Los Angeles combined						
10	rates were third lowest at \$11.48 per month. Los Angeles has						
11	the lowest telephone rate for basic two-party line residential						
12	service.						
13	At the end of 1957 the original cost of plant in service by						
14	electric, gas, telephone, water and steam utilities in California						
15	was \$7,005,068,000, or nearly triple the investment of \$2,398,-						
16	770,000 at the end of 1947.						
17	The commission continued its fight against increased charges						
18	for out-of-state natural gas. The out-of-state supply now makes						
19	up three-fourths of all natural gas sold in California. More than						
20	half the total expense of operation for gas companies is the						
21	charge for fuel, and neither the California companies nor the						
22	state commission can exercise control over the cost of imported						
23	gas. In order to actively and effectively engage in action to						
24	resist rate increases by suppliers of such out-of-state California						
25	gas, increased staff attention to Federal Power Commission pro-						
26	ceedings is necessary, and is proposed in this budget.						
27	Additional attention was given to enforcement of minimum						
28	rates for hauling by for-hire trucks. Formal hearings were held						
29	by the commission and penalties were assessed in 42 cases, with

86							

operators' permits being suspended an average of five days. Evidence was obtained in 88 other investigations which at year end were being studied by the legal division for formal action.

Addition of 4 inspectors made it possible to intensify effort to reduce the number of truck accidents. Nearly 5,000 of the 40,000 heavy-duty vehicles under safety jurisdiction of the commission were inspected in detail during the year.

Since 1953, state funds in the amount of \$771,373 have been expended for improved warning devices at railroad-highway grade crossings for a total of \$3,960,428 in improved protection. Railroads customarily pay half the cost, the city or county one-fourth and the State one-fourth from the grade crossing protection expenditures.

The commission is supported from both the General Fund and the Transportation Rate Fund. Activities supported by the Transportation Rate Fund are largely regulatory upon railroads, trucks, and water carriers engaged in the transportation of property. The Transportation Rate Fund revenue is derived from a fee of one-fourth of 1 percent of the gross operating revenue earned by carriers from the transportation of property and from other related fees.

FUND CONDITION: Revenues to the Transportation Rate Fund are inadequate to maintain the currently authorized expenditure program. In order to continue the existing level of service on a solvent basis, legislation to be submitted by the commission providing for adequate revenue to the fund during the 1959-60 Fiscal Year will be necessary. This budget anticipates enactment of such legislation.

ADMINISTRATION

fiscal accounting; filing procedures; reproduction of papers; personnel processing; custody of official property; purchases and sales of publications.

In the 1957-58 Fiscal Year the administrative staff processed 1,916 decisions, the second largest number of proceedings disposed of in a single year. During the year, 958 days of hearings were held, 16,026 interested parties were notified of public hearings, and 22,175 parties of record in the proceedings were served with decisions. Formal filings registered in the Docket Office increased to 7,591 in 1957-58. Due to the impact on the staff of this continual growth in activities, this budget provides for 2 additional clerical positions.

22	Objectives						
23							
24	The Utilities Division assists the commission in insuring the						
25	public adequate electric, gas, telephone, telegraph, water and						
26	steam heat utility service and facilities at reasonable rates,						
27	without discrimination, as is necessary to promote the safety,						
28	health, comfort and convenience of the public, customers, and						
29	employees of utilities.						
30							
31	Program and Performance						
32							
33	The division provides the technical and clerical staff to						
34	analyze and conduct studies relating to the regulation of rates,						
35	services, facilities, safety, valuation, and certification matters						
36	relating to the public utilities listed above. This is accomplished						
37	through the development of factual information and the mak-						
38	ing of engineering, operating, rate, administrative, and other						
39	recommendations to the commission.

44							
45							
46							
47	Objectives						
48							
49	This division regulates rates, service, safety and operating						
50	conditions of privately owned, for-hire carriers of passengers						
51	and property by railroad, highway and water, and to a limited						
52	extent, by air.						
53							
54	Program and Performance						
55	Field personnel in 14 district and the headquarters offices						
56	effect compliance of the carriers transporting property within						
57	the State by field investigations of carrier records as well as						
58	advising carriers regarding operating procedures and practices						
59	directed toward a dependable and adequate transportation sys-						
60	tem in the State. In the past fiscal year the accelerated enforce-						
61	ment program resulted in 62 formal orders of investigation						
62	issued and 45 decisions of the commission. These decisions						
63	suspended carriers operative rights for a total of 245 days						
64	and included orders to collect undercharges from shippers.						
65	There are approximately 14,500 carriers of property within						
66	the State subject to regulation by the commission.						
67	The division studies cost factors, service rates, and regula-						
68	tions applicable to the movement of freight and passengers by						
69	railroad, highway, airlines, water carriers, express corporations,						
70	freight forwarders, warehousemen, wharfingers and carloaders.						
71	These studies are presented as exhibits in public hearings

UTILITIES FINANCE AND ACCOUNTS DIVISION

pared with 88 proceedings during the Fiscal Year 1956-57 and 61 during the Fiscal Year 1955-56. In 1957-58 the commission considered applications involving the issue of securities aggregating \$668,130,427 which is the highest in any fiscal year since 1945-46. In addition, 3,419 annual and other financial reports of utilities were filed with this division.

During the actual year the division inaugurated a new program of auditing motor carriers' records to check the correctness of amounts of revenue reported as the basis for the payment of the $\frac{1}{2}$ of 1 percent fee.

This budget provides for continuing the existing level of service.

TRANSPORTATION DIVISION

before the commission involving the establishment of minimum rates throughout the State. The staff examines tariffs filed with the commission for compliance with statutes and commission regulations; audits summaries of rates charged by carriers to determine violations of established rates; quotes rates to the public; and participates and presents evidence in transportation rate hearings before the Interstate Commerce Commission to protect the interests of California shippers.

This division inspects for compliance with safety standards railroad bridges, trestles and tunnels and the operations and equipment of bus companies and the limited number of motor truck carriers, and investigates accidents of all carriers under its jurisdiction.

The division makes engineering studies relative to the need for and construction of new railroad grade crossings and crossing separation structures, investigates crossing accidents and recommends preventive action. The \$900,000 grade crossing protection appropriation made in 1953 has been completely allocated. The value of this program is seen in the accident report. A tabulation of 96 crossings for 3 years before and 3 years after installations of improved protection showed a reduction in deaths of 76 percent, and a reduction in the number of accidents of 52 percent.

13					
14	GENERAL ANALYSIS				
15	Objectives				
16	<p>The basic objectives of the Department of Social Welfare are (1) to assure that programs for assistance of needy persons are administered uniformly and humanely throughout the State in such a manner as to minimize distress, encourage self-respect and independence, and preserve family life; (2) to develop and strengthen services to children, to protect them, to prevent delinquency, and to provide substitute homes for children who cannot live in their own homes, and whenever possible, provide permanent homes through adoption; (3) to provide protection and care through family homes or institutions for aged persons who cannot live in their own homes; (4) to promote and develop methods to assure the most economical and effective means of administration of the social welfare programs through other agencies.</p>				
17	Program and Performance				
18	<p>Program responsibilities of the Department of Social Welfare are essentially those of developing policies and procedures for administering the broad range of public assistance, child welfare, and institutional licensing programs, and to supervise the administration of these programs by local and private agencies. Except for direct licensing responsibilities and reporting to courts on independent adoption petitions, the administration of these programs is discharged through other agencies, public and private.</p>				
19	<p>Programs are carried out within the framework of state and federal laws. For administration of public assistance to the aged, blind, children and disabled, the department is responsible for assuring the Federal Government that these programs are administered uniformly and in accordance with federal standards in all counties of the State. In the allocation of the federal funds for child welfare services, the department functions as the agent of the Federal Government.</p>				
20	<p>The public assistance programs provide direct financial aid and services to over 265,000 needy aged, 13,500 blind persons, 4,000 totally disabled, and 179,000 children in 65,000 families and 11,000 children cared for in foster homes.</p>				
21	<p>Monthly, some 2,000 children needing homes are under study in a statewide adoption program. Another 2,400 children placed in adoptive homes are under supervision pending final approval of placement. Approximately 1,700 prospective adoptive parents are being studied each month by staff of 27 local public and private agencies to determine suitability of their homes for adoptive placements. Adoption services also include study and recommendation to the courts by state staff and county adoption agencies of approximately 4,800 active petitions for adoption per year.</p>				
22	<p>Leadership is given local communities to develop and strengthen child welfare services to help troubled parents and children by dealing with behavior problems and family relationships to protect children, prevent delinquency, and preserve family life.</p>				
23	<p>Some 300 homes providing 24-hour care for the aged and children are licensed by the department under standards developed by it. Similarly about 900 day nurseries are licensed by the department. Local agencies accredited by the department license over 2,900 boarding homes for aged and 1,500 foster homes for children in accordance with department standards. In addition, private child placing agencies, with approximately 900 foster homes for children, license such homes under the department's supervision.</p>				
24	<p>Involved is an expenditure of over \$500,000,000 a year in state, county and federal funds for assistance payments, administration and services. These programs directly help 500,000 people and must serve a wide range of individual needs. Their complexities are inherent in the basic differences and circumstances and conditions in which people are found, and the aim is to serve these wide ranges of need for financial help and for protective care, and services necessary to restore persons to self-support or self-care.</p>				
25	<p>Inauguration of 2 new programs, Medical Care for all recipients except Needy Disabled, and Aid to Needy Disabled, on October 1, 1957, involved development of policies, procedures, rules, regulations, forms, etc., for program administration.</p>				
26	<p>The recipients in the category of Needy Disabled are not presently included in the medical care program. The needs of these people for medical care are as great, if not greater, than any other aid category. Legislation is proposed by the Governor which would extend medical care to the Needy Disabled. (See Local Assistance.)</p>				
27	<p>In addition, 24 statutes enacted by the 1957 Session of the Legislature affecting the Aid to Blind Program were implemented and reactivation of the Intercountry Adoption Program on October 1, 1957, involved establishment of policies and procedures for program administration. Plans to terminate the program on June 30, 1958, were also developed due to lack of an appropriation to carry on the program. Methods for simplifying administration of the Aid to Needy Children Program were developed and made operative. By reducing complexity of determination of need and amount of grant, county staff time was freed to provide more social services to restore recipients to self-sufficiency and minimize dependency. Similar gains were made in services directed toward self-support and self-care in the Old Age Security Program, particularly with respect to those requiring care outside their own homes. Improved methods for budgeting county adoption agencies were developed. Special studies were conducted in several counties to measure administrative effectiveness and program accomplishments. Consultation was provided county welfare departments on a wide variety of administrative and organizational problems, including the use of electronic data processing. The records management program was expanded through installation of uniform subject files, establishment of retention periods for counties on heavy usage forms, and identification of vital records requiring special protection. Through its administrative cost study, the department developed guides for self-analysis and budget methods for use of county welfare departments. Plans for a classification survey of the 45 merit system counties were implemented and the survey is scheduled for completion by June 30, 1960.</p>				
28	<p>In addition, the department developed clerical yardsticks for both central and area offices of the department and a yardstick for staffing area units handling appeals and complaints. In line with its desired intent to review a portion of its own operations and administration each year, it conducted a study of the Personnel Bureau and a variety of work simplification projects were undertaken covering fiscal processes, statistical and clerical procedures. A major effort was also devoted in formulating a plan for conducting comprehensive reviews of all aspects of county welfare administration. This plan modifies the department's current methods of county performance review and involves shifting from detailed analysis of the individual case to identify errors, to examining methods of program administration in relation to their ability to produce the desired end result.</p>				
29	<p>These reductions represent continuing savings of approximately \$62,000 starting in the budget year. Studies were also initiated to secure maximum simplification in fiscal methods and procedures which, when completed in the 1958-59 Fiscal</p>				
30	a The summary of expenditures from state, federal, and county funds for social welfare programs administered by the department and county administration of child welfare services appears in the Local Assistance Budget, "Subventions for Social Welfare."				
31	b Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

These are partially offset by the reduction of 15 positions resulting from administrative improvements and better staff utilization within the department leaving a net increase of 9 new positions. *In addition, 14 positions are to be transferred from the State Controller in order to reflect the proper functional assignment, and to take advantage of federal funds on a sharing basis.*

Provision is also made for an increase of \$84,649 in the *Prevention of Blindness Program* to provide funds for treatment of backlogged cases resulting from an underestimate of caseload in the 1957-58 Fiscal Year and an increase in surgical fees.

and advice to the department and the Social Welfare Board, and conducts appeal hearings for the Social Welfare Board.

Medical consultants are placed in this unit since they report directly to the deputy director. Medical consultation, which was obtained on a contractual basis during the 1957-58 Fiscal Year, is budgeted in salaries and wages for the 1958-59 and 1959-60 Fiscal Years.

Aid to Needy Children develops and interprets rules and regulations and provides consultation for the Aid to Needy Children Program. The Bureau of Aid to Needy Aged interprets rules and regulations and provides consultation for the Aid to Needy Aged Programs. The Bureau of Aid to Needy Disabled is responsible for the administrative policies of the new program. Close surveillance is being given to assure that department policy is consistent with legislative intent. Consultation is provided to local agencies by each of the bureaus concerning their respective programs.

DIVISION OF MEDICAL CARE

Objectives

It is the responsibility of this division to formulate and interpret standards, policy, rules and regulations governing the administration of the new medical program for public assistance recipients.

Program and Performance

Medical consultation is provided for in the executive unit. Continued efforts in formulation and interpretation of policies will be given. In addition, responsibilities of this division will include negotiation of fees, co-ordination with other public assistance programs and consultation with departmental and county staffs.

This division is responsible for the formulation and interpretation of standards, policies, rules and regulations governing the administration of the Aid to Blind Programs.

Program and Performance

The personnel of this division review reports of eye examinations, provide consultant services on medical phases, and administer the Prevention of Blindness Program. The Prevention of Blindness Program provides treatment or surgery to prevent blindness or restore vision to persons applying for or receiving aid to the blind. Advisory committees assist in the development of policies. The Prevention of Blindness Program is increased by \$84,649 due to increased workload and cost of the program.

have been developed. The remaining positions provide program consultation to counties and private agencies.

A new section, the Medical Services section, has been established based on staffing yardsticks for the new program.

20 new positions are proposed for 1959-60 Fiscal Year. This represents the extension for one more year of 3 professional positions in the Medical Services section and the permanent extension of 1 professional position for appeals and complaints. The remaining 10 professional positions are required for increased workload; 2 for adoptions program, 5 for licensing 1 for Child Welfare and 2 for Aid to Disabled eligibility determination. The 6 clerical positions are based on increased workload.

GENERAL ANALYSIS										
Objectives										
To encourage and assist citizen participation and action to make it possible for senior citizens to live with security, dignity, self-respect and usefulness; to advise the Governor on the problems of aging.				organized on a subcommittee basis with state department specialists and citizens being members of the subcommittees.						
The "Annual Report of the Citizens Advisory Committee on Aging, 1956" provides a report of existing problems and tentative recommendations for solving them. The committee is				The staff members of the committee consult with community organizations, interested groups, and the general public to encourage them in facing and solving common problems. A library has been developed which is used in the work with communities. A quarterly newsletter is prepared to summarize the developments and programs in gerontology.						
Program and Performance				Cost increase is nominal, with the same level of service being maintained.

EDUCATIONAL ASSISTANCE DIVISION

GENERAL ANALYSIS

This division administers two programs of educational assistance, one for California veterans, the other for dependents of deceased veterans. Under both programs the division provides educational counseling and assistance in securing admission to suitable institutions of learning. Insofar as funds permit, veterans are provided with tuition fees plus a monthly maintenance and book allowance of \$50 to a maximum of \$1,000. Widows and children of veterans who died as a result of war service may receive \$20 monthly while attending high school and \$40 monthly while attending schools above the high school level.

As of August 31, 1958, the State of California had assisted 64,885 veterans, 1,308 widows, and 5,285 orphans since inception of this program.

Only veterans whose federal benefits are no longer available are accepted, so there is no duplication with federal educational benefits. In addition, veterans must show a legitimate need for further training and demonstrate the ability to successfully pursue the educational course requested. Once in training, students' grades are reviewed periodically and only those making satisfactory progress are continued. Division representatives :

^a A utility enterprise fund, not included in overall budget totals.

^b Under the provisions of Chapter 507, Statutes of 1957, the salaries and expenses of the California Veterans Board, the secretary of the board, the director and the deputy director of the Department of Veterans Affairs are paid in full from the Farm Home Building Fund of 1943.

42	EDUCATIONAL ASSISTANCE TO VETERANS (General Fund)							
43								
44	This program, pursuant to the provisions of Sections 981 to 981.8							
45	of the Military and Veterans Code, is to provide opportunities							
46	for veterans to continue their education. The assistance is							
47	limited to a total payment of \$1,000 per California veteran.							
48	The subsistence is limited to \$40 per month based on actual							
49	attendance in school, plus school books and supplies as are							
50	necessary, not to exceed a total of \$50 per month. In addition,							
51	tuition costs are paid, provided the maximum of \$1,000 per							
52	veteran is not exceeded. The amount proposed is based on a							
53	peak enrollment expected to be 9,000 for the year 1959-60.							
54	Tuition and fees				\$1,742,940	\$1,846,291	\$1,846,291	
55	Subsistence				1,102,421	1,123,709	1,123,709	
56								
57	Totals, Educational Assistance to Veterans				\$2,845,361	\$2,970,000	\$2,970,000	
58								
59	EDUCATIONAL ASSISTANCE TO VETERANS'							
60	DEPENDENTS (Veterans' Dependents Education Fund)							
61								
62	The purpose of this program is to provide opportunities for depend-							
63	ents of veterans to continue their education. The educational							
64	aid to widows and orphans is not limited as to total amount							
65	for each eligible; however, subsistence payments may not							
66	exceed \$480 per year on the basis of school attendance. Pay-							
67	ments are limited to \$40 per month for college students, and							
68	\$20 per month for high school students, and represent only							
69	amounts for subsistence, per Department of Veterans' Affairs							
70	policy. Orphans over 16 years but not over 21 years of age							
71	may file for and receive assistance until the course is com-							
72	pleted or until 27 years of age is reached, whichever occurs							
73	first. Assistance to widows is limited to not more than 4							
74	years' duration. The new program of federal assistance to							
75	dependents has reduced the rate of growth of this program,							
76	since the Department of Veterans' Affairs advises in most							
77	cases that the federal program be used first. Even with the							
78	federal program, continuation of the increased rate of enroll-							
79	ments experienced in recent years is expected since a larger							
80	number of dependents become eligible each year. Peak enroll-							
81	ment in this program during the 1959-60 Fiscal Year is							
82	expected to total 1,500.							
83								
84	Tuition, fees and subsistence				\$234,020	\$293,000	\$301,000

GENERAL ANALYSIS

Objectives

The Veterans Home of California was established to provide a home for qualified California veterans who have physical disabilities and need hospital, chronic or domiciliary care which they are unable to provide for themselves.

Program and Performance

The home was founded in 1883 by the Grand Army of the Republic and the Associated Veterans of the Mexican War and was taken over by the State in 1897. As of October 1, 1958, there were 2,031 resident members, including 52 women veterans. The Federal Government acknowledges its responsibility for the veterans cared for by contributing \$700 per year for the support of each member.

To be eligible for admission, a veteran must have been a resident of California for at least 10 years immediately prior to making application, and have honorable wartime service in the armed forces of the United States. He must have temporary or permanent disability to the extent that he is unable to follow a gainful occupation and be financially unable to provide for his hospitalization or domiciliary care. The home

has no facilities for and does not accept veterans who are mentally ill, tubercular, chronically alcoholic, or addicted to narcotics or other drugs.

To carry out its medical program, the home's facilities include a fully accredited modern medical and surgical hospital of 451 beds, 2 intermediate type barracks for the chronically ill of 406 beds, 8 domiciliary barracks of 1,532 beds, which includes 1 unit of 55 beds for women veterans, a recreation center and various specialized buildings, including some employee housing. The hospital staff has 20 full-time physicians, 103 graduate nurses, and 181 hospital aids.

Convalescent hospital cases and most chronic ambulatory patients are assigned to the convalescent barracks near the main hospital. Members placed here are normally able to take care of themselves and go to meals in their own dining room.

The Veterans Home offers broad possibilities for the rehabilitation of members along physical, occupational, vocational, social, and spiritual lines. Unless employed at the home or excused by the chief of medical services, all domiciliary members are required to perform work therapy duties.

No change in workload is proposed in this budget.

11	The home is for custodial, medical and nursing care of the	pose of conducting a nursing home for the aged. Under the terms of a contractual arrangement between the Department of Veterans Affairs and the private persons, the remaining members will be cared for in accordance with standards of care and service prescribed by the department. An average population of 5 members is estimated for the 1958-59 and 1959-60 Fiscal Years. Actual membership was 5 on September 1, 1958. <i>No program of workload changes are reflected in this budget.</i>

GENERAL ANALYSIS

Objectives

The department has responsibility for planning, constructing, and operating authorized state water projects; co-operates in water projects with federal and local government units; takes responsibility for averting, alleviating, or restoring damaged property during times of emergency resulting from storms and floods, and for declaring of an emergency from such causes; compiles basic data on water resources and water use; compiles data on diversions and stream flows on the Sacramento and San Joaquin Rivers and tributaries; performs maintenance work on the Sacramento River Flood Control Project; approves designs and supervises construction of all dams, except those federally owned, as regards their safety; supervises certain flood and storm damage repairs in which the State participates financially; supervises certain public water districts; reviews federal reports on flood control and water supply projects; administers state filings on water and provides watermaster service; makes investigations of surface and underground water supplies; makes water quality investigations; licenses artificial weather control experiments and operations; administers interstate compacts relating to water; administers the Flood Control Fund to reimburse local agencies for their costs incurred by co-operation on federal flood control projects; represents the State on matters pertaining to the Central Valley Project; conducts engineering investigations for the California Districts Securities Commission; supervises construction of hydraulic structures for other state agencies; has responsibility for investigating and correcting beach erosion; and in co-operation with other agencies, forecasts snowmelt and other runoff.

Program and Performance

The Department of Water Resources has 3 divisions—the Division of Design and Construction, the Division of Resources Planning, and the Division of Administration. Work of the 3 divisions is accomplished in Southern California by a district office. The department also has several special staff activities such as supervision of safety of dams, water rights, and watermaster service which are attached to the executive office and are not an integral part of the 3 divisions. There is also the California Water Commission which acts in an advisory capacity to the department.

1957-58

The activities of the Division of Design and Construction during the Fiscal Year 1957-58 with respect to its capital outlay program have centered primarily on design studies relating to the Oroville features of the Feather River Project. The relocation of the highway and railroad through the Oroville Reservoir area was initiated and construction has continued on the highway relocation and on 2 tunnels for the Western Pacific Railroad. Work was started on a steel railroad bridge at Oroville and on a reinforced-concrete arch railroad bridge across the North Fork of the Feather River. Design studies continued on features for the South Bay Aqueduct and for the North Bay Aqueduct. Negotiations were started for the acquisition of the Frenchman Reservoir site, as well as for lands in the San Luis Reservoir area.

In the Southern California area work was continued on the alternate aqueduct studies leading to the selection of the best routes to serve water to the southern portion of the State.

Water right permits were obtained for the Whale Rock Project following the completion of negotiations with water users downstream from the project. Land acquisition, geologic investigations, and design for the Whale Rock Dam were continued.

The Division of Resources Planning, under the California Water Development Planning, continued its investigation of the water resources of all areas of the State, and, operating under the concepts of the California Water Plan, continued studies to determine those projects most feasible for the equitable and comprehensive development of the water resources in the interests of all portions of the State. This program includes projects designed for local development for local areas, as well as statewide distribution of water. Supporting the planning activities are the services of basic data collection, compilation and analysis in the fields of hydrology, meteorology, geology, land and water use, economics, hydroelectric power, surveying, water quality, and services in co-operation with the Federal Government. 4 of the 19 investigations continued into 1957-58 by the Division of Resources Planning were completed and reports were published. New investigations initiated were the nuclear engineering studies, sea water conversion, subsidence studies along the San Joaquin-Southern California aqueduct route and the inventory of water resources and requirements.

The Division of Administration continued to expand its activities to include servicing of the many new activities undertaken by the 2 operating divisions. Special activities included studies of department organization, preliminary work on the Departmental Administrative Manual, and beginning studies of the department's central records system.

Among the special activities of the department headquarters were the dissemination of news by the Public Information Section designed to supply the many demands of the public and to leave technical personnel free to perform technical duties; the geology and topographic staffs functioned as a technical coordinator among the operating divisions and the Southern California District Office; the Supervision of Dams' staff continued to supervise the design, construction, maintenance, and repairs of in excess of 800 dams throughout the State currently under department jurisdiction as to safety and it also assisted the Division of Design and Construction in developing satisfactory designs for Oroville Dam and Whale Rock Dam; the Water Rights and Watermaster Sections provided watermaster service in 17 watermaster service areas throughout the State, represented the department in numerous proceedings before the State Water Rights Board and the Federal Power Commission and carried on numerous activities with respect to state filings; and the department legal staff performed the necessary legal functions for all components of the department, including negotiations for rights-of-way and contracts for project purposes.

During this fiscal year the California Water Commission held public hearings jointly with the department on disposition of state filings involving Dry Creek in Sonoma County and the Feather River Project. The commission developed a 9-point water policy program, setting forth principles as the basis for a statewide water development program on a firm and continuing basis and continued its policy of public hearings on important department publications such as the Northeastern Counties Investigation, the Cache Creek Investigation and the Salinity Control Barrier Study. The commission, in a joint effort with the Director of Water Resources, initiated a federal-state program of co-operation on Corps of Engineers and United States Bureau of Reclamation multiple-purpose flood control and water conservation projects.

DEPARTMENT OF WATER RESOURCES—Continued

GENERAL ANALYSIS—Continued

1958-59

During the Fiscal Year 1958-59 the Division of Design and Construction is concentrating on design of the Oroville features of the Feather River Project, in an effort to complete the preliminary foundation exploration and investigation of alternative types of dams at Oroville. Preliminary design and foundation explorations are being initiated for the San Luis Dam. Location of the San Joaquin-Southern California aqueduct in the San Joaquin Valley from intake to Buena Vista Lake, and for service to Southern California will be completed. The subsidence investigation is being continued in the San Joaquin Valley by construction of a test section of various experimental canal linings to determine the most suitable type of construction for use in this subsidence area. It is also contemplated that contract plans and specifications for the initial unit of the South Bay Aqueduct to deliver water to the west portal of Brushy Peak Tunnel and for the Frenchman Dam in the upper Feather River area will be completed. Plans and specifications for the construction of the initial unit of the North Bay Aqueduct will be completed and design activities will continue on other features of this project. A progress report on the design, marketing studies, economic studies, financial analyses, and other matters pertinent to the Feather River Project will be submitted to the Legislature. Pursuant to a legislative directive, it is proposed to submit a report on the feasibility of constructing a dam at Bidwell Bar.

Final design plans and specifications for the construction of Whale Rock Project in San Luis Obispo County will be completed and construction will be initiated on the dam and necessary relocation of utilities and roads.

The Division of Resources Planning continued 25 investigations in progress at the beginning of 1958-59, of which 7 are planned for completion during the fiscal year. 6 new investigations will be initiated. In addition, studies will be initiated in the fiscal year in connection with recreation, fish and wildlife.

6 junior staff analyst positions were added to the Division of Administration to absorb the increasing workload. The Auditor General's report on the financial records of the department for the fiscal year ending June 30, 1958, received in September, 1958, indicated need for improvement in the accounting field. Several new positions were established on an emergency basis to assist in the improvement of the accounting system, to develop procedures, and to establish additional controls.

As a result of a stepped-up program of water development by local agencies, the California Water Commission is scheduling hearings and making recommendations on disposition of state filings on the Feather, Yuba, and Bear Rivers and Dry Creek in favor of several local agencies. The commission will continue its policy of holding public hearings on important department publications and other matters. It will also assist in securing federal appropriations for flood control and water development in California.

1959-60

During the budget year 1959-60 the Division of Design and Construction proposes to proceed with the final design and preparation of plans and specifications for the dam at the

Oroville site. Exploration programs will continue for the San Luis Dam site and the design of appurtenant structures will be continued. Negotiations will continue for joint use with the United States of the San Luis features. It is proposed to continue acquisition of land areas within the San Luis Reservoir site.

Final design and preparation of plans and specifications for the San Joaquin-Southern California aqueduct will be continued. Design activities south of San Luis will be co-ordinated with the United States Bureau of Reclamation as may be determined by negotiations toward joint use of the facilities. The Division of Design and Construction will continue work on the subsidence program. The design and preparation of plans and specifications from the Brushy Peak Tunnel of the South Bay Aqueduct to the end of the aqueduct at Airport Reservoir including the branch on the north side of Livermore Valley will be completed. The design of 3 additional reservoirs at the Abbey Bridge, Dixie Refuge, and Antelope Valley sites will be initiated for the upper Feather River development. The marketing section will continue negotiations and co-operation with local agencies towards determining the schedules, amounts, time, and points of delivery of project water. Construction of Whale Rock Project will be substantially completed.

The Division of Resources Planning will carry some 25 investigations into the 1959-60 budget year. It is contemplated that 8 of these investigations will be completed and 5 new studies will be initiated within the fiscal year. The study and measurement of the accumulated strain of the earthquake fault system existing in the State is to be continued during the fiscal year. Studies in relation to the California Water Development Planning will be continued.

The Division of Administration will continue to make improvements in the management areas during the budget year with the addition of personnel in the fiscal branch, the personnel branch, and services and supply branch. Emphasis during the budget year will be on systems analyses, improvement of procedures, departmental reorganization problems, and completion of the Departmental Administrative Manual.

The California Water Commission contemplates continuing the activities of the past fiscal year. It is anticipated that the demand for water development construction on the federal state, and local levels will increase materially and that the number of policy considerations will increase in proportion. The growing importance of water development will require decisions on pricing of water, methods of repayment, standards of reimbursability, forms of contracts and other policy matters which will come within the scope of the commission's jurisdiction. The role of the commission in federal appropriation for both Corps of Engineers and Bureau of Reclamation projects, and including watershed protection projects under Public Law 566, will continue. The commission will also continue to review important department publications and hold public hearings in connection therewith as it becomes necessary. It is anticipated that matters of federal policy will weigh heavily in the California water development picture, and that continued participation in this field by the commission will be necessary.

The special staff activities of the department will be continued at the present level of service.

DEPARTMENTAL ADMINISTRATION

Objectives

The director's office provides specialized staff assistance in (1) legal matters; (2) water rights; (3) geology; (4) surveying and mapping; (5) supervision of dams; (6) public information activities; and (7) training.

Program and Performance

The legal activities of the department and the personnel of the legal staff are under the direction and supervision of the chief counsel for the department. To maintain effective supervision and to keep the legal staff flexible for maximum efficiency, it is anticipated that the individual members of the legal staff will not be assigned to separate operating units.

All water right activities, including watermaster service, are under the direction and supervision of a principal hydraulic engineer. These activities include presentation before the State Water Rights Board, administration of state filings, and the acquisition of water rights for state projects. Assistance and advice is available to both operating divisions and the Southern California District Office to assist in problems relating to these as well as other water right matters.

Insofar as watermaster service is concerned, there are 17 watermaster service areas within the State where state water masters are in charge of distribution of water in accordance with court decrees.

The engineering geology staff provides technical guidance in all geologic studies, including both the planning and execution phases, and encompassing establishment of techniques and

DEPARTMENTAL ADMINISTRATION—Continued

Program and Performance—Continued

procedures. The staff will serve as technical consultants to the operating divisions, act as technical coordinators between the divisions and the Southern California District Office, supply geologic services to the Supervision of Dams function, and review all geologic reports prepared by the department prior to submission and release.

As with geology, each operating division will administer and control its own surveyors. The staff position of coordinator of surveying and mapping will have the same type of responsibilities as outlined above for engineering geology, and is available for consultation on methods to be employed, special procedures, basic data, and maps available, utilization of the California Co-ordinate System standardization of notekeeping and computation methods, and general co-ordination of surveying activities within the department. This function will also be responsible for contracts, for aerial photography, surveying or photogrammetric mapping, and directly supervising the preparation of such contracts by division personnel, and is also responsible for the mapping program and priorities relative to the co-operative mapping program with the United States Geological Survey.

The Supervision of Dams staff of the department has the primary duty of supervising the design, construction, maintenance, repairs, alterations, and operation of all dams in the State, except those owned by the Federal Government, to the

extent necessary for safety to life and property. The staff is directed by the principal engineer of dams. Most of the staff of this activity have had extensive field and office experience in the practical, as well as the theoretical aspects of dam design and construction, and will be available to consult with or advise the operating divisions in regard to problems related to dams. In the interests of maintaining uniform standards of safety in works being planned by the department with the standards required of outside agencies, the Supervision of Dams staff will review preliminary dam plans prepared by the Planning Division.

The public information functions of the department are under the supervision of the special representative of the director, with the information officer directly in charge of the public information and public relations program.

The training officer is responsible for all training, personnel development and accident prevention programs of the department, including management and supervisory training, employee development, employee orientation, technical training, and training in accident prevention. The training assistant position is needed to carry out detailed work relating to the department's employee development and rotation program, accident prevention activities, orientation training, supervisory training, training in administrative procedures, and to permit the training officer to devote more time to planning, management, and supervisory and organizational development.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration performs departmental cost control, administrative and management functions, serving the operating division with fiscal, budgetary, personnel, supply, filing, duplicating, stenographic, and other management services.

Program and Performance

Management policies are exercised through the administration of the Fiscal Branch, Personnel Branch, and Services and Supply Branch under the direction of the chief of the division. In addition, and reporting to the chief of the division, are administrative assistants assigned to the Divisions of Resources Planning and Design and Construction, thus providing administrative information and assistance as close to the engineering groups as possible. Also reporting directly to the chief of the division is an Administrative Analysis Section concerned with working out administrative problems on a department-wide basis. Emphasis during the budget year will be on a systems analyses, improvement of procedures, and departmental reorganization problems.

During the 1958-59 Fiscal Year the Auditor General completed an audit of the accounting procedures and records of

the Department of Water Resources for the year ending June 30, 1958. In general, the list of findings in the report was a summary of the accounting and fiscal management problems that existed in the department during the months following its creation by the Legislature in July, 1956. Included was the recommendation that an immediate study be made of the accounting system of the Department of Water Resources by the Department of Finance. Based upon the findings of this proposed study, an accounting system would be designed to furnish the necessary accounting records, procedures and controls needed by the department for efficient and economical operation. In anticipation of this study, and to bring existing records up to date and in an acceptable condition, authority was given to establish several positions on an emergency basis within the Fiscal Branch. These positions are being included as additional positions in the 1959-60 Budget, and include an accounting officer II assigned as assistant accounting officer, general accountant II as internal auditor and systems analyst, and 2 intermediate clerks for general auditing and accounting services at those points where backlog of work is most severe.

1 additional position of intermediate clerk is being proposed in the budget year for the expense voucher audit unit. A review of the work done in this unit shows a 20 percent increase in workload over the past fiscal year. Time not re-

are: (1) continuing activities involving processes of observation collection, interpretation, analysis, or presentation of physical facts, and (2) continuing activities involving matters of state wide interest called for by statutory direction, such as review of federal reports and work for boards and commissions.

Program and Performance

The division functions through 3 branches: Project Development Branch, Engineering Services Branch, and Special Activities Branch.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

PROJECT DEVELOPMENT BRANCH

The Project Development Branch is assigned responsibility for planning studies leading to authorization of project construction. Such responsibility includes investigation and planning under the California Water Development Planning; work in connection with co-operative water resources investigations with local agencies; and a large number of other major studies being made at the specific direction of the Legislature. For purposes of organization, the branch is divided into the following sections:

Major Project Section

The Major Project Section is assigned responsibility for the investigation and development of plans for major water conservation projects in the North Coastal and Sacramento Valley areas. The work in each area has been assigned to a unit of the section. These projects will be designed to provide large quantities of water for transfer to areas of deficient supply within the State. Investigation in each of the 2 areas will entail studies and designs to a greater and more detailed extent than those originally made in connection with the Feather River Project.

Local Projects Section

The Local Projects Section is assigned responsibility for 2 major functions, each of which is assigned to a unit. These units are: Local Projects Unit and Special Investigation Unit. Work of the Local Projects Unit includes investigation, planning and design of complete stream basin developments, particularly on those streams where the available water supply is not sufficient to provide surplus water for large-scale transfer between major hydrographic areas. The Special Investigation Unit conducts investigations and analyses, and prepares plans and reports on water resource investigations conducted in co-operation with local agencies.

California Aqueduct Section

This section is responsible for the integration of the elements of time and economics into the California Water Plan. This involves the determination of the quantity, timing and location of water in areas of need as well as the added responsibility of locating, sizing, and designing aqueducts. These findings are indispensable to the intelligent prosecution of the major and local project planning studies.

ENGINEERING SERVICES BRANCH

The Engineering Data and Services Branch is concerned with the collecting, assembling, developing, and analyzing of all statewide basic water resources data and with providing the other branches and divisions of the department with the technical assistance and supervision and the services of technical engineering specialists. The branch is divided organizationally into the Water Utilization Section, Technical Services Section, and Hydraulic Section.

nical assistance and supervision and the services of technical engineering specialists. The branch is divided organizationally into the Water Utilization Section, Technical Services Section, and Hydraulic Section.

WATER UTILIZATION SECTION

The Water Utilization Section consists of 5 units: Land and Water Use, Economics, Power Planning, Applied Nuclear Engineering, and Fish, Wildlife Recreation.

Applied Nuclear Engineering

This unit was established because of the impact of nuclear energy upon power aspects of water resources development. Nuclear fission, thermonuclear fusion, and solar radiation are gradually emerging as highly important potential factors. Study in this area by the State Department of Water Resources has been recommended in a report to the Legislature by the Subcommittee on Water Project Uses for Atomic Power, of the Assembly Interim Committee on Conservation, Planning, and Public Works.

In Water Resources Planning these new energy sources must be considered from the standpoint of:

1. Competition with conventional hydroelectric plants.
2. A source of heat energy for turbine-driven or motor drive pumps.
3. Impact of pump storage hydroelectric plants.
4. As a source of heat energy for either direct or indirect conversion of saline water and reclamation of waste water.

Power Planning

The activities of the Power Planning Unit are concerned with the planning of power phases of water resources developments, including types and sizes of generation equipment, sizes and routes for transmission lines, and related electrical facilities. Studies are made relative to potential market for power and of alternative means of developing power. Reports are drawn concerning the above, and specialized technical information and services are furnished engineering planning and design groups. The general increase in planning activities of the entire department contributes to main need for these additional positions. As the planning of water projects shifts from the preliminary state to more detailed status, need for specialized power planning services increases. The services of this staff, in addition to the planning activities, are required in connection with legislation and hearings, and hearings of legislative committees, application under the United States Small Reclamation Projects Act and Section 12880 of the Water Code providing for assistance to local projects. In planning the staging of water development and the development of individual initial projects, detailed consideration of power marketing, power for pumping, planning, design, and cost estimating of power features becomes increasingly important.

Fish, Wildlife, and Recreation

This unit supervises and co-ordinates the work of the Department of Water Resources in connection with fisheries, wildlife,

and recreation aspects of water resources development. This work will be supported by appropriations to special projects. Recreation contracts with private firms also will be supervised out of this unit. Establishment of a skeleton staff within the department's organization is considered necessary in order to provide technical continuing supervision over these activities, to determine departmental policy in these areas and to represent this department in its relationship with other state, federal, and private agencies including negotiation of contracts.

Economic Unit

The primary activity of the Economic Unit is to engage in the studies of the economic aspects of statewide water resources projects; to assemble and evaluate economic data pertinent to water development projects; to prepare special reports on economic management and financial matters; to review economic reports and develop conclusions and recommendations on financial and economic feasibility of projects; and to develop benefit-cost relationships. The section draws reports on the above and provides specialized services to the engineering groups as a necessary feature of engineering studies and reports on water resources development. An additional senior economist, 1 associate economist, and 2 assistant research technicians were established in 1958-59 and are proposed to continue to accomplish the work to be done under Assembly Concurrent Resolution No. 14 which calls for a study of the impact on the economic and social structure of the State resulting from different policies of financing, repayment, and pricing of water development projects.

Land and Water Use

The Land and Water Use Unit is engaged in classification of lands as to soil, fertility, land form, and drainage; with the making of crop surveys; with the development of consumption use requirements; and with the preparation of maps and reports related to the above for the purpose of supplying engineering personnel with specialized, technical information essential to water resources planning investigations and engineering reports resulting therefrom. The water use studies involve continuance of studies of various problems of water use at key stations already established, particularly in relation to consumptive use, irrigation efficiencies and water requirements. In addition, it involves establishing criteria and procedures for estimating evaporation rates based on pyrroheliometers, atmometers or evaporation pans. The land use studies involve establishing a program for recurring land use surveys and land use planning for ultimate or stage development of water resources. To the extent staff is available, compilation of land use data will be initiated to indicate rate of development and water use.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

TECHNICAL SERVICES SECTION

Administrative Office

This office was established to facilitate initiation of machine computing work of the department and to provide supervisory assistance necessary for the head of the branch. Included in this section will be the existing activities and organizational units of the Geologic Investigations Unit, the Maps and Surveys Unit, and the Drafting Unit.

The need for this organization level arose from the need to organize and initiate on an accelerated basis the limited activities that have been possible to date on machine computing and control work; the need for supervisory assistance for the chief of the branch, involving stronger line supervision over the Geologic Investigations Unit, the Maps and Surveys Unit, and the Drafting Unit; and the need for establishing a unit to provide technical engineering review of reports of the Resources Planning Division. The unit was activated in 1957-58.

Reports Unit

The purpose of the unit is to co-ordinate the preparation review, editing, and processing of technical engineering reports issued by the Division of Resources Planning. This work was previously done by the division engineer and various section chiefs. In the past, the State Engineer did much of this work personally and as a result, the processing, editing, and reviewing of many reports were unnecessarily delayed. With the increased workload and the greater emphasis on engineering reports, it has been impossible for the division engineer to handle this responsibility. A small reports unit was established informally in 1 section of the Projects Development Branch to work on the California Water Plan reports.

Maps and Surveys

The Maps and Surveys Section administers the co-operative mapping program carried on with the Federal Government; continuously investigates the adequacy of topographical map coverage of the State and indicates priorities for new or revised mapping; co-ordinates mapping activities within the entire department and with the outside agencies in order to avoid duplication of effort; and maintains an index of state maps and provides a central source of maps and mapping information for state, federal, and local agencies and other parties. This section also supervises the production of maps from aerial photographs by photogrammetric means. 3 additional assistant civil engineer positions are proposed to accommodate the total increase in workload in the Maps and Surveys Unit. A significant part of this increase is brought about by the fault strain measurement program begun in the 1958-59 Fiscal Year. The objective of this program is to determine by surveying and other means the amount and kind of movements that have developed or which may develop along fault lines located within the transport routes of the Feather River Project. The office and fieldwork necessary in connection with this program and the effects of the fault strain program on other phases of the sustaining activities of the Maps and Surveys Unit will occupy the time of personnel in these new positions.

Geologic Investigation

The Geologic Investigations Unit is engaged in geologic investigations in connection with the occurrence and movement of ground waters, with particular reference to quality of water; with relation to water well construction standards; and con-

cerning field investigations relating to structural geology for the purpose of statewide planning for the location and construction of major dams, tunnels, canals, and other hydraulic structures. The services provided include investigation of geologic conditions pertaining to hydraulic engineering structures and ground water, evaluation of and supervision of drilling activities, and preparation of geologic reports. The support activities include technical supervision of the geologic work done in the Division of Resources Planning; co-ordination of work done by personnel with that being done by contract; provision of staff geologic service to the division engineer on special studies; and the continued study of mechanisms, causes and effects of land subsidence in the San Joaquin Valley. 1 additional assistant engineering geologist is proposed to plan the geologic phases of the fault strain measurement program and to co-ordinate this program with the other activities of the Geologic Unit.

Drafting Unit

This unit provides drafting services to all programs in the department in need of such service.

Machine Computing and Control

Machine computation and control has been brought into being by the need to increase the output of work by available engineers who are now engaged in highly technical but nevertheless repetitive manual computation procedures. The section is composed of a small, highly competent staff of engineers and technicians who will serve immediate additional workload demands of the department and who will develop and perfect a plan for a full staff and proper equipment to meet the growing demands for increasing efficiency by machine computing methods and machine recordation.

The potential application of electronic and mechanical methods in the department are unusually broad in scope and varies in type. Roughly they can be classified as follows:

1. Recordation—This is mechanization of recording, analysis, and reporting of basic hydrological data.
2. Computation—This is the performance of technical engineering computations by electronic equipment. These applications can be divided into 3 groups:
 - a. Routine and repetitive, regularly occurring, simple arithmetical computations, such as reductions of current meter measurement notes, ground water level observations, and land classification and land use data.
 - b. Intermittent, or infrequent, long sequences of repetitive computations, including simple reservoir operation, slip circle analysis, earthwork volume computations, and correlation computations.
 - c. 1-time computations involving intricate and exhaustive numerical processes, such as rigorous computation processes, extremely large volumes of data, and limited personnel time.

During the last year progress has been made in developing both the organization and staffing. It has been determined, subsequent to the preparation of the detailed budget request, to establish 2 organizational units primarily concerned with machine computing and control activities. These will be an Engineering Methods Analysis Unit and a Machine Operations Unit, both of which will report directly to the chief of the Technical Services Section.

HYDRAULIC SECTION

The Hydraulic Section is concerned with the measurement of stream flow; installation and operation of gaging stations; hydrographic studies of stream and tidal channels; administration of co-operative snow surveys program; collection and analysis of climatological and meteorological data for purposes of developing annual statewide water crop forecasts; measurements of ground water levels throughout the State, including collection and assembling of well data; and other related activities having to do with the collection and analysis of hydraulic engineering data.

Hydraulic Unit

The establishment of this unit is proposed to provide uniformity in hydrological methods through a specialized staff which keeps informed on all current developments and tech-

niques in this specialized field. Initially, this unit will undertake the estimates of flood discharge and stream flow for use in planning and design. The unit will conduct studies involving the derivation of basin characteristics and rainfall-runoff relationship, including preparation of estimates or runoff and discharge rates for use by other activities of the department. 1 specific activity will be a continuing analysis of kind and location of stream gaging stations. The purpose of a centralized unit for this work is to insure the use of the most effective methods by other parts of the agency in hydrologic analyses, that the same techniques and data are used in the same areas on different investigations, and that duplications of work are kept to a minimum. The recommendation for actual construction of a project, as well as its size, location, and major features will depend upon the results of these analyses.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

HYDRAULIC SECTION—Continued

Ground Water Unit

The objectives of this unit established in 1956-57 are to collect and process ground water data for all ground water basins in central and northern California, and to act as a general statewide co-ordinating and clearing agency for all basic ground water data. The unit selects grids of wells for measurement which will permit the preparation of accurate water level contour maps showing for the spring and fall of each year the depth to, elevations, and changes in water levels. These data will be published in a series of annual reports.

Many of the records have been established through co-operative programs and the unit plans to establish and extend co-operative programs wherever possible. Local agencies are encouraged to make the bulk of well measurements and assist in making well canvasses.

Surface Water Unit

The Surface Water Unit operates the stream-gaging program for the department. This includes the Sacramento-San Joaquin Water Supervision Program, stream-gaging stations, flood flows and stages in the Central Valley and the Tule River diversions. A new part of the budget of this unit is the continuing program

of operation and maintenance of stream-gaging stations installed for specific investigations outside of the water supervision area. There are about 700 stream gages in operation in California of which 300 are operated by the United States Geological Survey, 300 by the State in co-operation with the United States Geological Survey, and 100 solely owned and operated by the State. 80 stations of this latter group are operated outside the water supervision area on behalf of California Water Development Planning.

Meteorologic Unit

The Meteorologic Unit is engaged in the weather modification and snow survey programs. The primary function of the unit is that of co-ordinating the efforts of many state, federal, local, and private agencies in the collection and publication of data. In addition, the unit takes snow measurements in limited areas, and publishes forecasts of runoff 4 times annually between April and July for 15 points in central and northern California. This unit administers the Snowpack Management Program conducted in conjunction with the United States Department of Agriculture. This is a 5-year program started in 1956-57 and financed through the appropriation for work in co-operation with the Federal Government.

SPECIAL ACTIVITIES BRANCH

The Special Activities Branch is concerned with conducting engineering investigations and preparation of reports concerning activities that are not properly a part of the work of the other 2 branches of the division. Such activities are in part dictated by statute under various sections of the water Code and specific sections of federal statutes, and in part by the need to secure and analyze data necessary in a variety of special investigations, including work for the California-Nevada Interstate Compact Commission. The branch is divided organizationally into the following sections:

Water Quality Section

The activities of the Water Quality Section include federal co-operation and water analyses; investigations and formulation of plans for the reclamation of waste waters for beneficial uses; ground water studies and recommendations for minimum standards of well construction; investigations for the State and regional water pollution control boards; investigation of the quality of all water, including saline water, as related to sources of pollution; monitoring of surface and ground waters; and all water quality studies required in connection with water resources investigations undertaken by the department. The work program includes 3 major programs; statutory investigations, the southern Alameda salt water intrusion study, and the lower San Joaquin Valley water quality investigation.

Special Investigations Section

The Special Investigations Section is concerned with engineering investigations which are broad in scope and which have as objectives making possible the orderly development of the State's water resources by promoting intrastate and interstate agreements on water rights, the determining of exportable water supplies from all watersheds of the State, and need for such supplies in areas of deficiency. An example of such investigations would be the work being done as requested by the 1956 Legislature to make an inventory by watershed of the quantities

of water originating therein; the amounts needed in each watershed for use therein; and the amounts available for export. A further example would be the work done on trial distribution of the waters of the Sacramento, Feather, and American Rivers, as well as the work being done for the intrastate compact commissions mentioned above.

Engineering Reports and Review Section

The work of the Engineering Reports and Review Section involves the broad technical studies required by the department in acting on the numerous legal and engineering problems involved in representing the State in connection with operation and construction of the Central Valley Project and studies necessary in review of federal reports dealing with reclamation, flood control, and water conservation in California. Specifically, activities include analysis of construction plans and costs; preparation of an annual report on the status of the Central Valley Project containing recommendations to the Congress for appropriation of funds; and making operational studies to determine yields of water and power from the project. Reports review activities result in recommendations by the State as to water requirements, water supply, design, operation, cost estimates, and economic and financial feasibility of proposed federal projects. Similar review reports are required for projects proposed under the Small Watershed Protection Act, Public Law 566, and under the Small Reclamation Projects Act, Public Law 984. This section will also be involved in review of projects to be financed under Section 12880 of the Water Code, when activated. This section also discharges the department's obligation under the law to conduct studies as to the engineering and economic feasibility of proposed formation of irrigation districts, water storage districts, replenishment districts, resort districts, and other public districts. Also, this group conducts investigations required by law concerning operations of existing public districts, including inspection and supervision of construction activities of the various districts and preparation of reports of operations of all irrigation districts.

DIVISION OF DESIGN AND CONSTRUCTION

Objectives

The Division of Design and Construction has responsibility for performing the detailed engineering design for construction of all projects within the jurisdiction of the department, including the necessary surveys, geologic and materials investigation, and include those delegated to the department directly and those performed for other state agencies; flood damage repair; San

Joaquin River Flood Control Project; coastal engineering; development projects for Division of Beaches and Parks or Department of Fish and Game; the operation of the Sacramento River Flood Control Projects, including the maintenance thereof, and water supply forecasting and warning.

DESIGN BRANCH

Program and Performance

The Design Branch has responsibility for preparing detailed engineering designs, drawings, and plans and specifications for the construction of all projects within the jurisdiction of the department. At the present time, the major design project is the Feather River Project, and this work is being done by 4 sections within this branch—Dam Design Section, Aqueduct Section, Electrical and Mechanical Section, and Exploration Section. Design work on other projects is performed by the Special Services Section within this branch.

Dam Design Section

This section is concerned with the study and investigation of alternate designs of all dams proposed for construction on the Feather River Project.

Aqueduct Section

This section is responsible for the design of the San Joaquin-Southern California Aqueduct from the intake at the Delta to the aqueduct terminus in Southern California. Structures include canals, siphons, bridges, buildings for housing the pumping plants, and other physical features involved in the aqueduct, except those for the motors and pumps at the pumping plants.

Electrical and Mechanical Section

This section performs the work involving design and preparation of drawings and specifications for all the electrical and mechanical equipment at the power plants and pumping plants for the Feather River Project.

Exploration Section

This section is concerned with all subsurface geologic investigations necessary to determine the design criteria for structures on the Feather River Project.

Special Services Section

This section has responsibility for the work not normally of a design nature, such as hydraulic studies, including model studies; collection and analyses of hydrologic data; planning and designing of miscellaneous structures for other state agencies for flood control, beach erosion control, navigation channel control, and related works; and preparation of construction plans and specifications therefor.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF DESIGN AND CONSTRUCTION—Continued

HYDRAULIC ENGINEERING LABORATORY

The Hydraulic Engineering Laboratory Branch embraces the physical and chemical testing of all materials in which the Department of Water Resources is interested. The work is divided among 3 sections, each of which is described as follows:

Chemical Section

This section makes the chemical, biochemical and biological analyses of water in connection with Statewide Water Quality Investigations and the determination of water quality as involved in numerous other studies conducted by the department.

Concrete Section

This section is responsible for the determination of concrete mixes and the testing of concrete aggregates, as well as determining the physical character of concrete.

Materials and Soils Section

This section performs the work involved in making the laboratory tests, both structural and physical, of materials and soils as they affect projects under consideration for construction by the department.

PROJECT ADMINISTRATION BRANCH

The Project Administration Branch is involved in the acquisition of properties and of rights-of-way, relocation of facilities, bidding and award of contracts, and marketing of water and power made available by the Feather River Project. The branch is divided into 3 parts as described below:

Contracts Administration Section

This section has the responsibility for preparing final specifications; for prequalification of contractors; opening of bids; awards of contracts; contract changes; and progress payments.

Surveys and Acquisition Section

This section has the responsibility of preparing maps; performing necessary surveying; making rights-of-way locations;

and negotiating for acquisition of all properties required for the highway and railroad relocations and for aqueduct line and reservoir sites.

Marketing Section

This section is concerned with the collecting and evaluation of data affecting the marketing of water and power. Analyses and recommendations are made of rates to be charged for various classes of water and power by areas which are based on ability of the market to absorb and ability of consumer to pay. Contracts for the sale of water and power will be negotiated by the staff in this section.

CONSTRUCTION BRANCH

The Construction Branch has responsibility for actual construction of any project being built under the supervision of the department, except the Feather River Project. Until such time as a Division of Operations may be activated, the Construction Branch will also have the responsibility for such items as flood forecasting and water supply, supervision of flood control projects, and the installation of communications systems.

Special Projects Section

This section is charged with the responsibility of supervising the construction of special projects authorized by the Legislature or transferred from other departments pursuant to the State Contract Act, such as work of flood damage repair; San Joaquin River Flood Control; coastal engineering; and development projects for Division of Beaches and Parks or Department of Fish and Game.

Flood Control Projects Section

This section is responsible for the operation and maintenance of the Sacramento River Flood Control Project; the supervision of local agency maintenance of other flood control project works in accordance with federal regulations and state law; co-operation with the Corps of Engineers, State Reclamation Board, and local agencies regarding flood control projects maintenance; review of applications to Reclamation Board; Yuba River Debris Control Project co-operation; investigations and plans for operation and maintenance of the Sacramento River Flood Control Project; flood control features investigation for Bay Barrier and California Water Plan; and review of federal reports relating to flood control and co-operative studies for formulation of rules for multi-purpose reservoir operations.

7 new positions are included for the Flood Control Section of the Construction Branch due to increased workload and the addition of new maintenance areas as follows:

1 senior hydraulic engineer and 1 associate hydraulic engineer are proposed to prepare for the trials arising from pending court action due to flood damage claims. These 2 positions will be fully reimbursed from the State Reclamation Board.

1 associate hydraulic engineer, 1 assistant hydraulic engineer, and 1 junior civil engineer are required to conduct spillway design flow studies. These positions will be financed from capital outlay funds.

2 additional positions are included to be financed from the support budget. 1 additional junior civil engineer is proposed to process the increased workload of Reclamation Board applications. 1 assistant engineer is proposed for increased workload in connection with additional maintenance areas.

Flood Control Projects Operations Section

This section is concerned with water supply forecasting, flood hazard forecasting, and flood hazard warnings.

Communications Section

This section is organized for the purpose of designing and installing a communication system for use in flood forecasting and for use during flood emergencies. During the construction and subsequent operation of the Feather River Project, a communication network will be installed throughout the State for use in the operation of the project. The system will be designed, operated, and maintained by personnel within this section and within the State Communications Division.

Branch, Planning Branch, and a Design and Construction Branch. The district engineer's office, together with the Administration and Planning Branches, is located in Los Angeles. The Design and Construction Branch is located at a branch office in Glendale. No increase in total district staff is included for 1959-60. However, it is proposed that a total of 9 existing positions be transferred to accommodate the proposed change in function and activities within the district.

for preparation of final designs, plans, and specifications for authorized projects; the acquisition of lands, easements, and rights-of-way required for the Whale Rock Project; the supervision of construction activities; and the investigations prerequisite to the sale of water from completed projects and eventually the acquisition of properties for the San Joaquin Valley-Southern California Aqueduct.

continue to carry out the statutory functions of the department, and will continue the program to secure and process hydrologic data in order to be informed at all times of the water situation, as regards both quality and quantity in the basins in the Southern California District.

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PLANNING

SUMMARY

California Water Development Planning is an intensive and continuing program of study of the needs for specific local and statewide water development projects, analysis of their economic justification and financial feasibility, and determination of the recommended priority of their construction, using the California Water Plan as a general guide. It is believed such a program is necessary to enable the planning endeavor to keep pace with the needs of a rapidly growing State. As an example, the population

of the State is increasing at a rate exceeding 500,000 per year. This increase demands the development of new sustaining supplies of water at the rate of some 750,000 acre-feet per year.

The California Water Development Planning is of necessity a long-range program, wherein works will be recommended for construction when and as they are needed with due consideration to varying interests. The program, which was initiated in Fiscal Year 1956-57 is now in its third year.

MAJOR PROJECTS

North Coastal Development

This is a comprehensive feasibility type investigation of selected features of the California Aqueduct System within the North Coastal Area. These features will comprise an initial multipurpose project to develop and export 1.5-2.5 million acre-feet of surplus waters to the Delta Pool. The project will consist of major storage reservoirs, hydroelectric power plants, pumping plants, tunnels, and other conveyance works. Original funds were appropriated as part of the California Water Development Planning by the Budget Act of 1956, Item 223. Continuing funds were appropriated by the Budget Acts of 1957 and 1958. A reconnaissance report programming stage development of the streams of the North Coastal Area and selecting an initial project for more detailed investigation is to be completed about January 1, 1959. The feasibility report on the selected project is to be completed about January 1, 1963.

Yuba-Bear River Development

This is a feasibility type investigation of a comprehensive plan to develop the water resources of the Yuba and Bear Rivers for multipurpose local and export use. The plan consists of major and minor storage reservoirs, hydroelectric power plants, tunnels, and other conveyance works. Original funds were appropriated as part of the California Water Development Planning by the Budget Act of 1956, Item 223. Senate Concurrent Resolution No. 130, Resolutions Chapter 296, Statutes of 1957, requires that feasibility studies be expedited. Continuing funds were appropriated by the Budget

Act of 1957 and 1958. A feasibility report on the initial units of the development is to be completed about January 1, 1959. A special report on the feasibility of Parks Bar Reservoir for flood control is required at the same time under the provisions of Assembly Concurrent Resolution No. 56, Statutes of 1958. A preliminary report on the entire program of development is to be completed about January 1, 1962, and a feasibility report on the remaining units is to be completed about January 1, 1963.

Upper Sacramento River Development

This is a comprehensive feasibility type investigation of a multipurpose project to develop the Upper Sacramento River and its tributaries between Shasta Dam and Red Bluff for local and export use. The investigation will also include consideration of Paskenta Reservoir on Thomas Creek which enters Sacramento River below Red Bluff. The project will consist of major and minor storage reservoirs, hydroelectric power plants, tunnels and other conveyance works. Original funds were appropriated as part of the California Water Development Planning by the Budget Act of 1956, Item 223. Continuing funds were appropriated by the Budget Acts of 1957 and 1958. Assembly Concurrent Resolution No. 33, Resolutions Chapter 96, Statutes of 1958, requested an interim report on the project to be completed about January 1, 1960. The final feasibility report is scheduled to be completed about January 1, 1963.

LOCAL PROJECTS

During the 1959-60 Fiscal Year this section is scheduling the following ten investigations: Northeastern Counties Ground Water, Mokelumne-Stanislaus-Calaveras, Cache Creek Basin, Mariposa Area, Tuolumne County Water District No. 2 Co-operative, Southern Tuolumne County Co-operative, Branscomb, Madera Area, Upper Putah Creek and Cosumnes Area.

Ground Water North Eastern Counties Investigation

The following studies have been or are being made in connection with this ground water investigation: surface water measurements, precipitation measurements, well measurements, drilling of test holes, geologic explorations, geologic surface mapping, consumptive use studies, hydrographic mapping, and economics of ground water pumping.

This investigation is a study of 10 major valley fill areas in northeastern California to determine their potential as a source of ground water supply. The purpose of the investigation is to bring together the available geologic and hydrologic data characterizing the individual ground water basins and to publish this information in order to facilitate the profitable and economical use of ground water as a dependable local water supply.

There is need for water development as indicated by local interests desiring the immediate construction of surface works to serve Big Valley in Modoc, and Lassen Counties. This and other areas of these basins have a serious water shortage in the latter part of the growing season, which reduces the agricultural production of the areas. Studies conducted during the Northeastern Counties Investigation disclosed that certain areas were actually areas of water deficiency. Other areas

appeared to have adequate water resources to satisfy the estimated water requirements, but the development of surface water supplies would be difficult and costly.

Mokelumne-Stanislaus-Calaveras River Basins Investigation

This investigation is a continuation of a study of water development of the Mokelumne-Stanislaus-Calaveras River Basins. During Fiscal Year 1958-59 it is contemplated that a feasibility report on the first stage of development will be published.

The East Bay Municipal Utility District is proposing works on the Mokelumne River for the purpose of exporting water to the Bay area. This proposal has resulted in serious water rights problems encompassing the counties of Amador, Calaveras, and San Joaquin. Furthermore, the United States Bureau of Reclamation is making studies of the Folsom-South Canal, and the Corps of Engineers, U. S. Army, is studying both New Hogan and New Melones Reservoirs.

During the 1957 session of the Legislature Senate Concurrent Resolution No. 109 was passed which directed the department to expedite its studies under the California Water Development Planning in this area, and to formulate plans for projects to serve the foothills and mountainous areas within these watersheds and valley lands adjacent thereto, including the City of Stockton.

The above conditions result in the need for a comprehensive study in order to co-ordinate water development and allow for its accomplishment in the most feasible and economic manner. These studies include water for conjunctive operation of upstream development as well as reservoirs to serve the valley floor and for export of water.

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PLANNING—Continued

LOCAL PROJECTS—Continued

Cache Creek Investigation

The Cache Creek Investigation is a comprehensive basin-wide study which is being continued as a result of local interests in Yolo and Lake Counties expressing approval of Bulletin No. 20, "Comparison of Alternative Wilson Valley and Guinda Projects on Cache Creek," published by the department in April, 1958.

The Wilson Valley Project, which would be constructed principally to satisfy the water needs of Yolo County, would have a substantial effect on Lake County with respect to recreation and flood control.

Water development projects are needed in the Cache Creek Basin to satisfy the demand for increased need for irrigation water as well as to provide flood control to the lands adjacent to Clear Lake and the lower reaches of Cache Creek. Through reduction in the fluctuation of the water level in Clear Lake considerable expansion of the existing recreation facilities at the lake could take place.

In order to determine the feasibility of the Wilson Valley Project, it is necessary to consider the effects and benefits which could accrue to the Clear Lake area through construction of Wilson Valley Dam.

The work to be accomplished during the 1959-60 Fiscal Year would include the evaluation of data on the engineering, power planning, water quality, and recreation aspects of the investigation. It is planned that a report on the investigation will be prepared and published by July, 1960.

Mariposa Area

This is the third year of a scheduled 3-year investigation with the objective of determining a comprehensive plan for water development and utilization in the Mariposa area. Included in the objective is the determination of economic justification and financial feasibility of initial projects for water resources development in the near future which could involve portions of Mariposa, Merced and Madera Counties.

At the present time small water development projects are being constructed by individuals in the area for local use. As a result the water development is piecemeal and costly. A comprehensive areawide plan for ultimate development will provide a framework within which water projects could be constructed for multiple purposes including irrigation, domestic, power, flood control, fish, wildlife, and recreation.

The need for this investigation is based on the urgency of determining plans for upstream development in Mariposa County in conjunction with plans of the Merced Irrigation District to meet requirements on the valley floor in Merced County. Through this co-ordination in planning there will be determined a comprehensive water plan for the area which will be of the greatest mutual benefit.

Tuolumne County Water District No. 2 Co-operative

This is the second year of a 2-year co-operative investigation of the Tuolumne County Water District No. 2 area.

This area has long been concerned with the development of a supplemental water supply. Recent events which have intensified local interests in pursuing a plan for these developments include a rapid growth in resort and residential areas on the ridge east of Sonora, an increase in water price to \$11 per acre-foot for existing deliveries, and water development projects in the area recently constructed and proposed for the purpose of supplying water for use outside the county on the Sacramento Valley floor.

The Tri-Dam Project, consisting of Donnell's, Beardsley, and Tulloch Dams and Reservoirs, was recently constructed by the Oakdale and South San Joaquin Irrigation Districts.

The City and County of San Francisco and the Turlock and Modesto Irrigation Districts hold most of the established water rights on the Tuolumne River. Since works for storage and diversion of water for use in Tuolumne County Water District No. 2 are proposed on the North Fork of the Tuolumne River, studies will have to be made to estimate the amount of surplus water remaining in this stream.

In addition, the United States Corps of Engineers released a feasibility report on the New Melones Project in March, 1957. The report proposes a new dam below the existing Melones Dam on the Stanislaus River for flood control, power generation, and conservation purposes.

The investigation has as its objective the preparation of a plan for supplying water for development of an area admirably suited to recreation, homesites, livestock raising, as well as agricultural purposes. The feasibility of an initial project, utilizing the most desirable features of an ultimate water plan, would be determined.

Southern Tuolumne County Co-operative

This is a companion investigation to that of the Tuolumne County Water District No. 2 Co-operative and comprises the area of Tuolumne County south of the water district. This will be the second year of a 2-year co-operative investigation, jointly financed by the county and the State.

The recreation and resort potential is extremely favorable in the Groveland area and to the east along Highway 120, leading to Yosemite National Park. Irrigable lands exist in the area but have not been developed. The economy of the area could be increased considerably through development of a firm water supply to satisfy the water requirements for recreation, urban, fish and wildlife, and recreation purposes.

The area is presently without a source of firm water supply except for a few scattered wells of undetermined yield. The City and County of San Francisco recently completed the construction of the Cherry Valley Dam on Cherry Creek. New Don Pedro Dam on the Tuolumne River is proposed for construction in the not too distant future.

The bulk of established water rights on the Tuolumne River are held by the City and County of San Francisco and the Turlock and Modesto Irrigation Districts. Tuolumne County Water District No. 2 has applications on the North Fork and several tributaries of the Tuolumne River. The County of Tuolumne has applications on the South and Middle Forks of the Tuolumne River.

In order to develop the Tuolumne River for the benefit of upstream, valley floor, and export users, detailed studies are necessary. These studies, starting in the 1958-59 Fiscal Year, would include land and water use, economics, fish, wildlife and recreation, geology, mapping, hydroelectric power generation, hydrology, water rights, and plans for development.

Branscomb Investigation

The Branscomb Investigation was initiated as a 2-year investigation in accordance with House Resolution No. 296 of the 1957 Legislative Session. It is scheduled to be completed by July, 1960.

This resolution requested the Department of Water Resources "to expedite as a part of the California Water Development Planning, the investigation as to engineering, economic, and financial feasibility of a dam and reservoir in the Branscomb and alternative sites on the South Fork of the Eel River in Mendocino County."

Recreation and fisheries are important industries in this area of the State. The Branscomb Reservoir would greatly increase the quality of fisheries habitat in the South Fork of the Eel River and benefit all recreation along the stream.

Releases of water from the reservoir would eliminate summer stagnation in pools and temperatures intolerable to fish life. It is possible that a minimum flow of 100 second-feet could be provided in the South Fork of the Eel River below Rattlesnake Creek. In addition to fishery enhancement, there would be provided recreational benefits at the reservoir.

Madera Area Investigation

This is the first year of a 3-year investigation of the Madera area, bounded on the north by Mariposa and Merced Counties and on the south by Fresno County. It has as its objective, the development of plans for serving the foothill and mountainous areas above Madera Canal as well as providing supplemental water to the valley floor. The existing Madera Canal from Friant Dam is not able to supply the water demand on the valley floor in Madera County. With an increased supply of water additional lands in the area could be developed for irrigated agriculture. This study would consider means of increasing the available supply from Madera Canal to meet these needs through the construction of storage works along the canal.

The economy of foothill and mountainous areas could be increased through the development of a water supply for agricultural, urban, fish and wildlife, power, and recreational purposes.

The department has made or is making similar studies in the central Sierra Nevada area. This investigation would extend these studies southward to include Madera County, and would have the advantage of concurrently studying areas having similar water development problems. These problems include water deficiencies in so-called areas of origin, recreational development, water shortages due to large export projects and a limited local financial capability. In addition, an analysis of local ultimate water requirements is necessary to insure an adequate water supply for the areas of origin in connection with federal agency studies of Buchanan, Hidden, Bailey Flat, and Windy Gap Dams.

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PLANNING—Continued

LOCAL PROJECTS—Continued

Upper Putah Creek Investigation

The Upper Putah Creek Investigation is a proposed two-year study to develop a plan for water conservation in the basin above Monticello Reservoir. It is necessary to proceed with the investigation at this time because there is contained in the water right permit granted to the United States Bureau of Reclamation for the Solano project a statement that an annual amount of 33,000 acre-feet of water is reserved for upstream use. It is also stated, however, that the rights to this water will be lost to that area unless it is put to beneficial use before it is needed in the Solano project service area. It is urgent, therefore, that a plan be developed by which the water can be used in the upper basin.

The department has received a resolution from the Board of Supervisors of Lake County requesting the investigation.

There are two areas of contiguous irrigable land in the upper basin, these are the Middletown and Pope Valley areas. It is planned that the principal effort of the investigation will be directed toward developing and determining the feasibility of a plan for water conservation to supply the needs of those areas. Both surface and ground water supplies will be investigated. It also is planned to give consideration to the needs for water for recreational development.

Cosumnes Area Investigation

This is the first year of a three-year investigation of the Cosumnes Area Investigation. It would be a comprehensive

study of the water resources and water requirements of Amador County and portions of El Dorado and Sacramento Counties. The northerly boundary of the area of investigation is the divide between the American River basin and the Cosumnes River basin. On the south it is bounded by the Mokelumne River and on the west by the service area of the Folsom South Canal.

At the present time serious water problems are impeding the development of the Mokelumne River by the East Bay Municipal Utility District. The United States Bureau of Reclamation is studying the Nashville project on the Cosumnes River. The bureau is also completing studies of the Folsom South Canal to supply water to the valley floor in Sacramento and San Joaquin Counties. In addition, the Board of Supervisors of Amador County has requested the department to conduct a preliminary examination of the county in order to prepare a program for an investigation to determine a water development plan for the area.

The objective of the investigation would be to determine engineering feasibility of a comprehensive water development plan to serve this area, and would include preliminary design of the required structures in sufficient detail to determine their costs. Economic justification and financial feasibility would be determined of an initial project which could be built in the near future.

The studies conducted under this program would be co-ordinated with the East Bay Municipal Utility District's plans for development of the Mokelumne River and the United States Bureau of Reclamation's plans for development of the Cosumnes River and the Folsom South Canal.

CALIFORNIA AQUEDUCT PROJECTS

The broad objective of the California Aqueduct Section involves integration of the elements of time and economics into the California Water Plan. This objective necessitates comprehensive investigation of the growth of economic market for water and hydroelectric power in each and every potential market area of the State, followed by selection of projects best suited to meet the needs so determined. The first step, determination of the quantity, timing and location of need, is vital to the department's planning effort, as findings thereof are indispensable to the intelligent prosecution of the major and local project planning studies presently in progress.

In addition to determining the future economic growth of water demands throughout the State, consideration must be given to the effect of future developments and increases in consumptive use in the watersheds tributary to the Delta on the water supply presently available in the Delta, and on the yield of existing and authorized projects dependent for their export supply on the availability of surplus waters in the Delta channels. As the Delta is presently, and will continue to be in the future, the hub of transfer of surplus waters from the north to the central and southern portions of the State, the effects of future developments on the water supply available in the Delta is an extremely important consideration. In its resolution lie the answers to the new basin yield of projects developed in the area draining to the Delta and the timing of major export projects. In addition, the knowledge gained from solution of this problem may have a profound effect on water policies adopted with regard to the allocation of water to the various areas of the State and pricing and repayment.

This section has the added responsibility of locating, sizing, and designing aqueducts to convey water developed by the major projects to the areas of need. The responsibility for conducting an investigation of present and probable future seepage conditions along the channels of the Sacramento River system constitutes a special case of the basic responsibility for aqueduct planning. The need for sizing, and timing of an aqueduct to transport North Coastal water through the Sacramento Valley to the Delta will depend to a large extent upon the degree to which seepage conditions might be aggravated through future use of the natural channels as conveyors of project water.

The work program proposed for Fiscal Year 1959-60 is discussed in the paragraphs that follow.

Staging

Fiscal Year 1959-60 will constitute the third year of endeavor on the programing studies. As in the previous two years, the San Joaquin Valley will constitute the principal area of investigation. By the end of the current fiscal period present land use of the entire floor of the San Joaquin Valley will have been surveyed and the collection of all other essential basic data will

have been completed on the valley floor portions of Kern, Kings, Fresno and Tulare Counties. During Fiscal Year 1959-60 analysis of the data collected during the previous two years will be completed and similar basic data, exclusive of land use, collected for the remainder of the San Joaquin Valley floor (basically, Madera, Merced, Stanislaus Counties and much of San Joaquin County).

Central Valley Operations

Evaluation of the effect of future development on the supplies available in the Sacramento-San Joaquin Delta necessitates a comprehensive operation study of the entire Central Valley, wherein all projects whether local, state or federal must be taken into consideration, as must the operation of the ground water basins in those valleys.

Fiscal Year 1959-60 will constitute the second year of the Central Valley Operations Studies. As in the first year the objectives of this study are to determine the surplus flows available in the Sacramento-San Joaquin Delta at present and under various stages of future development on streams tributary thereto.

The initial year of study, 1958-59, is being pointed toward the development of data on stream flow on major tributaries to the Delta, water requirements and utilization in the tributary drainage area and operating criteria for all reservoirs influencing flow in the tributaries. These data will be utilized in a machine programmed operation study of existing and proposed reservoirs in the Sacramento-San Joaquin Valley to determine surplus flows in the Delta under various conditions of development.

The second year (1959-60) will be a continuation of the foregoing program. These complex operation studies will be performed over a wide range of assumed conditions of development, so that the future availability of divertible surpluses in the Delta can be ascertained.

Aqueduct Design

Fiscal Year 1959-60 will constitute the second year of aqueduct design studies. During Fiscal Year 1958-59 a route was selected for a coastal aqueduct from the North Coastal area to Southern California on the basis of a reconnaissance survey. Preliminary designs and cost estimates were also prepared for this alignment. It is proposed that alternative routes be investigated during Fiscal Year 1959-60.

In addition reconnaissance surveys and preliminary designs of works required to import water to areas of need on the east side of the San Joaquin Valley are scheduled for Fiscal Year 1959-60.

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

CALIFORNIA AQUEDUCT PROJECTS—Continued

Sacramento Valley Seepage

On February 6, 1953, the Water Project Authority of the State of California and the Division of Water Resources entered into a service agreement under which \$30,400 was provided for the Division of Water Resources to conduct an investigation of seepage problems in the Sacramento Valley. Subsequent allotments of \$20,000 and \$7,500 were provided by the Water Project Authority in February, 1954, and May, 1955, respectively. A report entitled, "Report to the Water Project Authority of the State of California on Seepage Conditions in Sacramento Valley," was published under date of June, 1955. The scope of the investigation and report was confined to development of, "preliminary findings with regard to: (1) the location and extent of damage caused by waterlogging along the rivers and by-pass channels in the Sacramento Valley; (2) causes or factors contributing to such conditions; and (3) possible methods of solution of waterlogging resulting from seepage from the river or by-pass channels." The conclusion was reached as a result of this preliminary investigation that a 5-year comprehensive investigation should be undertaken.

The runoff season of 1957-58 was an unusually wet one. Data of a seasonal nature that would have been lost for all time had it not been collected, was gathered as a part of the California Water Development Planning.

It is proposed that during Fiscal Year 1959-60 the previous investigation be thoroughly reviewed, that data collected since 1955 be analyzed, and that a more comprehensive treatment of economic damages and costs of adequate control be made to obtain proper perspective of the problem.

San Joaquin Valley Drainage Investigation

The San Joaquin Valley Drainage Investigation has as its purpose the development of a master drainage plan for the San Joaquin Valley and detailed feasibility studies of drainage projects for specific areas presently or imminently in need of relief. This will be the third of a 4-year period of investigation.

The study of drainage problems in the San Joaquin Valley is recognized to be one of the most necessary activities that the department has under way, if the problems relating to interbasin transfers of water are to be resolved. It is apparent that an acceptable solution to the present and future drainage problems of the valley must be formulated prior to the adoption of any plan providing for importation of additional water to the valley. In recognition of the importance of developing this solution at the earliest possible time, it is mandatory that the drainage investigation be assigned a top priority within the total program of the department. The budget has been prepared on the basis of the estimated minimum requirements of a program designed to produce a sound report by the end of the year originally contemplated 4-year period.

The following discussion of the progress of the investigation during the first year, the program now under way in the 1958-59 Fiscal Year and the program in future years is presented to show the manner of attack of the problem, thereby providing an understanding of the need for the various component features of the study.

The work program during the first year of the investigation consisted primarily of a review of prior studies, tabulation of existing data, and initiation of the collection of data pertaining to land use, land class, underground geology and stratigraphy, and quantities of drainage water. During the second year the data collection program has been intensified and expanded with the objective of providing enough information by the end of the fiscal year to permit estimation of the quality and quantity of drainage water that will originate in each of several specific areas of the San Joaquin Valley under future stages of development, an essential step in design of the master drainage conduit. Also during the current fiscal year emphasis will be placed on developing the criteria to be used in evaluating the drainage plan in terms of benefits, detriments, allocation of costs, and kindred matters. This is, of course, an indispensable part of the study of any project that contemplates the use of public funds in part for construction thereof. In this connection

an interesting and important feature of the investigation is the evaluation of the effects of development of various drainage schemes upon the waterfowl in the valley. This study was inaugurated during the 1957-58 Fiscal Year and will be completed during the third year (1959-60) of the study.

The program is intended to produce a master drainage plan for the entire valley by the end of the 1959-60 Fiscal Year. This plan will include provision for staged implementation as the need develops, to the degree indicated from a consideration of the probable period of time involved between stages, and will provide a basis for the detailed study of projects for immediate construction to be undertaken in the fourth and final year of the investigation.

As has been stated, the fourth year (1960-61) of the investigative period will be devoted to formulation and detailed study of projects to relieve existing drainage problems of the valley. These studies will result in category 3 reports and therefore all phases of them will of necessity be carried to a greater refinement than is the case in connection with formulation of the master drainage plan.

Salinity Control Barrier Investigation (Delta Area Studies)

The current investigation of salinity control barriers was authorized by the Abshire-Kelly Salinity Control Barrier Acts of 1953 and 1957. The studies have been directed toward the formulation of definite plans for the Delta Water Project and most phases of the work will be completed by June, 1959. However, it will be necessary to extend the studies relating to the complex hydrologic factors of the Delta and to obtain additional basic data on soils and foundation conditions to insure economical design of the proposed project facilities. The proposed program has been fully discussed with a board of consulting engineers and the board strongly supports this work.

Although intensive effort has been devoted to the complex problems of salinity intrusion in Delta channels, it has not been possible to completely define the mixing relationships between upstream moving saline water and fresh water outflow. Additional data are needed. Velocity-salinity measurements would be made for 36-hour periods at 4 locations and salinity data would be obtained at 14 additional locations. It is also proposed to conduct tidal cycle measurements and water use studies to define more accurately the water use in the Delta. Water use data are necessary to determine fresh water outflow.

Further studies will be conducted on the electronic analog to study the integration of the Delta Water Project with future projects of the California Water Plan.

Intensive studies will be conducted on 2 typical Delta islands to determine seepage inflow characteristics and to evaluate the effects of brackish saline water in channels on adjacent farm operations. These studies will include detailed measurements of water supply and disposal factors.

The Delta overlies a natural gas field and gas extraction poses a potential subsidence problem. To provide data necessary for future design, it is proposed to install a network of bench marks for accurate future surveys.

It is proposed to install a seismograph in the Delta to obtain data on the intensity on seismic activity for use in final design studies.

The soils salination program being conducted jointly by the department and the University of California to determine water quality standards for irrigation in the Delta will be completed.

It is proposed to conduct tests on 3 levee sections in the Delta to study designs which will afford economical construction of proposed master levees. These tests involve rebuilding sections of existing levees. There is a slight, but inherent, risk of levee failure and it will be necessary to have emergency funds to adequately rebuild the levee if necessary. To obtain emergency funds, it will be necessary to have special authorization for this work. The estimated cost of this work is \$180,000 and special authorization, separate and apart from the budget, will be sought.

OTHER INVESTIGATIONS

Inventory of Water Resources and Requirements

The Inventory of Water Resources and Requirements is an investigation designed to develop for the Legislature the basic data required to solve the problems of providing water to supply the eventual needs of the areas of water surplus in the State, while at the same time providing for the water needs of the areas of deficiency.

This investigation has been continuous since it started in 1956, when originally authorized by Chapter 61, Statutes of 1956. The objectives of the investigation are to:

1. Determine the boundaries of the respective watersheds of the State and of the subdivisions thereof, which may be required to adequately present data as described below on water supply, water use, water requirements, and water supplies available for export;

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PLANNING—Continued

OTHER INVESTIGATIONS—Continued

Inventory of Water Resources and Requirements—Continued

2. Determine the quantities of water originating in each of the respective watersheds and subdivisions thereof;

3. Determine the water reasonably required for ultimate beneficial use in the respective watersheds and subdivisions thereof, including agricultural, industrial, municipal, stream maintenance and recreational requirements, based on land classification and land use surveys, and on economic studies;

4. Determine the present diversions, imports and exports of water, together with the present uses of water and the apparent claim of water right attaching thereto, excluding individual uses of water involving diversions of small quantities which are insufficient in the aggregate to materially affect the quantitative determinations to be included in the report on the investigation;

5. Determine the quantities of water potentially available for export from, or the deficiency of water supply in, each of the respective watersheds or subdivisions thereof.

In order to accomplish the above, the State has been divided into 10 major hydrographic areas. The 7 areas in Northern California have further been divided into 47 hydrographic units. The data obtained as desired in the objectives of this investigation will be reported on in 2 types of reports: 1 to cover basic data on land and water utilization, and the other to report water supply, water requirements, and surplus or deficiency of water supply by watersheds. The first type of report will be prepared for each hydrographic unit and the second for each of the major hydrographic areas. Each land and water utilization report will contain data obtained from land classification surveys and from an inventory of present land and water uses.

Reports on land and water utilization are to be completed during the 1959-60 Fiscal Year in the following hydrographic units: Russian River, Mattole River-Mendocino Coast, Mad River-Redwood Creek and Eel River. Preparation of land and water utilization reports will commence for the Putah-Cache Creeks and Sacramento Valley West Hydrographic Units. No reports on water supply and requirements are scheduled for 1959-60.

Sacramento River Trial Distribution Program

The Sacramento River Trial Distribution Program, which has been in progress since 1954, has as its objective the reaching of a negotiated settlement between the local water users along the Sacramento River and in the Delta and the Bureau of Reclamation regarding their respective entitlements to the use of water and the provision of a supplemental water supply for the water users. This will protect the water users' interests, permit the Central Valley Project to operate as designed, and allow additional major development of the State's water resources to proceed in an orderly manner.

Significant progress was made in the Trial Distribution Program during the 1957-58 Fiscal Year. In February, 1958, the Bureau of Reclamation completed a draft of a tentative form of contract that it was willing to enter with individual water users. The Trial Distribution staff contributed ideas and principles that were incorporated in this contract. This draft has been reviewed and comments of the Department of Water Resources have been submitted to the Bureau of Reclamation. At the present time it is being studied by organizations representing the water users to determine its suitability for settling the present controversy.

In the 1957-58 Fiscal Year, a procedure for illustrating allocation of water under the contract terms was prepared by the Trial Distribution staff to facilitate understanding of the draft. This may also be used as a detailed procedure for computing such an allocation under a final contract.

Negotiations were temporarily suspended in May, 1958, when notice was received by the parties that the State Water Rights Board had scheduled a hearing on Sacramento River and Delta water rights applications of the Bureau of Reclamation. However, this was postponed in August, 1958, and it is anticipated that negotiations centered around the bureau's form of contract, or revisions thereof, will continue during a part of the remainder of the 1958-59 Fiscal Year, at least until the water rights hearing is resumed. Information and special studies by the Trial Distribution staff undoubtedly will be required during the course of these continuing negotiations to illustrate the effects of changes in existing assumptions. It is believed that such changes will be found necessary in order to encourage widespread accept-

ance of a contract. Experienced personnel of the Trial Distribution staff, who are familiar with the studies that have been made and with all of the existing data, will be needed to make these studies.

It was originally anticipated that the Sacramento River Trial Distribution Program would be completed in February of 1959 and that an agreement could be reached between the water users and the Bureau of Reclamation by that date. However, because of time lost by the water user organizations in preparing for the aforesaid water rights hearing and because the hearing will again require the attention of these groups during a part of 1959, it is believed that the negotiation of an agreement between the water users and the bureau will extend into the 1959-60 Fiscal Year. State personnel will probably be called upon to supply the same sort of supplemental information above with respect to negotiations during the 1958-59 Fiscal Year.

Present indications are that the water rights hearing on the Sacramento River will probably not begin until after January 1, 1959, and will probably extend into the 1959-60 Fiscal Year. It is not planned for the Department of Water Resources to present direct testimony at the hearing which will include testimony by personnel of the Trial Distribution staff to present findings of the 1956 Co-operative Study Program in which they participated. It is also believed essential that an experienced staff such as this, which is familiar with the antecedent data and existing studies, be available to furnish further details of the co-operative studies and to make such additional special studies as are deemed necessary during the water rights hearing.

In addition to the services of the staff during 1959-60, as just outlined, it is believed essential that the continuity of the records of Sacramento River diversions and flows of the river at strategic locations be provided to facilitate negotiation of and operation under the proposed contract between the water users and the bureau. More data is required to determine the net use of water along the river than is obtained under the normal program of the Sacramento-San Joaquin Water Supervision function. The Bureau of Reclamation has been contributing to the cost of maintaining these records. However, no overall water user organization is in existence to subsidize this work and it is desirable for the State to continue its support.

Feather River Trial Distribution Program

The Feather River Trial Distribution Program, which has been in progress since 1956, has as its objective the reaching of an agreement between the local water users along the Feather River and the State of California regarding their respective entitlements to the use of water of this river and the provision of a supplemental water supply from the Feather River Project for the water users. It is believed essential that such agreements be reached prior to construction and operation of the Feather River Project by the State of California. To accomplish this it will be necessary to make studies and carry out negotiations similar to those that have been made and are now under way along the Sacramento River between the Bureau of Reclamation and the local water users.

In Fiscal Year 1958-59 information on the water rights of water users along the Feather River is being obtained and detailed hydrologic data are being compiled. On the basis of this information, during the 1959-60 Fiscal Year water-right assumptions will be made and will be compared with available water supplies in order to present a basis for agreements among the individual water users along the Feather River and agreement between those users and the State. It is planned to publish a report similar to "Report on 1956 Co-operative Study Program" in April, 1960, to serve as a basis for negotiation of such agreements.

It is planned to continue measurements of diversions and applied water through the 1959 irrigation season to insure that an adequate background of factual data will be available for the aforesaid report and for the future negotiations between the State and the local water users.

A trial distribution program for the American River was included in budgets for the past 2 years. However, a water rights hearing has been completed on the American River. Furthermore, no large diversions are made in the reach between Folsom Dam and Sacramento. For these reasons, it is no longer believed necessary to plan for work on the American River by the Trial Distribution staff.

WORK IN CO-OPERATION WITH FEDERAL GOVERNMENT

Objectives

Through the Department of Water Resources, the State participates co-operatively with agencies of the Federal Government in various activities directed toward the accomplishment of mutual interest and to develop solutions to problems in which

there is a common concern. State funds are matched by the expenditure of equal or greater amounts by agencies of the Federal Government.

Program and Performance

CO-OPERATIVE BEACH EROSION PROGRAM

A budget in the amount of \$20,000 has been made for Fiscal Year 1959-60 to provide direct matching funds to the Corps of Engineers, United States Army, in accordance with the provisions of Public Law 727, 79th Congress, 2d Session, for the State's share of the cost of co-operative beach erosion investigations. The federal program will be increased, and therefore the State contribution will increase \$10,000 over that for the present year.

The work to be performed is part of a 3-year program to provide for the complete investigation of the California shoreline from Point Conception to the Mexican border and from San Mateo to the Oregon line. These investigations are further necessary to secure needed information in advance of the rapidly expanding program for the development of small craft harbors along the entire California shoreline.

YUBA RIVER DEBRIS CONTROL PROJECT

The Yuba River Debris Control Project provides for the storage of mining debris within the bed of the river channels in order to hold over 300,000,000 cubic yards of mining debris in the Yuba River overflow area near Marysville, which would otherwise pass in some degree into the navigable channels of the Feather and Sacramento Rivers.

Plans for the work are prepared by the Corps of Engineers, of which the California Debris Commission is a part, and

submitted to the Department of Water Resources for approval. About \$1,000,000 of state funds have been appropriated for debris control. A budget request for \$100,000 is being made for the 1959-60 Fiscal Year to match an equal amount proposed to be appropriated by the Federal Government for the continuation of this work.

CO-OPERATIVE MAPPING PROGRAM

The Co-operative Mapping Program was established by Chapter 1424, Statutes of 1945, between the State of California and the United States Geological Survey.

Under this program, topographic mapping for the State of California has been carried on by funds from the State matched by an equal amount from the geological survey.

The State, as a co-operator, selects unmapped areas of the State for future mapping and selects mapped quadrangles for remapping, revision and scale conversions. State funds are expended only on co-operative mapping approved by the State.

CO-OPERATION WITH UNITED STATES GEOLOGICAL SURVEY FOR
SURFACE WATER INVESTIGATIONS IN CALIFORNIA

This is a continuing program of measurement of the discharge of surface streams of the State, in co-operation with the United States Geological Survey. It provides data on water supply, runoff, and diversions on many of the larger streams of the State, not otherwise measured by the department, \$279,515. The program also includes repairs to existing stations and construction of new stations, \$50,000.

A new portion of the program initiated in 1958-59 Fiscal Year provides for collection of data on flood discharges from small drainage areas which will facilitate design of drainage structures for highways, county roads, and water conduits, \$25,250. The program for development of an ultrasonic current velocity measuring device is continued, \$15,000. Total, \$369,765.

IRRIGATION INVESTIGATION

Co-operation with the Agricultural Research Service, United States Department of Agriculture, on continuation of studies of (1) consumptive use of water by natural vegetation evaporation from water surfaces, use of irrigation water including the consumptive use of various crops, improvement of irrigation practices to increase the efficiency of water use, and the contri-

bution of rainfall to the water supply for irrigated crops in California; and (2) conservation of water by artificial recharge of ground-water basins, with emphasis on characterization of suitable recharge sites, replenishment by application of excess irrigation water, and evaluation of water quality, \$50,000.

LINE	OTHER CURRENT EXPENSES DETAIL	NO. OF POSITIONS			ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
		57-58 (Filled)	58-59 (Auth.)	59-60 (Auth.)			
1	WORK IN CO-OPERATION WITH FEDERAL GOVERNMENT—Continued						
2	BASIN AND SUBSIDENCE STUDIES						
3	Co-operation with the United States Geological Survey on						
4	(1) continuing studies of the geology and hydrology of ground-						
5	water basins in the southern San Joaquin Valley, \$40,000; (2)						
6	continuing investigation of land subsidence in the San Joaquin						
7	Valley to ascertain the causes and to develop the basic informa-						
8	tion required for proper planning of water facilities, \$57,250;						
9	(3) continuing the program begun in 1958-59 of measurement						
10	and current reporting of water levels in key wells in ground-						
11	water basins of the State, providing thereby a continuous record						
12	of ground-water storage conditions, \$12,500; (4) continuing the						
13	program of basic-data collection and observation-well meas-						
14	urement in southern California desert areas, \$14,000. Total,						
15	\$123,750.						
16	SPECIFIC YIELD STUDIES						
17	A study of the specific yield, or water-yielding capacity, of the						
18	sediments of the State was begun co-operatively with the United						
19	States Geological Survey in the Fiscal Year 1957-58. The study						
20	is planned for a 5-year duration. After its completion, a much						
21	more accurate determination of the storage capacity of the						
22	ground-water basins of the State will be available. Field sam-						
23	pling of sediments is done at various depths and at various						
24	locations. The specific yield of the sediments is determined						
25	either directly by drainage or indirectly by moisture equivalent						
26	tests. The laboratory work is done in the Hydrologic Laboratory						
27	of the Geological Survey in Denver, Colorado, \$30,000.						
28	RESEARCH IN SNOWPACK MANAGEMENT						
29	The 1959-60 Fiscal Year will be the fourth year of a research						
30	program in snowpack management conducted in co-operation						
31	with the United States Department of Agriculture. These						
32	studies have as their objective testing of ways of conserving that						
33	portion of the State's water supply derived from mountain						
34	snowpack. About 40 percent of the State's stream flow comes						
35	from a belt of 9,000,000 acres of high-elevation forest land on						
36	which the snow packs deep in the winter and spring. This						
37	research ties in closely with the current activities of the Depart-						
38	ment of Water Resources and is co-ordinated with statewide						
39	studies for full conservation development of water resources.						
40	CO-OPERATIVE SEDIMENT INVESTIGATION						
41	The Co-operative Sediment Investigation involves collection						
42	of continuous records of sediment characteristics at eight sta-						
43	tions and periodic observations of sediment characteristics at						
44	17 stations on major streams from the Sacramento-San Joaquin						
45	Delta northward. In addition it is planned to complete 1 sedi-						
46	ment survey in a reservoir of northern California each year.						
47	This work and the reports to follow will be done by the Water						
48	Quality Branch, Geological Survey. The program for Fiscal						
49	Year 1958-59 is provided for by a sum of \$25,400. It is esti-						
50	mated that this program for the 1959-60 Fiscal Year will require						
51	approximately \$30,000. The increase allows for a 10 percent						
52	increase in federal civil service salaries and provides for an						
53	additional specialist in reservoir sediment surveys to enhance						
54	the effectiveness of this phase of the work.						
55	WATER QUALITY INVESTIGATION						
56	The Co-operative Water Quality Investigation provides for						
57	mineral analyses and heavy metals determinations for surface,						
58	ground and waste samples collected in accomplishment of the						
59	periodic stream-sampling program, the Lower San Joaquin						
60	Valley Water Quality Investigation, and the Southern Alameda						
61	County Salt Water Intrusion Study. It is contemplated that						
62	about 3,450 samples will be analyzed during the current fiscal						
63	year. Of this number, 1,160 samples will be subjected to stand-						
64	ard mineral analysis; 1,730 samples for partial mineral anal-						
65	ysis; and 560 samples for heavy metals determinations.						
66	Expenditures by Project

Program and Performance

During the 1957-58 Fiscal Year the board held hearings on applications by United-Calleguas to appropriate waters from the Santa Clara River System, United States Bureau of Reclamation applications to appropriate waters of the Santa Ynez River and 2 minor coastal streams for the Federal Cachuma Project, the City of Sacramento, Sacramento Municipal Utility District, Georgetown Divide Public Utility District, United States Bureau of Reclamation and numerous irrigation districts, municipalities, water districts and private companies to appropriate water from the American River System, Santa Margarita Mutual Water Company and Fallbrook Utility District to appropriate waters of the Santa Margarita River, Nevada Irrigation District, Oroville-Wyandotte Irrigation District, Stampede Project on Little Truckee River, Whale Rock, Sailors Ravine, Arroyo del Valle, San Joaquin River and other miscellaneous water rights.

During the 1958-59 Fiscal Year the board has continued the hearings on the San Joaquin River, and it is anticipated that hearings will be held on the Sacramento River and Delta, Yuba River, Trinity River, Prosser Creek tributary to the Truckee

River, San Antonio Creek tributary to the Salinas River, Calaveras River and other miscellaneous water rights.

5 engineering positions were added during the current year for the San Fernando reference. These positions and allied costs are financed by the parties and are fully reimbursable. They are continued as authorized positions in the 1959-60 Budget.

During the 1959-60 year it is anticipated that hearings will be held on the Feather River, Russian River, Kings River, Kaweah River, Tulare Lake and other miscellaneous water rights.

From July 1, 1957, to June 30, 1958, the activities of the State Water Rights Board concerning appropriations of water included:

Applications received	512
Permits issued	670
Licenses issued	559
Applications canceled	196
Permits and licenses revoked	180
Orders allowing changes in point of diversion, place and purpose of use	763
Decisions rendered	39

7	Personnel man-years -----	44.5	51.6	57.6	6
8					
9					
10	GENERAL ANALYSIS				
11					
12	Objectives				
13					
14	Co-operates with the Corps of Engineers, United States Army,				
15	in construction of flood control projects through the acquisition				
16	of rights-of-way for such projects; acts as governing body for				
17	the Sacramento and San Joaquin Drainage District; approves				
18	construction of levee systems and flood channels; and fulfills				
19	such construction obligations as have been assumed by the				
20	State in its agreement with the Federal Government.				
21					
22	Program and Performance				
23					
24	The agency program involves work on several projects as				
25	follows:				
26	Sacramento River Flood Control Project:				
27	This project is divided into 2 parts: that relating to works				
28	authorized prior to 1941 which is called "Old Sacramento River				
29	Flood Control Project"; and that relating to works authorized				
30	subsequent to 1941 which is referred to as "Major and Minor				
31	Tributaries."				
32	A. Old Sacramento River Flood Control Project:				
33	The so-called "Old Sacramento River Flood Control Project"				
34	has continued to receive federal appropriations in the neighbor-				
35	hood of \$3,000,000 per year, and it is anticipated that this rate				
36	of appropriation will continue at least through 1960. At this				
37	time the recommendations of the Corps of Engineers and the				
38	Bureau of the Budget for the 1959-60 Fiscal Year appropriation				
39	have not been made public, but the California Flood Control				
40	Conference has gone on record supporting the \$3,000,000 figure				
41	and the Corps of Engineers has indicated its capability of uti-				
42	lizing this sum.				
43	During the current fiscal year, 2 supplements have been exe-				
44	cuted to the Memorandum of Understanding which was origi-				
45	nally signed on November 30, 1953. The first supplement pro-				
46	vides for \$6,300,000 of additional federal expenditure on this				
47	project and \$311,500 of nonfederal expenditure. Supplement No.				
48	2 calls for an expenditure of \$1,500,000 of federal money and				
49	\$200,000 of nonfederal funds.				
50	The Corps of Engineers, at the present time, is also in the				
51	process of preparing a review report for the entire project which				
52	will probably result in a new program of federal-state co-				
53	operation for bank protection upon the Sacramento River and				
54	tributaries.				
55	B. Major and Minor Tributaries:				
56	Activity upon the so-called "Major-Minor Tributaries Proj-				
57	ect" was increased during the current fiscal year with a federal				
58	appropriation of \$1,000,000 for this project. The California				
59	Flood Control Conference has gone on record before the State				
60	Water Commission for the support of a federal appropriation				
61	of \$2,000,000 for this project of flood control for Fiscal Year				
62	1959-60, and the Corps of Engineers has indicated an ability				
63	to expend this sum on this project. One of the major units of				
64	work on this project was to have been through the City of Chico				
65	on Chico, Mud and Sandy Gulch. It has subsequently been deter-				
66	mined that the job could be more economically accomplished by				
67	a revision in the plans which would provide for the diversion				
68	of floodwaters around the urban area of the City of Chico.				
69	This modification is presently under consideration by the Fed-				
70	eral Government, and therefore the construction of this unit				
71	of work has been delayed and will, in all probability, proceed				
72	in Fiscal Year 1959-60. The modified project will result in a				
73	substantial right-of-way saving to the State of California,				
74	but will still involve an estimated expenditure of \$1,400,000.				
75	In lieu of going ahead with the Chico, Mud and Sandy Gulch				
76	unit during the current fiscal year, the Corps of Engineers has				
77	substituted work on the Cherokee Canal which will involve				
78	the reconstruction of five bridges and the acquisition of 60 or				
79	70 parcels of right-of-way. It is not anticipated that this				
80	change will result in any substantial reduction of workload				
81	during the current fiscal year.				
82	San Joaquin River Flood Control Project:				
83	The project of flood control of the San Joaquin River be-				
84	tween the mouth of the Merced River and the Stockton Deep				
85	Water Channel received an appropriation of \$1,000,000 for the				
86					

current fiscal year and the California Flood Control Conference has endorsed an appropriation of \$1,250,000 for this project for Fiscal Year 1959-60. The Corps of Engineers has indicated that it has the ability to expend this sum during the fiscal year involved.

The portion of the San Joaquin River Flood Control Project lying upstream from the mouth of the Merced River, which is being constructed at state expense, is proceeding rapidly. During the current year the Reclamation Board and local interests arrived at an agreement as to the plan to be followed for this project. The Department of Water Resources is presently preparing contract plans and final right-of-way plans for the first construction unit which is estimated to cost approximately \$2,000,000. While it was originally anticipated that all of the right-of-way for this project would be acquired during the current fiscal year, the Reclamation Board modified its policy with regard to this matter to provide that the necessary right-of-way for each construction unit would be secured as the project proceeded. It is therefore probable that the right-of-way acquisition for this project will extend through the 1959-60 Fiscal Year and possibly into the following fiscal year.

Middle Creek Project:

The Corps of Engineers received an appropriation of \$600,000 for the Middle Creek Project for the current fiscal year and the California Flood Control Conference has supported an appropriation for this project of \$700,000 for Fiscal Year 1959-60. It is understood that this amount will complete the project. The Reclamation Board anticipates that it will secure all of the right-of-way necessary for this project during the current fiscal year and that its only other activities in connection with this project will relate to such right-of-way problems which may arise during construction and problems relating to maintenance and operation of the project. No additional capital outlay funds should be necessary for this project after June 30, 1959.

Claims for Flood Damage:

Considerable engineering time is being devoted to the law suits and claims pending against this agency. There are a total of approximately 270 claims which have been filed with the State Board of Control involving this agency. These suits and claims allege damages in excess of \$23,000,000 resulting from the floods of 1955-56. Most of the flood damage claims have now been denied by the State Board of Control and suits have been filed in superior court based upon these claims. In addition, some 20 suits involving damages alleged to be in excess of \$12,000,000 have been filed in federal court against the United States for damages resulting from the 1955-56 floods. The United States has brought the State of California into these actions on the ground that it is our duty to hold and save the United States free and harmless from damages. In addition, more than \$40,000,000 is being claimed in connection with the litigation involving state ownership of oil and gas rights in the vicinity of Rio Vista. The board is also continuing its case against the United States for \$750,000 of damages resulting from the closure of Shasta and Keswick Dams in May, 1958. While a portion of the engineering work involved in connection with this litigation is being handled by the Department of Water Resources and independent engineers, there is a basic residue which must be accomplished by the engineering staff of this agency. This litigation is also consuming a considerable amount of legal time of the Attorney General and the associate counsel for this agency.

General Workload:

The Corps of Engineers' construction program combined with the right-of-way needs for the state construction on the San Joaquin River above the mouth of the Merced River will involve an increase in activity for the agency and will demand the authorization of additional personnel. The present staff has not been adequate to meet the needs of the current workload. The agency is still failing to provide the right-of-way required by the Corps of Engineers in time to meet the established deadlines. These delays have resulted in the postponement of construction by the corps and may result in the loss of federal funds.

RECLAMATION BOARD—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
		57-58 (filled)	58-59 (Auth.)	59-60 (Auth.)				
1	GENERAL ANALYSIS—Continued							
2	Program and Performance—Continued							
3	The agency anticipates that it will acquire between 325 and							
4	350 parcels of right-of-way during the 1959-60 Fiscal Year.							
5	This is approximately the amount of right-of-way originally							
6	estimated would be secured during the current fiscal year. How-							
7	ever, it is believed that there will be only about 325 parcels							
8	of right-of-way secured.							
9	Workload considerations make necessary the addition of 3							
10	real property appraisers and negotiators. 1 of the 3 is justified							
11	by additional workload and 2 of the 3 are justified by a pro-							
12	posal to reduce the level of contract appraisals used in the

8					
9					
10					
11	GENERAL ANALYSIS				
12	Objectives				
13	The Colorado River Board was created by Chapter 838, Stat-				
14	utes of 1937, for the purpose of protecting California's rights				
15	pertaining to the Colorado River. The board and its staff col-				
16	lects, compiles and analyzes engineering and legal data on the				
17	existing and proposed utilization of the Colorado River water				
18	supply, appears before congressional committees and interested				
19	federal agencies, and confers with representatives of other Colo-				
20	rado River Basin states regarding legislation and developments				
21	affecting California's rights and interests.				
22					
23	Program and Performance				
24					
25	The board is composed of members appointed by the Governor				
26	representing each of the 6 agencies having rights to the use of				
27	water or power from the Colorado River. The 6 agencies are the				
28	Metropolitan Water District of Southern California, Depart-				
29	ment of Water and Power, City of Los Angeles, San Diego				
30	County Water Authority, Imperial Irrigation District, Coa-				
31	chella Valley County Water District, and Palo Verde Irrigation				
32	District.				
33	Major phases of the board's work program as anticipated for				
34	the current fiscal year and the Fiscal Year 1959-60 are sum-				
35	marized as follows:				
36	1. Preparation of legal and engineering material for appear-				
37	ances before congressional committees and for conferences with				
38	interested federal agencies, senators and congressmen, regarding				
39	legislation pending before the Congress affecting California's				
40	rights and interests on the Colorado River.				
41	2. Exhaustive study of reports on proposed projects for devel-				
42	opment, control and utilization of water of the Colorado River				
43	System; analysis of engineering and financial aspects as re-				
44	quired; and preparation of views and recommendations.				
45	3. Collection, compilation and analysis of all available basic				
46	information on the water supply of the Colorado River System				
47	and present and future use thereof, with a view to ultimate				
48	determination of:				
49					
50					
51					
52					
53					
54					
55					
56

a. The long-time average water supply available for beneficial use.

b. Unit rates and total requirements of beneficial consumptive use of water for agricultural, industrial, domestic and municipal purposes.

4. Collection and study of repayment and crop data on existing and proposed developments.

5. Detailed analysis of the operations of existing and proposed projects to determine their efforts upon the water supply available to the lower basin and upon the rights of California.

6. Studies relating to the legal and engineering aspects of the administration of the Upper Colorado River Basin Compact Mexican Water Treaty, Colorado River Storage Project Act and other relevant statutes, regulations and court decrees.

7. Conferences with the California state agencies, representatives of other states, and federal officials concerning particular phases of the program.

8. Engineering studies and research needed in connection with the suit, Arizona vs. California, et al., before the United States Supreme Court.

Legal action in the suit, Arizona vs. California, et al., before the United States Supreme Court has required extensive engineering studies and research, as well as intensive legal service since the initial step in the long legal process was taken by the State of Arizona in August, 1952. This suit has involved both the Colorado River Board and the Department of Justice. Estimates of expenditure by both agencies directly related to this legal action follows:

	1957-58	1958-59	1959-60
Colorado River Board -----	\$109,330	\$78,500	\$45,32
Department of Justice -----	521,095	630,173	650,27
Total -----	\$630,425	\$708,673	\$695,59

A more detailed statement of the related program is shown in the budget of the Department of Justice.

GENERAL ANALYSIS

Objectives

The major purposes of this compact are, with respect to the water resources of the Klamath River Basin:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation and control thereof for various purposes, including, among others: the use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental co-operation with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the two states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

Program and Performance

The commission was created effective September 11, 1957, with the passage of an act of the Congress of the United States consenting to the provisions of that certain compact designated as the "Klamath River Basin Compact between the States of

Oregon and California." The Legislature of the State of California ratified and approved the compact by Chapter 113, Statutes of 1957.

The compact provides that the commission consist of three members. The Director of the Department of Water Resources represents the State of California. The representative of the State of Oregon is the State Engineer. The federal representative is appointed by the President. The representative of the United States serves as chairman of the commission without vote. The commission has entered into a service agreement with the Department of Water Resources for the services of the executive director, including all necessary clerical, stenographic or related services required in the performance of his duties.

California's share of the expense of the commission together with the State of Oregon's share is deposited in a trust account from which all expenses are paid. The \$12,000 appropriated by Chapter 113, Statutes of 1957, was withdrawn from the Treasury at the time operations were established. The monies are being used to meet the expenses of the commission for the 1957-58 and 1958-59 Fiscal Years. It is estimated that \$4,402 of the initial amount will be available as of July 1, 1959. The amount proposed in this budget plus the balance remaining will meet California's share of the expenditures for 1959-60. Future appropriations will be proposed on an annual basis.

For the purposes of comparison, California's share of the total program is shown for each of three years:

1957-58—actual	\$126
1958-59—estimated	\$7,472
1959-60—proposed	\$6,745

53	GENERAL ANALYSIS				
54					
55	Objectives				
56	The California-Nevada Interstate Compact Commission of	Both state commissions must work towards having a com-			
57	California was created by Chapter 1810, Statutes of 1955. Its				
58	function is "to co-operate with a similar commission repre-				
59	senting the State of Nevada in formulating and submitting to				
60	the Legislatures of both states for their approval an interstate				
61	compact relative to distribution and use of the waters of Lake				
62	Tahoe and the Truckee, Carson and Walker Rivers."				
63	Program and Performance				
64					
65	During the past year the main emphasis of commission work	initiated during the present fiscal year.			
66	has generally shifted from a study of the many complex demands				
67	on the water resources of the area of concern, to a consideration				
68	of possible solutions of these problems which might form the				
69	basis for an interstate agreement on the use of the waters				
70	involved. It is anticipated that this phase of the commission's				
71	work will soon permit it to initiate drafting of actual compact				
72	terms incorporating the necessary points of agreement reached				
73	in the discussions now under way.

GENERAL ANALYSIS

57								
58								
59	Objectives							
60								
61	The state board formulates statewide policy for control of							
62	water pollution, administers statewide programs of research, and							
63	reviews actions of the regional boards. The 9 regional boards							
64	have 3 principal responsibilities: to formulate and adopt long-							
65	range plans and policies for abatement and prevention of water							
66	pollution; prescribe and enforce discharge requirements; and							
67	co-ordinate the interests of other agencies. They also recom-							
68	mend projects needing financial assistance.							
69								
70	Program and Performance							
71								
72	The current program for the state and regional water pollution							
73	control board is continued for the 1959-60 Fiscal Year. 5-year							
74	budget planning was initiated during 1958-59 for the purpose of							
75	forecasting program changes and significant increases or de-							
76	creases in the workload budget. The workload of establishing,							
77	checking, and enforcing waste discharge requirements has shown							
78	a steady rise since 1957.							
79	The agency administers the federal grant program for con-							
80	struction of sewerage facilities at the local level under Public							
81	Law 660. Grants to communities are limited to 30 percent of							
82								
83	a Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.							
84								
85								
86

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

Objectives

A basic research program is carried on to provide technical data to assist the boards in properly discharging their responsibility under the law.

Program and Performance

This research is carried out through special projects under contractual arrangements with various organizations and individuals.

The research program was expanded in 1956-57 using federal

funds under Public Law 660, and further in 1957-58 with funds donated by an industry association. The state-level support is to continue the basic program.

Beginning in 1956-57, greatest emphasis has been placed on research in the field of submarine outfall disposal of sewage and sludge. Previous research dealt with inland waste disposal. The largest project currently in operation is an oceanographic survey of the continental shelf area of Southern California. This study, conducted by the University of Southern California Hancock Foundation, is obtaining biological, chemical and physical data

^a Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

Theodore Roosevelt Centennial Commission

TOTAL EXPENDITURES (General Fund)----- \$314 \$4,686 -

Objectives

The commission was created to insure participation by the State in programs commemorating the 100th anniversary of the birth of Theodore Roosevelt.

Program and Performance

The commission carried out the duties imposed by Chapter 1534, Statutes of 1957, by co-operating with the Theodore Roosevelt Centennial Commission created by the Congress of the United States, a statewide committee, local committees and

other organizations. The statewide committee, appointed by the National Centennial Commission, was an advisory committee to the state commission.

The major activities of the commission culminated in a statewide observance of the centennial on October 27, 1958. The commission will cease to exist on July 1, 1959.

The Theodore Roosevelt Centennial Commission consisted of 3 members appointed by the Governor, 2 senators and 2 assemblymen.

14	GENERAL ANALYSIS			
15	The State Personnel Board has been delegated the authority			
16	to set and adjust salary ranges for civil service and state col-			
17	lege employees, and has been directed to:			
18	(a) Consider the salaries for comparable service in private			
19	employment and in other governmental agencies;			
20	(b) Consider the proper internal salary relationships between			
21	state classes; and			
22	(c) Keep expenditures for salary adjustments within appro-			
23	priation limits.			
24	Salaries of other state employees and the University of Cali-			
25	fornia are provided for on a comparable basis.			
26				
27	GENERAL FUND			
28				
29	Provision for Salary Increases for Salaries			
30	Set by the State Personnel Board:			
31	Civil Service Classes:			
32	Number of positions -----	41,495		
33	Salaries and wages -----	\$197,185,362		\$9,859,268
34	Salary costs reimbursed -----	15,219,768		-
35	State Colleges:			
36	Number of positions -----	8,629		
37	Academic salaries -----	32,437,929		1,351,580 ^b
38	Nonacademic salaries -----	18,086,853		904,343
39	Salary costs reimbursed -----	2,235,970		-
40	Provision for special salary adjustments -----	-		500,000
41				
42	Total for Salaries Set by the State Personnel			
43	Board -----	-		\$12,614,191

^a See list of detailed allocations in budget for Reserve for Contingencies.

^b Executive orders are issued by the Department of Finance to augment legislative appropriations from special funds in the amount required to provide for salary increases in accordance with the provisions of the Budget Act. Executive orders are not required from those funds with fixed or continuing appropriations. The amount for 1959-60 includes the estimated requirements from salary increase authorizations and from fixed and continuing totals.

^c Federal, trust, and other funds are excluded from overall budget appropriations.

GENERAL ANALYSIS

Objectives

To pay interest and redemption charges on general obligation bonds.

Program and Performance

The State Construction Program Bond Act of 1955 provides for the issuance of bonds to finance major building construction, equipment and site acquisition needs for the departments of the State Government which are financed primarily from general revenues.

The first sale of bonds in the amount of \$50,000,000 was made in December, 1958, a second sale of \$50,000,000 is scheduled in March, 1959, and a third sale of \$50,000,000 is scheduled in December, 1959.

Interest and redemption charges on highway bonds are withheld from motor vehicle license fee revenues.

Interest and redemption charges on bonds issued for construction of state and university buildings, and for acquisition of areas for state park purposes were met from funds which were set aside from General Fund surplus, and placed in the Bond Sinking Fund of 1943. Sufficient funds were set aside to meet all debt service requirements to final maturity; however, \$5,000,000 was transferred to the Highway Fund to be used as a loan to the Golden Gate Bridge and Highway District, to be returned out of toll revenues after the bonded indebtedness of

the district is retired in 1971. Interest on the \$5,000,000 loan shall be paid to the General Fund at a rate not to exceed 2 percent per year when the loan is repaid by the State Highway Fund in accordance with Chapter 1505, Statutes of 1945. Available funds to meet bond obligations in the Bond Sinking Fund of 1943 were exhausted during the 1956-57 Fiscal Year and are currently paid by the General Fund.

There has been transferred to the State Buildings Sinking and Interest Fund sufficient money to retire the outstanding Sacramento State Building Bonds which will become due in 1965. These moneys have earned interest which provides excess funds over and above bond redemption requirements. This excess shall be transferred to the General Fund under authority of Section 20, Budget Act of 1958 as of June 30, 1959.

Debt service charges on school building bonds are considered as assistance to local units of government and are reported under the Local Assistance Budget, Subventions for Education.

These debt service charges do not include charges on bonds issued for construction at the San Francisco Harbor or charges on bonds issued for the veterans' farm and home loan program. They are general obligation bonds; however, the charges are primarily the obligations of, and are paid from, the respective utility funds. The activity of these funds is reported in the appendix section of the budget.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1959-60

LINE	AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
		FROM CAPITAL OUTLAY AND SAVINGS FUND	FROM STATE CONSTRUCTION PROGRAM FUND †	FROM OTHER FUNDS
1	The following table summarizes the proposed new appropriations for the 1959-60 Fiscal Year for the State Building Program by departments. Detailed explanation and description of each project is contained in the following agency detail budget.			
2				
3				
4				
5	Department of Agriculture:			
6	Minor construction and improvements-----	\$15,000	-	-
7	Poultry Improvement Commission:			
8	Minor construction and improvements-----	-	-	\$8,500 †
9	Department of Corrections:			
10	Men's Colony:			
11	Construct employees' activity building-----	-	\$290,300	-
12	Institution for Men:			
13	Construct dormitory addition-----	-	162,400	-
14	State Prison at Soledad:			
15	Install additional waterlines-----	-	75,000	-
16	Construct administration building addition-----	-	147,500	-
17	State Prison at San Quentin:			
18	Relocate exercise fields-----	-	100,000	-
19	Deuel Vocational Institution:			
20	Equip reception-guidance center (partial cost)-----	-	45,500	-
21	Institution for Women:			
22	Construct sixth cottage-----	-	797,200	-
23	Minor construction and improvements-----	\$521,831	-	-
24				
25	Totals, Department of Corrections-----	\$521,831	\$1,617,900	-
26				
27	Department of the Youth Authority:			
28	Northern California Reception Center:			
29	Construct dormitory-----	-	\$335,000	-
30	Alterations and additions—phase III-----	-	80,000	-
31	Equip alterations and additions-----	\$19,065	30,000	-
32	Fricot Ranch School for Boys:			
33	Site acquisition-----	1,000	-	-
34	Addition to academic school-----	-	144,450	-
35	Construct dormitory-----	-	209,000	-
36	Employee housing-----	-	109,700	-
37	Equip employee housing-----	4,450	-	-
38	Fred C. Nelles School:			
39	Construct 2 dormitories-----	-	546,200	-
40	Special treatment office building-----	-	113,940	-
41	Equip special treatment office building-----	3,000	-	-
42	Arts and crafts and music building-----	-	291,400	-
43	Chapel-----	-	89,500	-
44	Preston School of Industry:			
45	Construct dormitory-----	-	206,600	-
46	Equip kitchen-----	-	5,000	-
47	Youth Training School:			
48	Construct living unit-----	-	2,718,300	-
49	Administration building addition-----	-	47,500	-
50	Commissary addition-----	-	69,500	-
51	Equip new school—phase I-----	231,000	175,000	-
52	Los Guilucos School:			
53	Clothing-linen supply and laundry building-----	-	70,600	-
54	Equip clothing-linen supply and laundry building-----	2,600	6,000	-
55	Ventura School:			
56	Equip new school—phase I-----	-	20,000	-
57	Minor construction and improvements-----	288,159	-	-
58				
59	Totals, Department of the Youth Authority-----	\$549,274	\$5,267,690	-
60				
61	Department of Education:			
62	State Colleges:			
63	Chico:			
64	Remodel science building and construct addition-----	-	\$149,640	-
65	Equip remodeled science building and addition-----	\$49,100	227,600	-
66	Construct men's gymnasium-----	-	1,559,700	-
67	Install additional boiler-----	-	79,400	-
68	Construct swimming pool-----	-	133,300	-
69	Equip swimming pool-----	3,900	5,800	-
70	Equip physical science and agricultural building-----	60,800	203,700	\$70,800 †
71	Fresno:			
72	Construct men's gymnasium R.O.T.C. addition-----	-	150,000	-
73	Equip men's gymnasium R.O.T.C. addition-----	750	9,100	-
74	Construct women's gymnasium addition-----	-	823,050	-
75	Equip science building addition-----	28,300	100,800	-
76	Equip classroom building No. 3-----	3,200	30,000	-
77	Equip cafeteria addition-----	28,300	24,200	-
78				
79	† Fair and Exposition Fund.			
80	‡ State College Fund.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1959-60—Continued

AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
	FROM CAPITAL OUTLAY AND SAVINGS FUND	FROM STATE CONSTRUCTION PROGRAM FUND †	FROM OTHER FUNDS
Department of Education—Continued			
State Colleges—Continued			
Humboldt:			
Construct education-psychology building	—	\$663,500	—
Construct outdoor physical education building	—	160,500	—
Working drawings for library addition	—	50,000	—
Site acquisition for forestry building	—	80,000	—
Construct forestry building	—	485,900	—
Equip natural science building	\$95,700	467,500	—
Long Beach:			
Construct engineering building	—	1,660,000	—
Construct fine arts building	—	1,559,500	—
Construct administration building addition	—	523,700	—
Equip science building	250,500	888,200	—
Equip industrial arts building	42,300	238,900	—
Los Angeles:			
Working drawings for classroom building No. 1	—	310,000	—
Construct swimming pool	—	139,400	—
Equip swimming pool	500	4,800	—
Sacramento:			
Construct swimming pool	—	134,800	—
Equip swimming pool	560	3,340	—
Construct women's gymnasium	—	1,031,800	—
Equip engineering building—second increment	107,500	609,200	—
San Diego:			
Working drawings for life science addition	—	225,000	—
Construct corporation yard	—	500,000	—
Construct cafeteria addition	—	325,000	—
Equip men's physical education building and swimming pool	22,000	89,000	—
Equip education building addition	22,500	51,000	—
Equip administration building addition	9,900	89,100	—
Equip engineering and applied science building addition	218,000	773,000	—
San Fernando Valley:			
Construct swimming pool	—	185,800	—
Equip science building	146,550	548,950	—
Equip music building	60,800	243,900	—
Equip fine arts building	75,200	142,000	—
San Francisco:			
Construct cafeteria addition	—	1,016,600	—
Construct health building addition	—	215,600	—
Equip health building addition	3,800	33,800	—
Remodel creative arts building	—	61,850	—
Equip gymnasium addition	1,100	12,800	—
San Jose:			
Construct education building	—	2,378,000	—
Construct outdoor physical education facilities	—	730,500	—
Develop electrical distribution system (phase I)	—	108,800	—
Construct and equip aeronautics test cell	—	352,800	—
Enlarge steam services	—	106,030	—
Equip library addition	22,000	419,600	—
Equip music building addition	19,900	80,000	—
Equip speech-drama building addition	3,200	29,200	—
Equip outdoor physical education facilities	4,400	8,200	—
California Polytechnic (San Luis Obispo):			
Construct food processing building	—	—	\$1,412,600 r
Working drawings for engineering building	—	185,000	—
Construct library addition	—	1,222,500	—
Construct corporation yard	—	500,000	—
Site development	—	106,050	—
Construct additional boiler	—	91,300	—
Relocate thoroughbred unit	—	80,400	—
Equip home economics and mathematics building	85,300	37,000	—
Equip cafeteria	73,800	59,500	—
Equip little theater and music building	37,100	148,700	—
Equip graphic arts building	67,800	610,500	—
Equip outdoor physical education facilities	400	4,200	—
California Polytechnic (Kellogg-Voorhis):			
Working drawings for administration classroom building	—	125,000	—
Construct cafeteria addition	—	586,300	—
Site development	—	132,000	—
Construct meats processing building	—	—	198,300 r
Equip meat processing building	—	—	19,750 r
Equip outdoor physical education facilities	—	4,200	—
Equip agricultural engineering building	21,600	64,800	—
California Maritime Academy:			
Construct engineering building	—	548,500	—
Equip engineering building	7,600	145,300	—
Minor construction and improvements	1,102,372	—	116,995 r

r State College Fund.

† Expenditures from bond funds not included in budget totals.

POULTRY IMPROVEMENT COMMISSION

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
------	-----------------------------	-------------------	----------------------	---------------------

This commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys. The work is divided into two distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes. It is proposed

to bisect the existing turkey pens in order to conform with good sanitation practices for the control of disease. The construction of an equipment and feed storage building on the turkey project is proposed to provide adequate cover and protection.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^f

Minor Projects:

Bisect 40 turkey-range pens-----	-	-	\$3,000
Construct equipment and feed storage building-----	-	-	4,000
Alteration and improvement projects under \$5,000-----	-	-	1,500

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES ^f

Construct residence at turkey project-----	\$13,875	-	-
Minor Projects:			
Alteration and improvement projects under \$5,000-----	2,071	\$654	-
TOTAL EXPENDITURES, CAPITAL OUTLAY (Fair and Exposition Fund)-----	\$15,946	\$654	\$8,500

RECONCILIATION WITH APPROPRIATIONS

Fair and Exposition Fund

APPROPRIATIONS

Budget Act appropriation-----	\$16,600	-	\$8,500
Prior Year Balances Available:			
Budget Act of 1957, Item 287-----	-	\$654	-
Total Available-----	\$16,600	\$654	\$8,500
Available in subsequent years-----	654	-	-
TOTAL EXPENDITURES, CAPITAL OUTLAY (Fair and Exposition Fund)-----	\$15,946	\$654	\$8,500

^b Expenditures from bond funds not included in budget totals.

^f From Fair and Exposition Fund unless otherwise indicated.

GENERAL ANALYSIS

The 5-year building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards:

For cell buildings—1 bed and 1 prisoner per cell.

For dormitory—1 bed per 50 square feet.

The program also includes rehabilitation of the older prisons and elimination of unsafe facilities. The rated capacities shown below are computed on the above standards with 75 percent of the hospital, isolation and segregation beds being included.

The projected population is based on an anticipated court commitment rate of 70 per 100,000 population in the 18-49 age group for adult male felons.

The 1959-60 major construction program is primarily directed toward an expansion of capacity to meet the needs of an in-

creasing inmate population and to progress toward the goal set forth above. *Additional construction to increase rated capacity is proposed* including a 144-capacity dormitory addition at the Tehachapi Branch, Institution for Men, Chino, and a 120-capacity cottage at the Institution for Women, Corona.

Utilities and auxiliary buildings are proposed to meet the requirements at the various institutions to handle the increasing inmate population. These facilities include an employee activity building, an administration building addition, and additional water lines. *The relocation of exercise fields is proposed* to start the major rehabilitation at the oldest and largest prison.

The 1959-60 minor construction program mainly proposes essential projects at the older institutions, as well as projects to correct deficiencies and provide some improvement of the physical plants at all institutions.

^c Expenditures from bond funds not included in budget totals.

Men's Colony

The Men's Colony is located 5 miles west of San Luis Obispo and approximately 12 miles east of Morro Bay on the north side of State Highway No. 1. The present facility utilizes the hospital section of Army installations at Camp San Luis Obispo to provide capacity for 1,350 inmates in open barracks type wooden buildings.

Pursuant to Section 2046 of the Penal Code, planning is well advanced and preparation of site work practically completed for a new medium security institution to house 2,400 inmates

adjacent to the present facility. It is planned eventually to add another 600-man minimum security unit at this location at a future date, bringing the total capacity of the new facility to 3,000 inmates. Plans are made to continue the present 1,350-inmate facilities in operation.

Included in the budget are funds for an employee activity building at the new medium security facility. Minor construction projects totaling \$27,885 are included to correct operational deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^a

Construct employee's activity building	-	-	\$290,300
State Construction Program Fund			
This project will provide a dining room and kitchen for employees at the new medium security facility.			
Minor Projects:			
Remodel dishwashing machine rooms	-	-	13,335
Construct vegetable preparation and storage building	-	-	7,300
Alteration and improvement projects under \$5,000	-	-	7,250

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES ^a

Purchase land for construction site	-	\$5,000	-
Construct new medium security facilities (Phase 2)	-	4,256,213	-
State Construction Program Fund			
Construct new medium security facilities (Phase 3)	-	5,513,380	-
State Construction Program Fund			
Construct new medium security facilities (Phase 1)	\$10,761,000	500,000	-
State Construction Program Fund			
Construct new medium security facilities (Utilities and services only)	3,263	12	-
Working plans for medium security facilities	-	300,000	-
Relocate and renovate existing army building—200 capacity	36,609	6,012	-
Equip existing army buildings	4,580	445	-
Minor Projects:			
Remodel building for library	-	6,500	-
Remodel building for education	-	7,245	-
Equip dayrooms (first of 2 increments)	-	6,000	-

^a From Capital Outlay and Savings Fund unless otherwise indicated.

6	Institution for Men			
7	This is primarily a minimum security prison with extensive			
8	agricultural and industrial programs. The institution is located			
9	in San Bernardino County about 2 miles south of Chino on			
10	2,566 acres of land. It was opened in 1941 and consists of			
11	reinforced concrete permanent main buildings, semipermanent			
12	steel industrial building, frame farm buildings and temporary			
13	steel barracks building. The total capacity at Chino is 1,347			
14	including the 400 capacity reception-guidance center. It has a			
15	rated permanent-type capacity of 730. The temporary barracks			
16	have a capacity of 217. The state camps have a capacity of 350			
17	which, with the scheduled operation of the 2 additional author-			
18	ized state camps will bring the total capacity to 510 in Septem-			
19	ber, 1959. The southern reception-guidance center is located on			
20	a 15-acre portion of the Chino site, and is reinforced concrete			
21	construction with a capacity of 400 inmates. It is planned to			
22	increase this capacity from 400 to 550 with the construction of			
23	a 150-cell addition, which is scheduled for completion in Sep-			
24	tember, 1960.			
25	The Tehachapi Branch, located at the former women's insti-			
26	tution near Tehachapi, is administered by the main institution			
27	at Chino. It has a rated capacity of 300.			
28	Included is a project to construct an addition to a dormitory			
29	at the Tehachapi Branch for additional capacity of 114. Minor			
30	construction projects totaling \$114,965 are included to correct			
31	deficiencies and to improve the physical plant.

5	State Prison at Folsom			
6	This is a maximum security prison with emphasis upon industrial and work programs. The total rated capacity is 2,253 inmates including 1,947 in the institution and 306 in camps. The original construction was completed in 1858 and is located on 1,700 acres of land about 2 miles northeast of the City of Folsom.			
7	Modernization and rehabilitation of some of the older facilities at Folsom is needed and will be considered in master planning which is authorized. The construction program consists of minor projects totaling \$77,490 to correct deficiencies and improve the physical plant.

State Prison at Soledad

This is a medium-security institution with agricultural, industrial, academic, and vocational training programs. The central facility consists of permanent reinforced concrete construction and was completed with a rated capacity of 1,527 inmates in December, 1951. A temporary barracks-type unit with rated capacity of 272, but an administrative population quota of 630, operates as a farm unit. 4 camps totaling 181 inmates are maintained. The new north facility with a rated capacity of 1,200 was opened for inmates in November, 1958. When this unit is completely activated, total rated capacity at Soledad will be 3,180.

The institution is located on 936 acres of land in the Salinas Valley about 4 miles north of the town of Soledad and is surrounded by farm land.

The budget includes an addition to the north facility administration building and provides additional water lines to handle increased water demands. Minor construction projects totaling \$88,725 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^a

Construct addition to north facility administration building-----	-	-	\$147,500
State Construction Program Fund			
This project provides additional office area space for the in-			
service training function, and provides a second board hear-			
ing room for the Youth Authority members. This addition			
is required due to a change in the staffing pattern and opera-			
tions resulting from an increase in the number of Youth			
Authority wards being housed.			
Install additional water lines-----	-	-	75,000
State Construction Program Fund			
This project will provide the required line capacity to meet			
usage demands that have increased with the opening of the			
new north facility unit.			
Minor Projects:			
Provide primary disposal ponds-----	-	-	27,925
Recondition culinary refrigerators (1st of 3 increments)-----	-	-	25,000
Install emergency lighting-----	-	-	10,000
Recondition buildings (barracks)-----	-	-	22,000
Alteration and improvement projects under \$5,000-----	-	-	3,800

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES ^a

Equip additional warehouse-----	-	\$6,000	-
Equip additional vocational shops-----	-	184,000	-
Construct additional warehouse-----	-	89,600	-
State Construction Program Fund			
Construct industries building-----	-	350,000	-
State Construction Program Fund			
Construct additional vocational shops-----	-	750,000	-
State Construction Program Fund			
Expand dairy facilities-----	\$47,822	57,328	-

Deuel Vocational Institution

This medium-security institution is located on 783 acres of farmland in San Joaquin County 4 miles east of Tracy, and 15 miles south of Stockton. It is primarily an academic and vocational training institution for younger offenders with some industrial and farming activities also available. The institution operates a reception-guidance center processing Youth Authority wards committed by the criminal courts and an adjustment center unit handling behavior problem cases in the younger age group.

The institution has a rated capacity of 1,215 inmates which will be increased to 1,515 when the new 300-man reception-guidance center is completed in July, 1960. The budget includes funds to partially equip the new reception-guidance center. Minor construction projects totaling \$112,552 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES^a

Equip new reception-guidance center (partial cost)	—	—	\$45,500
State Construction Program Fund			
To partially equip the new reception-guidance center project authorized in 1957-58 and scheduled for completion in July, 1960. This amount will permit ordering of items with extended delivery dates.			

^a From Capital Outlay and Savings Fund unless otherwise indicated.
^c Expenditures from bond funds not included in budget totals.

GENERAL ANALYSIS

The Capital Outlay program of the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population and an increase in rate of commitment from the counties. The demand for additional capacity is being alleviated to some extent by a program of encouraging improvements in juvenile law enforcement and probation, increased use of county juvenile homes and camps through both maintenance and construction subsidies, and increased use of parole.

The major projects in the Capital Outlay program for the 1959-60 year consist of the third 400-boy increment of the new Youth Training School and certain related auxiliary facilities.

A new dormitory and alterations are included at the Northern Reception Center; a new dormitory, additions to academic

school and employee housing for Fricot Ranch School; and 2 dormitories, an arts and crafts building plus a new chapel and a Special Treatment program facilities, at Fred C. Nelles School. This latter facility is to be conducted on an experimental basis of providing special buildings only for classrooms and clinic operations, and utilizing regular dormitory space.

At Preston School of Industry is included a replacement dormitory; at Los Guilucos School a laundry building is included; and at Ventura School for Girls is included equipment for phase I of the new institution.

Minor construction projects are budgeted for all existing institutions with the exception of Forestry Camps for Boys to provide for necessary alterations, improvements and small scale additions.

^c Expenditures from bond funds not included in budget totals.

6	Northern California Reception Center and Clinic			
7	This institution is located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins. This facility receives all boys and girls from Northern California. The major purpose is to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psycho-			
8	logical, and psychiatric treatment are given. Serious medical and psychiatric cases developing in the schools are also treated. Upon completion of the projects financed in the 1959-60 Budget, this institution's capacity will total 260 plus 42 hospital and detention beds.

Youth Training School

Chapter 303, Statutes of 1949, added Section 1250 to the Welfare and Institutions Code which provides for "an institution for the confinement of males to be known as the Youth Training School." It is located on the site of the Institution for Men, Chino. It is planned that this school will ultimately house

1,200 wards of the 18 to 21 age group. It will have a vocational education type program. The capacity of the initial development is 400 beds plus 30 hospital and detention beds. The third increment of 400 beds plus 16 detention beds plus related facilities are included in this budget.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^a

Construct 1 400-ward living unit--third increment-----	--	--	\$2,718,300
State Construction Program Fund			
This project will provide the necessary beds to complete the institution's capacity of 1,200.			
Construct addition to administration building-----	--	--	47,500
State Construction Program Fund			
This project provides increased administrative space for the full capacity of the institution.			
Construct addition to commissary-----	--	--	69,500
State Construction Program Fund			
This project provides warehouse space for necessary supplies for full capacity of the institution.			
Equip Youth Training School-----	--	--	406,000
Capital Outlay and Savings Fund-----			\$231,000
State Construction Program Fund-----			175,000
This provides the balance of the necessary equipment for the initial occupancy of the institution in January, 1960.			
Minor Projects:			
Construct warehouse addition-----	--	--	8,250
Provide water storage facilities-----	--	--	10,200

^a From Capital Outlay and Savings Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

6	Ventura School for Girls			
7	This institution is located near Ventura in Ventura County. on a level site acquired in the 1952-53 Fiscal Year. The capacity of the existing institution is 216, including 30 hospital and detention beds.			
8	The present school was constructed in 1916 on hillside terrain. The proposed school as funded will have a capacity of 300 plus 14 hospital beds and 50 detention beds. The ultimate planned capacity for this institution is 550.			
9	Present facilities are of a 2-story cottage type, each cottage containing its own kitchen, dining room, and living area. Dormitories are located on the second story and consist of 2 15-girl dormitories in each cottage making supervision difficult and expensive. The present plan is to construct a new institution

DEPARTMENT OF EDUCATION—Continued

DEPARTMENTAL ADMINISTRATION

Chapter 1681, Statutes of 1957, provided funds for the acquisition of sites for the 4 state colleges. In addition, it provided for the legal establishment of colleges to be known as Alameda State College and Orange State College. The appropriations therefor are shown under the respective colleges. Site purchase

appropriations for the other two areas—Stanislaus County and North Bay—are reported under the Department of Education. It is anticipated that the sites will be acquired during the 1958-59 Fiscal Year.

STATE COLLEGES

Enrollments

The construction program for the 11 existing state colleges is based on a projected enrollment of 71,000 regular students (FTE) in 1961-62. This is an increase of 13,290 over the 57,710 regular students (FTE) anticipated in 1959-60. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

Enrollment trends have been estimated from statistics on prior experience of the progression of students from high schools

to the colleges and through the various collegiate-level grades. The data include a compilation of numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university area. The projections also assume a continual increase in the percentage of population attending college in tax-supported institutions.

The following table outlines actual enrollments of regular students in the state colleges from 1956-57 to 1957-58 and estimated enrollments from 1958-59 to 1961-62.

Full-time Equivalent Enrollments of Regular Students¹—1956-62

	Actual		Estimated

DEPARTMENT OF EDUCATION—Continued

STATE COLLEGES—Continued

Capacity

The basic unit for measuring classroom student capacity is the student station. The stations are weighted depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and a weighting, based upon the time of required attendance per unit of student credit in each type of classroom, is given each student station.

The weighting is predicated on utilization standards which fix practical maximum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms must be occupied an average of 75 percent of student station capacity each hour of use, while activity rooms and laboratories must be

occupied an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from 1 school year to the next.

A fourth categorization is that of earned capacity. This is the capacity that results from actual enrollments in courses that use rooms which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The existing and funded capacity of the various college plants based on planned 1961 use is shown below.

Summary of Capacity—Existing and Funded—Available in the Fall of 1961

COLLEGE	LECTURE	ACTIVITY	LABORATORY	EARNED	TOTAL
Chico State College	2,257	652	229	201	3,339
Fresno State College	4,411	609	544	577	6,141
Humboldt State College	933	284	308	70	1,595
Long Beach State College	4,775	1,153	878	350	7,156
Los Angeles State College of Applied Arts and Sciences	3,455	835	598	400	5,288
Sacramento State College	3,243	415	380	218	4,256
San Diego State College	6,370	897	888	347	8,502
San Fernando Valley State College	1,459	712	625	418	3,214
San Francisco State College	4,568	1,317	441	418	6,744
San Jose State College	6,829	1,780	850	480	9,939
California State Polytechnic College:					
San Luis Obispo Campus	3,508	34	775	256	4,573
Kellogg-Voorhis Campus	1,542	34	481	69	2,126
Totals	43,350	8,722	6,997	3,804	62,873

The total 1961 existing and funded capacity of 62,873 FTE is short 8,127 FTE of the needed capacity to house enrollments anticipated in 1961-62. The construction projects included in the budget for 1959-60 will include a total capacity of 4,229 FTE. Working drawing projects will provide 7,750 FTE. The excess of 3,852 FTE is necessary to house enrollments anticipated in 1962-63.

Status of Presently Authorized and 1959-60 Governor's Budget

	Enrollment	Capacity
1961-62 enrollment of regular students (FTE)	71,000	—
1961 existing and funded capacity	—	62,873
1959-60 proposed projects (construction)	—	4,229
1959-60 proposed projects (working drawings)	—	7,750
Totals	71,000	74,852

PROJECTS PROPOSED FOR FINANCING IN 1959-60

The total capital outlay program for the state colleges, including the California Maritime Academy, is \$31,290,787. \$21,998,620, or 70.3 percent of the total program, is included in the budget to finance major construction projects. The balance is composed of projects for the purchase of equipment, \$8,072,800 and minor construction projects, \$1,219,367. The nature of the projects and the justification for including them is summarized below.

Science and Engineering Facilities

Included in the budget are 2 construction projects to house 436 additional regular students (FTE) in science and engineering. For 2 additional projects working drawings are required which will provide capacity for 1,607 FTE for 1962-63 enrollments. The aeronautics building at San Jose State College, funded in 1958-59 is resubmitted to the Legislature to be considered in conjunction with a request for an aeronautical test cell. The aeronautics building and test cell will add capacity for 74 FTE regular students. An engineering building is proposed for the California Maritime Academy. The total cost of these projects is \$4,031,440 which is 18 percent of the total of major construction budget.

The increased importance of science and engineering programs has resulted in an expanded enrollment in these areas, necessitating an expansion of existing facilities.

Other Instructional Facilities

Included in the budget are 4 construction projects to house approximately 2,910 regular students (FTE) in education, fine arts, general classrooms and forestry management. Additional capacity is proposed for only those colleges which would experience a significant shortage in existing and funded capacity in 1961-62. 1 additional project will provide additional faculty office space while another project is for working drawings only

which will provide capacity for 5,152 FTE for 1962-63 enrollments.

The total cost of these projects is \$5,619,150. This is 26 percent of the total expenditure for major construction.

Physical Education Facilities

There are 10 projects included in the budget which are to provide physical education facilities. The cost of the projects is \$5,048,850 and accounts for 23 percent of the total major construction expenditure program. Of these 10 projects, 4 will provide swimming pools, 4 are for construction of gymnasiums which will provide 461 FTE capacity, and 2 will provide outdoor physical education facilities.

Agriculture Facilities

2 projects costing \$1,610,900 are included in the budget. Both of these projects are located at California Polytechnic College and will add capacity of 32 regular students (FTE) in the agricultural programs. This expenditure is 7 percent of the total of major construction expenditures.

Libraries

The funds for the construction of 1 library and the preparation of working drawings for another are included in the budget. The total expenditure of \$1,272,500 represents 6 percent of the cost of the major construction projects.

Health Centers

1 health center project is included in this budget. This project is an addition to the existing health building at San Francisco State College. The cost will be \$215,600. This is 1 percent of the cost of the total major construction program.

DEPARTMENT OF EDUCATION—Continued

STATE COLLEGES—Continued

PROJECTS PROPOSED FOR FINANCING IN 1959-60—Continued

Cafeterias

Included in this budget are 3 projects to provide additional cafeteria facilities at 3 state colleges. The need for these additional facilities is created primarily because of increasing enrollments and in part by the occupancy of the on-campus residence halls which will require increased cafeteria facilities.

The total cost of these projects is \$1,927,900 or 9 percent of the major construction program.

Maintenance Facilities

This budget includes 2 corporation yard projects, 3 steam plant additions, an electrical distribution system, and 2 site acquisition projects. These projects are required to service new and expanding physical facilities of the state colleges.

The total cost of these projects is \$1,623,580. This amount represents 7 percent of the total major construction cost.

Administration Facilities

Included in the budget are funds for the construction of an administration building addition at Long Beach State College which will also provide 390 FTE of classroom capacity, and

working drawings for a combination administration-classroom building at California Polytechnic State College. These facilities are required by the increasing enrollments and the corresponding increases in faculty and administrative staff.

The total cost of these projects is \$648,700, or 3 percent of the major construction cost.

Equipment

In addition to the major construction program \$8,072,800 included in this budget for equipping buildings and facilities previously funded, and those facilities funded this year, which are scheduled for completion in 1959-60. The total cost of the equipment is 36.7 percent of the total cost of the capital outlay program.

Minor Capital Outlay

The final portion of the capital outlay program is a total \$1,219,367 which is included in this budget for projects of minor capital outlay including a number of equipment projects for new instructional programs. The total of minor capital outlay projects is 3.9 percent of the total capital outlay program.

SPECIAL SCHOOLS

At the present time the Department of Education administers 6 special schools; 2 for the education of deaf children, 2 for cerebral palsied children, 1 for the education of blind children and 1 orientation center for the adult blind.

The facilities of the deaf school at Berkeley have been augmented by the completion of an addition to the existing vocational building to provide students with those skills necessary in the metal fabricating trades. It is anticipated that the presently financed addition to the classroom facilities for the intermediate and advanced schools will be completed and ready for instructional purposes in 1959-60. This will allow the school to reach its maximum planned capacity of 500. No major projects have been proposed for 1959-60.

The 2 schools for cerebral palsied children located at Altadena and San Francisco each have a capacity of approximately 100 residents. The school in San Francisco is a relatively new facility, being housed on the campus of San Francisco State College, and having been completed in 1955. The southern school occupies rented quarters of a somewhat older nature. Funds have been provided for the acquisition of a site adjacent to the Los Angeles State College of Applied Arts and Sciences with which institution the school will co-operate in the training of teachers of handicapped children.

Alameda County State College

A 4-year liberal arts state college for Alameda County, emphasizing teacher education, was established by Chapter 1681, Statutes of 1957, which appropriated \$1,650,000 for site acquisition and improvements. An additional \$830,108 was

appropriated by the Budget Act of 1958. This budget does not include further appropriations for 1959-60 as amounts available are sufficient to continue the development program.

a science building addition, classroom building, cafeteria addition, and residence halls. *Construction proposed* in this budget includes a men's gymnasium addition to house the Air Force Reserve Officers Training Corps facilities, and an addition to the women's gymnasium. These projects will provide 258 additional FTE capacity.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^a

Construct men's gymnasium R.O.T.C. addition-----	-	-	\$150,000
State Construction Program Fund			
This project will provide the facilities necessary to conduct an			
Air Force Reserve Officers Training Corps program and will			
allow the final removal of classes from the former campus			
and provide additional lecture facilities for 144 FTE.			
Equip men's gymnasium ROTC addition-----	-	-	9,850
Capital Outlay and Savings Fund-----	\$750		
State Construction Program Fund-----	9,100		
Construct women's gymnasium addition-----	-	-	823,050
State Construction Program Fund			
This project will provide physical education facilities for the			
estimated enrollment in women's physical education facilities			
and provide additional lecture facilities for 114 FTE.			
Equip science building addition-----	-	-	129,100
Capital Outlay and Savings Fund-----	\$28,300		
State Construction Program Fund-----	100,800		
This project provides equipment for the science building addition			
funded in the Budget Act of 1958.			
Equip classroom building No. 3-----	-	-	33,200
Capital Outlay and Savings Fund-----	\$3,200		
State Construction Program Fund-----	30,000		
This project provides equipment for classroom building No. 3			
which was funded by the Budget Act of 1958.			
Equip cafeteria addition-----	-	-	52,500
Capital Outlay and Savings Fund-----	\$28,300		
State Construction Program Fund-----	24,200		
This project provides equipment for the cafeteria addition			
funded by the Budget Act of 1958.			
Minor Projects:			
Replace farm wells and pumps-----	-	-	15,750
State College Fund			
Install raisin processing equipment-----	-	-	5,000
State College Fund			
Construct storage and fumigation room-----	-	-	5,000
State College Fund			
Alteration and improvement projects under \$5,000-----	-	-	2,500
Alteration and improvement projects under \$5,000-----	-	-	11,220
State College Fund			

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES ^a

Site acquisition-----	\$97,911	\$218,038	-
State College Fund			
Equip speech-drama building-----	-	165,000	-
Equip outdoor physical education facilities-----	-	3,000	-

Humboldt State College

Humboldt State College offers programs in teacher education, liberal arts, wildlife management, and vocational training. An enrollment of 2,000 regular students (FTE) is estimated for 1961-62. Presently existing and funded capacity totals 1,595 (FTE), including projects currently under construction which

are a natural science building, cafeteria, student health center, and residence halls. This budget includes an education-psychology building, outdoor physical education facilities, and a forestry building providing 421 (FTE) additional capacity to meet the increasing enrollments.

STATE BUILDING PROGRAM**PROPOSED 1959-60 EXPENDITURES^a**

Construct education-psychology building	—	—	\$663,500
State Construction Program Fund			
This project provides classrooms, activity rooms, laboratories, and faculty offices to house 310 FTE in education and psychology.			
Construct outdoor physical education facilities	—	—	160,500
State Construction Program Fund			
This project provides for the relocation and renovation of existing outdoor physical education facilities, necessitated by recent construction projects.			

^a From Capital Outlay and Savings Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

46	Sacramento State College			
47	This college was established in 1947, and moved to its present 265-acre site in 1953. A regular student enrollment of 3,900 FTE is estimated for 1961-62. Presently existing and funded capacity totals 4,256 FTE with an engineering building, cafeteria addition, administration building addition, and residence halls currently under construction. This budget includes such specialized facilities as a women's gymnasium, a swimming pool with a capacity of 143 FTE. Also included is \$716,700 for the second increment of equipment for the engineering building. This latter amount is in addition to the \$1,000,000 provided in the Budget Act of 1958.

48	PROPOSED 1959-60 EXPENDITURES ^a			
49				
50	Working drawings for life science addition -----	-	-	\$225,000
51	<i>State Construction Program Fund</i>			
52	This project will provide working drawings for a future life			
53	science building addition of 1,014 FTE capacity.			
54	Construct corporation yard -----	-	-	500,000
55	<i>State Construction Program Fund</i>			
56	This project will replace the present corporation yard which			
57	must be relocated because of other construction. It will			
58	provide shops and storage area for maintenance and repair			
59	of buildings, grounds, and equipment.			
60	Construct cafeteria addition -----	-	-	325,000
61	<i>State Construction Program Fund</i>			
62	This project will provide additional student and faculty dining			
63	room and snack bar facilities.			
64	Equip men's physical education building and swimming pool -----	-	-	111,000
65	<i>Capital Outlay and Savings Fund -----</i>	<i>\$22,000</i>		
66	<i>State Construction Program Fund -----</i>	<i>89,000</i>		
67	This project will equip the physical education facilities financed			
68	by the Budget Act of 1957.			
69	Equip education building addition -----	-	-	73,500
70	<i>Capital Outlay and Savings Fund -----</i>	<i>\$22,500</i>		
71	<i>State Construction Program Fund -----</i>	<i>51,000</i>		
72	This project will equip the addition to the education building			
73	financed by the Budget Act of 1958.			
74	Equip administration building addition -----	-	-	99,000
75	<i>Capital Outlay and Savings Fund -----</i>	<i>\$9,900</i>		
76	<i>State Construction Program Fund -----</i>	<i>89,100</i>		
77	This project will equip the addition to the administration build-			
78	ing financed by the Budget Act of 1957.			
79	Equip engineering and applied science building addition -----	-	-	991,000
80	<i>Capital Outlay and Savings Fund -----</i>	<i>\$218,000</i>		
81	<i>State Construction Program Fund -----</i>	<i>773,000</i>		
82	This project will equip the addition to the engineering building			
83	financed by the Budget Act of 1958.			

^a From Capital Outlay and Savings Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

building, residence halls, and a health service building addition. This budget includes the construction of a corporation yard, a cafeteria addition and working drawings for a new life science building. This latter building will provide a capacity of 1,014 FTE but will not be available until 1962-63.

San Jose State College

The present facility was established in 1870, and is a fully accredited 5-year college offering programs in general education and teacher training. The enrollment estimate of regular students for 1961-62 is 11,200 FTE. Presently existing and funded capacity totals 9,939 FTE.

Projects currently funded and under construction are a library addition, music building addition, engineering building addition, speech and drama building addition and residence

halls. Additional facilities proposed in this budget include the construction of an education building, outdoor physical education facilities, and necessary steam and electrical facilities. Additional capacity of these buildings will be 1,898 FTE. The aeronautics building, funded by the Budget of 1958, is resubmitted for legislative review to be considered with a request for a test cell for jet engines to cost \$352,800.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^b

Construct education building	—	—	\$2,378,000
State Construction Program Fund			
This project will provide classrooms, laboratories and faculty offices necessary to accommodate 1,893 FTE in education and psychology.			
Construct outdoor physical education facilities	—	—	730,500
State Construction Program Fund			
This project will provide a baseball diamond, playfield, practice field, tennis courts and building housing instructional facilities for the south campus.			
Equip outdoor physical education facilities	—	—	12,600
Capital Outlay and Savings Fund	\$4,400		
State Construction Program Fund	8,200		
Develop electrical distribution system (Phase I)	—	—	108,800
State Construction Program Fund			
The project will provide adequate electrical service which is required by construction of new facilities.			
Construct and equip aeronautics test cell	—	—	352,800
State Construction Program Fund			
This project will provide a facility for the operation of turbojet aircraft engines in conjunction with the aeronautical engineering. This project will provide an additional capacity of 5 FTE.			
Construct aeronautics building	—	—	910,500
State Construction Program Fund			
This project is to provide facilities for 89 regular students (FTE) in aeronautics. The Budget Act of 1958 funded this project which is now resubmitted for legislative review to be considered with the test cell.			
Enlarge steam services	—	—	106,030
State Construction Program Fund			
This project will correct differences in the existing steam system and provide steam service to new facilities under construction.			
Equip library addition	—	—	441,600
Capital Outlay and Savings Fund	\$22,000		
State Construction Program Fund	419,600		
This project will provide the equipment necessary for proper utilization of the library addition funded by the Budget Act of 1958.			

^b From State Construction Program Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

California State Polytechnic College

California State Polytechnic College, established in 1901, provides occupational education at the collegiate level in agriculture, engineering, and the arts and sciences.

The main campus at San Luis Obispo is located on a 2,838-acre site and has a capacity of 4,573 regular students (FTE) including existing and currently funded buildings. An enrollment of 5,500 regular students is anticipated for 1961-62. In order to partially meet this increase in enrollment, the 1959-60 Budget includes a food processing building (27 FTE capacity), a library addition, a new corporation yard and a boiler addition. Working drawings for an engineering building with a capacity of 593 FTE are included. This building will not be ready until 1962-63.

The Southern California campuses are maintained near Po-

mona. The Voorhis unit specializes in citriculture, ornamental horticulture and related courses and is situated on a 150-acre site.

The Kellogg unit consists of 812 acres received as a restricted gift in 1952. The capacity of the Kellogg-Voorhis Campus is 2,126 regular students (FTE) including existing and currently funded buildings. An enrollment of 3,200 regular students (FTE) is anticipated for 1961-62. In order to accommodate this increase in student population, the 1959-60 Budget includes the construction of a cafeteria addition and a meats processing building. In addition, funds for working drawings for an administration-classroom building with 991 FTE capacity are included. This building will not be ready for occupancy until 1962-63.

STATE BUILDING PROGRAM**PROPOSED 1959-60 EXPENDITURES ^a****San Luis Obispo Campus:**

Construct food processing building	—	—	\$1,412,600
State College Fund			
This project will provide facilities for dairy manufacturing, meat processing, refrigerated storage, fruit and vegetable processing, laboratories and related faculty offices to provide capacity for 27 FTE.			
Working drawings for engineering building	—	—	185,000
State Construction Program Fund			
This project will provide additional classrooms, activity rooms, laboratories with related auxiliaries and faculty offices to serve 593 FTE students in engineering.			
Construct library addition	—	—	1,222,500
State Construction Program Fund			
This project will provide additional reading area and stack space in order to accommodate increases in student enrollment.			
Construct corporation yard	—	—	500,000
State Construction Program Fund			
This project will provide necessary shops and storage areas in order to maintain buildings, grounds and equipment. Relocation of the existing corporation yard is necessary because of the new library addition.			
Site development	—	—	106,050
State Construction Program Fund			
This project will provide improvements to water supply system and extension of utilities to thoroughbred unit.			
Construct additional boiler	—	—	91,300
State Construction Program Fund			
This project will provide additional boiler capacity in order to adequately heat buildings included in the 1959-60 budget.			
Relocate thoroughbred unit	—	—	\$0.400
State Construction Program Fund			
This project will relocate the thoroughbred unit from the present location which is master planned as the site for the corporation yard which is included in the 1959-60 budget.			

^a From State Construction Program Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

California Maritime Academy

This school is located at Vallejo and will have an average enrollment of 210 students in 1959-60. Permanent facilities at this campus consist of a gymnasium and pool, classroom buildings, messhall, administration building and residence hall.

All other facilities are temporary structures. Based on the requirements of the instruction program an engineering building is included in the 1959-60 budget.

School for the Deaf, Riverside

The third unit of dormitory and classroom construction was completed and ready to receive students in September of 1958. This increased the school's enrollment capacity to 463 resident students and 37 day students. The 1958-59 Budget provided for

the construction of a gymnasium to complete the facilities necessary for the school's educational program. *The 1959-60 capital outlay program proposes* only minor projects to replace or improve existing facilities.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES^a

Minor Projects:

Replace primary power distribution system	—	—	\$27,400
Install deep freeze box	—	—	6,000
Alteration and improvement projects under \$5,000	—	—	10,100

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES^a

Construct gymnasium	—	\$449,430	—
<i>State Construction Program Fund</i>			
Equip gymnasium	—	20,000	—
Construction of third unit	\$33,567	—	—
Installation of boiler and additional mechanical work	1,500	—	—
Construction of running track and drainage project	—1,127 ^d	—	—
Work drawings—new gymnasium	28,270	—	—
Construct second unit	—6,602 ^d	—18,959 ^d	—
Minor Projects:			
Air condition spotting and pressing shop	13,500	—	—
Construct warehouse	6,000	—	—
Replace condensate lines	19,690	—	—
Decomposed granite on bare areas	14,200	—	—
Alteration and improvement projects under \$5,000	19,799	967	—
Sidewalks along Arlington Avenue	3,000	—	—
<i>General Fund</i>			
TOTAL EXPENDITURES, CAPITAL OUTLAY	\$131,797	\$451,438	\$43,500
<i>General Fund</i>	<i>3,000</i>	—	—

The University of California maintains 8 campuses through-

out the State from La Jolla in the south to Davis in the north.

2 of these campuses, La Jolla and Mt. Hamilton, are research

centers rather than teaching institutions. The other 6, Berkeley,

Davis, Los Angeles, Riverside, San Francisco and Santa Bar-

bara, are teaching campuses. San Francisco is a specialized

institution, concentrating on medical sciences.

In addition to the 8 campuses, numerous agricultural experi-

ment and field stations are maintained throughout the State.

The capital outlay for these stations and the agricultural activi-

ties on the teaching campuses is provided from a continuin,

appropriation from the Fair and Exposition Fund.

The 1959-60 Capital Outlay program for the university total

\$24,327,155. Of this amount \$22,827,155 is from the stat

sources. The balance of \$1,500,000 is from university contrac

overhead funds. The distribution of amounts by campus and

source of financing is shown in the table below:

\$1,500,000

\$1,500,000

The amount of \$1,500,000 from contract overhead funds is scheduled to be used for the purchase of structures for the use of the University extension program.

Continuing appropriations from the Fair and Exposition Fund total \$4,440,442. However, project expenditures from the Fair and Exposition Fund total \$1,851,532. The remaining balance of \$2,588,910 will be used to fund projects that were previously budgeted but not financed because of an over programming of the Fair and Exposition Fund.

The 1959-60 program continues the policy of providing needed

instructional capacity with only those auxiliary facilities necessary to carry on the instructional program.

The program is built on a need to meet requirements in 1961 and 1962 in cases where the project is very large and would require an additional year to complete.

The table below contains the enrollment projections through 1962 on which the Capital Outlay budget was based. Only instructional campuses are included. Specialized teaching and research campuses such as La Jolla, Mount Hamilton and San Francisco are excluded from these projections.

FULL TIME EQUIVALENT STUDENTS

	Fall 1957	Fall 1958	Fall 1959	Fall 1960	Fall 1961	Fall 1962

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^b

STATEWIDE

Preliminary plans -----				\$891,120
State Construction Program Fund -----	\$860,620			
Fair and Exposition Fund -----	30,500			
To provide funds for the preparation of preliminary plans and cost estimates for University projects for inclusion in the 1960-61 Governor's Budget.				
University Extension:				
Acquisition, remodeling, and equipping the California Farm Bureau Federation Building -----				814,960
University Contract Overhead Fund -----				
To acquire new housing for administration of University Extension, providing needed expansion for University Extension and releasing present quarters for expansion of Berkeley Campus.				
Acquisition of downtown Los Angeles extension center -----				685,040
University Contract Overhead Fund -----				
To acquire a building for a University extension center in downtown Los Angeles by providing the down payment on the purchase, the remainder of the purchase to be made over a period of years with revenues of the University Extension.				

^b From State Construction Program Fund unless otherwise indicated.

25	To equip cafeteria funded in the Budget Act of 1958.			
26	Construct off-campus storage building (near Berkeley Campus) .	-	-	1,616,500
27	To prepare working drawings for and construct low-unit-cost			
28	building to house less frequently used library materials			
29	for the northern campuses of the University and to house			
30	temporarily inactive equipment and records which would			
31	otherwise continue to occupy high-cost on-campus space.			
32	Construct physical education courts on block 1886-----	-	-	113,300
33	To prepare working drawings for and construct hard-surface			
34	courts on block 1886.			
35	Transfer Stephens Union and Eshleman Hall to academic use--	-	-	1,676,800
36	To provide for the release of 2 centrally located buildings now			
37	occupied by student activities to make these available,			
38	after release, and alteration (through later appropria-			
39	tion) for teaching and research in the social sciences;			
40	provided, that a complete financial history of these 2			
41	buildings, together with an up-to-date appraisal of the			
42	value of the building, is submitted before any transfer of			
43	funds is made.			
44	Working drawings for engineering unit 1-----	-	-	178,000
45	To prepare working drawings for a building with classrooms,			
46	laboratories, and offices for teaching and research in			
47	engineering design, industrial engineering, mechanical en-			
48	gineering, and nuclear engineering.			
49	Construct Cory Hall improvements, step 2-----	-	-	399,284
50	To prepare working drawings for, construct, and equip various			
51	improvements to Cory Hall for electrical engineering;			
52	work includes construction of assembly shop and hydrogen			
53	furnace room on roof, construction of mezzanines in			
54	high-ceilinged rooms, and various alterations.			
55	Construct engineering building in courtyard south of Hesse Hall	-	-	629,266
56	To prepare working drawings for, construct, and equip a			
57	building with laboratories for teaching and research in			
58	mechanical engineering.			
59	Working drawings for building for architecture, city and re-			
60	gional planning, decorative art, landscape architecture, and			
61	sculpture-----	-	-	217,300
62	To prepare working drawings for a building with classrooms,			
63	laboratories, and offices for architecture, city and regional			
64	planning, decorative art, landscape architecture, and			
65	sculpture.			
66	Working drawings for Le Conte Annex-----	-	-	96,300
67	To prepare working drawings for an addition to Le Conte			
68	Hall with classrooms, laboratories for teaching and re-			
69	search in physics.			
70				
71	Minor Projects:			
72	Expenditures From Capital Outlay and Savings Fund			
73				
74	Enlarge 4 K. V. feeder system of campus main electrical system	-	-	60,000
75	Convert to academic and administrative use part of storehouse			
76	building and residences at 2620 Bancroft Way, 2222 Pied-			
77	mont Avenue, and 2232 Piedmont Avenue-----	-	-	45,000
78	Engineering building—alter attic (room 500) to provide effective			
79	storage facilities-----	-	-	18,500
80	Life sciences building—alter refrigeration room and laboratory			
81	room 3521 for department of bacteriology-----	-	-	9,500
82	Alteration and improvement projects under \$5,000-----	-	-	2,650

42	To construct improvements and provide equipment for facili-			
43	ties in the medical center to meet increasing demand for			
44	services from operations of new neuropsychiatric institute.			
45	Basic sciences Unit 2-----	-	-	404,800
46	To prepare working drawings for building with classrooms,			
47	laboratories, offices, and ancillary facilities for increasing			
48	medical school capacity to accommodate classes of M.D.			
49	candidates to 100 per class.			
50				
51	Minor Projects:			
52	Expenditures From Capital Outlay and Savings Fund			
53				
54	Medical center—mount power transformers on vibration insu-			
55	lators on A level above radiation physics division-----	-	-	20,000
56				
57	MT. HAMILTON CAMPUS			
58	Auxiliary equipment for 120-inch telescope, step 2-----	-	-	83,000
59	To provide auxiliary equipment necessary for use of new 120-			
60	inch telescope.			
61				
62	Minor Projects:			
63	Expenditures From Capital Outlay and Savings Fund			
64				
65	Rehabilitate and modify old photographic building-----	-	-	9,000
66				
67	RIVERSIDE CAMPUS			
68	Equip administration building-----	-	-	71,205
69	Capital Outlay and Savings Fund-----	\$14,300		
70	State Construction Program Fund-----	56,905		
71	To equip administration building funded in the Budget Act			
72	of 1958.			
73	Alterations to social sciences-humanities building-----	-	-	90,425
74	To prepare working drawings for, make alterations to, and			
75	equip space vacated by campus administration to make			
76	it effectively usable for teaching in the social sciences			
77	and humanities.			
78

2				
3	PROPOSED 1959-60 EXPENDITURES ^b —Continued			
4				
5	RIVERSIDE CAMPUS—Continued			
6	Equip addition to physical sciences building -----	-	-	\$321,439
7	Capital Outlay and Savings Fund ----- \$64,000			
8	State Construction Program Fund ----- 257,439			
9	To equip addition to physical sciences building financed in			
10	the Budget Act of 1958.			
11	Construct and equip alterations to physical sciences building -----	-	-	45,867
12	To prepare working drawings for, make alterations to, and			
13	equip space in physical sciences building to integrate			
14	facilities of that building with those of new addition.			
15	Install refrigerated air conditioning for physical sciences build-			
16	ing -----	-	-	249,750
17	To prepare working drawings for and install equipment for			
18	air conditioning the main wing of the physical sciences			
19	building and the addition to the physical sciences			
20	building.			
21	Construct electrical improvements, step 1 -----	-	-	65,000
22	To prepare working drawings for, make alterations to, and			
23	extend electrical service to athletic fields and construct re-			
24	placement for inadequate, hazardous electrical substation;			
25	and make safety corrections to electrical system.			
26	Alterations to Webber Hall -----	-	-	154,832
27	Fair and Exposition Fund -----			
28	To prepare working drawings for, make alterations to, and			
29	equip space vacated in Webber Hall by the life sciences			
30	division to make it effectively usable for research of the			
31	citrus experiment station.			
32	Construct physical education fields and facilities, Step 2 -----	-	-	250,000
33	To prepare working drawings for and construct outdoor ath-			
34	letic facilities; work includes area lighting, utilities dis-			
35	tribution, baseball facilities, and field improvements.			
36	Construct health services building -----	-	-	350,000
37	To prepare working drawings for and construct building with			
38	facilities for health examination, treatment, and related			
39	infirmary-dispensary functions; project will release space			
40	in physical education building for increased needs of			
41	physical education division.			
42				
43	Minor Projects:			
44	Expenditures From Capital Outlay and Savings Fund			
45				
46	Convert buildings on acres known as "Commercial Triangle" to			
47	college bookstore -----	-	-	21,000
48	Alteration and improvement projects under \$5,000 -----	-	-	4,700
49				
50	SAN FRANCISCO CAMPUS			
51	Working drawings for health sciences instruction and research			
52	building -----	-	-	342,800
53	To prepare working drawings for building with facilities for			
54	medical and health sciences instruction and research of			
55	182 undergraduate professional students and 200 graduate			
56	students and fellows.			
57				
58	Minor Projects:			
59	Expenditures From Capital Outlay and Savings Fund			
60				
61	Moffitt Hospital—install emergency power system for elevator.	-	-	11,000
62	Repair terra cotta on University of California Hospital and paint			
63	exterior of University of California Hospital, clinics build-			
64	ing, medical school building, and radiological building -----	-	-	46,500
65	Remove fire hazards in nurses' dormitory -----	-	-	30,000
66				
67	SANTA BARBARA CAMPUS			
68	Construct and equip alterations to science unit 1, step 1 -----	-	-	277,000
69	To prepare working drawings for, make alterations to, and			
70	equip space vacated by biological sciences to make it			
71	effectively usable for chemistry, physics, and geology.			
72	Construct utilities and site development -----	-	-	153,065
73	To prepare working drawings for and construct extensions			
74	to electrical system, develop walks and minimum land-			
75	scaping.			
76	Construct library unit 2 -----	-	-	1,415,400
77	To prepare working drawings for and construct library addi-			
78	tion to provide additional seating and book-stack capacity.			
79				
80	^b From State Construction Program Fund unless otherwise indicated.

7	Minor Projects:			
8	Expenditures From Capital Outlay and Savings Fund			
9				
10	Hearst Mining Building—install ventilation for safety in pres-			
11	sure-volume-temperature laboratory (room 238)-----	-	\$10,000	-
12	Wheeler Hall—improve ventilation system (install air filters,			
13	insulate ducts, etc.)-----	-	15,000	-
14	Old chemistry building—rehabilitate laboratory facilities in room			
15	246, using experimental installation of stations newly de-			
16	signed to achieve greater space utilization-----	-	37,000	-
17	Engineering building—partition and develop photogrammetry lab-			
18	oratory and 2 offices in room 7-----	-	8,500	-
19	Install smog-control equipment on virus laboratory greenhouses			
20	Life sciences building—remodel laboratory in room 2030 for in-			
21	struction in botany-----	-	15,000	-
22	Gilman Hall—rehabilitate electrical distribution system-----	-	35,000	-
23	Remodel areas in mechanics building-----	-	45,000	-
24	Architecture and city and regional planning building—partition			
25	and rehabilitate areas for increased laboratory capacity and			
26	more effective space utilization-----	\$12,500	-	-
27	Men's gymnasium—retiling swimming pool-----	5,628	-	-
28	Public health building—develop unfinished library stack area to			
29	accommodate expanded collections-----	19,500	-	-
30	Gilman Hall—remodel reassigned rooms 15 and 19 for chemical			
31	engineering-----	10,500	-	-
32	Richmond Field Station—increase water supply-----	18,600	-	-
33	Doe Library—install stacks and lighting in undeveloped first tier,			
34	step 1 of 3 steps-----	20,000	-	-
35	Cowell Hospital—(student health)—replace interior steam lines,			
36	step 1-----	17,500	-	-
37	Install additional outdoor lighting throughout campus-----	20,000	-	-
38	Richmond Field Station—increase electrical power capacity-----	14,500	-	-
39	Augment Union cafeteria project-----	14,372	-	-
40	Alteration and improvement projects under \$5,000-----	-	3,500	-
41				
42	Minor Projects:			
43	Expenditures From Fair and Exposition Fund			
44				
45	Alter and modernize room 307 of Agriculture Hall—entomology			
46	and parasitology-----	-	8,000	-
47	Install ventilating hood and drying chamber in room 115 of			
48	Mulford Hall-----	-	9,000	-
49	Construct storage shed for organic solvents and chemical			
50	reagents at forest products laboratory-----	-	11,500	-
51	Install roof temperature tanks in plant pathology greenhouse--			
52	Remodel service-storage building—Gill Tract-----	-	20,000	-
53	Expand distilled water facilities in home economics building-----	-	5,000	-
54	Forestry—convert storage space in room 26, Mulford Hall, to			
55	teaching laboratory-----	-	9,000	-
56	Gill Tract—remodel insectary to provide 4 culture and segrega-			
57	tion rooms for biological control work-----	6,000	-	-
58	Gill Tract—rehabilitate and expand irrigation and drainage			
59	system-----	9,856	-	-
60	Forestry—make improvements to Meadow Valley Summer			
61	Camp, step 2-----	20,000	-	-
62	Hearst Greenhouse Range—install smog protection equipment			
63	in 4 greenhouses-----	12,000	-	-
64	Alteration and improvement projects under \$5,000-----	6,900	-	-
65				
66	DAVIS CAMPUS			
67	Food technology building—completion of fast-freezing unit-----	-	47,700	-
68	<i>Fair and Exposition Fund</i>			
69	Auditorium-----	-	1,290,800	-
70	<i>Fair and Exposition Fund</i>			
71	Poultry husbandry building—complete environmental control			
72	facilities-----	-	350,000	-
73	<i>Fair and Exposition Fund</i>			
74	Physical education fields and facilities-----	-	77,500	-
75	<i>Fair and Exposition Fund</i>			
76	Shop building for department of irrigation-----	-	31,400	-
77	<i>Fair and Exposition Fund</i>			
78	Utilities for central campus and Hopkins Tract—steps 1 and 2--			
79	<i>Fair and Exposition Fund</i>	-	139,500	-
80	Biological sciences unit 2 for plant pathology and bacteriology--			
81	<i>Fair and Exposition Fund</i>	-	2,251,300	-
82	Farm division—move and re-establish headquarters-----	-	210,000	-
83	<i>Fair and Exposition Fund</i>			
84				
85	^b From State Construction Program Fund unless otherwise indicated.

40	Food technology building—revision of cold storage building			
41	(completion)-----	5,949	-	-
42	<i>Fair and Exposition Fund</i>			
43				
44	Minor Projects:			
45	Expenditures From Fair and Exposition Fund			
46				
47	Construct storage laboratory building for landscape management	-	20,000	-
48	Install irrigation facilities in field A-3 and B-2 for viticulture	-	5,600	-
49	Dairy industry creamery—repair and bring up to health standards	-	31,600	-
50	Install laboratory benches (4) in rooms 150D, 150E, and 150F			
51	of food technology building-----	-	12,100	-
52	Construct extension of headhouse No. 31 for vegetable crops-----	-	12,000	-
53	Install walls for building which houses aseptic glass packing line			
54	for food technology (includes lighting, ventilation and elec-			
55	trical bus bar)-----	-	5,250	-
56	Develop reserve book reading room-----	-	20,000	-
57	Install pipelines (1.5 miles) and water troughs in field C-2 for			
58	animal husbandry-----	-	20,000	-
59	Bring electric wiring up to code in campus buildings, step 1-----	-	25,000	-
60	Install hood and alter rooms 255 and 256 in home economics			
61	building-----	-	7,000	-
62	Replace and improve fencing for animal husbandry-----	-	18,500	-
63	Widen street and add sidewalks on California Avenue between			
64	Hutchinson Drive and corporation yard-----	12,000	-	-
65	Genetics—construct lathhouse and headhouse-----	10,000	-	-
66	Animal husbandry—beef field laboratory and steer shed, install			
67	concrete slabs and feed bins-----	10,000	-	-
68	Irrigation—construct storage shed-----	10,500	-	-
69	Hopkins Tract (area D)—supplement and expand domestic			
70	water supply system-----	20,000	-	-
71	Provide additional sidewalks near memorial union, and make			
72	other landscaping and site improvements-----	5,000	-	-
73	Install security fence around poultry space in area D-1-----	10,023	-	-
74	Construct irrigation reservoir for areas B-6, B-7, B-8, B-9-----	15,000	-	-
75	Food technology—construct equipment storage building-----	20,000	-	-
76	Install rabbit-proof fencing in areas B-6, B-7, B-8, B-9 (15,500			
77	feet) and E-3 (8,300 feet)-----	17,250	-	-
78	Irrigation—construct outdoor water measurement laboratory-----	17,000	-	-
79	Purchase of metering devices on the campus wells-----	15,000	-	-
80	Alteration and improvement projects under \$5,000-----	12,350	3,700	-

DEPARTMENT OF EMPLOYMENT

CAPITAL OUTLAY EXPENDITURES

ACTUAL
1957-58ESTIMATED
1958-59PROPOSED
1959-60

GENERAL ANALYSIS

The proposed appropriations will provide for the continuation of the department's building program started in 1948-49. The long-term building program of the Department of Employment proposes to replace leased premises with state-owned buildings where economically sound.

The department is presently leasing office space in many communities throughout the State. The acquiring of state-owned buildings will represent in the future a substantial savings in rent paid by the department. The Federal Bureau of Employment Security will provide a rental grant to the Department of Employment which will be used to amortize the cost of the building projects over a reasonable number of years. Similar grants will also be made for maintenance and repair costs during and after amortization.

The proposed projects would provide sufficient working space correctly designed to meet the specific needs and would be designed to provide for future expansion. The department is continuing its efforts to build an outstanding employment service in California; and experience here and elsewhere in the Nation indicates that suitable premises definitely contribute to employer and applicant acceptance of the program. With properly designed facilities the department can give better service to employers, applicants, and claimants.

The projects include proposed construction of an addition to the Santa Rosa building, purchase of a site and construction of an off-street parking area in Torrance, purchase of a site for an off-street parking area in Los Angeles, construction of an off-street parking area in Redding, installation of mechanical air conditioning in the Long Beach office; and preliminary plans for the 1960-61 Capital Outlay projects.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^k

Purchase of site in Torrance-----	-	-	\$75,000
For the purchase of a site for off-street parking. Funds were appropriated in 1957-58 for the construction of a Department of Employment building in this city. The site will provide parking space for only 23 automobiles. This is inadequate in relation to the present staff of 50 and the heavy volume of public traffic. This request provides for land acquisition of a parking area to accommodate an additional 60 automobiles.			
Purchase of site in Los Angeles-----	-	-	185,000
For the purchase of a site for off-street parking. There is parking space available for only 83 automobiles on the site of this agency's new Los Angeles building. This is inadequate for the 500 employees housed in this building and the parking requirements of the public. This building houses 2 local employment offices, creating very heavy public traffic. Existing parking facilities fall short of the requirements of the city ordinance for office building parking. Land acquisition is therefore proposed to provide for the parking of approximately 100 additional automobiles.			
Construct addition to existing building—Santa Rosa-----	-	-	105,000
To provide funds for plans and working drawings and for construction of an addition to the Santa Rosa Department of Employment office building. Land for the building addition was acquired during the 1957-58 Fiscal Year. This project provides funds for the construction of an addition of approximately 5,889 square feet to be used in local office operations. Due to a rapid increase in activities, space available to this local office is inadequate and it has been necessary to move the farm placement activities to another location. Additional growth in activities is estimated in the years ahead. The proposed addition will approximately double the local office space.			
Preliminary plans for cost estimates on employment projects for inclusion in the 1960-61 Governor's Budget-----	-	-	7,346
Minor Projects:			
Site development—Redding-----	-	-	4,900
To provide funds for preparation of plans and construction of an off-street parking area for the Redding office.			
Land for off-street parking and future expansion was acquired in the 1957-58 Fiscal Year. Parking space for only 14 cars is available on the present site which is completely inadequate.			
Construction of off-street parking area—Torrance-----	-	-	14,460
To provide funds for plans and drawings and construction of an off-street parking area for the Torrance office.			
Installation of mechanical air conditioning—Long Beach-----	-	-	48,000
To provide for working plans and construction of a mechanical air conditioning unit for the Long Beach building. This 30,000-square foot multistory building was provided with a ventilating system but no air conditioning equipment. This office is subject to heavy public traffic, having an average of 2,100 public contacts per day. Heat created by office lighting, summer weather and occupancy load makes the air conditioning of this multistory building necessary.			

^k From Department of Employment Contingent Fund unless otherwise indicated.

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1				
2				
3				
4				
5	General Activities			
6	<i>The proposed Capital Outlay program includes acquisition of</i>			
7	<i>an existing office building, alterations to elevators and buildings,</i>			
8	<i>and equipment for 2 new state buildings anticipated to be com-</i>			
9	<i>pleted during 1959-60. New state office buildings are being con-</i>			
10	<i>structed under the authority of the State Building Construction</i>			
11	<i>Act of 1955 and are financed through the issuance of trust cer-</i>			
12	<i>tificates by the State Public Works Board. The anticipated</i>			
13	<i>expenditures are shown in the appendix section.</i>			
14				
15	STATE BUILDING PROGRAM			
16				
17	PROPOSED 1959-60 EXPENDITURES ^a			
18				
19	Acquisition of State Compensation Insurance Building,			
20	San Francisco -----	-	-	\$650,000
21	State Construction Program Fund			
22	The acquisition of this building will provide quarters for agencies			
23	presently occupying rental office space in San Francisco.			
24	Alterations to State Compensation Insurance Building,			
25	San Francisco -----	-	-	250,000
26	State Construction Program Fund			
27	The alteration of this building will provide space for a general			
28	relocation of several agencies for necessary expansion and			
29	will increase efficiency of space layouts.			
30	Alterations and improvements to existing state buildings,			
31	San Francisco -----	-	-	500,000
32	State Construction Program Fund			
33	To provide additional financing for alterations to the existing			
34	state-owned buildings which will be co-ordinated with the			
35	relocation of agencies upon completion of the new State			
36	Building Annex in August, 1959. An initial appropriation of			
37	\$800,000 was made in 1958-59 based on a square footage			
38	cost.			
39	Elevator modernization, Office Building No. 1, Sacramento-----	-	-	57,320
40	State Construction Program Fund			
41	This project will provide additional financing to completely con-			
42	vert the elevators in this building from manual to auto-			
43	matic operation. An initial appropriation of \$40,000 was			
44	made in 1958-59 for this purpose.			
45	Elevator modernization, east wing, State Capitol-----	-	-	89,000
46	State Construction Program Fund			
47	This project will provide for converting the main bank of eleva-			
48	tors to a fully automatic operation which will permit safe			
49	unattended operation by the public.			
50	Equip new State Building Annex, San Francisco-----	-	-	46,898
51	This will provide initial complement of equipment for new State			
52	Building Annex to be completed August 1, 1959.			
53	Equip new State Building, Oakland-----	-	-	29,911
54	This will provide initial complement of equipment for new State			
55	Building to be completed January 1, 1960.			
56	Minor Projects:			
57	Extend mezzanine in State Treasury-----	-	-	15,400
58	Consolidate utility meters for Office Building No. 2 and Archives			
59	Building, Sacramento -----	-	-	7,050
60	Construct communications vault on Mt. Diablo-----	-	-	15,000
61	Pave R Street between 11th and 12th, Sacramento-----	-	-	4,500
62				
63				
64	ESTIMATED 1957-58 AND 1958-59 EXPENDITURES			
65				
66	Acquisition of Building Sites:			
67	San Jose -----	-	\$250,000	-
68	San Bernardino -----	\$67,285	182,715	-

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates statewide, 8 hospitals for mentally ill patients, 3 hospitals for mentally retarded patients, and 2 hospitals housing both mentally ill and mentally retarded patients. In addition, it is planned that wards and other physical facilities of the new Fairview State Hospital, located near Costa Mesa, Orange County, will be utilized for mentally retarded patients about January, 1959. Provision was made in the 1957-58 Capital Outlay budget for bringing utility connections to the site acquired for a new hospital for the mentally ill in the San Fernando Valley. However, based on population and patient forecasts, it does not now appear that additional mentally ill bed capacity will be needed for several years and the unexpended balance of funds appropriated for site development is being reverted.

The Langley Porter Clinic for teaching, research, and clinical purposes in connection therewith, is operated by the department in conjunction with the University of California Medical School at San Francisco. Construction of a similar facility, the Neuropsychiatric Institute as part of the Los Angeles Medical School of the University has been authorized and is expected to be activated during the 1960-61 Fiscal Year.

Due to the leveling off of the mentally ill patient population, no major construction projects for additional bed capacity are proposed in this budget. As of June 30, 1958, 33,696 beds were available for an actual mentally ill population of 36,297, with an overcrowding of 2,601 patients. By June 30, 1959, 34,592 beds will be available for an estimated patient population of 36,335, with an overcrowding of 1,743 patients. An additional 1,695 presently funded beds will become available by the end of the 1959-60 Fiscal Year, at which time it is estimated that overcrowding for mentally ill patients will be eliminated. The tables

that follow set forth in detail actual and estimated populations, and indicate the latest estimates of availability of presently funded capacity.

Additional mentally retarded patients are admitted as bed capacity and related treatment buildings become available, and a moderate amount of overcrowding occurs in order to fully utilize the facilities. As of June 30, 1958, 9,039 beds were available. These beds together with those presently funded, will provide a total bed capacity of 11,317 on June 30, 1959, and 11,597 by June 30, 1960. Patient population forecasts beyond the 1959-60 Fiscal Year indicate that it will be necessary to fund additional mentally retarded capacity at Fairview in this budget. The tables that follow include population and capacity estimates for the mentally retarded.

The Langley Porter Neuropsychiatric Institute now has a rated capacity of 110 including 15 beds for the day-night hospital program. Completion of the 4-story addition in 1959-60 will add 10 additional beds as well as expand research and training facilities. As mentioned above, similar facilities will be completed at the Los Angeles Medical School of the University of California in the 1960-61 Fiscal Year, and will have a capacity of 196 beds. Thus, a total institute bed capacity of 316 beds will be available at that time.

A number of other major projects are proposed in this budget. They provide necessary service facilities, equipment for projects nearing completion, and essential improvements at the various hospitals, and are explained under their respective budgets. Essential minor construction projects are included to correct deficiencies and to improve the physical plant. These projects are detailed in the individual budgets.

^c Expenditures from bond funds not included in budget totals.

Atascadero State Hospital

This hospital for the mentally ill is the maximum security unit of the Department of Mental Hygiene, and had a rated bed capacity of 1,108 on June 30, 1958. A new ward addition will provide 432 additional beds in 1959-60, bringing the total

beds to 1,540. No major construction is proposed for 1959-60. A minor construction project totaling \$22,100 is proposed to provide and install additional laundry equipment to handle the additional laundry load.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^a

Minor Projects:

Install additional laundry equipment

5	Napa State Hospital			
6	This hospital for the mentally ill shows a rated bed capacity			
7	of 5,090 on June 30, 1958. The new juvenile unit with a capacity			
8	of 216 beds will be activated by July, 1960. Several major proj-			
9	ects, explained in detail below, are proposed in order to improve			
10	some wards, cottages, and employee work areas as well as to			
11	equip the additional juvenile unit and remodel an old ward to			
12	provide a complete rehabilitation unit. Minor construction proj-			
13	ects totaling \$118,350 are included to correct deficiencies and to			
14	improve the physical plant.			
15				
16	STATE BUILDING PROGRAM			
17				
18	PROPOSED 1959-60 EXPENDITURES ^a			
19				
20	Construct rehabilitation therapies building-----	-	-	\$764,800
21	State Construction Program Fund			
22	The project provides for certain remodeling of a portion of old			
23	Ward P and the construction of additional area to provide			
24	a complete rehabilitation therapies unit. Ground improve-			
25	ments and necessary and related mechanical and electrical			
26	work is included.			
27	Construct addition to administration building-----	-	-	476,900
28	State Construction Program Fund			
29	The project provides for certain remodeling in the existing			
30	building and the construction of an addition to provide ad-			
31	ministrative offices and work areas to adequately house			
32	authorized personnel. Ground improvements, air condition-			
33	ing, necessary and related mechanical and electrical work is			
34	included.			
35	Remodel and modernize wards-----	-	-	294,000
36	State Construction Program Fund			
37	The project consists of alterations and additions at Chambers			
38	and Ogden Cottages to provide facilities more nearly con-			
39	forming to present day hospital standards. All necessary and			
40	related mechanical and electrical work is included.

Stockton State Hospital

This hospital for the mentally ill shows a rated bed capacity of 4,092 on June 30, 1958. The old main male building with a capacity of 383 beds was deactivated in the current year. A *ward adjustment* in the budget year will reduce the capacity by 45 for a total capacity of 3,664 by June 30, 1960.

The major construction in the budget year provides for construction of a building to house the professional and staff groups currently housed in overcrowded or temporary areas.

Minor construction projects totaling \$97,000 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM**PROPOSED 1959-60 EXPENDITURES ^a**

37	Construct professional building-----	-	-	\$1,142,900
38	<i>State Construction Program Fund</i>			
39	The project consists of the construction of a 4-story building to			
40	house authorized positions of the professional and staff			
41	groups. Ground improvements, services and necessary and			
42	related mechanical and electrical work is included.			
43	Minor Projects:			
44	Remodel patients' cottages, 6, 7, 8, and 10-----	-	-	32,000
45	Install de-aerating heater tank-----	-	-	5,000
46	Improve heating system, cottage 3-----	-	-	5,000
47	Replace plaster in receiving and treatment building-----	-	-	20,000
48	Remodel cottage A-----	-	-	13,000
49	Alteration and improvement projects under \$5,000-----	-	-	18,000
50	Construct addition to administration building-----	-	\$140,925	-
51	<i>State Construction Program Fund</i>			
52	Replace boiler at steam plant-----	-	126,700	-
53	Remodel recovery area in receiving and treatment building to a			
54	ward-----	-	56,550	-
55	Construct ward building-----	\$5,210	-	-
56	Construct laundry building addition-----	392,200	40,000	-
57	Equip laundry building addition-----	-	4,700	-
58	Purchase and install vegetable preparation equipment-----	62,290	-	-
59	Construct marking, mending, and tailor shop-----	125,500	-	-
60	Equip marking, mending, and tailor shop-----	94	2,906	-
61	Construct ward building-----	647	-	-
62	Construct addition to cottage 12-----	-7,442 ^d	-	-
63	Preliminary Plans for:			
64	Property warehouse-----	1,016	-	-
65	Ward building-----	858	-	-
66	Replace boilers-----	1,300	-	-

6	New Hospital for Mentally Ill Near San Fernando			
7	A site for a new hospital for the mentally ill has been acquired in the San Fernando Valley in Southern California. As current population figures indicate that it will be several years before construction of facilities on this site will be needed, the unexpended balance of the funds for off-site utilities development are being returned to the Capital Outlay and Savings Fund.

50	Fairview State Hospital			
51	This is a new hospital for the mentally retarded and it is planned to receive the first patients early in 1959. At that time facilities for care and treatment will be available. Bed capacity will be 1,665, and an additional capacity of 280 is currently funded and will be available in the 1959-60 Fiscal Year. Construction of additional wards with a capacity of 700 beds is proposed in the budget year. Minor construction provides for alterations and improvements totaling \$19,100.

Pacific State Hospital

The hospital for the mentally retarded shows a rated bed capacity of 2,841 as of June 30, 1958. Previously authorized alterations has resulted in a 23 bed capacity increase for a total capacity of 2,864 as of June 30, 1959. The major project

proposed for 1959-60 is to enlarge the physical therapy unit and provide the necessary equipment. Minor projects totaling \$65,200 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1959-60 EXPENDITURES ^a

Enlarge physical therapy annex	-	-	\$50,400
State Construction Program Fund			
This project consists of the construction of an addition, adjacent to present physical therapy area, and certain alterations and additions in the existing area. All necessary and related demolition, site work, services and mechanical and electrical work are included.			
Equip enlarged physical therapy annex	-	-	2,700
Capital Outlay and Savings Fund	\$1,500		
State Construction Program Fund	1,200		
Minor Projects:			
Construct additional bathing and hand washing facilities	-	-	18,000
Improve electrical distribution system	-	-	15,500
Provide cathodic protection of lawn irrigation system	-	-	8,000
Complete air conditioning, hospital unit	-	-	23,700

^a From Capital Outlay and Savings Fund unless otherwise indicated.

MILITARY DEPARTMENT

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1	GENERAL ANALYSIS			
2				
3				
4				
5	The capital outlay program of the Military Department com-			
6	prises the construction of armories, warehouses, rifle ranges,			
7	and other facilities essential to the organization, training, and			
8	morale of the California National Guard and the California Air			
9	National Guard. The long-range construction program would			
10	provide armories and other facilities to house and train all			
11	units.			
12	Since the 1951-52 Fiscal Year the Federal Government, under			
13	Public Law 783, Eighty-first Congress, has participated in the			
14	construction of armories on a cost-sharing basis. Federal funds			
15	have been made available on the basis of up to 75 percent of			
16	qualifying phases of the construction.			
17	In addition to federal participation in the construction of			
18	armories, certain facilities such as: motor vehicle storage build-

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1	GENERAL ANALYSIS			
2	This service and tax collection agency, headquartered in			
3	Sacramento, functions through field offices located in all popu-			
4	lation centers throughout the State. During the budget year			
5	the department will register and collect the taxes and fees on			
6	an excess 8,200,000 vehicles, issue new and renewed drivers'			
7	licenses to about 2,800,000 applicants and license an estimated			
8	15,500 automobile dealers and 27,000 automobile salesmen.			
9	Tremendous population growth during recent years has			
10	caused many of the present facilities to be inadequate. <i>This</i>			
11	<i>agency's capital outlay program provides</i> for construction of			
12	state-owned buildings where it has been determined that ade-			
13	quate privately owned leasing facilities are not available for			
14	the department to provide satisfactory services to the people			
15	in the area.			
16	<i>The major portion</i> of capital outlay expenditures proposed			
17	in the budget year are for the expansion and improvement of			
18	Sacramento headquarters facilities. <i>Provisions for offices</i> at			
19	Stockton and San Jose is limited to working drawing money			
20	pending determination of site location.			
21	STATE BUILDING PROGRAM			
22	PROPOSED 1959-60 EXPENDITURES §			
23	Purchase of site for addition to Sacramento headquarters office			
24	building	-	-	\$200,000
25	For the purchase of additional site for construction of Sacra-			
26	mento headquarters office building. The existing facility is			
27	not adequate due to a greater workload than was antici-			
28	pated when the building was constructed.			
29	Construct office building for Sacramento headquarters	-	-	12,174,400
30	The existing facility is not adequate due to a greater workload			
31	than was anticipated when the building was constructed.			
32	Revamp air-conditioning system in Sacramento headquarters	-	-	58,900
33	The existing air-conditioning system is not adequate to provide			
34	the capacity required to supply all zone areas with an equal			
35	and even distribution of refrigerated air. New equipment to			
36	be connected and co-ordinated with existing system.			
37	Working drawings for office building San Jose	-	-	30,000
38	The present facility does not have an adequate area for off-street			
39	parking and on-street parking is not available. The office is			
40	overcrowded and adequate facilities are not available for			
41	the staff or the public.			
42	Working drawings office building—Stockton	-	-	24,000
43	Off-street parking facilities are not available at the existing			
44	leased location. Office space is inadequate for the anticipated			
45	increase of the Stockton staff and to meet the future ac-			
46	celeration of the Driver Improvement Program.			
47	Construct office building—Riverside	-	-	220,000
48	The present facility is leased from the Division of Forestry and			
49	they have indicated a need for the entire facility.			
50	Minor Projects:			
51	Construction of partial roof over parking deck, Sacramento			
52	headquarters building	-	-	23,860
53	Revamp lighting system, third floor, Los Angeles office	-	-	19,300
54	ESTIMATED 1957-58 AND 1958-59 EXPENDITURES §			
55	Purchase of site for Fresno office building	-	\$100,000	-
56	Purchase of site for Long Beach office building	-	200,000	-
57	Purchase of site for El Centro office building	-	40,000	-
58	Purchase of site for San Francisco office building	-	350,000	-
59	Purchase of site for Sacramento headquarters office building	-	285,000	-
60	Purchase of site for San Jose office building	-	100,000	-
61	Purchase of site for Santa Barbara office building	-	50,000	-
62	Purchase of site to provide off-street parking facilities for the			
63	Los Angeles office	-	150,000	-
64	Purchase of site for Stockton office building	-	120,000	-
65	Purchase of site for Riverside office building	-	80,000	-
66	Purchase of site for addition to Sacramento headquarters			
67	office building	\$21,438	253,562	-
68	Purchase of site for Hollywood office building	5,170	219,830	-
69	Purchase of site for San Diego office building	89,058	145,596	-
70	Purchase of site for Glendale office building	131,374	18,413	-
71	Purchase of site for San Bernardino office building	-175,861 *	175,861	-
72	Preliminary plans and specifications for the expansion of the			
73	Sacramento headquarters office building	50,000	-	-

§ From Motor Vehicle Fund unless otherwise indicated.

* Proceeds from sale of the Department of Motor Vehicles Building in San Bernardino, appropriated for acquisition of site for a new San Bernardino office.

Wildlife Conservation Board

Continuation of the acquisition, construction, and improvements of wildlife conservation projects is planned. The \$9,000,000 appropriated by Chapter 1327, Statutes of 1947, and the \$3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, has been allocated to projects by the Wildlife Conservation Board. Additional revenue of \$750,000 each

fiscal year is provided by Section 19627, Business and Professions Code. The budget reflects the actual and estimated expenditure of funds previously allocated to specific projects by the Wildlife Conservation Board, and estimated expenditures from revenue.

WILDLIFE CONSERVATION PROGRAM**PROPOSED 1959-60 EXPENDITURESⁱ**

Warm water and other fish projects.....	-	-	\$858,247
For the acquisition and development of additional warm water fish lakes in various parts of the State.			
Flow maintenance and stream improvement projects.....	-	-	26,848
For the construction of small dams to provide stream flow during summer months. This will improve the fishing on many miles of streams.			
Waterfowl projects.....	-	-	242,312
For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			
Fishing access projects.....	-	-	682,845
To provide roads, trails, and parking areas to assist in access to ocean beaches and fishing areas.			
Special projects.....	-	-	1,000
For project evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			

ESTIMATED 1957-58 AND 1958-59 EXPENDITURESⁱ

Fish hatchery and stocking projects.....	\$46,021	\$7,394	-
For construction and equipping of facilities for fish hatching and stocking.			
Warm water and other fish projects.....	61,871	1,329,232	-
For the acquisition and development of additional warm water fish lakes in various parts of the State.			
Flow maintenance and stream improvement projects.....	50,564	22,698	-
For the construction of small dams to provide stream flow during summer months. This will improve the fishing on many miles of streams.			
Fish screen and ladder projects.....	11,541	2,146	-
To prevent loss of fish through water diversions and to permit passage of fish over stream obstructions.			
Waterfowl projects.....	154,631	282,904	-
For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			

ⁱ From Wildlife Restoration Fund unless otherwise indicated.

Division of Beaches and Parks

The major responsibility of the Division of Beaches and Parks continues to be the acquisition and development program initiated by the 1956 and 1957 Legislatures. This program was developed to meet critical deficiencies in the recreational resources of the State. It was funded to a great extent with revenue received from impounded tideland oil money. Continuing revenues from the State Lands Act Fund have also been made available. Legislation enacted during the 1957 General Session provided for a revenue level of \$12,000,000 annually to support the division and to supplement acquisition and development resources. These moneys were to be transferred from the revenues of the State Lands Act Fund. Except for the Fiscal Year 1958-59 estimates indicate that the total funds available for transfer will be insufficient to provide the revenue level previously anticipated on a continuing basis. As a result, the State Beach and Park Fund is currently overappropriated. A total of \$11,134,307 will remain unexpended under the 1956 and 1957 appropriations for state park acquisition and development at the close of the 1959-60 Fiscal Year. These appropriation balances together with subsequent years development program and operating expenses must be met from the continuing revenues made available to the State Beach and Park Fund. It will be noted that estimated expenditures for the current and budget years will exhaust the resources of the fund by June 30, 1960. This depletion has resulted primarily because revenues to the fund have not held at the authorized \$12,000,000 revenue level.

Although all the areas included in the 5-year plan are incorporated in this budget, the time-consuming task of consummating an acquisition program of this magnitude may reasonably be expected to extend over a period of several years. The sequence of acquisition is to be determined by the Park Commission. Programs in the 1956 legislation are subject to review by the State Public Works Board.

The major construction program proposed is directed primarily toward the expansion of facilities at existing parks and beaches so that the benefits from these expenditures may be realized as quickly as practicable. There are, however, several instances of initial development of state parks and beaches to provide recreational areas in regions of the State now seriously deficient in such facilities or to provide relief from overcrowded conditions at existing state parks.

The minor construction projects proposed are for the most part required to correct deficiencies in the facilities of various units of the State Park System; to provide facilities for improved utilization of existing parks and beaches, and to repair or replace deteriorated facilities.

In addition to the above, the budget anticipates continuation of collateral programs such as riders' and hikers' trails; the historic ship program, and the Redwood Highway relocation. Provision is also made for expenditure of the balance of funds available for a state park in San Francisco.

BEACHES AND PARKS ACQUISITION AND IMPROVEMENT PROGRAM

REAL PROPERTY ACQUISITION^j

Expenditures From Appropriations Available Prior to Budget

Act of 1956:

Big Basin Redwoods State Park-----	\$6,870	-	-
Gold Discovery Site State Park-----	330	-	-
Humboldt Redwoods State Park-----	53,299	-	-
Prairie Creek Redwoods State Park-----	640	-	-
San Clemente Beach State Park-----	138,000	-	-

^c Expenditures from bond funds not included in budget totals.

^j From State Beach and Park Fund unless otherwise indicated.

10	Calaveras Big Trees State Park:			
11	Roads and parking.....	-	-	\$28,578
12	Utility and shop buildings.....	-	-	7,600
13	Sanitary facilities.....	-	-	29,410
14	Camp units.....	-	-	11,500
15	Utilities—water system.....	-	-	22,438
16	Utilities—electric.....	-	-	4,620
17	Present campground facilities are inadequate for public needs.			
18	The proposed development will provide additional public			
19	use facilities and a utility building required for storage			
20	of vehicles.			
21	Carlsbad Beach State Park:			
22	Roads and parking.....	-	-	83,184
23	This development is for the utilization of newly acquired			
24	property and to provide necessary parking. It is urgently			
25	needed to control bluff erosion and meet the heavy public			
26	demand.			
27	Carrillo Beach State Park:			
28	Sanitary facilities.....	-	-	33,000
29	Office and contact station.....	-	-	4,400
30	Roads and parking.....	-	-	112,099
31	This is the second phase of the continuing development pro-			
32	gram to provide a safe access from the highway, parking			
33	for 246 cars and necessary sanitary facilities.			
34	Caswell Memorial State Park:			
35	Roads and parking.....	-	-	30,360
36	Residence and garage.....	-	-	19,250
37	Utility and shop buildings.....	-	-	660
38	Sanitary facilities.....	-	-	25,300
39	Camp units.....	-	-	11,000
40	Utilities—water system.....	-	-	13,163
41	Utilities—electric.....	-	-	1,155
42	Grading and landscaping.....	-	-	5,500
43	This is a continuation of park development for increased pub-			
44	lic use and protection of the park.			
45	Columbia Historic State Park:			
46	Area restoration.....	-	-	60,000
47	The 1948 master plan approved by the State Park Commission			
48	includes the restoration of existing structures which have			
49	historic interest in order that they may be made safe for			
50	public use. This item continues the restoration program.			
51	Colusa-Sacramento River State Park:			
52	Roads and parking.....	-	-	45,842
53	Office and contact station.....	-	-	14,300
54	Sanitary facilities.....	-	-	2,640
55	Picnic units.....	-	-	5,500
56	Utilities—water system.....	-	-	4,978
57	Utilities—electric.....	-	-	1,188
58	Trails and footbridges.....	-	-	561
59	Grading and landscaping.....	-	-	7,632
60	Projects proposed here will complete the first phase of devel-			
61	opment in accordance with the Master Plan.			
62	Del Norte Coast Redwoods State Park:			
63	Roads and parking.....	-	-	8,798
64	Utility and shop buildings.....	-	-	6,600
65	Residence and garage.....	-	-	18,700
66	Picnic units.....	-	-	418
67	Sanitary facilities.....	-	-	1,100
68	Utilities—electric.....	-	-	1,650
69	Utilities—water system.....	-	-	6,983
70	Because of the increased use throughout the park and ac-			
71	companying trespass problems, it is necessary to begin			
72	active development of the park as projected in the 5-year			
73	master plan. Development of the day-use areas and sani-			
74	tary facilities is proposed initially.			
75	Doheny Beach State Park:			
76	Roads and parking.....	-	-	52,318
77	Office building.....	-	-	33,000
78	Sanitary facilities.....	-	-	66,000
79	Picnic units.....	-	-	35,200

38	Picnic units	—	—	3,875
39	Sanitary facilities	—	—	28,208
40	Utilities—water system	—	—	10,643
41	Camp units	—	—	8,200
42	Utilities—electric	—	—	1,760
43	Proposed development is in accord with the approved general			
44	development plan and complements the camping facilities			
45	and boat launching ramp provided in prior budgets.			
46	Increased activity and attendance now requires develop-			
47	ment of a picnic area with parking area and sanitary			
48	facilities.			
49	Patrick's Point State Park:			
50	Roads and parking	—	—	48,240
51	Sanitary facilities	—	—	61,400
52	Camp units	—	—	16,240
53	Utilities—water system	—	—	10,857
54	Utilities—electric	—	—	2,767
55	Patrick's Point State Park is located in the heart of Cali-			
56	fornia's northwestern recreational area. A large number			
57	of visitors, as well as overnight campers, seek campsites			
58	in this area. Present camping facilities are inadequate to			
59	meet this demand. Under the master plan for development,			
60	the present campground will become picnic grounds and			
61	a 116-unit campground with sanitary facilities and roads			
62	and parking area will be developed.			
63	Pfeiffer-Big Sur State Park:			
64	Utilities—electric	—	—	86,500
65	For replacement of an existing underground electrical system			
66	which has been in use for approximately 21 years and has			
67	become inadequate, defective and hazardous. All materials			
68	have passed their normal span of life and can no longer			
69	be repaired and maintained economically or satisfactorily.			
70	Portola State Park:			
71	Office and contact station	—	—	7,150
72	Utility and shop building	—	—	25,433
73	Trails and footbridges	—	—	8,800
74	This development is needed to replace inadequate buildings and			
75	facilities and to develop additional facilities necessary to			
76	provide for increased public use.			
77

7				
8	PROPOSED 1959-60 EXPENDITURES ^j—Continued			
9				
10	Salton Sea State Park:			
11	Roads and parking-----	-	-	\$127,296
12	Sanitary facilities-----	-	-	32,700
13	Camp units-----	-	-	16,844
14	Utilities—water system-----	-	-	8,190
15	Utilities—gas system-----	-	-	5,396
16	Utilities—electric-----	-	-	1,925
17	Boating facilities-----	-	-	59,192
18	Increased public use requires that additional overnight camp-			
19	ing facilities be provided. Additional facilities for boat			
20	launching and parking of automobiles and boat trailers			
21	are also included.			
22	Samuel P. Taylor State Park:			
23	Utilities—sewage-----	-	-	39,276
24	Utilities—water system-----	-	-	32,000
25	Sanitary facilities-----	-	-	6,500
26	The present clay sewer pipeline is deteriorating rapidly. Be-			
27	cause of its location in redwood groves, the pipe is being			
28	damaged by the penetration of roots which makes the			
29	sewer line frequently inoperative. Replacement with cast			
30	iron pipe is, therefore, proposed to prevent a possible sani-			
31	tation and health problem. Replacement of the existing			
32	deteriorated water storage and distribution system is in-			
33	cluded to provide an adequate water supply for present			
34	and future facilities. 2 small comfort stations to be			
35	located near the swimming hole and picnic area are also			
36	proposed for public use needs.			
37	San Buenaventura Beach State Park:			
38	Grading and landscaping-----	-	-	70,930
39	It is planned to reclaim approximately 16 acres of land by			
40	importing fill material and reseeded with grass and			
41	planting shade trees. The area will ultimately serve for			
42	both group and individual family picnicking with a total			
43	capacity of 1,500 persons.			
44	Silver Strand Beach State Park:			
45	Sanitary facilities-----	-	-	66,000
46	Relocate residence, garage and utilities-----	-	-	14,300
47	Roads and parking-----	-	-	6,155
48	Fencing-----	-	-	3,432
49	Grading and landscaping-----	-	-	840
50	Utilities—water system-----	-	-	7,948
51	Utilities—telephone-----	-	-	2,921
52	Utilities—electric-----	-	-	8,360
53	The funds requested will provide for completion of the major			
54	development work in this park, and will permit the maxi-			
55	mum utilization of this beach area by the public. Proposed			
56	projects conform to the Master Plan.

ROADSIDE RESTS

Analysis

This project provides for the establishment and development of a statewide system of roadside rests. The division will have 10 rests completed and in operation by the close of the current

fiscal year. No further construction is proposed for the budget year.

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES ^j

Establishment and development of a statewide system of roadside rests	\$83,331	\$8,602	—
TOTAL EXPENDITURES (Roadside Rests)	\$83,331	\$8,602	—

ACQUISITION AND RESTORATION OF HISTORIC SHIPS

Analysis

Because of the part played by the early day sailing and steam schooners in the development of California, this project was established to create a fitting monument. The project has provided for purchasing, moving and rehabilitation of the 3-masted schooner C. A. Thayer, and the steam schooner Wapama (Ton-

gass). These 2 schooners are to be displayed in San Francisco. Both schooners have been purchased and are now in the San Francisco Bay area. *Expenditures proposed for 1959-60 are to be spent on both schooners for additional restoration to make them ready for exhibit purposes.*

PROPOSED 1959-60 EXPENDITURES ^j

Historic ships	—	—	\$200,000
----------------	---	---	-----------

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES

TOTAL EXPENDITURES (Historic ships)	\$48,174	\$149,432	\$200,000

ACQUISITION, DEVELOPMENT, AND IMPROVEMENT OF STATE PARK IN SAN FRANCISCO

Analysis

This project includes the acquisition and development of a site for a state park to be located in the City of San Francisco. *The total balance of the appropriation is estimated to be spent during the 1959-60 Fiscal Year.*

PROPOSED 1959-60 EXPENDITURES ^j

Acquisition of real property and development of a state park in San Francisco	—	—	\$1,724,000
---	---	---	-------------

^j From State Beach and Park Fund unless otherwise indicated.

REDWOOD HIGHWAY RELOCATION

Analysis

This project provides funds for acquisition of real property, construction and other costs related to the relocation of the highway through and in the vicinity of the Humboldt Redwoods State Park (U. S. 101). The funds proposed for the 1958-59

and 1959-60 Fiscal Year expenditures are for development of certain needed access facilities to the state park from funds appropriated in prior years.

PROPOSED 1959-60 EXPENDITURES j

Redwood Highway relocation—State Park System----- - \$495,579

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES j

Redwood Highway relocation----- \$54,421 \$250,000 -

* Of this amount, \$3,088,459 was originally withheld from transfer from the State Lands Act Fund because of a potential need in the 1956 flood damage program. Although these funds were eventually not required for flood damages, timing caused this amount to be transferred instead to the Investment Fund. The remaining \$5,000,000 represents the difference between the \$12,000,000 anticipated as a transfer during 1956-57 by Chapter 2367, Statutes of 1957 and \$7,000,000 which would have been transferred under prior legislation. Chapter 2367, Statutes of 1957 proposed transfer effective for the 1956-57 Fiscal Year; however, the legislation did not become effective until September 11, 1957, and a retroactive transfer was not possible.

1				
2				
3				
4				
5	Division of Forestry			
6	<i>The proposed capital outlay program for the 1959-60 Fiscal</i>			
7	<i>Year includes funds for forestry conservation campsite acquisition</i>			
8	<i>as a continuation of the program conducted in conjunction</i>			
9	<i>with the Department of Corrections. It includes site money to</i>			
10	<i>acquire and augment the leased land now occupied by the</i>			
11	<i>Magalia Forestry Conservation Camp. Also included are funds</i>			
12	<i>for the acquisition of a site for the District V Headquarters in</i>			
13	<i>Monterey which office is now quartered in leased space. Funds</i>			
14	<i>to expand the District IV site at Fresno and sites for fire suppression</i>			
15	<i>stations and lookouts at various locations throughout</i>			
16	<i>the State are also provided.</i>			
17	<i>Construction projects include replacement of the Shasta</i>			
18	<i>County Headquarters with an office providing larger space to</i>			
19	<i>adequately house recently added personnel; replacement of</i>			
20	<i>buildings at the State Nursery Headquarters in Davis that were</i>			
21	<i>eliminated by widening of U. S. Highway 40; second phase construction</i>			
22	<i>for 2 forestry conservation camps as a continuation</i>			
23	<i>of the joint program with the Department of Corrections; and</i>			
24	<i>first phase construction program including working drawings,</i>			
25	<i>site development and equipment for a camp to house Youth</i>			
26	<i>Authority wards. To the extent possible it is contemplated that</i>			
27	<i>the conservation camps will be constructed from standard plans</i>			
28	<i>furnished by the Division of Architecture; supervision will be</i>			
29				
30	STATE BUILDING PROGRAM			
31				
32	PROPOSED 1959-60 EXPENDITURES ^a			
33				
34	Purchase of land for Forestry Conservation Camps-----	-	-	\$80,000
35	<i>State Construction Program Fund</i>			
36	Purchase of 3 sites. 1 is in southern Tulare County and 1			
37	is in Santa Clara County. These 2 are for programmed			
38	forestry conservation camp construction. Funds were previously			
39	provided for the Santa Clara County site, but were			
40	used to purchase the Big Valley site in Lassen County.			
41	The third proposal is to acquire presently leased land at			
42	the Magalia Forestry Conservation Camp as well as additional			
43	contiguous land to provide a buffer zone against			
44	encroaching real estate development, and to provide additional			
45	land for growing nursery stock. The Magalia site			
46	is one of 3 branch nurseries.			
47	Purchase of land for District V Headquarters-----	-	-	85,000
48	<i>State Construction Program Fund</i>			
49	District V Headquarters in Monterey is presently located in			
50	leased office space. Construction of a new headquarters is			
51	contemplated in the State Building Construction Program.			
52	Space to be constructed will be shared with the Division of			
53	Beaches and Parks district headquarters.			
54	Sites for Lookouts and Forest Fire Stations:			
55	Various locations-----	-	-	36,875
56	To provide funds for continuation of the program of acquiring			
57	strategically located fire control stations and lookout sites			
58	now occupied under lease and easement.			
59	Engineering, planning and inspection services-----	-	-	113,334
60	<i>State Construction Program Fund</i>			
61	To provide 8 technical positions, a survey crew, 3 clerical positions,			
62	and operating expenses required in connection with			
63	the division's capital outlay program.			
64	Construct Shasta County Headquarters-----	-	-	58,100
65	<i>State Construction Program Fund</i>			
66	To replace an existing inadequate and deteriorated office building.			
67	Additional personnel are inadequately provided for and			
68	present office building cannot be expanded.			
69	Equip Shasta County Headquarters-----	-	-	800
70	<i>State Construction Program Fund</i>			
71	Construct State Nursery Headquarters at Davis-----	-	-	129,600
72	<i>State Construction Program Fund</i>			
73	To replace buildings that will be eliminated when U. S. Highway			
74	40 is made a freeway. The State Division of Highways			
75	is paying approximately \$39,000 for the land being taken			
76	and in addition they are relocating certain structures. This			
77	proposal will provide a more efficient operating plant. All			
78	activities with the exception of seed processing are proposed			
79	to be in one building.

9	Equip State Nursery Headquarters at Davis-----	—	—	\$2,750
10	State Construction Program Fund			
11	Construct Alder Forestry Conservation Camp-----	—	—	401,200
12	State Construction Program Fund			
13	The second phase of the program for this camp in Del Norte			
14	County is provided. Funds are for construction of an 80-			
15	man conservation camp within existing standards to fit the			
16	camp program in the north coast area and to build up fire			
17	fighting strength. To the extent possible, construction will			
18	be from standard plans furnished by the Division of Archi-			
19	tecture; supervision will be provided by Division of Forestry			
20	personnel; and construction will primarily be by inmate			
21	work crews.			
22	Construct Big Valley Forestry Conservation Camp-----	—	—	401,200
23	State Construction Program Fund			
24	The second phase of the program for this camp in Lassen			
25	County is provided. Funds are for construction of an 80-			
26	man conservation camp within existing standards to fit the			
27	camp program in the north central mountain area. Crews			
28	will be available for fire fighting, fire prevention and hazard			
29	reduction work and for other wild land work projects. To			
30	the extent possible, construction will be from standard plans			
31	furnished by the Division of Architecture; supervision will			
32	be provided by Division of Forestry personnel; and con-			
33	struction will primarily be by inmate work crews.			
34	Construct Washington Ridge Forestry Conservation Camp-----	—	—	230,258
35	State Construction Program Fund			
36	The first phase of the program for this camp in Nevada County			
37	calls for \$25,000 for working drawings, \$125,258 for site			
38	development work, and \$80,000 in initial equipment related			
39	to site and construction needs. The proposed camp will			
40	provide capacity for Department of the Youth Authority			
41	wards.

GENERAL ANALYSIS

The California Olympic Commission was established by Chapter 124, Statutes of 1955, which became effective on June 18, 1955, with the awarding of the VIII Olympic Winter Games to Squaw Valley, California, by the International Olympic Committee. The commission is composed of 5 members appointed by the Governor. The duties of the commission are to provide facilities for the 1960 Winter Games with the funds made available by the State; to encourage and assist participation in these games by persons from all parts of the world; to co-operate to the fullest extent with the Government of the United States and with other persons, corporations and agencies concerned with staging the winter games in California in 1960; and to engage in such other activities as may be necessary or desirable to make the holding of the games in California a success.

Chapter 1069, Statutes of 1957, provides that all facilities constructed by the California Olympic Commission shall be transferred to the Division of Beaches and Parks, Department of Natural Resources, for inclusion in the State Park System as soon as practicable after the completion of the games and in no event later than June 30, 1960.

The commission has negotiated a master contract with the Organizing Committee, VIII Olympic Winter Games, Squaw Valley, California, U. S. A., 1960, Incorporated, the organization appointed by the United States National Olympic Committee and authorized by the International Olympic Committee to stage the games.

By the enactment of Public Law 85-365 (72 Stat. 78), the Congress of the United States authorized the advancement of \$3,500,000 to the Organizing Committee for the construction of an ice arena on land of the United States Government in Squaw Valley which is occupied by the State under a Thirty-Year-Term Special Use Permit granted by the United States Forest Service. Public Law 85-365 also authorizes the expenditure of up to \$500,000 in federal funds for the lending of military support to the staging of the VIII Olympic Winter Games, and the Defense Department and its components are actively lending such support.

The construction of all necessary facilities is proceeding according to schedule.

DEPARTMENT OF PUBLIC HEALTH

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1				
2	The Department of Public Health, in co-operation with local			
3	health departments, is responsible for the prevention of disease			
4	and the provision of a healthful environment for the people of			
5	California.			
6	Additional space is required to provide for present needs,			
7	normal expansion, and special project research. Of primary need,			
8	is expansion of the laboratory facility of the Division of Labo-			
9	ratories which provides laboratory services to the department			
10	and to local areas without laboratories; and also more advanced			
11	services to local areas with laboratories. The Federal Govern-			
12	ment has allocated \$652,200 for a special project facility on a			
13	matching basis.

^a From Capital Outlay and Savings Fund unless otherwise indicated.

During the current year \$25,150 was authorized for planning this project, the results of which do not appear to be in the best interest of the State since the cost of an addition to the present building is estimated to be substantially higher than the cost estimated for a new building of an improved functional design. Prior to the next budget submission the problem will be re-examined in the light of a new site location, either in the Bay area or the Sacramento area, and recommendations as to the best solution will be presented.

GENERAL ANALYSIS

The proposed expenditure program for highway construction anticipates that the increased rates and fees which expire in the 1959-60 Fiscal Year for the motor vehicle fuel and diesel fuel taxes and for motor vehicle registration and weight fees will be extended.

Recapitulation of Proposed Expenditures and Obligations for Construction of State Highways for 1959-60 Fiscal Year, Showing Allocation of Construction Funds by County Group

EXPENDITURE CATEGORY	NORTHERN COUNTY GROUP	SOUTHERN COUNTY GROUP	TOTAL
Major construction and improvement projects	\$133,772,000	\$164,205,000	\$297,977,000
Thin blanket program and deferred seal coat	3,500,000	1,500,000	5,000,000
Construction engineering	15,000,000	13,000,000	28,000,000
Minor improvement and betterment	450,000	350,000	800,000
Rights-of-way	49,906,000	77,594,000	127,500,000
Preliminary engineering and design	16,250,000	14,750,000	31,000,000
Grade crossings	2,250,000	2,750,000	5,000,000
Contingencies	4,943,008	4,592,389	9,535,397
Totals, Reconditioning, Resurfacing, and Construction of State Highways ^a	\$226,071,008	\$278,741,389	\$504,812,397
State aid county highways, federal, and matching funds ^b	3,017,448	1,255,612	4,273,060
Totals, Expenditures Subject to Allocations Under Section 188, Streets and Highways Code	\$229,088,456 (45%)	\$279,997,001 (55%)	\$509,085,457 (100%)

^a Excludes honor camp construction which is not subject to allocation by county group pursuant to Section 188.7, Streets and Highways Code.

^b Included in county group allocation pursuant to Section 2210.5, Streets and Highways Code.

10	Alameda	5, 69	Routes 5 and 69 west and north of distribution structure; pave and drainage	—	72,000
11					
12	Alameda	69	Farnsworth-Halcyon Separation; structure	—	160,000
13	Alameda	69	0.6 mile south of Tennyson Road to 0.3 mile north of Jackson Street; functional planting	1.8	80,000
14					
15	Alameda	69	Washington Avenue to 0.2 mile south of High Street; median barrier rail	6.8	306,000
16					
17	Alameda, Contra Costa	69, 7	0.3 mile south of El Cerrito Overhead to 0.2 mile south of Jefferson; grade, pave and structure (\$1,300,000—1958-59 Fiscal Year)	2.3	1,300,000
18					
19	Alameda, Contra Costa	75	Broadway Low Level Tunnel; paint interior	—	55,000
20	Alameda	226	Webster Street Tube; parallel 2-lane tube (Total estimate \$18,000,000, \$8,000,000—1960-61 Fiscal Year, \$3,000,000—1961-62 Fiscal Year)	0.8	7,000,000
21					
22					
23	Alameda	227	Park Boulevard to south of Lincoln Avenue; landscape	1.4	25,000
24	Alameda	227	Lincoln Avenue to 0.5 mile south of Carson Street; grade, pave and structures	1.6	1,273,000
25					
26	Alameda	228, 5	Route 69 to Center Street; landscape	3.8	110,000
27	Alpine, El Dorado	23	Picketts to Grass Lake (Luther Pass); grade, pave and structures	3.9	655,000
28	Amador, Alpine	34	Summit of Carson Spur to 0.2 mile east of Amador-Alpine County line; grade and pave	2.2	430,000
29					
30	Butte	3	Big Chico Creek to 0.3 mile north of Lindo Channel; grade, pave and structures	1.8	600,000
31					
32	Colusa	7	North of High School Road to north of Gail Avenue; landscape	0.9	41,000
33	Colusa	88	3.6 miles south of Grimes to 0.1 mile south of Leven Street; grade, pave and structures	3.3	200,000
34					
35	Contra Costa	7	Ridge Road to Crockett; functional planting	8.0	50,000
36	Contra Costa	69	Intersection with 47th Street; grade, pave and signals	—	80,000
37	Contra Costa	75	West of Sunnybrook Drive to Hodges Road; functional planting	2.8	50,000
38	Del Norte	1	DeMartins Point to Cushing Creek (portions); grade and pave	1.2	250,000
39	Del Norte	71	Lopez Creek Bridge; structure and approaches	—	25,000
40	El Dorado	11, 38	Mays to Globins; grade, pave and structures	2.4	500,000
41	El Dorado	38	0.2 mile north of Eagle Creek to 0.9 mile north of Eagle Creek; scaling cuts	0.7	40,000
42					
43	El Dorado	65	0.2 mile north of Pilot Hill to 1.0 mile north of Hastings Creek; grade and pave	1.7	250,000
44					
45	Fresno	10	Second Street in Coalinga to Three Corners; grade, pave and structures	2.6	251,000
46					
47	Fresno	41	Teilman Avenue to Tuolumne Street; grade and pave	1.2	210,000
48					
49	Glenn	45	Codora Four Corners to Butte City Bridge; grade, pave and structures	1.2	1,150,000
50					
51	Humboldt	1	Myers Flat to 1.0 mile south of Dyersville; grade, pave and structures (Total estimate \$5,690,000, \$1,265,000—1960-61 Fiscal Year)	7.2	4,425,000
52					
53	Humboldt	1	0.4 mile south to 0.2 mile north of South Scotia Bridge; grade, pave and structures	0.6	1,300,000
54					
55	Humboldt	1	Little River to 0.3 mile north of Trinidad; grade, pave and structures	3.7	2,700,000
56					
57	Kings, Fresno	125	Hanford-Armona Road to Floral Avenue (portions); structures	—	161,000
58	Lake	89	FAS Road 1039 to Kelseyville; grade, pave and structures	4.0	510,000
59	Madera	4	0.5 miles south to 1.5 miles north of Madera; landscape	3.9	250,000
60	Madera	4	Berenda to Califa; pave	3.7	369,000
61	Madera	4	Califa to 0.7 miles south of Merced County line; functional planting	6.1	35,000
62	Marin	1	North City limit of San Rafael to Lucas Valley Road (portions); grade, pave and structures	2.4	1,250,000
63					
64	Marin	1	Greenbrae Interchange; structures and approaches	0.8	1,240,000
65	Marin	1	Richardson Bay Bridge to San Quentin Wye (portions); functional planting	5.0	50,000
66					
67	Marin	1	Vista Point, southbound parking area and connection, grade and pave	—	40,000
68	Mariposa	18	El Portal to Park Line; grade and pave	1.1	180,000
69	Mariposa	65	2.0 miles north of Route 18 to Coulterville (portions); grade and pave	—	50,000
70					
71	Mendocino	1	1.3 miles south of Robinson Creek to Smith Street in Ukiah (portions); pave	4.8	500,000
72					
73	Mendocino	1	0.9 miles south of Irvine Lodge to 0.8 miles north of Sherwood Road; grade, pave and structures	5.0	2,800,000

REASONS FOR REVISIONS

¹ Savings—funds in excess of project requirements.

² Project deferred.

³ Decrease due to change in scope of work.

⁴ Decrease, project or portion of project financed from other funds.

⁵ Additional project to install or revise traffic regulatory or safety devices.

⁶ Additional project to alleviate hazardous traffic conditions.

⁷ Additional funds required because of low budget estimate or higher construction costs.

⁸ Additional funds required because of revision of design standards or scope of work.

⁹ Additional project to improve deficient roadway or structure.

¹⁰ Additional project to improve drainage.

¹¹ Additional project to improve traffic service.

¹² Additional project to relieve traffic congestion.

¹³ Additional project to improve traffic safety.

¹⁴ Additional project to construct weighing facilities or loadometer stations.

¹⁵ Additional project to replace a deteriorated or destroyed structure.

¹⁶ Additional project to repair a deteriorated roadway or structure.

¹⁷ Additional project to provide for roadside delineation.

¹⁸ Additional project or funds, work deferred from prior year.

¹⁹ Additional project to stabilize slide area or remove underground water.

²⁰ Additional project to repair bridge foundations.

²¹ Additional project to replace traffic stripe obliterated by construction.

²² Additional project, State's share of highway relocation for dam, canal and levee construction.

²³ Additional funds to cover increases in project costs.

²⁴ Additional project for erosion control.

²⁵ Additional project to acquire materials for use on construction.

²⁶ Additional project to place roadway in acceptable condition for relinquishment.

²⁷ Additional project, storm damage repair.

²⁸ Project financing revised to several fiscal year budgets.

²⁹ Additional project, required by freeway agreement.

³⁰ Additional project to comply with legislative action.

REASONS FOR REVISIONS

- ¹ Savings—funds in excess of project requirements.
- ² Project deferred.
- ³ Decrease due to change in scope of work.
- ⁴ Decrease, project or portion of project financed from other funds.
- ⁵ Additional project to install or revise traffic regulatory or safety devices.
- ⁶ Additional project to alleviate hazardous conditions.
- ⁷ Additional funds required because of low budget estimate or higher construction costs.
- ⁸ Additional funds required because of revision of design standards or scope of work.
- ⁹ Additional project to improve deficient roadway or structure.
- ¹⁰ Additional project to improve drainage.
- ¹¹ Additional project to improve traffic service.
- ¹² Additional project to relieve traffic congestion.
- ¹³ Additional project to improve traffic safety.
- ¹⁴ Additional project to construct weighing facilities or loadometer stations.
- ¹⁵ Additional project to replace a deteriorated or destroyed structure.
- ¹⁶ Additional project to repair a deteriorated roadway or structure.
- ¹⁷ Additional project to provide for roadside delineation.
- ¹⁸ Additional project or funds, work deferred from prior year.
- ¹⁹ Additional project to stabilize slide area or remove underground water.
- ²⁰ Additional project to repair bridge foundations.
- ²¹ Additional project to replace traffic stripe obliterated by construction.
- ²² Additional project, State's share of highway relocation for dam, canal and levee construction.
- ²³ Additional funds to cover increases in project costs.
- ²⁴ Additional project for erosion control.
- ²⁵ Additional project to acquire materials for use on construction.
- ²⁶ Additional project to place roadway in acceptable condition for relinquishment.
- ²⁷ Additional project, storm damage repair.
- ²⁸ Project financing revised to several fiscal year budgets.
- ²⁹ Additional project, required by freeway agreement.
- ³⁰ Additional project to comply with legislative action.

SUMMARY

WATER DEVELOPMENT AND FLOOD
CONTROL PROGRAM

CONSTRUCTION

Feather River and Delta Diversion Projects:			
San Joaquin Valley-Southern California Aqueduct	-	-	\$8,358,000
San Luis Features	-	\$1,011,054	2,310,000
South Bay Aqueduct	-	-	7,914,000
Upper Feather River Features	-	253,881	2,394,000
Oroville Features	\$22,832,150	150,000	11,883,000
Federal-State Projects:			
Federal projects—flood control and conservation	-	-	13,740,000
Sea water conversion plant	-	-	1,600,000
Totals, Construction	\$22,832,150	\$1,414,935	\$48,199,000 ^a
Administration and Design (Feather River and Delta Diversion Project, and North Bay Aqueduct)	\$1,860,327	\$4,566,033	\$4,717,842 ^b
Feather River Project Highway Maintenance	-	-	\$20,000
TOTALS, WATER DEVELOPMENT PROGRAM	\$24,692,477	\$5,980,968	\$52,936,842
State Building Program	\$4,286	\$166,300	\$5,200
TOTAL EXPENDITURES, CAPITAL OUTLAY	\$24,696,763	\$6,147,268	\$52,942,042
General Fund	88,065	1,264,935	144,850
Capital Outlay and Savings Fund	4,286	166,300	5,200
Investment Fund	24,604,412	4,716,033	52,791,992

The Capital Outlay budget includes funds for Construction and Administration and Design.

The construction program will provide needed rights-of-way and construction of features of authorized state projects, and also provide for co-operation with the Federal Government in the construction of multiple purpose projects and sea water conversion experiments.

The program will provide for acquisitions for the San Joaquin-Southern California Aqueduct which would transport surplus water from the Delta service areas to the south and west. Funds are provided to enable initial construction of the South Bay Aqueduct, and to provide urgently needed additional

water to Alameda County. Provision is made for complete acquisition of the land for the four remaining dams, and construction of Frenchman Dam in the Upper Feather River Basin. For the Oroville project funds are provided for the West Branch Bridge to complete the remaining link in the highway relocation.

The administration and design program includes funds to finance the design, exploration, right-of-way, and acquisition activities including the marketing studies and the preparation of construction plans and specifications on the Oroville and San Luis features, the San Joaquin-Southern California Aqueduct System including subsidence studies, North and South Bay Aqueducts, and the Upper Feather River Basin developments.

PROPOSED 1959-60 EXPENDITURES

FEATHER RIVER AND DELTA DIVERSION PROJECTS

San Joaquin Valley-Southern California Aqueduct System and San Luis Site			
Delta to San Luis Reservoir Site:			
Right-of-way	-	-	\$1,085,000
Acquisition costs	-	-	217,000
Aqueduct From San Luis Reservoir Site to Southern Kern County:			
Right-of-way	-	-	3,130,000
Acquisition costs	-	-	626,000
Extension of Aqueduct System Into Southern California:			
Right-of-way	-	-	3,000,000
Acquisition costs	-	-	300,000
San Luis Reservoir Site:			
Right-of-way	-	-	2,100,000
Acquisition costs	-	-	210,000
Totals, San Joaquin-Southern California Aqueduct System and San Luis Reservoir Site	-	-	\$10,668,000

^a Includes \$10,000,000 from the appropriation made by the Budget Act of 1958 (Item 425.4).

^b Includes \$521,861 to be expended from prior year appropriations: Budget Act of 1956 (Item 419.5, \$144,850 and Item 417, \$38,131); Chapter 15 and 2252, Statutes of 1957 (\$323,614 and \$15,266).

DEPARTMENT OF WATER RESOURCES—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1				
2	PROPOSED 1959-60 EXPENDITURES—Continued			
3				
4	FEATHER RIVER AND DELTA DIVERSION			
5	PROJECTS—Continued			
6				
7	San Joaquin Valley-Southern California Aqueduct System			
8	and San Luis Site—Continued			
9				
10	<i>The appropriation provides for lands, easements, and rights-of-</i>			
11	<i>way for the San Joaquin Valley-Southern California Aqueduct</i>			
12	<i>system throughout its length, and San Luis Reservoir site. It is</i>			
13	<i>necessary this year to commence the program of constructing con-</i>			
14	<i>veyance facilities which can initially divert and transport to areas</i>			
15	<i>of need, the presently surplus waters available in the Delta, and in</i>			
16	<i>the future, additional waters conserved by upstream reservoirs</i>			
17	<i>on the Sacramento Valley and North Coast streams. These works</i>			
18	<i>are necessary irrespective of the final sources of water. Initiation</i>			
19	<i>of construction as rapidly as possible is imperative to meet the</i>			
20	<i>urgent need for water now in the San Joaquin Valley and, by 1970,</i>			
21	<i>in Southern California. Provision is also made for a portion of the</i>			
22	<i>State's share of the joint San Luis venture between the State and</i>			
23	<i>the Federal Government.</i>			
24	<i>Of the total included for this aqueduct, \$1,330,000 would be for</i>			
25	<i>rights-of-way acquisition from the Delta to San Luis Reservoir</i>			
26	<i>site. This appropriation is necessary at this time in order that</i>			
27	<i>this land may be acquired in co-ordination with lands acquired by</i>			
28	<i>the Division of Highways for the west side freeway, \$3,756,000</i>			
29	<i>would be for rights-of-way acquisition for the aqueduct from San</i>			
30	<i>Luis Reservoir site to southern Kern County. \$3,300,000 would be</i>			
31	<i>for rights-of-way acquisition for extension of the aqueduct system</i>			
32	<i>into Southern California. Details of the aqueduct system to serve</i>			
33	<i>the entire Southern California area will be available during the</i>			
34	<i>session. The remainder of this appropriation will complete the</i>			
35	<i>acquisition of land at the San Luis site.</i>			
36				
37	South Bay Aqueduct			
38				
39	Intake to Del Valle Reservoir:			
40	Right-of-way -----	—	—	\$210,000
41	Acquisition costs -----	—	—	21,000
42	Doolan Lateral and Reservoir:			
43	Right-of-way -----	—	—	330,000
44	Acquisition costs -----	—	—	33,000
45	Delta Mendota Canal to Livermore Valley:			
46	Construction contracts -----	—	—	6,800,000
47	Construction engineering costs -----	—	—	520,000
48				
49	Totals, South Bay Aqueduct -----	—	—	\$7,914,000
50				
51	<i>Funds are provided for lands, easements, and rights-of-way and</i>			
52	<i>the commencement of construction of conveyance facilities from the</i>			
53	<i>Delta to serve Alameda and Contra Costa Counties and portions of</i>			
54	<i>Northern Santa Clara County.</i>			
55	<i>This envisions initial utilization of the Bureau of Reclama-</i>			
56	<i>tion's Delta pumps and the Delta-Mendota Canal until such time</i>			
57	<i>as the State's San Joaquin Valley-Southern California Aqueduct</i>			
58	<i>is completed. The need for additional water in Alameda County</i>			
59	<i>is critical to prevent ruination of the ground water basin in the</i>			
60	<i>Niles area and to provide a water supply for the expanding indus-</i>			
61	<i>trial development. Alameda County interests have stated they are</i>			
62	<i>ready to contract for water service.</i>			
63				
64	Upper Feather River Features			
65				
66	Completion of Acquisition Projects (Antelope Valley, Dixie			
67	Refuge, Abbey Bridge and Grizzly Valley reservoirs)			
68	Right-of-way -----	—	—	\$304,000
69	Acquisition costs -----	—	—	30,000
70	Frenchman Dam and Reservoir:			
71	Construction contracts -----	—	—	1,905,500
72	Construction engineering costs -----	—	—	154,500
73				
74	Totals, Upper Feather River Features -----	—	—	\$2,394,000
75				
76	<i>To complete the land acquisition for the 4 remaining dams in the</i>			
77	<i>Upper Feather River Basin authorized by Section 11260, Water</i>			
78	<i>Code and to provide for the construction of Frenchman Dam and</i>			
79	<i>Reservoir. The irrigation interests in Sierra Valley have indicated</i>			
80	<i>a willingness to repay the full cost allocated to irrigation under</i>			
81	<i>the Frenchman Project.</i>			
82				
83				
84				
85

1				
2	PROPOSED 1959-60 EXPENDITURES—Continued			
3				
4	FEATHER RIVER AND DELTA DIVERSION			
5	PROJECTS—Continued			
6				
7	Oroville Features			
8				
9	Railroad and Highway Bridge Over West Branch of Feather			
10	River:			
11	Construction contracts -----	-	-	\$11,883,000
12				
13	Totals, Oroville Features -----	-	-	\$11,883,000
14				
15	Provision is made for the construction of the combination rail-			
16	road and highway bridge over the west branch of the Feather River.			
17	The high-speed highway being constructed on both ends of the			
18	proposed bridge will be completed in the present fiscal year with			
19	funds made available by the 1957 Session of the Legislature. The			
20	bridge is the only remaining link to complete the highway to make			
21	it usable.			
22	Further recommendations will be forthcoming subsequent to the			
23	completion of current studies relating to the possibility of making			
24	the Oroville features substantially self-supporting and providing			
25	urgently needed flood control at the earliest possible date. Certain			
26	of these studies are being prepared by the board of consulting			
27	engineers in compliance with a resolution adopted by the 1958			
28	Session of the Legislature, and should be completed prior to Febru-			
29	ary 1, 1959; flood control on the Feather River must be provided			
30	as rapidly as possible. Such additional appropriations would include			
31	funds for land acquisition and relocations, including the construc-			
32	tion of Tunnels 2 and 3 on the Western Pacific Railroad relocation			
33	around Oroville Dam.			
34				
35	TOTAL EXPENDITURES, FEATHER RIVER AND DELTA	-	-	\$32,859,000
36	DIVERSION PROJECTS -----			
37				
38				
39	FEDERAL-STATE PROJECTS			
40				
41	Federal Projects—Flood Control and Conservation			
42	Black Butte on Stony Creek -----	-	-	\$7,300,000 a
43	New Hogan on Calaveras River -----	-	-	6,440,000 a
44				
45	Early construction and participation in the Federal-State pro-			
46	gram will require agreement by the State to repay the conserva-			
47	tion features of the Black Butte and New Hogan Projects. These			
48	projects, though multi-purpose, are primarily flood control in			
49	character for which they are urgently needed.			
50	The Black Butte Project is presently under construction by the			
51	United State Army Corps of Engineers. The State's share in this			
52	project will be approximately \$7,300,000 for which it will receive			
53	the right to all water conservation benefits in addition to the flood			
54	control provided by the project without reimbursement. Water			
55	conserved by this project will be utilized for service in the local			
56	areas as the demand there grows and the surplus will be used as a			
57	source of supply for the Delta Pool.			
58	New Hogan on the Calaveras River is a similar project, but not			
59	yet under construction. The State's share of this project is expected			
60	to be \$6,440,000.			
61				
62	Sea Water Conversion Plant			
63	Construction -----	-	-	1,500,000
64	Investigation and studies -----	-	-	100,000
65				
66	Funds are provided for co-operation with the Federal Govern-			
67	ment in the construction of a sea water conversion plant to be			
68	located along the coast. The construction of this plant will			
69	also include consideration of a nuclear reactor as a source of			
70	energy. This appropriation will be a tangible demonstration of			
71	California's interest in forwarding this most important program			
72	and will yield valuable results.			
73				
74	TOTAL EXPENDITURES, FEDERAL-STATE PROJECTS--	-	-	\$15,340,000
75				
76	a Includes \$10,000,000 from the appropriation made by the Budget Act of 1958 (Item 425.4).

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1	ADMINISTRATION AND DESIGN—Continued			
2	ESTIMATED 1957-58 AND 1958-59 EXPENDITURES			
3	FEATHER RIVER AND DELTA DIVERSION PROJECTS			
4	Oroville Features			
5	Highway design contracts-----	\$260,922	-	-
6	In July, 1956, a Service Agreement was entered into between the			
7	department and the Division of Highways for the design of State			
8	Highway No. 21, between Oroville and Jarbo Gap. The Division			
9	of Highways has completed design of the highway and the double-			
10	deck bridge over the North Fork Feather River.			
11	Construction—Tunnels 4 and 5, Western Pacific Railroad relo-			
12	cation-----	9,699,451	-	-
13	In May, 1957, a contract was awarded in the amount of \$8,499,235			
14	for the construction of these two tunnels. During 1957-58 driving			
15	at Tunnel No. 4 advanced 2,440 feet of a total length of 4,400 feet			
16	and Tunnel No. 5 excavation completed 2,783 feet of a total length			
17	of approximately 8,800 feet. Tunnel No. 4 was holed through in			
18	October, 1958, and during the 1958-59 Fiscal Year is proposed to			
19	complete some of the concrete lining for the tunnel. Also, during			
20	1958-59 it is expected that Tunnel No. 5 will be excavated in its			
21	entirety.			
22	During the 1959-60 Fiscal Year all work will be completed on			
23	both tunnels. The estimated total cost of the work on both tunnels			
24	amounts to \$9,699,451.			
25	Relocation of State Highway No. 21-----	10,611,100	-	-
26	In May, 1957, a contract was awarded in the amount of \$7,292,214			
27	for the construction of approximately 13 miles of highway from			
28	Wicks Corner to Jarbo Gap. During 1957-58 construction contin-			
29	ued and approximately 64 percent of the work was completed.			
30	During 1958-59 Fiscal Year, the highway relocation will be com-			
31	pleted with available funds. The total cost, with change orders, is			
32	estimated at \$10,611,100.			
33	Railroad bridge at Oroville-----	1,063,867	-	-
34	A contract was awarded in April, 1958, for a 1,100-foot steel			
35	girder railroad bridge over the Feather River near Oroville down-			
36	stream from the dam site.			
37	During 1957-58 Fiscal Year construction activities consisted			
38	primarily of the construction of access roads and the clearing of			
39	the construction area. During the 1958-59 Fiscal Year it is ex-			
40	pected that all concrete piers will be completed and some steel			
41	girders will be placed. All work will be completed during the			
42	1959-60 Fiscal Year.			
43	Railroad bridge North Fork, Feather River-----	1,457,732	-	-
44	A contract was awarded in February, 1958, in the amount of			
45	\$1,538,660 for the construction of a reinforced concrete arch bridge			
46	about 1,000 feet long over the North Fork of the Feather River.			
47	During the 1957-58 Fiscal Year the only work completed was the			
48	construction of an access road and a construction trestle at the			
49	bridge site. During the 1958-59 Fiscal Year the contractor expects			
50	to complete construction of the concrete arches and piers. Work in			
51	the 1959-60 Fiscal Year will complete activities on this bridge at a			
52	total estimated cost of \$1,538,660.			
53	Utilities relocation and inspection-----	-	\$150,000	-
54	For relocation of telephone line, work on the Miocene Canal and			
55	railroad inspection.			
56	Totals, Oroville Features-----	\$23,093,072	\$150,000	-
57	San Luis Features			
58	Property acquisition—reservoir site-----	-	\$1,011,054	-
59	Right of way and property descriptions will be completed during			
60	the 1958-59 Fiscal Year. Acquisition will proceed during the cur-			
61	rent fiscal year. Additional funds will be needed to complete the			
62	acquisitions.			
63	South Bay Aqueduct			
64	Property acquisition-----	\$978,844	\$734,818	-
65	Acquisition activities during 1957-58 involved the purchase of			
66	lands at the Airpoint Reservoir site, located about 4 miles east			
67	of Milpitas in Santa Clara County.			
68	During the present and the next fiscal year it is proposed to			
69	complete acquisition of lands in the Airpoint Reservoir site and			
70	to purchase lands within the Del Valle Reservoir site.

21	San Joaquin-Southern California Aqueduct			
22				
23	San Joaquin Aqueduct:			
24	Design and exploration -----	-	-	\$2,083,043
25	Surveys, relocations, right-of-way activity, and marketing			
26	studies -----	-	-	152,719
27	Subsidence:			
28	Test canal sections, subsidence area -----	-	-	200,384
29				
30	Totals, San Joaquin-Southern California Aqueduct -----	-	-	\$2,436,146
31	Work will proceed with the final design and preparation of plans			
32	and specifications for the section of aqueduct from the intake			
33	on Italian Slough to the San Luis Dam and for the			
34	aqueduct in the southern part of the State. Necessary			
35	surveys and field locations will be made on the remaining			
36	portion of the aqueduct from San Luis Dam to Buena			
37	Vista Lake. The design activities south of San Luis will			
38	be co-ordinated with the U. S. Bureau of Reclamation			
39	as may be determined by negotiations during the present			
40	fiscal year.			
41	Activities on the Subsidence Investigations will involve a con-			
42	tinuation of the actual construction features as initiated			
43	in the present fiscal year. This portion of the program is			
44	to determine actual construction procedures and design			
45	criteria for constructing the aqueduct through areas of			
46	known or potential shallow subsidence in the San Joaquin			
47	Valley. The requested funds will be primarily for observa-			
48	tion activities in the budget year.			
49				
50	Upper Feather River Development			
51				
52	Design and exploration -----	-	-	\$212,443
53	Surveys, relocations, right-of-way activity and marketing studies -----	-	-	57,629
54				
55	Totals, Upper Feather River Developments -----	-	-	\$270,072
56	It is proposed to complete the design and preparation of plans			
57	and specifications for the 3 additional Upper Feather River			
58	reservoirs at the Abbey Bridge, Dixie Refuge, and Antelope			
59	Valley sites. The necessary foundation exploration and ma-			
60	terials investigations will be made for these projects.			
61				
62	North Bay Aqueduct			
63				
64	Surveys, relocations, right-of-way activity and marketing studies			
65	The only proposed program for the fiscal year on the North	-	-	\$15,266
66	Bay Aqueduct will be by the marketing section whose			
67	activities will be centered on negotiations and co-operating			
68	with local agencies with the aim toward determining			
69	schedules, amounts, time and points of delivery of project			
70	water.			
71	Branch Administration -----	-	-	171,764
72	This is for the administration of the units in the Division of			
73	Design and Construction and the Southern California dis-			
74	trict office responsible for the Capital Outlay program.			
75	Fault Strain Investigations -----	-	-	45,057
76	The fault strain program investigates seismic activity along			
77	the major earth faults in California. The information de-			
78	rived is essential to the planning and design of the aque-			
79	duct system. The program commenced in 1958-59 and will			
80	be a continuing long-term activity.

1957-58ESTIMATED
1958-59PROPOSED
1959-60

ADMINISTRATION AND DESIGN—Continued

ESTIMATED 1957-58 AND 1958-59 EXPENDITURES

Oroville Features

Administration, design, and explorations	\$1,154,712	\$1,923,034	-
Construction—tunnels 4 and 5, Western Pacific Railroad relocation	414,822	85,294	-
Relocation of State Highway No. 21	85,951	43,202	-
Railroad bridge at Oroville	40,294	68,025	-
Railroad bridge, North Fork, Feather River	38,101	85,206	-
Totals, Oroville Features	\$1,733,880	\$2,204,761	-

During the 1957-58 Fiscal Year, activities at Oroville centered on the studies of alternative types of concrete and earth-fill dams and the alternative designs for the Thermalito Power Canal and afterbays. An extensive geologic exploration program was in process to gather geologic data for use in the alternative dam design studies. Field surveying, right of way activities and office design work were accomplished on the highway and railroad relocation features.

During the 1958-59 Fiscal Year it was decided that the earth-fill dam would be the best and most economical type to construct at Oroville and final design activities have been started for this type of dam. Studies for a power plant larger than originally proposed were made using the "pumped storage" concept. Extensive preliminary foundation explorations are in process to assist in the design of the earthfill dam. Work is continuing on right of way activities as well as on design of railroad relocation features.

San Luis Reservoir

Surveys, relocations, right-of-way activity and marketing studies	\$68,946	\$264,268	-
Work during the 1957-58 Fiscal Year involved the appraisal work by independent contractors. During 1958-59 Fiscal Year the appraisal reports were received and negotiations are in progress for the acquisition of lands primarily at the dam site. Further acquisitions will require additional funds. All right-of-way, engineering, and property descriptions are being made in the present fiscal year for all the lands within the reservoir site.			

San Joaquin-Southern California Aqueduct

Design and administration	\$38,300	\$460,889	-
Subsidence	-	564,268	-
Fault strain	-	49,207	-
Totals, San Joaquin-Southern California Aqueduct	\$38,300	\$1,074,364	-

Work during the 1958-59 Fiscal Year is being devoted primarily to mapping and surveying leading toward a decision of a firm location of the San Joaquin Aqueduct route from the intake at the Delta to Buena Vista Lake.

During the 1959-60 Fiscal Year work will continue on the final design and preparation of plans and specifications for this section of the aqueduct from the intake to San Luis Dam. Design activities south of San Luis will be co-ordinated with the United States Bureau of Reclamation as determined by present negotiations for an integrated use of facilities.

During the 1959-60 Fiscal Year the Southern California district office will initiate design activities on the southern portion of the San Joaquin Valley-Southern California Aqueduct in the area south of the Tehachapi on the route approved by the Legislature as a result of the alternative route studies.

As part of the San Joaquin-Southern California Aqueduct, a subsidence investigation was initiated in the 1958-59 Fiscal Year with funds allocated by Item 425 of the Budget Act of 1958. An investigation of the shallow subsidence on the east side of the San Joaquin Valley is being made as to the cause and methods of combating the problem. During the 1958-59 Fiscal Year it is proposed to construct a test section of various experimental canal lines to determine the most suitable type of construction of a canal through the subsidence area. During the 1959-60 Fiscal Year the subsidence investigation program will be continued primarily on observations and further test of actual construction procedure and design criteria for constructing the aqueduct through areas of known and potential shallow subsidence in the San Joaquin Valley.

3				
4	ESTIMATED 1957-58 AND 1958-59			
5	EXPENDITURES—Continued			
6				
7	Alternative Route Studies			
8	Administration and design.....	\$830,417	\$1,160,108	-
9	Item 419.5, Budget Act of 1956, included funds for the initiation			
10	of an alternative route study into Southern California.			
11	Work was initiated in 1956 on investigation of alternative			
12	routes into Southern California and additional funds were			
13	appropriated by Item 425 of the Budget Act of 1958 to com-			
14	plete the investigation.			
15	A report is being submitted to the Legislature on the			
16	results of these studies and approval by the Legislature will			
17	be requested of the route finally recommended by the depart-			
18	ment. All work on the alternative route studies will be com-			
19	pleted in the 1958-59 Fiscal Year.			
20				
21	North Bay Aqueduct			
22	Design and exploration.....	\$120,463	\$336,380	-
23	Surveys, relocations, right-of-way activity, and marketing studies	86,483	224,254	-
24				
25	Totals, North Bay Aqueduct.....	\$206,946	\$560,634	-
26	Pursuant to Chapter 2252, Statutes of 1957, design work was			
27	initiated for the North Bay Aqueduct.			
28	During 1957-58 Fiscal Year studies, preliminary design, and cost			
29	estimates were made for alternative aqueduct routes. During			
30	1958-59 Fiscal Year additional work was done on determina-			
31	tion of the most economical route and design of features of			
32	the aqueduct.			
33	Because none of the local agencies have formally presented any			
34	data which would indicate their desire to contract for North			
35	Bay Aqueduct water, it is proposed that the 1959-60 Fiscal			
36	Year activities be limited to work by the Marketing Section			
37	in negotiating activities with the North Bay counties to-			
38	wards authorization of contracts for water to be served by			
39	the North Bay Aqueduct. No funds have been appropriated			
40	for acquisition for lands, easements and rights-of-way on			
41	this project.			
42				
43	South Bay Aqueduct			
44	Administration and design.....	\$431,581	\$656,181	-
45	Work during 1957-58 Fiscal Year involved the design and study			
46	of alternative routes between the Delta and service area of			
47	the South Bay Aqueduct.			
48	During 1958-59 Fiscal Year design activities continued in the			
49	first stage development plan between the intake at the Delta-			
50	Mendota Canal and the west portal of Brushy Peak Tunnel.			
51	However, alternative studies indicated that a route via the			
52	Dyer-Altamont Pass would be more economical for this			
53	route and is being designed and will be completed during the			
54	present fiscal year.			
55				
56	Upper Feather River Developments

59	Reservoir involved mapping and surveying preparatory to			
60	preparation of right-of-way maps and property descriptions			
61	of lands to be acquired at the reservoir site. Similar work			
62	was done at Antelope Valley Reservoir site.			
63	Preparation of plans and specifications for the Frenchman Dam			
64	are being prepared and should be completed in the 1958-59			
65	Fiscal Year.			
66				
67	Feather River Project Report			
68	Feather River Progress Report.....	-	\$137,220	-
69	A progress report on the Feather River and Delta Diversion			
70	Project is in process of preparation for submission to the			
71	Legislature.

RECLAMATION BOARD

CAPITAL OUTLAY EXPENDITURES

ACTUAL
1957-58ESTIMATED
1958-59PROPOSED
1959-60

Through this board, the State co-operates with the Federal Government in the construction of flood control projects in the Sacramento-San Joaquin River drainage basin. The extent of state participation is determined by the several acts adopting and approving specific projects and for which appropriations to meet the State's cost are made as necessary. Generally such participation consists of the acquisition of rights-of-way, easements, flowage rights, and the cost of replacement or relocation of permanent improvements necessitated by the construction of the flood control works.

The 1959-60 Budget proposes a continuation of the Sacramento River Flood Control Project, the San Joaquin River Flood Control Project and the Middle Creek Flood Control Project.

Total expenditures for 1959-60 are estimated to be \$6,000,000. Further explanation of the program is found in the support budget for the board.

Part III. Local Assistance Section

SUBVENTIONS

FOR EDUCATION :

- Apportionments for Public Schools
- Vocational Education—Reimbursements to School Districts
- Child Care Centers
- School Building Construction
- Debt Service on Public School Building Bonds
- Contribution to Teachers' Retirement System
- School Lunch Program
- Special Milk Program
- Free Textbooks

FOR PUBLIC HEALTH :

- Assistance to Local Agencies for Mental Health Services
- Assistance to Local Health Departments
- Assistance to Counties Without Local Health Departments
- Assistance to Counties for Tuberculosis Sanatoria
- Assistance to Counties for Care of Crippled Children
- Assistance to School Districts for the Treatment of Cerebral Palsied Children
- Assistance to Local Agencies for Mosquito Control
- Assistance to Local and Nonprofit Agencies for Hospital Construction

FOR PUBLIC WORKS :

- Local Roads and Highways
- Flood Control
- Beach Erosion Control
- Postwar Public Works Projects
- Redondo Beach Sea Wall
- Grade Crossing Protection Works
- Storm and Flood Damage Repair
- Earthquake Damage Repair
- Veterans Housing
- Loans to Local Agencies for Small Craft Harbors

FOR SOCIAL WELFARE :

- Old Age Security
- Aid to the Needy Blind
- Aid to Partially Self-supporting Blind
- Aid for Institutional Care of Needy Aged and Blind
- Aid to Needy Children
- Aid to Needy Disabled
- County Administration of Assistance Programs
- Local Inspection of Homes and Agencies Caring for Aged and Children
- Reimbursement to Counties for Administration and Cost of Care of Adoptions
- County Administration of Child Welfare Services
- Transportation of Needy Children

FOR OTHER PURPOSES :

- Salaries of Superior Court Judges
- Contributions to Judges' Retirement Fund
- County Veterans' Service Officers
- Salaries of County Agricultural Commissioners
- Workmen's Compensation for Civil Defense Workers
- Assistance to Counties for Maintenance of Juvenile Homes and Camps
- Assistance to Counties for Construction of Juvenile Homes and Camps
- Assistance to County Agricultural Fairs and Citrus Fruit Fairs

SHARED REVENUES

FOR GENERAL GOVERNMENT:

- Apportionment of Liquor License Fees
- Apportionment of Motor Vehicle License Fees

APPORTIONMENT OF FEDERAL RECEIPTS:

- Flood Control Lands
- Forest Reserves
- Grazing Lands
- Potash Lease Rentals

FOR COUNTY ROADS:

- Apportionment of Motor Vehicle Fuel Tax
- Apportionment of Motor Vehicle Registration and Weight Fees

FOR COUNTY AIRPORTS:

- Apportionment of Motor Vehicle Fuel Tax

FOR CITY STREETS:

- Apportionment of Motor Vehicle Fuel Tax

9	Totals	\$534,230,928	\$574,936,607	\$635,619,382
10				
11				
12	GENERAL ANALYSIS			
13				
14	Article IX, Section 6, of the Constitution, provides for state			
15	aid to local school districts at not less than \$180 per pupil in			
16	average daily attendance in the preceding fiscal year, to be			
17	apportioned to the Public School System so as to offer equal			
18	educational opportunities throughout the State.			
19	In 1957 the Legislature raised the apportionment figure from			
20	\$180 to \$193.37 for a period of 2 years ending June 30, 1959.			
21	Without additional legislation the apportionment will return to			
22	\$180 at June 30, 1959.			
23	The apportionment figure used in this budget is \$200.82 per			
24	student in average daily attendance. The proposed changes from			
25	the present apportionment program may be summarized as			
26	follows:			
27	1. Basic and Equalization Aid is presently at the figure of			
28	\$167.04, which is the major portion of the apportionment			
29	figure of \$193.37 established in 1957. It is proposed to			
30	increase the \$167.04 figure by 5 percent to \$175.39, subject			
31	to the following deductions:			
32	a. Since it is not proposed to increase basic, as opposed to			
33	equalization, aid beyond the present level of \$125, and			
34	since approximately one-fifth of the total ADA is in			
35	districts receiving only basic aid, there will be a reduction			
36	in the figure of \$175.39 by \$1. This contemplates			
37	that the additional apportionment amounts will be used			
38	for equalization purposes, rather than to go to all			
39	districts regardless of need.			
40	b. Support for adult education comes from the apportion-			
41	ment for basic and equalization aid. It is proposed to			
42	reduce the adult education apportionment by approxi-			
43	mately one-fourth of projected expenditures, thus reduc-			
44	ing the figure of \$175.39 by an additional 89 cents per			
45	total ADA.			
46				
47	Average Daily Attendance:			
48	Elementary Grades—Kindergarten Through 8:			
49	Regular classes	1956-57	1957-59	1958-59
50	Classes for physically handicapped	1,957,383	2,074,164	2,185,800

In summary, therefore, the proposed increase for basic and equalization aid will be from \$167.04 to \$175.50.

2. Apportionments for special education (excess costs for educating physically handicapped and mentally retarded children) are increased by the approximate amount necessary to cover current average excess costs. This adds \$2.49 to the allowance for ADA.

3. Apportionments for growth are reduced by \$1.50 per ADA since current provisions have provided more funds than necessary. This reduction is based upon the budgeted allowances for apportionments as here proposed.

Other programs, including transportation allowances for regular students, allowances to the County School Service Fund, and Driver Training Education, are maintained at the same general level as at present.

The net effect of the changes proposed will increase the amount required for school apportionments in 1959-60 over and above the amount produced at the present apportionment level of \$193.37, by \$23.4 million, as follows:

	In Millions
Basic and Equalization Aid (\$6.46)	\$20.3
Special Education (\$2.49)	7.8
Growth Allowance (—\$1.50)	—4.7
Total	\$23.4

For the complete picture, there should be added to this amount the sum required to maintain the present level of \$193.37, as compared to \$180, for the next fiscal year based upon the increased enrollment expected, or an additional \$42 million.

GENERAL ANALYSIS				
15	The purpose of vocational education is to provide training to develop skills, attitudes, working habits and to impart knowledge and information needed by workers to enter and make progress in employment on a useful and productive basis.			
16	Program and Performance			
17	The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts, the State Department of Education and the United States Office of Education.			
18	The available funds are expended for supervision and teacher training at the state level and as reimbursements to those local districts which meet the established qualifications of the approved program. These reimbursements are based on the magnitude of the excess costs to the school districts of meeting the prescribed standards.			
19	In accepting federal aid for vocational education, the State has provided continuing appropriations to match in part federal grants in aid contained in these acts. After deduction of state operating costs, the remaining balances of state and federal funds for supervision and teacher training costs are distributed to public secondary school districts maintaining approved courses in vocational instruction in agriculture, homemaking, business education and industrial occupations.			
20	The available funds have been allocated to programs at the local level as follows:			
21	Agriculture	\$353,454	\$338,406	\$322,686
22	Industrial	1,007,827	976,196	812,638

Child Care Centers

EXPENDITURES (General Fund)-----	\$4,604,048	\$4,688,365	\$4,805,574
----------------------------------	-------------	-------------	-------------

GENERAL ANALYSIS

Objectives

Child care centers are established to provide care and supervision of children where it is necessary for the parent to work, and the parent qualifies on the basis of need.

Program and Performance

To carry out this program the State furnishes two-thirds of the cost, or about \$0.26 per hour per child, for the maintenance and operation of the centers. The balance of the cost, or about \$0.13 per hour, is paid from fees collected from those persons utilizing the program.

The Child Care Center Program was established on a temporary basis by the 1943 Legislature and was made a permanent program by the 1957 General Session of the Legislature. There are, at present, 240 centers in 47 school districts which

accounted for approximately 17,595,000 hours of attendance in 1957-58.

The following table illustrates the past, current and proposed budget year financial activities of this subvention:

Year	Hours of Enrollment	Percent of Change	Total Expenditures
1957-58 -----	17,595,000	—	\$4,604,048
1958-59 -----	18,032,000	2.5	4,688,365
1959-60 -----	18,483,000	2.4	4,805,574

The expenditures programmed for 1959-60 are expected to increase slightly over 1958-59 as a result of enrollment increases. The administrative costs of this program are carried in the budget of the Administrative Services Bureau, Division of School Administration, Department of Education (see page 144).

GENERAL ANALYSIS

Objectives

Proceeds from bond sales are loaned to impoverished school districts of the State of California for the purpose of providing adequate school facilities. The school districts repay the loans over a period of years. The bonds that have been sold constitute valid and legally binding general obligations of the State.

Program and Performance

The school building loan program was started in 1949 for the purpose of providing urgently needed public school facilities. The school districts which are financially able to do so will repay all or part of the amounts advanced to them. The amount to be repaid each year from each school district is measured by the relationship between the assessed valuation of the district and the amount the district must raise by local property taxes for payment on its bonded debt. Provisions for deferment of annual repayment is authorized by Chapter 1880, Statutes of 1957, as amended by Chapter 4, Statutes of 1958. The period for repayment of deferred amounts is extended from a 30-year period to a 40-year period. At the expiration of the 40-year period, the unpaid portion of the deferred amounts are to be canceled by the State.

Of the bonds authorized \$615,000,000 have been sold as of December 31, 1958, and an additional sale of \$50,000,000 will be made in September, 1959. Interest and redemption costs are paid initially from the General Fund. Any money in the bond funds which is derived from repayments by the school districts or from premiums and accrued interest on bonds sold is available for transfer to the General Fund and is accounted as an offset against the debt service charges paid from the General Fund.

Chapter 15, Statutes of 1958, First Extraordinary Session, appropriates \$30,000,000 from the Investment Fund for loans to the State School Building Aid Fund from time to time in such amounts as are directed by the State Allocation Board.

Chapter 98, Statutes of 1958, First Extraordinary Session, authorized issuance of additional bonds amounting to \$220,000,000 and includes authorization for repayment of \$30,000,000 to the Investment Fund for loans which may have been transferred under authorization of Chapter 15, Statutes of 1958, First Extraordinary Session.

a Expenditures from bond funds are not included in the budget totals.

GENERAL ANALYSIS

The State Allocations Board under provisions of this program, apportions money to local school districts which are impoverished to the extent that their tax rate is within one-half cent of their legal maximum, and their bonded debt exceeds 95 percent of the amount permitted by law.

Chapter 2383, Statutes of 1957, created the State School Building Construction Fund to make loans to school districts in construction project areas. It is estimated that preliminary work will require approximately \$200,000 in financing during the 1959-60 Fiscal Year.

Contributions to Teachers' Retirement Fund

TOTAL EXPENDITURES (General Fund) ————— \$8,555,000 \$14,455,898 \$40,254,000

GENERAL ANALYSIS

The State Teachers' Retirement System will contain 224,721 active members on June 30, 1960, with an additional retired roll of 21,824 members on June 30, 1960. Since July 1, 1944, members' contributions have been on a full reserve basis. State contributions are appropriated in amounts required to liquidate the amount of maturing liabilities not funded from the members' accumulated reserve, and the contributions of employers, rather than as the liabilities accrue. Since July, 1956, the member contribution has averaged approximately 50 percent of his estimated retirement benefits; the district payment since July, 1956, has been 3 percent of the teacher payroll in the district (with a maximum limitation of an amount equal to \$0.05 per \$100 assessed valuation) plus \$12 per teacher. Before 1956, only the \$12 per teacher payment was made by the district.

The State's contributions to the Teachers' Permanent Fund and Retirement Annuity Fund are used to finance the major portion of expenditures for retirement allowances. Subventions to local retirement systems and a portion of death benefits from the Retirement Annuity Fund are also provided from state contributions.

The State finances expenditures not funded by the contributions of employing agencies and members. This will require the State to provide approximately 57 percent of total benefits during the 1959-60 Fiscal Year to cover increased benefits made by 1956 legislation that member contributions prior to this date do not

cover. In addition, contributions by employers (school districts) reflect an increase at a lower rate than the State's contribution due to the fact that more and more districts have reached the maximum contribution rate of 5 cents per \$100 assessed valuation.

The subventions to local systems consist of payments of amounts equal to the allowances which would have been payable had the retired members involved been entitled to benefits from the state system alone. The payments are made on the basis of the amounts withheld from local members in the preceding year, and are reduced by one-half of the benefit payable on account of service after 1944 on which no Retirement Annuity Fund contributions have been paid.

The large increase in the General Fund contribution for 1959-60 is due to the exhaustion of the Restricted Reserve, established by Chapter 13, Statutes of 1944 (Fourth Extraordinary Session). In accordance with the provisions of Chapter 1073, Statutes of 1957, approximately one-half of this reserve was applied against the State's contribution from the General Fund in 1957-58 and the remainder applied in 1958-59.

The effect of this situation on the 1959-60 Budget may be seen by comparing the General Fund expenditure for this item in 1958-59 of \$14.5 million with the \$40.3 million required for 1959-60.

through the State Educational Agency for Surplus Property. Handling charges for this service amounting to \$669,508 were reimbursed by the school districts to the Surplus Property Revolving Fund.

No significant program changes are anticipated for the 1959-60 Fiscal Year.

RECONCILIATION WITH APPROPRIATIONS

Federal Aid Funds ^a

Federal Grants:
For school lunches (Expenditures) ----- \$4,384,677 \$5,000,000 \$5,000,000

Special Milk Program

TOTAL EXPENDITURES (Federal funds) ^a ----- \$6,458,485 \$6,500,000 \$6,800,000

GENERAL ANALYSIS

This program is sponsored by the Federal Government under the Agricultural Adjustment Act of 1949, which encourages the public school pupils to consume surplus milk. During 1957-58, 5,085 schools participated in this program. This is an increase of 332 schools over the previous year. The increased amount shown in the budget year is based on the

anticipated amount of federal funds available and reflects normal increases in the program.

This program, as well as the School Lunch Program, is administered through the Division of Public School Administration.

RECONCILIATION WITH APPROPRIATIONS

Federal Aid Funds ^a

Federal Grants:
For school milk (Expenditures) ----- \$6,458,485 \$6,500,000 \$6,800,000

^a Federal grants and expenditures therefrom are not included in the overall budget totals.

^b Represents benefits paid from member contributions after deducting refund to members who withdrew from the system.

SUMMARY

TOTAL EXPENDITURES (General Fund)-----	\$5,331,132	\$9,054,999	\$10,383,566	\$1,328,567 (14.7%)
Personnel man-years -----	16.2	17.8	16.3	—1.5

GENERAL ANALYSIS

This program provides for the publishing and purchasing of textbooks approved by the State Board of Education and distributing them so as to be available to elementary pupils in the State Public School System.

In order to meet the growing school enrollment several series of textbooks, amounting to 9,577,000 copies, will be reprinted to fill back orders and replenish inventories in 1959-60. Printing and royalty costs of these books is estimated to be \$7,657,982. In addition, 2 new textbook series, amounting to 2,700,000

copies, are being considered for adoption. 1 of these new adoptions is a language series which will be distributed as a basic textbook for grades 3 through 8. The second adoption is a music series which will be distributed as a basic textbook for grades 7 and 8. The cost of printing these new series, including royalties, is estimated to be \$2,427,600. This budget will provide a 2-year supply of both the existing and new adoptions which represents a more economical procedure than printing a 1-year supply, and is estimated to produce an annual future savings of \$300,000.

Assistance to Local Agencies For Mental Health Services

TOTAL EXPENDITURES (General Fund)-----	\$37,083	\$1,230,000	\$3,024,733
--	----------	-------------	-------------

GENERAL ANALYSIS

Financial assistance to local governments may be granted under Section 9034 and pursuant to Section 9030 of the Welfare and Institutions Code in the establishment and development of mental health services, including services to the mentally retarded, through locally administered and locally controlled community mental health programs. It is designed to augment and promote the improvement and, if necessary, the expansion of already existing local psychiatric services in general hospitals

or clinics that help to conserve the mental health of the people of California, and is administered by the Department of Mental Hygiene.

The program was initiated in January, 1958, and is currently in its first full year of operation. The increase of \$1,794,700 is predicated upon the continuation and expansion of existing programs and the inclusion of additional local jurisdictions that have indicated participation.

13	GENERAL ANALYSIS			
14	These federal and state funds may be allocated to qualified	cents per capita per county, or \$16,000 per county, whichever is the lesser, as a basic amount, plus 20.735401 cents per capita. The 1959-60 amount is calculated on a July 1, 1959, population estimate of 15,275,000. After allocation for special local demonstration and investigation projects, the balance of the federal funds are distributed in the same ratio as state funds.		
15	health departments pursuant to Section 1100 of the Health and			
16	Safety Code to provide effective local public health services.

81				

^a Grants from Federal Government and expenditures therefrom are not included in the budget totals.

^b Allocations from the General Fund in 1958-59, for which formal contracts will be executed in 1959-60, will be \$4,086,589 in excess of available state appropriations. A similar procedure is proposed for 1959-60. General Fund allocations in 1959-60, to match available federal funds will amount to \$4,088,700 more than the proposed appropriation; these allocations will be formalized by contracts in 1960-61.

11				
12	Major Federal-State Flood Control Projects			
13	Chapters, 1, 2, 3, and 4 of Part 6, Division 6 of the State			
14	Water Code provides that the State will pay for lands and re-			
15	location of facilities in connection with such federal projects			
16	that are authorized by the Legislature of the State.			
17	<i>This reallocation program is a continuing program with new</i>			
18	<i>projects being conceived every year. It is anticipated that</i>			
19	<i>several reports will be prepared on projects which are new or</i>			
20	<i>in the early stages of development and that approximately 50</i>			
21	<i>claims will be processed directly by the department. It is ex-</i>			
22	<i>pected that a total of at least 8 projects in Alameda, Contra</i>			
23	<i>Costa, Lake, Marin, Santa Cruz, and Sonoma Counties will be</i>			
24	<i>involved in this work. Administrative processing of about 50</i>			
25	<i>claims originating from local agencies in Southern California</i>			
26	<i>will also be necessary during this period.</i>			
27	Watershed Protection Projects			
28				
29	This group of projects represents those which are adminis-			
30	tered at the federal level by the Department of Agriculture.			
31	One project at Walnut Creek is based on the Public Law 46

GENERAL ANALYSIS

FLOOD RELIEF LAW OF 1956: Chapter 9, Statutes of 1956 First Extraordinary Session), appropriated \$24,900,000, of which \$14,500,000 is payable from the General Fund and \$10,400,000 was made available for loans from the State Lands Act Fund. The amount appropriated from the General Fund is subject to allocation by the State Public Works Board to provide assistance to local agencies; including any city, city and county, county, or public district, for repair and restoration of public property damaged or destroyed by storm and flood during the months of December, 1955, and January and February, 1956. The amount appropriated from the State Lands Act Fund is for loan to local agencies for the completion of any project or projects wherein the local agencies are unable to meet their share of the cost. The 1957 Legislature appropriated an additional \$1,200,000 to complete the financing of the program of which \$500,000 is estimated as savings. Action by the 1959 Legislature will be necessary to extend the existing law into 1959-60 so as to extend the appropriation to those applicants that have not completed their projects.

FLOOD RELIEF REDEVELOPMENT LAW: Chapter 58, Statutes of 1956 (First Extraordinary Session), appropriated \$3,500,000 from the General Fund to provide a loan fund to permit local redevelopment agencies to acquire real property in

flood damaged areas where the agencies are planning redevelopment projects and prior to the availability of federal funds to carry them out, and to assist such agencies in financing the local share of such projects.

To date only 1 loan in the amount of \$106,163 is outstanding against the appropriation. Repayment of the loan is over a 10-year period at the rate of 4 percent interest on the unpaid balance. This appropriation expired on June 30, 1958, and has an estimated \$3,393,837 in savings as of that date.

FLOOD RELIEF FOR 1958: Item 446.7, Budget Act of 1958, appropriated \$15,000,000 from the Investment Fund to provide financial assistance to local agencies for the repair and restoration of public real property damaged by storm or flood during the period between January 1, 1958, and July 1, 1958. As of December 31, 1958, the cut-off date for filing for assistance under this act, 162 applications have been received. It is estimated that state assistance for those approved applications will be nearly \$10,000,000. In addition to the general flood relief program reviewed above the Budget Act of 1958 provided \$780,000 from the Investment Fund (Item 446.2) for damage on the Sacramento River Flood Control Project. An additional \$1,000,000 was provided from the Investment Fund (Item 446.8) as a continuing program of emergency flood relief.

PROJECT DETAIL

Allotments to Provide for Assistance to Local Agencies for Repair, Restoration and Aquisition of Public Property Damaged or Destroyed by Storm and Flood During 1955-56:

39	GENERAL ANALYSIS			
40	The Division of Small Craft Harbors and the Small Craft			
41	Harbors Commission were created by Division 5.7 of Part I,			
42	Public Resources Code. The powers of the division are executed			
43	by the chief of the division acting under the supervision and			
44	direction of the Director of Natural Resources. The commission			
45	establishes the general policies. The division is to concern itself			
46	with the program of developing small craft harbors and main-			
47	taining or improving the waterways of the State. At the present			
48	time the agency is functioning in the area of assistance to			
49	cities, counties, or harbor districts in the planning of small			
50	craft harbors and waterways development. The assistance may			
51	be in the form of engineering advice, surveys, and site inspec-			
52	tion. During the final planning stages in which preliminary			
53	plans are developed into contract plans and specifications this			
54	assistance would take the form of planning loans and engineer-			
55	ing consultation. The agency may also provide construction			
56	loans to those local jurisdictions that can properly qualify. All			
57	financial assistance to local jurisdictions whether for planning			
58	or construction will be on a loan basis.			
59	As a part of the long-range program it is contemplated that			
60	the division will also construct harbor facilities as a state			
61	development in areas where the need is great and where com-			
62	plete development of the project is beyond the financial capabil-			
63	ity of a local agency. Because of the lack of funds the 1959-60			
64	Fiscal Year Budget does not provide for agency construction;			
65	however, the Small Craft Harbors Commission has suggested			
66	that the first phase of an estimated \$4,000,000 harbor project			
67	at Shelter Cove in Humboldt County be undertaken when			
68	adequate funds are available. Although other harbors of refuge			
69				
70				
71	FEASIBILITY AND PLANNING STUDY LOANS			
72				
73	PROJECT DETAIL			
74	Section 5827 of the Public Resources Code authorizes the			
75	Division of Small Craft Harbors to make planning loans to			
76	cities, counties, or districts having power to acquire, construct,			
77	and operate small craft harbors. Such loans as are made must			
78	be repaid within 10 years and repayment must include a charge			
79	estimated to equal the revenue which the State would have			
80	derived by investing the total deferred payment at the interest			
81	rate prevailing for legal state investments.			
82	Berkeley, Alameda County -----		\$10,000	—
83	Expansion of existing harbor and development of additional facili-			
84	ties. Loan to City of Berkeley.			
85				
86				

have been proposed, the commission considers that Shelter Cove should be developed first because of its location. Humboldt County has already provided for access road construction by obtaining options on the land required, and by master planning an airport development at the site as initial development. The commission has suggested that construction funds for this project be made available in the amount of \$460,000 contingent upon the execution of an agreement that the County of Humboldt will take over the Shelter Cove project within a 3-year period. The commission has also indicated that their approval of the project is contingent upon the Legislature providing a continuing source of funds for the support of the division and for planning loans.

In addition to the program proposed for the 1959-60 Fiscal Year the Small Craft Harbors Commission has been authorized to make expenditures from any funds available from the sale of bonds authorized by the Harbor Development Bond Law of 1958. It is provided in this law that loans might be made to cities, cities and counties, counties, and districts having power to acquire, construct, and operate small craft harbors. While the bonds which are authorized by this law are general obligation bonds it was contemplated that the bonds would be self-liquidating. At the present time there is no provision in the enabling law for the initial bond service charges to be met from any source other than the General Fund. Principal repayments and interest income from loans would initially be inadequate to cover the bond service charge; therefore, the repayments would be General Fund obligations.

The 1959-60 Fiscal Year program proposes continuation of the planning loans which have been the major activity of the commission since its organization. It is estimated that \$125,000 in loan requests will be received by the commission during 1959-60.

Loans to Local Agencies for Small Craft Harbors—Continued

ACQUISITION OF SITE AND CONSTRUCTION LOANS

PROJECT DETAIL

Chapter 2304, Statutes of 1957, made funds available by direct appropriation to the County of Los Angeles for the purpose of matching federal funds for the acquisition of site and the development of a small craft harbor and recreation area

at Playa del Rey. Repayment of the loan is scheduled to start July 1, 1961, and terminate 35 years from the date of first payment.

Playa del Rey, Los Angeles County

(State Lands Act Fund)

\$2,000,000

CONSTRUCTION LOANS

PROJECT DETAIL

Section 5827 of the Public Resources Code authorizes the Division of Small Craft Harbors to make construction loans to cities, counties, or districts having power to acquire, construct, and operate small craft harbors. The division may loan money for acquisition, construction, improvement, maintenance, or operation of small craft harbors and related facilities. In addition the division may concern itself with connecting waterways. The division is charged with the responsibility of determining that a project is feasible. The commission functions as the policy body in establishing the policies and standards to be used in making loans.

A brief statement of the present policies and standards follows:

1. All planning shall have been completed and copies of such plans and reports submitted to the division for approval.
2. The feasibility study shall indicate a favorable benefit-cost ratio.
3. All property to be used in connection with the project shall be owned or fully controlled by the requesting public agency; or, an agreement-to-sell by the owner at a stated reasonable price shall be obtained prior to final approval of the loan.
4. A repayment agreement approved by the governing body of the requesting public agency shall be submitted with the application indicating the proposed method of loan repayment.
5. If the loan does not cover the entire cost of the project, a financing plan shall be submitted indicating sources of construction funds other than the loan being applied for, and the proposed method of retiring the loan and meeting other financial obligations of the project.

6. An operating plan shall be submitted indicating how the harbor will be operated and maintained on completion of construction.

7. Personnel of the division will inspect periodically the construction area to check on progress and to discuss the work with the local agency's inspection staff.

The 1958-59 Fiscal Year budget and the 1959-60 Fiscal Year budget reported here represents the initial construction loan proposal of the division. Section 5882 of the Public Resources Code provides that the Legislature shall make a specific appropriation of funds allocated from the Small Craft Harbors Revolving Fund for any authorized purpose with the exception of planning loans. The program reported herein does not require specific appropriation as it is furnished from a \$5,000,000 appropriation from the Investment Fund made by Item 421.5, Budget Act of 1958. In addition to the state funds, federal and local funds will be used to meet the total estimated costs.

In addition to the construction loan program presented below the Small Craft Harbors Commission has given preliminary review to the following projects:

Blythe, San Bernardino County
Dana Point, Orange County
Imperial Beach, San Diego County
Martinez, Contra Costa County
Moss Landing, Monterey County
Oceanside, San Diego County
San Francisco City and County
Santa Cruz, Santa Cruz County

13	GENERAL ANALYSIS			
14	This is a public assistance program financed by county,	resulting in an increase in the maximum monthly grant to \$90 on October 1, 1958. Amendments enacted by the 1957 Legislature increased the maximum monthly grant by \$16 to cover special needs and provided for medical vendor payments on behalf of recipients effective October 1, 1957.		
15	state and federal governments for needy persons 65 years and			
16	over who meet certain other requirements such as residence,			
17	property, etc. The Social Security Act amendments of 1958			
18	increased the federal participation in categorical aid payments

Aid to the Needy Blind (Assistance)

TOTAL EXPENDITURES

General Fund -----	\$7,468,324	\$7,960,500	\$8,200,900
Federal funds ^a -----	6,399,751	6,817,100	7,096,600
Totals -----	\$13,868,075	\$14,777,600	\$15,297,500

GENERAL ANALYSIS

This is a public assistance program financed by county, State, and Federal Governments to assist persons who, because of loss or impairment of sight, are unable to provide themselves with the necessities of life, and who meet certain additional eligibility requirements. The Social Security Act amendments of 1956 increased the federal participation in categorical

aid payments resulting in an increase in the maximum monthly grant to \$99 effective October 1, 1956. Amendments enacted by the 1957 Legislature increased the maximum monthly grant by \$11 to cover special needs and provided for medical vendor payments on behalf of recipients.

Number of Cases:

Assistance:

67	GENERAL ANALYSIS			
68	This is a public assistance program financed by county, state,	children's institution. The program is administered by county welfare departments and supervised by the State Department of Social Welfare. On October 1, 1956, <i>grants were increased</i> an average of \$2 per individual as a result of 1956 amendments to the Social Security Act. <i>Amendments enacted by the 1957 Legislature</i> increased the maximum monthly payments to 1-child families, and provided for medical vendor payments on behalf of recipients.		
69	and federal governments. The primary purpose of the program			
70	is to provide family security and financial assistance for needy			
71	children who are deprived of parental support or care. The pro-			
72	gram is designed to keep children in a setting of their own			
73	family and to enable parents to continue responsibility for the			
74	family living plan. If it is not possible for a child to live with			
75	his own family, the program aims to provide the best substitute			
76	care in the home of a relative, in a foster home, or in a

12	GENERAL ANALYSIS			
13				
14	This is a public assistance program financed by county, state and federal governments for needy permanently and totally disabled persons who meet certain requirements such as degree of disability, residence, and property. The program was established by the 1957 Legislature effective October 1, 1957. The Social Security Act amendments of 1958 increased the federal participation in categorical aid payments resulting in an increase in the maximum monthly grant to \$106 less income on October 1, 1958.			
15	The recipients in this category are not presently included in the medical care program. The needs of these people for medical care are as great, if not greater, than any other aid category. Legislation is proposed by the Governor which would extend medical care to the Needy Disabled at a cost of \$514,620 for the 1959-60 Fiscal Year.

GENERAL ANALYSIS

The cost of local administration of the aged, blind, children, and disabled programs is borne by the county and the Federal Government. Federal funds for county administration are received by the State and forwarded to the counties on the basis

of estimates prepared by the State Department of Social Welfare subject to adjustment upon receipt and audit of the counties' statements of expenditures.

Old Age Security:			
Total expenditures	\$17,057,687	\$18,777,900	\$19,716,800
Less: County share—paid by counties	—8,600,506	—9,461,200	—9,934,300
Net Expenditures—Federal Funds	\$8,457,181	\$9,316,700	\$9,782,500

^a Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

^c Payments from October 1, 1957, to June 30, 1958.

^a Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

1957 Legislature changed the basis for reimbursement for a maximum of \$5 per month per licensed home to a maximum of \$65 per year for each new or renewal license issued. Legislation will be submitted by the Department of Finance for a legislative deficiency of \$21,924 in the 1958-59 Fiscal Year as a result of an underestimation of caseload trends.

Salaries of Superior Court Judges

45 **TOTAL EXPENDITURES (General Fund)**----- \$2,279,799 \$2,355,000 \$2,355,500

46 Under the provisions of Section 68206 of the Government Code, the State contributes toward the salary of each judge of the superior courts in accordance with the population of the county as determined by Section 68207 of the Government Code.

47 The amount budgeted is to provide the State's share of salaries of the 271 judges authorized by existing law. Included in the authorized number is 1 position not yet established in San Joaquin County which is contingent upon action of the board of supervisors as provided by Chapter 2038, Statutes of 1957.

The following statement shows the contribution by the State and by the county toward the salary of each judge:

Population of County	State's share	County's share	Total salary
250,000 or more-----	\$8,500	\$9,500	\$18,000
More than 40,000 but less than 250,000-----	9,000	7,500	16,500

10	Average number of wards-----	1,341	1,662	2,213	

GENERAL ANALYSIS

Under the provisions of Sections 950 through 960 of the Welfare and Institutions Code, the board of supervisors of any county may establish juvenile homes, ranches, or camps. Wards are committed by the juvenile courts to these facilities in lieu of commitment to the Youth Authority.

Certain standards prescribed by the Youth Authority must be met by the counties before they are entitled to receive any state funds. Under Section 957 reimbursements to counties may be

made for one-half of operating costs, but not in excess of \$95 per month per child. There is no limit as to the number of camps for which any one county may be reimbursed.

It is estimated that counties will be reimbursed for an average population of 2,213 boys and girls during the 1959-60 Fiscal Year with a total of 42 camps in operation at the end of the year.

Maintenance of homes and camps -----	\$3,683,975	\$4,648,250	\$6,426,760

Assistance to Counties for Construction of Juvenile Homes and Camps

TOTAL EXPENDITURES (<i>General Fund</i>)-----	—	\$1,197,670	\$2,042,000
---	---	-------------	-------------

GENERAL ANALYSIS

Pursuant to Section 962 of the Welfare and Institutions Code, the State may reimburse counties for one-half the cost of construction of juvenile homes, ranch camps or forestry camps not to exceed \$3,000 per bed unit. Construction includes only construction of new buildings (including related site development and utilities) and initial equipment of such buildings. This program is administered by the Department of the Youth Authority.

This expenditure program will provide the State's share of construction of 1,330 beds in county facilities. The original ap-

propriation for this program was available for 3 years and the Budget Act of 1958 appropriation for 2 years. The budget appropriation of \$812,170 is also for a 2-year period of availability with the amount to be expended in the first year limited to \$732,670. The amount available for expenditure in the succeeding fiscal year will be \$79,500 plus \$148,000 from Chapter 2403, Statutes of 1957. This permits the State to make commitments for more than 1 fiscal year to counties that are constructing these facilities in phases.

Part IV. Appendix

Treasury Funds Not Included in Budget Totals

1. WORKING CAPITAL AND REVOLVING FUNDS

CORRECTIONS:

- Correctional Industries Revolving Fund
- Inmate Welfare Fund

EDUCATION:

- California Industries for the Blind Manufacturing Fund
- Surplus Educational Property Revolving Fund

FISCAL AFFAIRS:

- Printing Fund
- Purchasing Revolving Fund

NATURAL RESOURCES:

- Soil Conservation Development Fund

PUBLIC WORKS:

- Division of Architecture Revolving Fund

WATER RESOURCES:

- State Water Pollution Control Fund

STATE BUILDINGS FINANCED BY LOANS FROM TREASURY FUNDS

2. PUBLIC SERVICE ENTERPRISE FUNDS

SAN FRANCISCO PORT AUTHORITY:

- San Francisco Harbor Improvement Fund

SAN FRANCISCO WORLD TRADE CENTER AUTHORITY

TOLL BRIDGE AUTHORITY:

- San Francisco-Oakland Bay Bridge Construction Fund
- San Francisco-Oakland Bay Bridge Toll Revenue Fund
- Southern Crossing Engineering Fund
- Richmond-San Rafael Bridge Construction Fund
- Carquinez Strait Bridges Construction Fund

EDUCATION:

- College Auxiliary Enterprise Fund

INDUSTRIAL RELATIONS:

- Compensation Insurance Fund

VETERANS AFFAIRS:

- Veterans Farm and Home Building Fund of 1943

3. RETIREMENT FUNDS:

- Judges' Retirement Fund
- Legislators' Retirement Fund
- State Employees' Retirement Fund
- Teachers' Retirement Funds

4. FEDERAL, TRUST, AND AGENCY FUNDS:

- Department of Employment

5. DISTRICT, COUNTY, AND CITRUS FRUIT FAIRS

CLASSIFICATION OF FUNDS IN THE STATE TREASURY

I The budget totals of revenues and expenditures reflect the activities of 78 separate funds. See Schedule 5 for complete list of these funds. They are segregated into the following classifications:

GENERAL FUND—Consists of money received into the State Treasury not required by law to be credited to any other fund, to be used for general purposes of State Government.

RESERVE FUNDS—Funds created for administrative purposes, from general purpose moneys, which have been set aside for a current or future use.

SPECIAL FUNDS—Funds created to receive certain revenues or to finance particular activities which are for general purposes of State Government or for activities subject to the regulatory or police powers of the State.

II The transactions of the other funds are not included in the budget totals. See Schedule 6 for list of funds which are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues, receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. Funds not included in the budget totals are segregated into the following classifications:

WORKING CAPITAL AND REVOLVING FUNDS—Funds created to finance services for governmental agencies for which charges are made at cost to maintain a fixed accountability. The charges are reflected as expenditures in the budget of the agency receiving the commodity or service.

PUBLIC SERVICE AND ENTERPRISE FUNDS—Activities operated under state control for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues. These functions are not subject to the regulatory or police powers of the State.

BOND FUNDS—To hold proceeds from sale of bonds and to finance projects for which the bonds were authorized. The cost to the State is charged at the time interest payments are made and when the bonds are redeemed.

RETIREMENT FUNDS—Moneys held in trust by the State for retirement benefit payments.

DEBT SERVICE FUNDS—Moneys held by the State to be used for payment of interest or for redemption of bonds.

TRUST AND AGENCY FUNDS—Funds holding moneys in trust pending disbursement to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their resources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

**TREASURY FUNDS FOR WHICH NO DETAILED TRANSACTIONS
ARE REPORTED IN THE BUDGET**

BALLOT PAPER REVOLVING FUND: The fund is used by the Secretary of State to purchase paper for sale to counties and municipalities for their use for election ballots.

OLD AGE AND SURVIVORS INSURANCE REVOLVING FUND: The fund is used by the State Employees' Retirement System to clear employer and employee contributions under the Federal Old Age and Survivors Insurance Program from public agencies included in the agreement between the State and the Federal Government.

STATE PAYROLL REVOLVING FUND: The fund is used by the State Controller for payment of salaries through the Central Payroll System.

INDIA BASIN SINKING FUND: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SAN FRANCISCO SEAWALL SINKING FUND NO. 2: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SAN FRANCISCO SEAWALL SINKING FUND NO. 3: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SAN FRANCISCO SEAWALL SINKING FUND NO. 4: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SCHOOL LAND FUND: A nonexpendable endowment fund for public school purposes. Revenues consist of payment of principal and purchase price on sale of school lands. The interest received on the investment of this fund is deposited in the School Fund.

SPECIAL DEPOSIT FUND: Accumulation of numerous trust funds deposited by state and private agencies for a specific purpose. This fund also contains unclaimed checks and deposits pending either payment to the proper persons or transfer to the General Fund. The transactions of this fund are so numerous and so indefinite that no attempt is made to estimate the volume that will flow through the fund.

STATE PARK CONTINGENT FUND: Receives moneys from gifts, bequests, from municipal or county appropriations, or donations, for improvements, additions, or administration of the State Park System. The amounts received are disbursed in accordance with the provisions of the donations.

SURPLUS MONEY INVESTMENT FUND: Excess money in those funds which do not have other provision for investment may be transferred to this fund, the pooled resources are invested and the interest earned is prorated to the contributing funds.

TAX-DEEDED LAND RENTAL TRUST FUND: Receipts are derived from leases made by the State Controller covering property deeded to the State for taxes. The rentals are paid semiannually to the county in which the property is located for distribution to the taxing agencies.

TORRENS TITLE ASSURANCE FUND: Fund contains unexpended balance of fees and investment income of one-tenth of 1 percent of assessed value of land and improvements insured under the Torrens Title Assurance Act. An outstanding judgment against the fund exceeds the assets of the fund. There is no current activity in the fund.

TREASURY TRUST DEPOSITS: Provides for the State Treasurer's Central Banking System.

UNCLAIMED PROPERTY FUND: This fund accounts for all unclaimed moneys held by the State.

CONDEMNATION DEPOSITS FUND: Contains deposits held in trust pending settlement of court cases in condemnation proceedings.

MEDICAL CARE PREMIUM DEPOSIT FUND: Contains money received from state and federal sources pending disbursement for medical care for public assistance recipients.

GENERAL ANALYSIS

Objectives

The Correctional Industries program of the Department of Corrections was established to provide a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment in order that they might be returned to society as useful citizens. This program plays a significant role in the elimination of inmate idleness which would otherwise contribute to the causes of both mental and physical degeneration.

Another objective of the Correctional Industries program is to develop work programs which will contribute to the rehabilitation of prisoners with minimum competition with private industry and free labor.

Program and Performance

The Correctional Industries Commission, representing organized labor, industry, agriculture, and the general public, is the policymaking body for this activity. It is empowered to recommend productive industrial and agricultural enterprises for the prisons. This includes determining the advisability and suitability of establishing, expanding, diminishing, or discontinuing any industrial or agricultural enterprise involving a gross annual production of not more than the maximum determined by the formula established by the Legislature.

The Correctional Industries program includes 24 industrial and 16 agricultural enterprises which have been established in

all the correctional institutions of the department except the Medical Facility. About 2,900 men or 16 percent of the total prison population will be employed during the 1959-60 Fiscal Year. Activities include industrial operations such as the license plate factory at Folsom and the cotton textile mill at San Quentin.

A detergent blending enterprise was activated and is in operation at San Quentin. Dairy production at Chino has been increased to furnish fresh milk to other nearby state institutions. The tobacco enterprise was transferred from San Quentin to the Men's Colony during the month of May, 1958. This industry is operating in redesigned buildings thus permitting more uniform production of improved tobacco products. Improved cannery facilities were placed in operation for the 1958 canning season at Folsom.

Numerous new items have been added or are under consideration for production in existing approved enterprises. Design work is under way on new lines of office and other furniture used by tax-supported agencies.

Sales of products resulting from the employment of men in this program totaled \$4,964,334 during the 1957-58 Fiscal Year. Estimated sales for the 1959-60 Fiscal Year are \$6,639,800 including progress payments for the next full issue of license plates. Products are sold only to the tax-supported agencies of the State and its political subdivisions.

GENERAL ANALYSIS

Objectives

The Inmate Welfare Fund is a trust fund held in the State Treasury and administered by the Director of Corrections for the benefit, education, and welfare of inmates in institutions under the jurisdiction of the Department of Corrections. The fund was established by Section 5006 of the Penal Code in 1945. The primary source of revenue for the fund is profits from the sale of items to inmates at canteens maintained in each institution under the Department of Corrections. Other revenue is derived from sale of handicraft items, donations, and other miscellaneous sources. Funds so received are deposited in the State Treasury and allotted to the various institutions through departmental budgetary procedures. These allotments provide funds for the operation of the canteens and hobby shops and for recreational equipment and supplies such as fiction books, television sets, rental of motion picture films, small games, and athletic and recreational programs.

Program and Performance

Since the 1954-55 Fiscal Year the gross fund revenues have been in excess of \$1,000,000 annually. Of this revenue, 92 percent is used in operating the canteen, the handicraft shops and

meeting administrative expenses, while approximately 8 percent is available for the recreation and welfare of the inmates. Until the 1956-57 Fiscal Year these funds were used primarily for athletic supplies, film rentals, games, and fiction books. During the 1957-58 Fiscal Year a revised policy of allocations of expenditures between the Inmate Welfare Fund and the General Fund was established due to inconsistencies in the original policy. Under the revised policy the Inmate Welfare Fund assumed the cost of original complements of television sets for the institutions; the replacement and upkeep of such equipment; film rentals; fiction books for the libraries; and all athletic and recreational supplies not a part of the organized athletic program. The General Fund assumed the cost of the organized athletic, educational, and religious programs, part of which had been previously financed from the Inmate Welfare Fund. The installation of original complements of television sets for all institutions was completed during the 1957-58 Fiscal Year. The current major program of the Inmate Welfare Fund is the build-up of the institution libraries fiction book inventory to the standards recommended by the American Correctional Association. This program is being studied by the department during the current year to determine the most feasible method of financing.

Department of Education

CALIFORNIA INDUSTRIES FOR THE BLIND MANUFACTURING FUND PROGRAM

The California Industries for the Blind operates 3 subsidized production centers located at Oakland, Los Angeles, and San Diego. These centers supply sheltered factory employment to blind and partially sighted persons, and manufacture such items as brooms, mattresses, mops, pillowcases, surgical drapes and wrappers, rugs, brushes, plastic articles, and rubber mats, in addition to fabrication and assembly of many products on a subcontract basis. The administrative and other overhead expenses are a direct charge against the General Fund and manufacturing activities are financed from working capital supplied by California Industries for the Blind Manufacturing Fund into which the proceeds from the sale of the products are deposited. For many years, these centers were considered as separate entities with little direct central administration. The goal is now toward development of a strong

central administration with adequate administrative control over the program. The program is administered by a general manager in the Division of Special Schools and Services of the Department of Education in Sacramento.

During the 1957-58 Fiscal Year, 242 full-time equivalent blind or otherwise physically handicapped workers were employed in the 3 centers, and the payroll was \$540,177. Sales for the 3 centers amounted to \$2,549,908 and the cost of goods sold, including salaries and wages, amounted to \$2,345,760, producing a profit in the amount of \$68,289.

The programs for 1958-59 and 1959-60 are based on the employment of 310 full-time equivalent workers compared to 242 in 1957-58. In other respects the program is estimated to continue at the same level of operation.

CALIFORNIA INDUSTRIES FOR THE BLIND MANUFACTURING FUND

TOTAL EXPENDITURES

Support (*Surplus Property Revolving Fund*)----- \$2,057,301 \$2,192,331 \$2,386,259 \$193,928

Personnel man-years ----- 193.2 210.5 210.5 -

GENERAL ANALYSIS

Objectives

The State Educational Agency for Surplus Property is authorized to co-operate with the Federal Government and its agencies in securing the expeditious and equitable distribution of federal surplus property to eligible institutions in California and to assist all such eligible institutions in securing surplus property.

Program and Performance

Surplus property of all federal agencies, as well as surplus foods, is made available to schools and other eligible institutions through this agency. All expenses of procuring, handling and distributing such property are paid by the agency and recovered by nominal service charges. Any excess service charges are refunded to the participating agencies after the close of each fiscal year. Reserves are maintained sufficient to meet any unliquidated obligations.

Availability of hardware and surplus food and requests from interested agencies, determine the level of expenditures budgeted for the agency. The increasing importance of this agency's operations may be seen by the following tabulation:

Year	Fair value of property distributed
1952-53	\$8,062,400
1953-54	12,590,000
1954-55	13,983,511

Year	Fair value of property distributed
1955-56	\$17,083,736
1956-57	20,216,696
1957-58	21,656,349
1958-59 est.	23,000,000

In general terms, the work program includes the screening of available property, warehousing that which is received, processing and repairing where required, and distributing of material. The work force required has increased in proportion to the workload as measured in terms of service and handling charges made. This is shown in the following table. The number of positions given are equivalent full-time positions including temporary help and overtime.

Year	Service and handling charges	Work force
1952-53	\$842,066	108.8
1953-54	1,331,252	113.2
1954-55	1,424,399	124.6
1955-56	1,749,657	149.4
1956-57	2,010,665	178.5
1957-58	2,478,397	193.2
1958-59 est.	2,700,000	210.5
1959-60 est.	2,700,000	210.5

Due to an increase in workload in 1958-59, 3 new positions were authorized on a temporary basis. These positions are shown as proposed new positions in the 1959-60 Fiscal Year.

GENERAL ANALYSIS

ing for the Legislature and the state departments. In 1884 a constitutional amendment was provided whereby the State could print textbooks. Since that time the work of the Printing Division has grown along with the State and there are now approximately 734 people employed by this division. The financing of this division is on a revolving fund basis and there is an annual appropriation for support.

GENERAL ANALYSIS

Objectives

To provide centralized services for state agencies in the operation of an automotive pool, centralized purchase and distribution of office supplies, and maintenance and repair of communication equipment and office machines.

Program and Performance

In order to better provide for some of the needs of state agencies the 4 divisions of this fund were established; Central Stores, State Garages, Radio Maintenance, and Office Equipment Repair.

The use of a centralized store for the purchase of office supplies provides a cheaper and more economical service for state agencies than which they could provide for themselves.

The centralized automotive pool makes better utilization of automobiles and at the same time provides good service and lower cost of automobile operation for state agencies.

It is anticipated that there will be 1,759 vehicles in the pool by June 30, 1960, and they are expected to be driven 29,500,000 miles in the 1959-60 year. This is an increase of 100 vehicles

over the June 30, 1959, estimate and an increase of 2,600,000 miles over the 26,900,000 miles estimated for 1958-59. The Department of Corrections transferred 107 cars to the pool on January 1, 1959, which has increased the estimated pool mileage in both the current and the budget year. *Provision is made for opening the Oakland garage on January 1, 1960.*

Communication technicians are distributed in key locations throughout the State to provide installation, modification and maintenance service for state-owned radio communication systems. An additional technician is being proposed based on increased workload.

The office machine repair shop is located in Sacramento to repair state-owned calculators, adding machines and typewriters. An additional typewriter repairman is proposed in the budget year based on an anticipated current year increase of 341 typewriters and an additional 300 in the budget year. There are presently 7 repairmen for 6,015 typewriters in the Sacramento area.

An augmentation of \$410,000 is proposed in the State Operations Section of the Budget.

10					
11	GENERAL ANALYSIS				
12					
13	Objectives				
14	<p>The Soil Conservation Development Fund was created by Chapter 1032, Statutes of 1949, as amended with an appropriation of \$1,000,000, to provide for the acquisition of soil conservation machinery, equipment, and buildings and rental thereof to soil conservation districts. Section 12.2 of the Budget Act of 1958 returned \$400,000 of this amount to the General Fund as the full amount was no longer required for operation of the fund. The fund is administered by the State Soil Conservation Commission.</p>				
15	<p>During recent years, federal surplus equipment has been available to soil conservation districts and the purchase of equipment for districts with state funds has decreased in volume. Loans are now made primarily for reconditioning and modifying the surplus equipment to adapt it for soil conservation use.</p>				
16	<p>The equipment engineer position, responsible for investigation of requests and inspection of equipment, formerly included as a direct charge in the budget of the fund is now included in the budget of the Division of Soil Conservation for administrative purposes. Salary and expenses of the position will continue to be charged to the Conservation Development Fund as a pro rata charge of the division.</p>

Department of Public Works

DIVISION OF ARCHITECTURE REVOLVING FUND

LINE	EXPENDITURES	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
------	--------------	-------------------	----------------------	---------------------

STATEMENT OF OPERATIONS

Authorized by Section 14030 of the Government Code, the Division of Architecture Revolving Fund provides the Division of Architecture with a working revolving fund from which to pay the cost of architectural services and construction for state agencies. The resources consist entirely of transfers, subject to the approval of the Department of Finance, from appropriations

for construction and improvements made to the several agencies. Expenditures are reported in the budgets of the agencies to which the appropriations were made. Any unexpended balance remaining after completion of a project is returned to the appropriation and fund of origin.

LEGAL CITATIONS

The functions of the Division of Architecture are defined by Part 5, Division 3 of the Government Code and the following are the more significant provisions:

Section 14100. "The State Architect has general charge, under the department, of the erection of all state buildings * * *"

Section 14255. "Whenever provision is made by law for any project which is not under the jurisdiction of the Department of Water Resources, the project shall be under the sole charge and direct control of the Department of Public Works." A project is defined by Section 14254 as any construction or improvement of any state structure or improvement which will exceed \$5,000 in cost.

Section 14256. "If the total cost of the project will not exceed \$50,000 the State Architect may, with the approval of the Director of Finance, authorize the agency concerned to carry out the project directly."

Sections 14270 to 14275 require full and complete plans and estimates prior to entering into any contract for a project; require work on all projects be done under contract awarded to the lowest responsible bidder except in the event it is found that such procedure is not in the best interest of the State; and prohibit awarding a contract in excess of the estimate.

Sections 14290 to 14402 prescribe in detail the contract procedure to be followed, including advertising for bids, qualification of bidders, award of contracts, and payment.

SCHEDULE OF ESTABLISHED POSITIONS

To accomplish this program the Division of Architecture employs personnel in the technical and craftsman classes as needed.

The salaries of the employees are paid from project funds and such expenditures are reported as a portion of the project cost.

8	OFFICE BUILDINGS, VARIOUS CITIES				
9	(Loans From State Trust Funds)				
10	<p>The State Building Construction Act of 1955 provides that the State Public Works Board may issue revenue bonds or certificates to provide funds to acquire or construct state office buildings when authorized by a separate act or appropriation of the Legislature. The buildings so acquired or constructed are to be leased by state agencies at a rental rate that will retire the bonds or certificates and provide for the payment of interest.</p> <p>The State Public Works Board has entered into an agreement with the Board of Administration of the State Employees' Retirement System whereby that agency will purchase certificates to finance the construction of the 6 office buildings authorized by Chapter 1687, Statutes of 1955, as amended by Chapter 1647, Statutes of 1957. The Budget Act of 1958 authorized 2 additional office buildings and the Los Angeles garage.</p>				
11	<p>Construction of the San Francisco, Los Angeles, Oakland and Fresno Buildings is underway. Construction of the San Diego Building should get under way by June 30, 1959. Location of the site of the San Jose Building has not yet been determined, but it is probable that it will be within the new civic center area. Anticipated completion dates are as follows:</p>				
12	<p>San Francisco ----- August 1, 1959</p> <p>Los Angeles ----- October 1, 1960</p> <p>Oakland ----- January 1, 1960</p> <p>Fresno ----- July 1, 1960</p> <p>San Diego ----- April 1, 1961</p> <p>San Jose ----- January 1, 1962</p> <p>San Bernardino ----- January 1, 1962</p> <p>Sacramento ----- September 1, 1962</p>

HIGHWAY PATROL OFFICE BUILDING, SACRAMENTO

(School Land Fund)

Pursuant to the authority contained in Chapter 11, Statutes of 1951, a loan was made available to the Department of the California Highway Patrol from the School Land Fund for the construction of a new office building in Sacramento.

The loan is being repaid in a series of 240 monthly payments together with interest at the rate of 2½ percent per annum on the unpaid balance. Provision for these payments is made in the support budget of the Department of California Highway Patrol.

^a Financed by loans from trust and other funds and not included in overall budget totals.

10					
11	GENERAL ANALYSIS				
12	The San Francisco World Trade Center Authority was				
13	established by Chapter 1508, Statutes of 1947, to obtain land,				
14	buildings, works, and property and to operate and maintain				
15	them so as to foster and develop domestic and international				
16	trade for the benefit of the entire State.				
17	The San Francisco World Trade Center has been in operation				
18	since March, 1956, under management of the San Francisco Bay				
19	Area Council, Inc., by contract. Through June 30, 1958, ap-				
20	proximately 50 percent of the cost of operation was paid by the				
21	contractor from funds donated by businesses in San Francisco				
22	to assist the center to get started. The other half was paid from				
23	authority funds. <i>Beginning with the 1958-59 Fiscal Year the</i>				
24	<i>World Trade Center Authority must supply the total support.</i>				
25	<i>The funds are obtained from San Francisco Harbor Improve-</i>				
26	<i>ment Fund.</i>

TOLL BRIDGE CONSTRUCTION AND REVENUE FUNDS

LINE	FUND CONDITION	ACTUAL 1957-58	ESTIMATED 1958-59	ESTIMATED 1959-60
1				
2	Toll bridge construction funds consist of proceeds from sale			
3	of revenue bonds, the issuance of which is authorized by the			
4	California Toll Bridge Authority. At the present time all toll			
5	crossings are situated in the San Francisco Bay area.			
6	<i>The San Francisco-Oakland Bay Bridge:</i>			
7	While currently there are no outstanding bonds against the			
8	revenues on this structure, tolls are being continued to pay for			
9	the cost of alterations and improvements authorized by Chapter			
10	2316, Statutes of 1957. In addition to the toll revenues on this			
11	bridge the residue of bond proceeds, in separate funds designated			
12	as the San Francisco-Oakland Bay Bridge Construction Fund			
13	and Southern Crossing Engineering Fund, are being utilized			
14	respectively for improvements to the existing bridge and studies			
15	of future crossings.

^a Maintenance of bridge assumed by State Highway Fund on September 11, 1957, pursuant to Section 188.3 of the Streets and Highways Code.

The Richmond-San Rafael Bridge:

The upper deck of this bridge was completed and opened to traffic September 1, 1956. The lower level was completed in 1957 and, after a period during which either one or the other levels was closed for construction purposes, both levels were fully opened to traffic on August 20, 1957.

The Carquinez Strait Bridge:

The Toll Bridge Authority has authorized the construction of the parallel Carquinez Bridge and the Martinez-Benicia Bridge under a single resolution. Bonds, however, have been sold only for the Carquinez Bridge which is now under construction by the Division of Highways. The new bridge is open for use. However the original bridge is closed for improvements and to allow the reconstruction of the approaches during the 1958-59 Fiscal Year.

4	Personnel man-years-----	31.9	31.3	28.2	—3.1
5					
6	GENERAL ANALYSIS				
7					
8	Objectives				
9	This program provides residential facilities for state college				
10	students, both married and single.				
11					
12	Program and Performance				
13	During the fall of 1946 the Federal Public Housing Admin-				
14	istration provided temporary housing facilities for veteran				
15	students at Chico, Fresno, Humboldt, San Francisco, and San				
16	Jose State Colleges. These facilities were operated by the				
17	various colleges by agreement with the FPHA from 1946 until				
18	October 31, 1948, at which time title to all facilities was				
19	transferred to the State by Public Law 796 of the Eightieth				
20	Congress, and their operations were financed through the General				
21	Fund support appropriation of the individual colleges as an				
22	interim measure.				
23	On August 1, 1949, Chapter 1485, Statutes of 1949, estab-				
24	lished the College Auxiliary Enterprise Fund, to which was				
25	transferred the excess of income over expenditures for prior				
26	operations. All rents, charges and fees are paid into this fund				
27	and are appropriated therefrom to the Department of Education				
28	for maintenance, repairs, and operation of student housing

This budget reflects some changes in existing facilities due to the conversion of dormitory units to family units, the removal of some units due to age and condition, and the rearrangement of trailer spaces.

In 1957 the Legislature approved an additional residence hall program to be partially financed by a loan from the Federal Housing and Home Finance Agency. The program provides 7,600 capacity for single students at the several state college campuses. The operation of the new program and the retirement of revenue bonds is to be funded from revenues received from rentals of the facilities. These new units are under construction and dates of opening are still uncertain. Therefore, the new program is not included in this budget.

GENERAL ANALYSIS

Objectives

The objective of this division is to assist eligible veterans in the acquisition of a farm or a home. This is a self-sustaining activity not supported by funds derived from taxation.

Program and Performance

Within limitations set forth by law, the department may purchase a farm or home and in turn enter into a contract with the veteran for the sale of the property to the veteran. The cost to the department cannot exceed \$15,000 in the case of a home or \$40,000 in the case of a farm. The contract with the veteran provides for monthly payments which include interest currently computed at 3½ percent and is usually written for a term of 20 years, sometimes less. 17 district offices have been established throughout the State to process applications for assistance under this program.

Property purchases by the department for resale to veterans are currently at a rate of approximately 1,300 per month. Past year purchases were at an average rate of 1,192 per month.

From 1922 to June 30, 1957, 111,248 homes and 1,573 farms were acquired for resale to veterans at contract values totaling \$836,424,187. During 1957-58 Fiscal Year 14,654 homes and 254 farms were acquired at contract values totaling \$187,451,306. It is estimated that 15,600 farm and home loans will be made

during 1958-59 with contract values of \$195,000,000 and 14,650 during 1959-60 at contract values of \$183,000,000.

Included in the total to June 30, 1958, are 96,020 properties financed for World War II veterans, and 10,337 for veterans of the Korean emergency. To June 30, 1958, 42,065 contracts have been paid in full.

The Home Protection Plan of life insurance was started on December 1, 1938. Each veteran who is insurable is covered for the exact amount of the unpaid balance of his contract at a cost of 35 cents per month per \$1,000 insurance. The premium was originally set at \$1 per month per \$1,000 but favorable experience permitted a gradual reduction to the present cost. To June 30, 1958, 3,224 insured contract holders have died and \$8,171,237 paid in full settlement of balances due. This insurance provides family protection which generally would not otherwise be carried. In addition to life, insurance against fire and other hazards is required, the coverage being under blanket policies at the low rates of 48 cents (home) and \$1.20 (farms) per \$100 for a term of 5 years.

The 1959-60 budget is based on the \$300,000,000 1958 Veterans Bond Act, approved by the voters in November, 1958.

The current and budget year reduction in number of positions anticipates an increased effectiveness and is the subject of administrative analysis.
